LISTEN TO LUKE

The heavy cloudy weather that has prevailed in this area for the past several days has been a big help in keeping things a little cooler than usual, but there has been no rain locally from the clouds.

We have heard of some of the ranchmen of the county who received up to one inch of rainfall in the past two weeks, but the showers that have fallen have been spotted and sparse.

Three or four times it looked as though it were going to rain in Sanderson and it even sprinkled a few drops, but that was it.

Ranchmen have been busy recently shipping their lambs or hunting buyers for the lambs.

Most reports we have heard are that the lambs weighed up to 85 pounds, which is a good testimony of the ability of this land to produce good and heavy stock.

The ranching industry has a lot to do with the economic picture of the county. It is a steady year-to-year thing. Certainly it fluctuates with the condition of the elements, but the land and the sheep are always going to be there.

And Terrell County is always going to be up among the best in the production of lambs and wool.

The school officials are planning an open house for their re-erected buildings and new facilities for Sunday-week, so be sure to keep the date in mind and go out and see how they have been doing a good-sized chunk of your tax money. If you look real hard you may be able to find the flaws in something or you may be able to see where if it had been up to you you would have done it another way. But it isn't up to you and someone else to make up a set of plans and prove them, and what you will do is the result.

We think the school board has done a good job and we congratulate them on their work and efforts.

Men who serve so untriflingly, in their time and efforts, deserve the backing of the people and we are for them.

Many devices and means and ways are being used in efforts to change votes from one party to the other. We doubt that this is going to be effective. We know of no one who is capable of alteration of his opinion politically. And before we call anyone else hard-headed could you be changed?

When the two parties' candidates were announced there were changes made then, but the party lines are very definitely set, as far as we know.

We are willing to discuss any part of the campaign privately with any one, but any and all efforts to draw us, editorially, into religious debate are in vain.

We think that the use of our names as a sounding board for ill-willed political-religious issues does more than embitter readers with the letter-writer. Christianity has its place in the same as it has its place in all other things, or should have. But Christianity, to have Divine Guidance in all of its parts. We think that when we put Christianity into politics we have out dogmas, resolutions, grievances, spontaneity, selfishness, personal self-aggrandizement, self-bossiness, and many other traits. Those things that are in the name of religion should be done on the basis of love.

District Court Here Monday Hears Four Cases

At the fall term of the district court here Monday, Judge Roger Thurmond heard four cases, two civil and two criminal cases. District Attorney Douglas A. Newton gave state's evidence on two pleas of guilty, Mrs. Belle Sutherland, court reporter, was also here for the court proceedings.

Mrs. Catherine Massie and Mrs. Martha Athas were granted divorces in the two civil cases. Rafael R. Silva's plea of guilty was heard to charges of forging and passing a forged instrument. He waived a trial by jury. After hearing the evidence, Judge Thurmond withheld the sentence pending obtaining of additional information.

It was brought out at the trial that Silva had been in possession of three traveler's checks in the amount of \$60 for about six months prior to his forging and passing one of the checks at the Dryden Mercantile early this year. His story, that he had found the checks in San Antonio, had not been checked and the court wanted to be sure there was no other criminal act involved in Silva's having the traveler's checks.

Mrs. Jerrv Jacob Cadillac of Corpus Christi pleaded guilty to charges of forging and passing a forged instrument, and waived a trial by jury. Mr. Newton presented the state's evidence after which Judge Thurmond passed sentence on the defendant of three years in the penitentiary. Sentence was suspended by the judge. Mrs. Cadillac had passed checks in Alpine, Sanderson and Del Rio, according to the evidence submitted. The violations occurred last year, and restitution was made by the defendant this summer to repay the amount of money taken illegally.

Sheriff Buster Babb stated that he had a warrant to arrest Mrs. Cadillac on similar charges in New Mexico, but when he called the officer who had obtained the warrant Monday, it was learned that the defendant had also made restitution there and they did not desire to have the warrant executed.

Testimony heard at her trial Monday failed to reveal any such action of possible forgery and passing or of restitution having been made for any worthless checks.

Electricity is your better way to cook...because it's FLAMELESS

You'll enjoy cleaner cooking in a cooler kitchen when you cook the flameless electric way. Electric heat is as clean as electric light, so your utensils, kitchen walls and curtains stay new-looking longer. Flameless electric surface units transfer heat by direct contact with utensil bottoms, so little or no heat escapes up the sides to raise kitchen temperatures. And because an electric oven requires no oxygen to operate, there's no need for a draft of air through the hot oven and into your kitchen. See

CARD OF THANKS

We wish to say "thank you" to each of our relatives and friends for their expressions of sympathy in so many ways - flowers, food, calls, and cards, for those who sat at the funeral home and for the many kind words at the time of the death of our loved one, Robert E. Fred. Your kindness and love have been a great comfort to us and will never be forgotten. Mrs. R. E. Fred Mrs. E. H. Jessup and family

SMOKE VS FIRE

Where there is fire there is not necessarily smoke. I'm passing that little gem of knowledge along just to let you know that old adages don't always hold true. If you want proof, here it is: Oil burners for furnaces are commonly thought of as messy, smelly, smoky and sometimes noisy things. But now along comes a new LENNOX oil burner that is the exception. Just in time, too, for the fuel oil people because other fuels have been increasing in popularity. This new burner makes oil competitive on a clean, quiet and economical basis. Maybe you are not the least bit interested in burning oil in your furnace. But whether you are or not, it is an example of how LENNOX has been ADVANCING THE SCIENCE OF HOME HEATING FOR 60 years. And that's a long time to be advancing anything. The LENNOX HI-PERFORMANCE oil burner is just the latest. There will be more in other fuels and in air conditioning, too. What I am trying to say is that whatever fuel you choose... oil, gas, electricity or coal... you can look to LENNOX for the latest and best. That goes for central air conditioning, too. By some strange coincidence, this LENNOX equipment I'm bragging about is sold and installed through our shop. Make us prove what we brag about.

"These trails would shake the cab off an ordinary truck... but not our Chevy"

Few trucks are subjected to the body-wracking beatings that are part of a day's work for this Chevrolet Series 60 pulpwood hauler. It's owned by J. E. Fox, North Carolina logging contractor. As Bobby Fox, a partner in the business says, "Loaded with pulpwood, we drive over stumps and potholes you'd think would tear the truck to pieces. These trails would shake the cab off an ordinary truck, but not our Chevy. We can average an extra load a day... make \$45 to \$50 a day more with this Chevy than we can with the others."

In every weight class these Chevs are doing more work at less expense than trucks have ever done before. Drive one at your Chevrolet dealer's. It's an experience that could pay you big dividends.

"That 6-cylinder engine really performs," says Bobby Fox. "It's got the lugging power we need in the woods and walks right along with a full load on the highway."
