

Ten March of Dimes Medical Advances Are Listed for Year

Ten March of Dimes-financed projects in birth defects and arthritis have been cited by The National Foundation for outstanding progress in 1963.

"In 1963 the arthritis riddle continued to baffle the experts and despite many informative studies by scientists, no significant breakthroughs concerning cause or prevention were reported," according to Dr. Theodore E. Boyd, the organization's director of scientific research.

"In birth defects research, progress was more promising," he stated. "New light was shed on the genetic code of life, on how a baby develops normally and abnormally in the womb and on the causes of some of the hundreds of defects which affect more than a quarter of a million newborns in the U. S. each year."

Dr. Boyd reported that in 1963 The National Foundation-March of Dimes awarded more than \$3,312,000 for research grants. Dr. William S. Clark, medical director, also called attention to the continued rapid growth of the Foundation's treatment and research center program.

There are now 48 March of Dimes centers for birth defects and 29 for arthritis across the country, he said. Approximately 1,000 National Foundation chapters granted more than \$1,500,000 to finance such centers in 1963.

The list of top ten March of Dimes-financed projects and achievements follows:

1. Test for Galactosemia. Development of an accurate blood test to detect both victims and symptom-free carriers of an inherited chemical defect called galactosemia, which causes mental retardation in babies when they drink milk. Test perfected by Dr. Arthur Robinson and associates at the University of Colorado.

2. Test for Maple Syrup Urine Disease. Development of a simple blood test to identify infants with an inherited condition named maple syrup urine disease, because of its telltale odor to the urine of its victims. The condition involves abnormalities in body chemistry and generally results in death by the age of two. Test devised by Dr. Joseph Dancis and colleagues at New York University.

3. Homograft Barrier Cracked?

Apparent cracking of the "homograft barrier," a notable achievement in efforts to make adult animals permanently tolerant to organ transplants and skin grafts, which open the way to solving the problem in man. This potential major breakthrough accomplished by Dr. Robert A. Good and research team at the University of Minnesota.

4. Clues to How Cells Specialize

Evidence found to show the existence of chemical messengers between living cells which instruct cells of one kind to change their specific job. Some birth defects may be caused by errors occurring during pregnancy in this cell specialization messenger system. Research conducted by Dr. John Papacostantinou and others at University of Connecticut.

5. New Kind of Gene Discovered

Studies of inner workings of cells revealed new kind of gene (unit of heredity) which controls the putting together of proteins into proper form. This significant research directed by Dr. Robert S. Edger of the California Institute of Technology.

6. Viruses and Birth Defects

Tentative identification of several viruses as causing miscarriage, stillbirths and birth defects when mothers-to-be are infected during pregnancy. These preliminary findings reported by Drs. Gordon C. Brown and Thomas Francis Jr. of the University of Michigan.

7. Synthesis of Biologically Active DNA

For the first time the master code-of-life chemical DNA (deoxyribonucleic acid) has been synthesized in the laboratory in a form that is biologically active. This is as close as anyone has come to creating life in the test tube. Achievement by Drs. Rose M. Litman of the University of Colorado and Dr. Wacław Szybalski of the University of Wisconsin, and their fellow investigators.

8. New Clue to Birth Defect

Use. New lead to causes of

Dr. Ralph F. Jacox, who is cited in the accompanying article, talks to a young arthritis patient.

certain birth defects produced in studies of fluid imbalance in chick embryos. Several factors, such as too little oxygen, too much salt, foreign substances, resulted in salt imbalance in the blood, followed by excess accumulation of body fluids and the development of major defects and often the death of the chick. Reported by Dr. Casimer T. Grobowski, University of Miami.

9. Outbreaks of Spinal Birth Defects

Three reports made of unusual outbreaks of a serious birth defect involving the spine, two by staffs of March of Dimes birth defects centers. Increased referral centers for birth defects patients and vastly increased concern about the problem considered responsible for spotting these "epidemics" of spina bilda. Reported in Atlanta, Ga., by Birth Defects Center there, Fort Campbell, Ky., by Birth Defects Center in Nashville, Tenn., and in Vermont by Burlington physicians. The outbreaks remain unexplained despite intensive inquiry.

10. Arthritis Clues in Twin Study

Strong evidence that emotional stress triggered onset of rheumatoid arthritis was found in a study of five sets of identical twins in which one of each pair had the disease. Reported by Drs. Ralph Jacox and Sanford Meyerowitz of the March of Dimes Arthritis Center, University of Rochester.

Mrs. Herbert Brown Is Hostess For '51 Bridge Club

Daffodils and camellias decorated the party rooms in the home of Mrs. Herbert Brown when she entertained the '51 Bridge Club last Wednesday afternoon. High score prize went to Mrs. F. M. Wood, second high to Mrs. E. J. Hanson, with both holding slam prizes.

Also present were Mmes. H. E. Fletcher, A. J. Harn, J. A. Gilbreath, Paul Hatem, Robert Hunn, Austin Nance, Vic Littleton, O. T. Sudduth, J. T. Williams, and H. L. Richardson.

Merritt - Little Troth Announced

Miss Darlene Merritt

Announcement has been made of the engagement of Miss Darlene Rae Merritt of Brawley Calif., and Robert Gene (Bob) Little, son of Mr. and Mrs. J. O. Little Jr. of Sanderson. The bride-elect's parents are Mrs. Muriel Merritt and Leland R. Merritt of Brawley.

Miss Merritt is a 1962 graduate of Brawley Union High School where she served as honored queen of Bethel 117, International Order of Job's Daughters. She is now a sophomore at San Diego State College, San Diego, Calif. where she is a member of Sigma Kappa sorority.

Mr. Little, a graduate of the Sanderson high school, is now a sophomore at Texas A&M University where he is majoring in aero space engineering.

The wedding date has not been chosen.

Mrs. Underwood Is Bridge Hostess

Mrs. S. H. Underwood entertained the Duplicate Bridge Club in the dining room at the Oasis Restaurant last Thursday afternoon. Chocolate cream pie, tea and coffee were served for refreshments.

In the card games, Mrs. Roger Rose had high score, ten and one-half points, and Mrs. H. E. Ezelle had seven and one-half points.

Also present were Mmes. H. L.

Richardson, James Caroline, M. W. Duncan, A. C. Garner, and Jack Crossman.

Jacuzzi
"AUTOMATIC WATER"

As you may already know, Jacuzzi is the originator and nation's largest producer of jet-type water systems — now accounting for more than two out of every three water systems sold in the United States.

You can therefore understand our pride in being appointed your local representative for this outstanding line of pumping equipment.

So, if you have a farm, home or business beyond city water service, won't you let us give you the facts on the unequalled convenience and economy of Jacuzzi "automatic water."

Ranch Club Hears Talk on Care of Synthetic Fabrics

Mrs. E. H. Jessup, president, presided at the monthly meeting of the Ranch Home Demonstration Club with prayer when the group met in the Legion Hall Tuesday morning. Members answered roll call with household hints.

Mrs. H. E. Ezelle gave the educational talk on the care of synthetic fabrics.

Mrs. Willene Siler, home demonstration agent of Fort Stockton, gave a demonstration on "salads" and the salads were served at noon with the sandwiches brought by the members. The hostesses added a rice-broccoli casserole dish, relishes, cake, coffee, and tea to the menu for lunch. Hostesses were Mrs. Gene Litton, M. W. Duncan, and O. Little.

Mrs. H. P. Boyd directed a drum-blowing relay for recreation and the members also enjoyed a song.

Mrs. B. F. Dawson is a new member of the club and guests were present were Mrs. Clyde Smith, J. D. Nichols, Tol Murrain, C. P. Peavy, J. B. Edmonson, and Bob Moon.

Other members present were Mrs. H. E. Gatlin, Jack Hardgrave, J. W. Carruthers Jr., Ray Caldwell, Eddie McNutt, J. Garner, N. M. Mitchell, F. G. Grigsby, C. F. Cox, E. F. Pierson, K. H. Stutes, A. C. Garner, C. J. Wrinkle, H. C. Goldwire, D. L. Duncan, Woody Richards, and O. J. Cresswell, and Miss Eva Billings.

Lt. Brucks Bader, son of Mr. and Mrs. M. F. Bader, former residents now living in Castroville, has arrived in Bremerhaven, Germany, to begin a tour of foreign service with the Transportation Corps of the U.S. Army. He had been stationed in Fort Eustis, Va.

J. A. Mansfield returned home Friday night from Temple where he had surgery on his ear and he is recuperating satisfactorily.

Seniors Honored At Banquet

The annual banquet honoring the graduating seniors of the Sanderson High School was served in the old band hall Saturday evening by the women of the Baptist Church.

Besides the 22 seniors, other invited guests included Supt. and Mrs. H. L. Richardson, Principal and Mrs. A. J. Riess, T. L. Richardson, class sponsor, and Mr. Richardson, and Rev. and Mrs. J. C. Hancock.

The dinner which was prepared by the members of the W.M.U., was served by Delores Northcut, Barbara Shoemaker, Pixie Mansfield, and Pam Stavley.

Supt. Richardson was master of ceremonies. Rev. Hancock gave the invocation. Bobby Hatchel gave the response to the welcome address by Mrs. Hancock.

For entertainment features Johnny Weyerts played accordion accompaniment to sing several songs. Jack Bogusch and Pixie Mansfield presented a skit. Several songs were sung by a quartet composed of Jodie Tronson, Pam Stavley, Carla Dunn, and Suzanne Downie.

The guest speaker was Rev. Carl Young of Baytown, a worker with the Haggar Youth Revival team. He was accompanied by Rev. Bill Ingram, Baptist Student Youth Director at Sul Ross College.

The band hall presented a beautiful Chinese setting for the dinner. Wall panels with a large dragon, a ricksha, butterflies, Chinese characters and other symbols were used. Against the west wall was a large flowering cherry tree growing from a pot surrounded by simulated rocks with plants and flowers for decorative note. Chinese lantern hanging from the limbs provided decorations. Several colorful arrangements of spring flowers were used.

Rose-twined candles of several shades were in crystal holders and placed the full length of

For Spring: New Ways With Wool

For more centuries than most people realize, wool has been the "warhorse" fiber, sturdy and dependable. Stone Age man may have worn it 12,000 years ago! Wool's durability is astounding: a Danish tomb yielded a wool plaid skirt that had survived the ravages of 1500 years.

Ancient man (and woman) must have marveled at wool's seemingly magical ability to shed wrinkles. Modern scientists know that the secret lies in the unique structure of the wool fiber. Crimped and covered with tiny overlapping scales, it can bounce back like a spring to its original shape even after wrinkling. Sometimes, of course, it bounces back to erase the trouser crease or skirt pleats that the wearer wants to keep. But now science has solved even this problem. New processes give 100% wool fabrics a permanent crease that withstands drycleaning and normal wear, and stays sharp even when exposed to water or steam.

The first method, developed by the Commonwealth Scientific and Industrial Research Organization, Australia, involves spraying the garment with a dilute chemical solution, setting the creases with steam in a press, and then drying the garment. It's most widely used for men's slacks and suit trousers.

A second method, developed by the Wool Bureau, "presensitizes" the fabric; the setting solution is applied at the mill and remains in the fabric till the garment is given its final shaping and pressing. This method is favored for women's slacks and skirts.

These changes give the wool fibers a new "shape memory", but do not change their other properties. The "hand" of the treated fabrics is as luxurious as ever, and their resistance to wear and tear is unimpaired.

the white linen-covered U-shaped table. Place cards were Chinese umbrellas and the nut cups were red poppies. The covers on the menus represented pagoda gates and Chinese characters were on the napkins.

Mrs. Marion Batson Is Hostess For Bonhomie Club

Mrs. Marion Batson entertained the Bonhomie Club in her home last Wednesday afternoon.

Those present were Mrs. H. P. Boyd, O. J. Cresswell, Ray Caldwell, L. R. Hall, F. G. Grigsby, C. I. White, J. Garner, B. F. Dawson, C. F. Cox, and E. F. Pierson; also two guests, Mrs. J. J. Spurlin of Jal, N.M., and Mrs. L. H. Gilbreath.

Orange cake, tea, and coffee were served for refreshments.

Miss Linda Morris, Howard Payne College junior, was one of 57 students on the dean's list for the fall semester. Requirements for the dean's list are a grade point average of at least 2.75 of a possible 3, with no grade less than a B. She is the daughter of Mr. and Mrs. W. J. Morris.

Johnson - Dunagan Wedding Feb. 15 In Las Vegas, Nev.

Mr. and Mrs. V. G. Ross have announced the marriage of their granddaughter, Laura Dunagan, to Patrick H. Johnson on February 15 in Las Vegas, Nev. The couple is residing in Long Beach, California, where he is employed by the General Telephone Co. of California.

The bridegroom is the son of Mr. and Mrs. O. H. Johnson of San Antonio and is a nephew of H. W. L. Johnson of Sanderson. He is a 1960 graduate of the Edison High School in San Antonio and has served two years in the U.S. Navy.

The bride, a 1962 graduate of the Sanderson High School, has been employed in Long Beach, Calif., for the past year and a half.

Miss Winnie Mansfield of Comstock visited here Friday with relatives.

Baptists Observe Week of Prayer For Home Missions

The Week of Prayer for Home Missions is being observed by the members of the Baptist W.M.U. this week. Services are being held in the church each afternoon.

Monday, Mrs. H. G. Cates led the service on "We Proclaim Christ" and Tuesday's program led by Mrs. J. L. Hancock, was on "We Proclaim Life". Mrs. T. O. Moore, H. L. Richardson and O. D. Gray were in charge

of the other three programs. Tuesday, March 10, Mrs. R. L. Witner of Alpine will teach a W.M.U. leadership course. The class will be at the church from 9:00 a.m. to 4:30 p.m. and lunch will be served at noon. A cordial invitation is extended to members and friends of the church to attend the study course.

Mr. and Mrs. Reynaldo Garza and son, Danny, returned home Monday from San Antonio where they visited their daughter, Miss Elodia Garza, while Danny had a medical checkup.

A MODERN AUTOMATIC

electric RANGE

Cooks Rings Around the Rest!

With a 1964 electric range you get modern cooking that's four ways better for you . . . more accurate for favorite recipes, too. Check these wonderful features of every new electric range. Then hurry to your dealer's and choose from his many beautiful modern styles.

- CLEAN**—Since electric cooking is flameless, utensils stay shiny bright—there's less time required for clean-up.
- COOL**—Your kitchen will be degrees cooler in summer. Because there is no combustion with electric cooking, no flow of air through the oven and into the kitchen is needed.
- FAST**—Today's flameless electric range cooks as fast as food will cook. Heat is transferred to utensils by direct contact for maximum efficiency.
- FULLY AUTOMATIC**—Precision electric controls start and stop cooking when you choose, and keep meals warm for you . . . add new accuracy to cooking time and temperature.

Chevelle 300 6-Passenger Station Wagon

Chevelle balanced performance is best!

Passing, cornering, threading through traffic, sudden stops—Chevelle excels all around! Chevrolet's new surprise package has what it takes to meet any driving challenge: Six or V8 engines, hefty brakes, Full Coil suspension—and a trim size that makes the most of them!

Chevelle means performance aplenty—standard 120-hp Six or 195-hp V8—and optional at extra cost, a 155-hp Six, a 220-hp V8, a new 327-cu.-in. V8! But Chevelle's performance means more. Chevelle's a foot shorter than the big cars. And the space Chevelle saves in size comes off the ends, not the middle. So it rides like you want a car to ride.

Chevelle lets you choose Power-glide*, 4-speed manual* or 3-speed manual transmission. Knowing how people like the custom touch, we wrote out a long list of extra-cost options.

Knowing all this, what's keeping you from a test drive? Certainly not your Chevrolet dealer!

vertising, so we won't recall any of those things to you, interesting though they may be.

We did mention several things some time ago about what we did like, and didn't like, and it got some favorable comment.

Here are some more of our likes...

False teeth like we like a cocklebur in our eye.

The thought of growing older much better than the alternative.

To talk and visit with friends.

Being able to stay away from doctors' offices.

The fact that we will never have to have another tooth filled.

Spring weather, if only for a day.

The reality of spring weather when it does arrive.

To be able to pay income taxes.

The thought of being able to spend all the money we make in our own way.

The quietness after about an hour of incessant barking by a dog.

The lack of the fire siren's sound other than at noon time.

The first hint of green grass breaking through on the lawn.

The knowledge that the lawn has just been mowed.

... and many more.

One of our readers handed us this bit of information -

The mint actually loses money on nickels.

The silver in the coin costs seven cents.

There's a slight profit on dimes and quarters.

And a big profit on pennies: some 30 cents worth of copper produces 146 cents at a manufacturing cost of 11 cents.

Net profit is \$1.05.

And speaking of remembering and advertising, we wonder if anyone remembers the words to "The Fate of Floyd Collins".
