LISTEN TO LUKE

By Albert:---

Our interest in the heart machine mentioned last week was shared by others and this is encouraging in itself. We would like to see someone really get after that project and see what can be done. We will be glad to do the letter writing or make the necessary contacts for some of the organizations involved if it is their wish that we do so.

We think that everyone who reads this column or any other column has a set of values of their own, and well they should, for their own endeavors. And we hold no quarrel with those whose values are different from ours. There will be some who will work their heads off on a project that others take very lightly, and then along comes something else that will warrant the support of some more different people, and some way and some how we manage to get many of the things we want and even some of the things that we need.

What is fun or interesting or worthwhile for one person is a drag and useless for another! Es la vida - Cest la guerre! It depends on how you look at it, doesn't it?

Some who saw the stories in daily papers of our area about the approval of the Sanderson Flood Project with an Alpine origin were curious, to say the least.

There is some kind of a long story involved in the reasons for the release of the story from Alpine "prematurely", that involves the official presentation of the approved watershed work plan to the commissioners of Terrell County at their next meeting, which will be Monday, December 13.

The facts of the story were absolutely correct and approval has been made.

This is the season to be specially thankful, or aware of a need for thanksgiving.

We join you in expressions of thanks to God for all blessings and for a greater awareness of our blessings and needs for expressing our thanks.

There are so many things we have and so many things we need, and so many things we want, that we at times become involved in the getting that we forget the need for acknowledging appreciation for what we have.

And some times our own selfishness and wants get us so involved in trying to get the things we want, we pay no attention to the needs or desires of any of those around us.

It is very difficult to be unselfish!

Sometimes next to impossible.

Deer hunters will be pouring through Sanderson by the time this is being read and a big harvest of ruined meat can be expected if there is no more cold weather than we are told to expect for the next several days.

The season opens Saturday, so we are told and weather up to now has been in the 70s.

BLESSINGS OF PRODUCTIVITY

THANKSGIVING 1971

The Pilgrim Fathers of the Massachusetts Bay Colony first celebrated Thanksgiving in November, 1621 to thank God for the bountiful harvest.

Undergoing the rigors of the hostile wilderness, this small band of men and women carved out a future by the sweat of their brows and a few crude tools. With the help and assistance of some friendly Indians, new foods and fruits found their way to the festive board.

The successful fruit of their labor were a tribute to their productivity and they, in turn, shared what they had produced with their Indian neighbors.

It is this same driving force which has motivated this country in the years since the first Thanksgiving. It has enabled us to become the most prosperous and the most generous nation in the world. Through increased productivity we can continue to prosper and to share our bountiful harvest with those less fortunate.

Immunization Laws For Students Change

C. B. Card, superintendent of schools, received word recently from J. W. Edgar, commissioner of education of the Texas Education Agency, and J. E. Peavy, M. D., commissioner of health of the Texas State Department of Health, as follows:

The Texas State Board of Health on November 8, 1971, deleted compulsory smallpox vaccination as a requirement of the School Immunization Law (Senate Bill 27). At least one of the other required immunizations must be started by January 1, 1972 and all other required immunizations completed as soon as medically feasible."

It was his opinion that the judging was very strict this year and he stated that Division I ratings were given to Van Horn and Wink, Rankin received a Division II, and Sanderson and Iraan got Division III.

In twirling solos, Alice Goldwire, Nancy Maples, and Janet Harrell received a Division I rating and Janice Carter, Billie Kay Cooksey, and Elaine Brown received a Division II rating.

Sanderson Canyon Flood Control Project Work Plans Are Approved

After years of study, planning, and working, another step has been taken toward the completion of flood control dams on the Sanderson Canyon Watershed.

The work plan has been approved and will be turned over to the Terrell County Commissioners at their next meeting.

Work can begin as soon as all rights-of-way and/or easements are secured and contracts let, according to information from the Soil Conservation Service, who directed the planning of the project and will also direct the work to completion.

The project is being sponsored jointly by the Commissioners Courts of Terrell, Brewster, and Pecos Counties, and the Rio Grande-Pecos River, Trans-Pecos, and Big Bend Soil and Water Conservation Districts.

The cost of the project will be \$4,681,983.00 with local governments - the counties involved - providing \$85,655.00, according to figures received.

There will be 11 structures in the flood control project, with eight in Terrell County, two in Pecos County, and one in Brewster County, controlling run-off on approximately 150 square miles of land that drains into Sanderson Canyon above Sanderson.

The purpose of the project is to prevent repetition of another tragedy like the one that occurred on June 11, 1965, when the lives of 27 people were lost in flood waters that came down the canyon just before 7:00 a. m. Besides the loss of lives, there was the destruction of property - business, ranch, and personal - in hundreds of thousands of dollars of value.

Education Vital To Cancer Control

"According to our projected statistics, one in every four persons in Terrell County will eventually have cancer. The mission of our committee is to prevent this projections from becoming a reality," Mrs. David Mitchell, chairman of the public education committee of the American Cancer Society's Terrell County Unit, stated this week.

"We know that our best defense against cancer is to educate people on the value of early diagnosis and treatment and to show them ways of preventing cancer," she stated.

Mrs. Mitchell would like to appeal especially to presidents of civic and social clubs, to school officials, and to employers to schedule a cancer control program for their group. The committee thinks that every person in the county should know about cancer, and our program is designed to this end, but will need help and cooperation, according to the chairman.

"Any club or person wanting a meeting program may contact me at 345-2570," Mrs. Mitchell stated.

Other members of the education committee are Mrs. E. E. Farley, Mrs. H. E. Ezelle, Mrs. W. W. Sudduth, Mrs. Eleno Marquez, and the county chapter president, Mrs. Web Townsend.

Tips that can save you money on heating your home

1 Have your heating equipment serviced annually. Preventive maintenance on blowers,

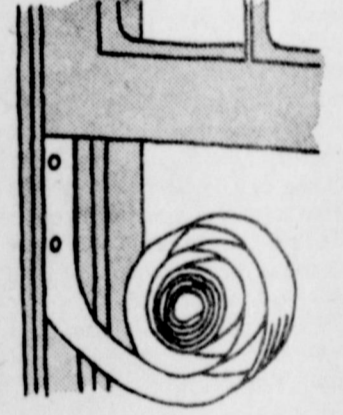

fans, belts and bearings and replacement of filters can increase the efficiency of your heating system and save the cost of major repair bills later.

2 Use lower thermostat settings at night and when you're away from home.

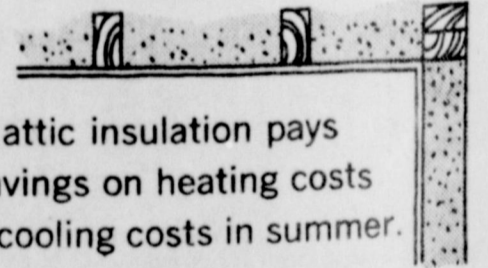

The U. S. Government advises that you can save 3/4% on heating costs for each degree you lower the thermostat for a period of 8 hours at night.

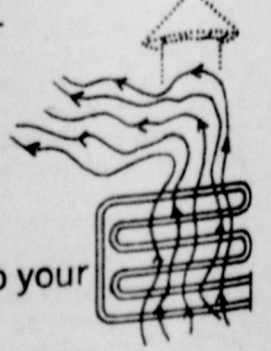

3 Weatherstrip doors and windows to keep out any cold air. Caulk cracks. Keep drapes closed, especially at night. Insulated-back drapes help prevent heat loss.

4 Wall and attic insulation pays for itself in savings on heating costs in winter and cooling costs in summer.

5 Clean, flameless electric heating is 100% efficient since no heat is wasted up a chimney or flue. Electric furnaces have heating elements that turn on in sequence for exact heat control... and the temperature stays closer to your thermostat setting.
