LISTEN TO LUKE

by Albert ---
Several things have been crossing our minds recently, and we like to air them from time to time to make room for some more thoughts that may be wanting to come our way.

It seems that one of the main considerations of some people in the coming county commissioner's race is the possibility of increased taxes due to excessive expenditures associated with the possibility of the election of certain candidates. We don't know if the consideration exists or not, or if there is a possibility or not, or whether or not some people are even concerned. But we think that this is an interesting switch.

We haven't changed our mind about expenditures one single bit, nor of taxes, nor of what we consider to be luxuries and what we consider necessary. We have been harping on taxes one way or another for some time and their connection with what we have and don't have, and at the same time voicing our opinion on what we needed and didn't need - and it was just opinions - and that's all anyone else has - opinions.

What we wonder is -- if there are many people who are concerned about taxes being increased, where were they when this writer's hide was nailed to the outside wall of the announcing stand at the football field a couple of years back? There were many people then that told us that we could stand a lot more taxes than we were paying, and we were told plainly. Has this fact changed, or is it only the opinions of some or many of the people that have changed?

And another thing that we have wondered about! At various times in the past, voters have been told that we should elect a certain school board member to represent a certain segment of the population. That those segments, namely: the railroad employees, the gas plant people and our many residents with surnames of a Mexican origin, were entitled to representation and a voice in the school board's actions. We wonder if those same people will now favor the election of a Ms. to the board. It would be my guess that fully half, if not more than half, of the qualified voters are Ms.s. And we would wager that 100% of all the mothers of school children are Ms.s.

Just passing thoughts. And your opinion, like mine, will depend on how you look at it!

We were told that it was not the opinion of every railroad employee that the changes of operational procedures would not result in a long-range better job. Our story last week stated that local employees felt confident that the changes would make for a better job than they now had following adjustment to the new proced-

HERE IT IS! That "whatever" cactus in front of the postoffice was putting forth this stalk of blooms Monday morning. Our usual "herald of spring" picture is ahead of previous years-- in 1971 it was on March 18, and in 1970 it was April 2. If there had been a buzzard on the cactus and a rattlesnake on the ground below, with a budding mesquite in the background, we would still doubt that spring is here. It just seems too early!

Gas Strike Seen At Turk Well

An Atoka gas discovery was indicated in Terrell County with the flowing of gas at the maximum rate of 6.8 million cubic feet daily on a drillster test at Skelly Oil Co., Midland, No. 1-4 Oasis Ranch, in 4-Doc Turk-CCSD&RGNG, Abst. 2373, 35 miles northeast of Dryden, 11/4 miles southeast of the depleted one-well Brown-Bassett, North (Fusselman) field and six miles north of the Brown-Bassett (Ellenburger, Fusselman, Pennsylvanian and Wolfcamp) field.

On the three-hour test at 11,279-379 feet, water blanket surfaced in 17 minutes, flowing back the 2,000-foot water blanket in 15 minutes and gas in 30 minutes, flowing through the separator at the rate of 6.8 million cubic feet daily and decreasing to 5.4 million cubic feet after one hour.

Then flowed to the separator on a 1/2-inch choke, it made gas in 10 minutes at the rate of 2.3 million cubic feet daily, then flowed 30 minutes at the rate of 2.5 million cubic feet daily, then 30 minutes at the rate of 3.4 million cubic feet daily, then 30 minutes at the rate of 3.31 million cubic feet daily, and then 18 minutes at the rate of 3.25 million cubic feet daily.

Recovery was 10,502 feet of gas and 775 feet of gas-cut mud; recovery from the sample chamber was 6.2 cubic feet of gas. Flowing pressure was 1,403-1,476 pounds; one-hour initial shut-in pressure, 5,815 pounds; and four-hour final shut-in pressure 5,783 pounds. Drilling was scheduled on a 15,200-foot contract.

Earlier it flowed gas at the rate of 3 million cubic feet daily, decreasing to 500,000 cubic feet daily, after three hours when drilling reached 11,200 feet.

The Brown-Bassett, North opener, Roden Oil Co. (now HNG Oil Co.) No. 1 L.H. Hicks, was finalized Nov. 5, 1961, for a calculated, absolute open flow of 4.05 million cubic feet daily through perforations at 12,844-876 feet. It became depleted in November 1968. A potential of 4.2 million cubic feet daily was reported through Atoka perforations at 11,492-12,072 feet, however, it was never filed with the Railroad Commission.

Water District Lowers Rates Starting April 1

Don Allen, manager of the Terrell County Water Control and Improvement District #1, announced last weekend action by the directors of the water district that would reduce the water rates for all local users for a year beginning with the May 1 reading of water meters.

Currently, the rates set a fee of \$2.50 for the first 1,500 gallons; 10¢ per 100 gallons on the next 1,500 gallons; and 8¢ per 100 gallons on the water used in excess of 3,000 gallons.

The new rates would reduce the final figure to 6¢ per 100 gallons for water used in excess of 3,000 gallons.

The new rates will be in effect on May 1 for all local users, residential and commercial.

Other action of the board of directors at their meeting last week was the decision to build a warehouse and working building on the water district's property on US 285. Details of the building and bids advertising will be given as soon as possible, Allen stated.

We talked to several employees before writing that statement and this was their unanimous opinion. We did not talk to all of the employees, but thought we were talking to a representative group. We did not purposefully try to discolor a picture.
We hope, sincerely, that those who are skeptical about the merits of the changes as they are affected will be wrong in their skepticism and that all of their jobs prove to be better for all of them. No man is happy if he is unhappy in his work, and we would wish for them all a happier working climate.
We personally feel that Sanderson will be a better place in which to live if indeed we can become accustomed to the fact that our "sword of Damocles" - the possibility of the moving of the terminal from Sanderson - might no longer exist, and that the disappearance of this threat will be a realized fact before very long.

We were not directly involved, but witnessed an incident recently that was interesting.
It was similar to this: Typewriter ribbons come in several grades, several materials, and several lengths of material. The longer top-quality cotton ribbon is not the same price as the shorter top-quality cotton ribbon; and there are several grades of cotton, and of inking; as well as nylon, and silk, also in various lengths. We can stock a ribbon that sells for 85¢, or another that sells for \$2.50, and there is a lot of difference in the quality, as well as the price.
So it is with merchandise that other retailers handle. Look at the choices of insurance benefits and premiums; the choice of automobiles, styles, accessories, and prices. A can of asparagus may cost a lot or little, but you don't get the same quality in some brands that you do in others.
All things are just not equal, are they?

others, that "Nixon gave away more than he got" in China, is typical of the selfishness of so many people in our nation.
Some in previous years said: "What have you done for me?" Now it's: "What have you done for me in the last five minutes?"
If, in our generosity that is unpleasant to some, we manage to find a few years of a lack of war, maybe that won't kill us.

Fires Plague Local Smoke-Eaters

Grass fires have plagued local volunteer firemen during the past several days and local residents are asked to call the fire department and arrange to have the truck there prior to setting the blaze so that there can be some control of the fire.
Firemen were called out twice last week to extinguish a fence, weeds, and trash near the mobil home of Mrs. Manuel Calzada.
Saturday afternoon burning weeds in the back of the house occupied by Mr. and Mrs. Ernie Ayers got out of hand and demolished a storage shed and contents in the back yard, set fire to the garage and some contents belonging to Mrs. Felix Harrison, and burned the fence and some lumber stacked in the yard of Mrs. L.H. Gilbreath and some of the grass also in her yard. The blaze was set by the man who was hired to clean up the yard behind the Ayers, according to Mrs. Ayers.

Cooperation Asked At Trash Dump Site

Jim Turner, who has been in the employ of the county for several weeks supervising the work of picking up and disposition of trash, cleaning out barrow ditches, and repair of local streets, is asking for the cooperation of local people who take any kind of refuse to the local dump.

A new channel has been cut through the dump ground for water run-off, and pits dug for burying all of the junk and garbage that was at the area, and additional pits dug at the far north end of the dump ground for disposition of trash for the present time. Anyone taking any refuse to the area now is asked to take it to the far north end of the plot and put it in the pits if possible or as near to the pits as possible so that it can be pushed into the pits and covered.

A lane is going to be constructed in the near future to prevent dumping in the clear area so that there can be a systematic and efficient disposal of all refuse by burial.

Turner stated that a lot of time and some money had been spent in getting the dump area in good shape and that with a little cooperation and effort on the part of everyone, it could be kept sanitary and more sightly.

He asked that anyone who is not getting a systematic and regular trash pick-up, to let him know so that they can begin, and anyone who is taking their own refuse to the area and would permit the county employees to pick it up, to let them know, also.
