LISTEN TO LUKE

By Albert:---
Did you ever notice how the people in offices whose salaries are paid by taxpayers are always talking about saving money, but seldom turn down an opportunity for a raise?

It would be more convincing at times that their efforts to save taxpayers' money, if they would do some conserving a little closer to home.

The recent action of the legislators in voting the ridiculous amount of duplicate chairs of the original designers of the state's constitution and asking for a raise to \$15,000.00, and talk about a short source of revenue!

Midland and Pecos Counties have been having their trouble lately with efforts to re-align their precincts that would bring those with less than 100 voters up in voting strength to the requirements.

There are probably other counties of the state that have been beset with these kinds of problems, but we do not get our newspapers from all of the other parts of the state.

The new state law requires at least 100 voters in each precinct, according to what we have read. Some of their problems began several months ago - in those counties mentioned - because someone initiated legal action against the situation where the "one man, one vote" did not apply.

The "one man, one vote" requirement mandate of the laws of the state and upheld by the courts was sought by some persons or person within those counties and thus the long, drawn-out effort for realignment; probably accompanied by unnecessary expense, a sad waste of time, and a useless severance (possibly) of friendships.

We see, hear, and read recently that the use of books by people who are still working toward academic education, and the use of books by older people who are interested in "smartening up" is "the thing!" We heartily agree. We know some people who read more than we do, and we know some who are smarter than we are, but we don't know anyone who enjoys reading the way we enjoy it, or more than we do. Reading is an excellent and rewarding past-time and we are happy to have any part that we may have in promoting reading for the sake of entertainment and education.

Watch for these developments, possibly: there is going to be a serious clash between the environmentalists and people who want to stay warm this winter, and some who were so strongly for pollution control of the air will be on the side of those who want fuel and/or electricity.

There just seems to be no good answer right now to some of our problems. There is a built-in consequence to every choice we make.

Eagles Win Opener Over Imperial 28-6 Home Game Friday

The Sanderson Eagles romped over the Class B Buena Vista-Imperial Shorthorns 28-6 in their opener there Friday night of last week.

The scoring for Sanderson was in the second and fourth quarters, with the Imperial TD coming in the third frame.

Robert Kline went over from the 3-yard line in the second period for the first touchdown. Kline is the quarterback. Kendall Billings ran 18 yards for the second Eagle score, running from the halfback slot. Kline scored again on a four-yard run in the same period. Bill Mott, halfback, converted extra points on place-kicks after each of the three TDs.

Imperial's score in the third period was on a 5-yard run by Rodney Powell, quarterback. The point-after try failed.

A pass from Mott to Ricky Marquez, end, accounted for the final Eagle touchdown. The pass was good for about 35 yards and Mott again boot-ed the extra point to wind up the scoring in the game.

Coach Willie Myers said that the players showed well during their first game in his opinion, and he awarded the following players stars for their efforts: Kendall Billings 3, Jimmy Davis 2, Carlos Munoz, Larry Hernandez, and Robert Kline.

The Eagles were able to make about 255 yards rushing as compared with 50 for Imperial, they also led in first downs 15-8. Imperial completed 8 of 12 passes for 80 yards, and the Eagles completed 4 of 8 passes for 78 yards. Sanderson's penalties amounted to 90 yards and Imperial's 30 yards.

Players, besides those mentioned above, who saw action in the game, included: Kevin Phillips, Serjoe Galvan, Randy Massey, Kevin Farley, William Corbett, Ja Chriesman, Bobby Spence, Darrell Cooke, Don-

More Rain Falls Last Week Here, Two Report Snow

About an inch and a half of rain was reported by several local citizens on Thursday and Friday of last week, with similar amounts being reported in some areas north of Dryden. Lesser amounts were also reported, but the rains seemed to be general.

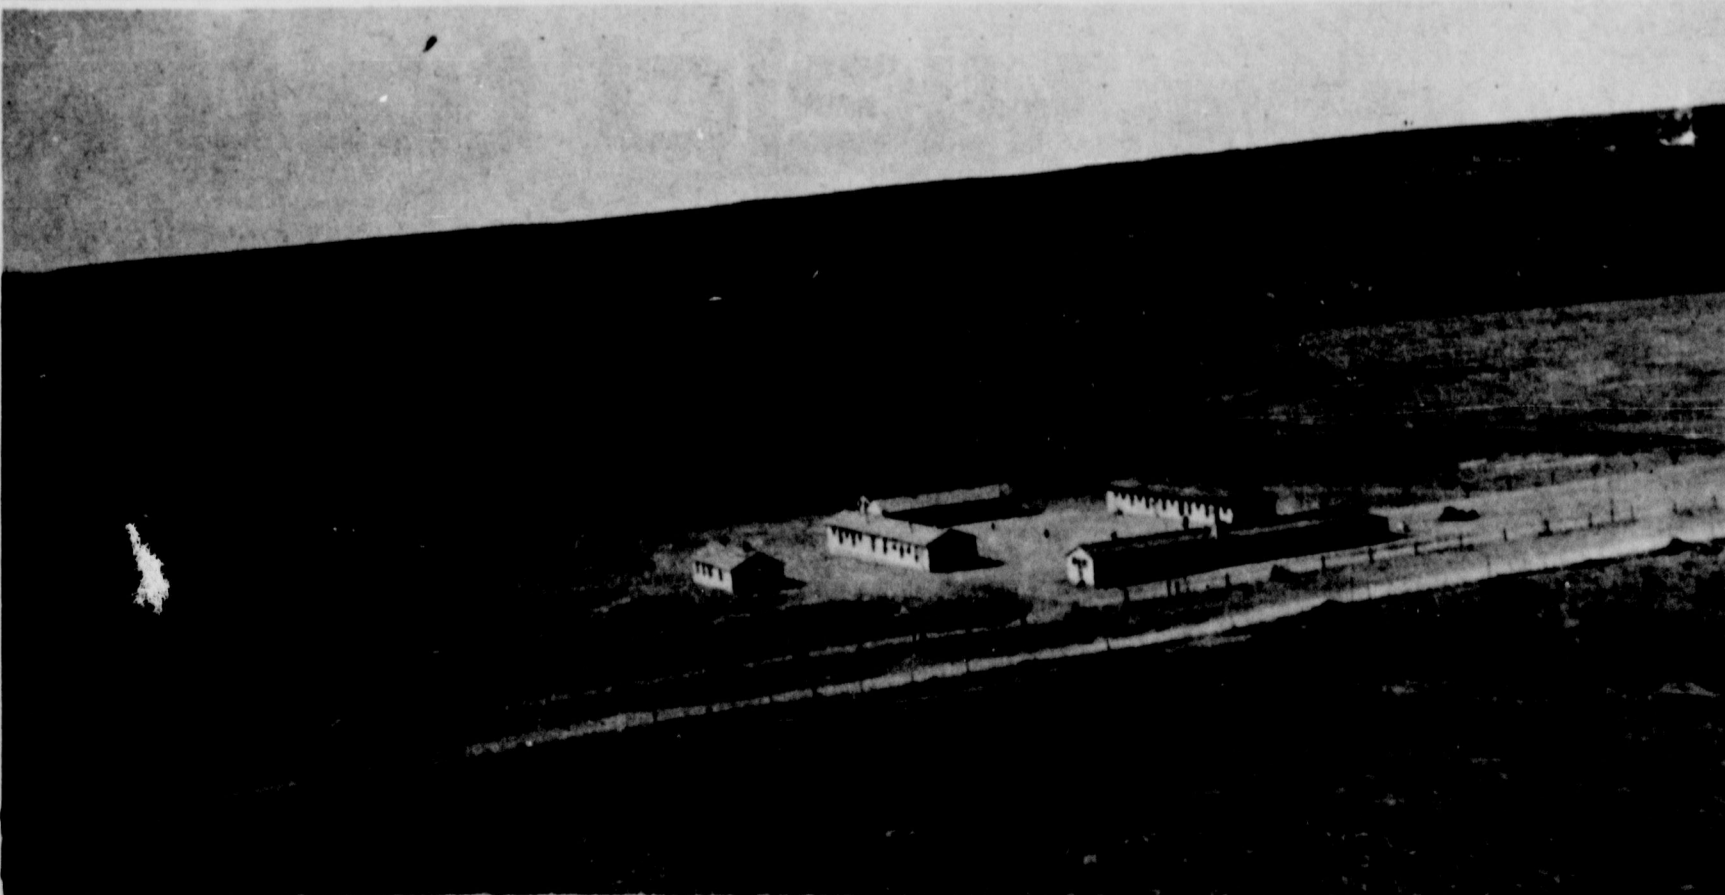

Two local residents, who are early risers, reported to The Times that there was actually a brief and light flurry of snow early Friday morning.

There was a hard wind Thursday night accompanying the rain and some damage was reported to some trees locally, but no serious damage was reported.

Good results from the rains have been noted already in the coming of green shoots in parts of the country and ranchmen are hoping for good rains to bring feed to go into the winter, as most ranchers agree that the summer was "pretty hard", recalling to a degree some of the dry years of the '50s.

Mr. and Mrs. B.L. Melton Jr. of Rio Hondo are visiting their son, Bryant Melton III, and family.

Another of the very few pictures we have seen of the Army Air Force installation which was stationed at Sanderson. In the original picture, the Kerr well is visible over the top of the two tents at the left of the buildings, and at the right of the picture, just inside the landing field area, is some kind of wording made by white-washed rocks on the ground. The buildings were constructed by an engineer unit for the air force unit and the engineer remained here to maintain the landing field and buildings. US285 is the road in the foreground. The picture was made about 1919 and was loaned by Mrs. John Simmang, nee Bohlman.

Monday to tell us that he and his wife had changed their plans to leave Sanderson and would remain here gladly as residents.

We are glad always to learn that some people live here because they want to.

There was some lengthy discussion at the meeting Monday night by those present at the meeting of the Terrell County Historical Survey Committee about the possibilities of a museum in Sanderson. The group is looking for a suitable location, and they are looking to see, if there is a sufficient amount of interest that can be generated to see the project through.

Since the committee is made up of responsible people and since they are working under the sanction and sponsorship of the Terrell County Commissioners, we would think that there is a good possibility for a great amount of cooperation from those who have items that would be suitable for such a project.

A bouquet of words for Charlie Brown, son of Mr. and Mrs. Joe N. Brown, who volunteered to paint the YPCC bulletin board at the postoffice if the organization would buy the paint. The initiative of the lad is commendable, and not only that, but he did a good job of painting, too!

The museum project of several years ago ended up in a bad blow and great disappointment to many people, and even though this is well-remembered, it would also be well to consider a comparison of details of the planning of this group where one can note a sincere determined effort that is brewing.

There are many details to be worked out, plans to be made, ideas to be sought, and thinking to be done. But the main thing is that they want the people to be thinking about what they might be able to do in cooperation with the survey committee as the plans progress for the museum.

We sincerely feel that a verified effort on the part of a big bunch of our citizens is not only good for the citizens, but good for the town, county, and area. We like to see, and be a part of people working together for something that is worthwhile.

We think a museum would be worthwhile. But maybe it just depends on how we look at it!

The committee would appreciate comments and ideas by any individual, and if there is some citizen who would be interested enough in the project to want to boost it by their comments for The Times, we will be glad to cooperate.

A good babysitter needs a lot more than a way with kids

Of course a babysitter should like children. And like taking care of them. But the job also involves some pretty big responsibilities.

Caring for little ones means being able to handle just about any emergency. Because emergencies often require the use of the telephone, a handy list of important numbers can do wonders for your sitter's confidence.

So write down the phone numbers for fire, police, medical assistance and the places you'll be while out. Keep the list right next to the phone, and remember to call home if your plans change.

Interested in getting more for your telephone dollar? We'll send 30 tips to help you save time and money. No charge. We'll also include an Emergency Numbers List.

"The constitutional amendment to authorize cities, towns, and villages to levy such ad valorem taxes as are sufficient to pay the principal of and interest on their general obligations hereafter issued subject to the restrictions provided by law."

Article VIII of the Texas Constitution is amended by adding a new Section 2C which:

Allows the Legislature, by general law, to exempt all real and personal property used by non-profit water supply corporations or cooperatives from all property taxes. "The constitutional amendment authorizing the legislature to exempt from property taxes certain property used by a non-profit water supply corporation or a non-profit water supply cooperative."

No Active TB From Recent Tests In Terrell County

The Texas State Department of Health in conjunction with the American Lung Association, Trans-Pecos Area, conducted a Tuberculin Skin Test Survey in Terrell County in October of 1972. As a result of the survey, no active tuberculosis or contagious disease was found among those tested. Some people, however, were placed on preventive treatment.

In 1965 Senate Bill 130 was passed to facilitate control of Tuberculosis in Texas. Because of the discovery of anti-tuberculosis drugs it is no longer the dread disease it was at one time. An intense effort is being made to find all active cases and those persons at high risk of developing tuberculosis. The high risk group includes persons who have a positive skin test and who are under 20 years of age. A positive skin test does not mean a person has active disease, but it does mean that he has picked up a tuberculosis infection at some time. As the result of a positive skin test, a chest x-ray is necessary to determine whether it has developed into disease.

Preventive treatment, for tuberculin reactors under 20, consists of the individual taking anti-tuberculosis drugs for one year and the drug will greatly reduce the individual's chances of ever developing active tuberculosis. During this year, the individual is followed closely by a physician and with periodic x-rays.

The fact that a person is taking preventing medication in no way means that this person is contagious, but that an effort is being made to prevent the spread of this disease.
