By Albert---

The request for fire hydrants by the Young People's Chamber of Commerce got some immediate results from the Commissioners Court at their meeting last week, as related in the story about the meeting.

A bit of follow-up information on this subject was the recommendation of the fire department executive staff to the water district directors for the placing of several fire hydrants, near the schools, and some additional ones, also.

The water district is looking at the request or recommendation, but has to consider the size of the mains available to install fire hydrants and the cost of installing larger mains if they are needed or recommended in order to supply a sufficient amount of water to do any good.

In other words, there is no point in tying a fire hydrant on a 2-inch line if the booster is going to be drawing through a three-inch intake, according to what we understand (?) about pumping water.

Anyway, the situation is being looked into. There is a seemingly determined effort being made to take care of the situation, but it is not going to be done this week. And, in reality, it shouldn't, unless the mains were all sufficiently large, the hydrants were sitting on the ground ready to be installed, and the water district had the equipment ready to install them.

There is a possibility that the installation of some additional fire hydrants in Sanderson will result in a greater fire insurance credit. And if it does, then the installation costs will have been an additional advantage over the protection to lives and property that more plugs may afford.

There were some mixed feelings expressed after the redistricting action was revealed last week in The Times. The expressions were from complete indifference to complete dissatisfaction. But that is normal, since it was humans involved!

There was no way that the commissioners could have solicited and paid attention to the wishes of everyone in the county as to the placement of the dividing lines. The fact that most of the local residents are divided between precincts 1 and 3 is due to the fact that precincts 1 and 3 have the fewest out-of-town residents.

The lines as set will hold until something happens that causes another great imbalance in precinct populations, and someone complains about the imbalance long and loud enough to get results. A re-districting at that time will not please everyone any more than this one did.

What is important is that there was a re-districting of

Eagles Whip Wink In Final Grid Tilt

The Sanderson Eagles blasted the Wink Wildcats 40-0 in the final game of the season here Friday night. The Wildcats were winless in district competition.

The Eagles jumped out in front early in the first period on their first offensive drive which was capped by Carlos Munoz's 10-yard touchdown run and Bill Mott added an extra point with a place-kick. Munoz scored again in the first period, this time on a 34-yard run, and Mott's aim was good the second time for another PAT.

In the second period, Ricky Marquez intercepted a pass and ran 80 yards for a score. Robert Kline threw a pass to Kevin Phillips for a 9-yard touchdown and later in the same period threw another pass to Marquez, who made a picture-book catch in the end zone for a 32-yard score. Only one of the points-after were added during the second period.

With a 33-0 lead at the half-time there was liberal use of reserves during the offensive play of the Eagles in the second half and well as defensive. The only score in the second half was in the third frame when Bill Mott ran over the goal line from eight yards out. Kendall Billings added the extra point on a place-kick.

Sanderson led Wink in 1st downs 20-7, yards rushing 296-64, and yards passing 87-0. The Eagles completed 5 of 11 passes and held the Wildcats to a futile effort in three throws. Each team had 1 interception and Sanderson had two turn-overs on lost fumbles to one by Wink. The Eagles were penalized 4 times for 30 yards and Wink 7 times for 60 yards. Sanderson punted once for 26 yards and Wink 7 times for a 27-yard average.

The Eagles wound up the season with district losses only to Balmorhea and Rankin, who won the district title, and a third loss during the season was to Class AA McCamey.

Nine Eagles played their last high school football game Friday night: Robert Kline, Bill Mott, Jimmy Davis, Darrell Cooke, Larry Hernandez, Jake Murrell, Bob Spence, Kevin Phillips, Sergio Galvan.

Friday was dad's night at the football game and the representatives were introduced before the game, players and the team managers and their fathers or

The coaches, Willie Myers, Steve Burleson, Tommy Gray, and Larry DeVasto, were lavish in their praise of the team's effort during the year, their willingness, and their favorable response to each situation confronting them during the season.

Voters Must Register In New Precincts

Mrs. A.J. Hahn, deputy tax collector-assessor, stated last weekend that all voters must be sure and come to the sheriff's office to register in the precinct in which they reside since the re-alignment of precinct lines by the commissioners last week.

She stated that persons must come to the office and register, rather than try to take care of it by telephone. She stated that she would not accept requests to register by telephone.

All eligible voters in the county must vote in the precinct in which they reside, and they must know their precinct number and be registered in that precinct before they become eligible.

Deer Season Begins Saturday

Deer season opens in the Trans-Pecos area Saturday and runs through December 9. The limit will be four deer but cannot include more than two mule deer, more than one mule deer buck, more than two white-tail bucks nor more than three antlerless deer.

The entrance of deer hunters into this area is expected to begin Thursday, reaching the peak of rush on Friday, the day before the season opens.

The condition of deer is said to be real good in Terrell County with an ample, as usual, number of animals to fill the desires of the good hunters.

Bloodmobile Date Set

The date of December 6 has definitely been set as the date for the bloodmobile to visit Sanderson, according to Mrs. Joe N. Brown, who is in charge of the project for the Young People's Chamber of Commerce.

The unit will accept donations of blood by local donors who will receive six months blood insurance for their family at no cost, as well as give blood types.

The typing of blood is considered an advantageous activity since it will furnish a ready essential bit of information in case a person needs blood.

Cross Pens at The Times

Terrell County Judge G.J. Henshaw is shown in his office just off the district court room in the Terrell County courthouse. He served from 1920-1938 and the date of the picture is not known. The old upright telephone on top of the bell box with the hand crank on the side is at the right. Carlton White loaned us the picture.

the county and the population is very-nearly equally divided and you as a voter have as much voice with the commissioners as do the voters in any other precinct.

The awareness of the commissioners to the situations in the county and their reactions to them will pretty much determine the time each will spend in his office in the future, but this is not any different from in the past. The only difference is that now the balance of responsibility is more evenly divided - voterwise! Each commissioner has a larger number of constituents, except precinct 1 which has a constituency that does not have the same people, thus different interests.

And many people are beginning to look at things a little different from the way they used to, and a lot depends on how we look at things!

CORRECTION

The information about the division of precincts concerning Cargile Addition in Sanderson was wrong last week. All of Cargile Addition will be in Precinct 1 as will the Lometa Terrace area. She had a large poster to illustrate her remarks and handed out pamphlets "The Truth About Trash". To open the meeting, Mrs. Card gave a devotional from "Finding Happiness Here" by Wallace Friddy.
