Pioneer Apply For Rate Increase

Pioneer Natural Gas Company has notified the city officials on its West Texas System that the Company is applying for an increase in its base rate for gas service within the cities on its West Texas distribution system.

In his letter to the cities, K.B. Watson, Company President said, "As you are probably aware, Pioneer's last base rate increase became effective during the year 1970, based on recommendations of the Company and a committee of city representatives." Watson went on to say, "Since that time, in spite of the increased cost of gas to the consumer, the Company's rate of return has decreased substantially due to many factors and an increase in the base rate is now essential."

Watson pointed out that the increase in the customer's cost of gas over the past several years has come about by the "cost-of-gas adjustment, an adjustment that is designed to pass the increased cost of gas in the field directly through to the consumer." "Pioneer does not retain any of the increased cost of gas and does, in fact, fail to recover much of the increase because of several cost items not recovered in the cost-of-gas adjustment," Watson said.

Company officials have pointed out on numerous occasions in the past that the cost-of-gas adjustment has been the assurance that Pioneer Natural Gas Company has been able to maintain an adequate gas supply to protect the interest of the customers it serves and to enable the Company to continue to serve the growth of its service area.

Pioneer has not specified the new rates needed in this initial request to the cities and said it would supplement the application. The Company has retained the services of H. Zinder and Associates, Inc., utility consultants, to assist in the study currently being made to determine the appropriate amount of the deficiency in the gas service revenue at Pioneer.

Watson told the city officials that a preliminary draft of a report of the studies made by the utility consultants indicates the current value of the properties used to serve the West Texas Distribution System to be in excess of \$178 million in addition to the value of properties used to serve irrigation and other rural customers. The deficiency in annual revenues has increased substantially in very recent years and is approaching \$30 million according to the study.

In his communication to the cities, Watson pointed out that in the eight-year period since Pioneer's last base rate increase, the cost of providing gas service, aside from the cost of gas in the field, had increased tremendously.

Watson said, "I am sure that you, as businessmen, understand this tremendous increase in the cost of doing business." He went on to say, "In most businesses, much of this cost has already been absorbed in price increases passed on to the customer and returned to the business. In Pioneer's case, this is not true. The increased cost of natural gas to the customer has been reflected only in the cost-of-gas adjustment which has been flowed through directly to the gas producer." Watson emphasized that Pioneer's rate of return on investment has dwindled significantly in the past eight years.

The West Texas Distribution System consists of the following city plants: Abernathy, Amherst, Anton, Big Spring, Bovina, Brownfield, Canyon, Coahoma, Crosbyton, Dimmitt, Earth, Edmonson, Floydada, Forsan, Friona, Hale Center, Happy, Hart, Hereford, Idalou, Kress, Lake Ransom Canyon, Lake Tanglewood, Lamesa, Levelland, Littlefield, Llaneta, Lorenzo, Lubbock, Meadow, Midland, Muleshoe, Nazareth, New Deal, New Home, Odessa, O'Donoghue, Olton, Pampa, Panhandle, Petersburg, Plainview, Post, Quitaque, Ralls, Ropesville, Seagraves, Seelye, Shallowater, Silverton, Slaton, Smyer, Southland, Springlake, Stanton, Sudan, Tahoka, Tulia, Tule, Vega, Welch, Wellman, Whitharal, Wilson and Willsboro.

Q. Is it permissible to move a car that has been involved in an accident before the police get there? — C. J. Yoakum

A. Yes, if it is a serious obstruction to traffic and can be safely driven. If the accident occurred in a main traffic lane, ramp, shoulder, median or adjacent area of a freeway in a metropolitan area, the car must be removed off the freeway. Otherwise it is usually a better idea to leave it where it stopped. If the impact was serious, remember to turn off the ignition to reduce the risk of fire.

Letter To The Editor

We are no longer the STRIKE OFFICE. We have been notified that the American Ag. Union has to be organized. This we have to do in order to stay in the Farming and Ranching Business and be recognized as the A.A.M.

We need every farmer and rancher that is interested in this area to be present. WE WILL NOT GOVE UP! The Land has been good to us and we have our crops pretty well under control and we have our money that we cannot spend a dime while the A.A.U. is here.

There will be speakers that will explain what happened at the National State and County Meetings. We are not meeting to discuss matters in the past. A.A.M. has two new business men, a new president. We now have Our National Delegate, District Delegate and District Delegates. We will have a new office in the A.A.M. Office throughout the State. We are meeting behind schedule due to planting time.

It takes each member to make an A.A.M. and it takes every Farmer and Rancher to make an A.A.M. WE MUST AND WILL ORGANIZE!

The meeting will be at the Community Building from July 11th at 8 o'clock in Littlefield. Make a reservation with
