

GRAND OPENING

Perryton Feeders, the newest cattle feeding operation in the area will hold open house Saturday July 18th from twelve noon to five p.m.

Dr. Charles M. Smallwood, Dean of the school of Agriculture at West Texas State University will make the keynote address for the occasion. A barbecue dinner will be served at 12 noon.

Jim Jacobs, manager of the 25,000 head operation is a veteran of seven years in feedlot management at the moody farms in Pampa. Jacobs who was educated in Greeley, Colorado, is presently living in Perryton with his wife and three children.

His wife, Joan, acts as receptionist in the modern office building on the complex.

One son, Jimmy, age seventeen graduated from high school last season and plans to attend college this year. He is presently performing the role of cowboy for the firm.

Another son, John, will be a Senior at Perryton High School this season. They also have a daughter, Teresa, age 15.

According to Jim, the new feeding operation can accommodate groups of cattle in thirty to forty head lots and has pens to handle groups of 250 head.

The feed mill is something different from others in the area in that the mill is popped in the manner of pop corn and Jacobs is quite proud of the results.

He proudly told of an 84 day check he had made on pen 210. The cattle in this pen belong to Vern Conners and his 84 day check showed an average gain per day of 3.55 pounds.

Although the main cattle diet consists of 1/3 corn and 2/3 milo, Jim was quick to point out that the corn doesn't get popped. It's parched until it swells up and softens. It's then run through an abrasive process.

There are many unique things about the operation of Perryton Feeders and one of the most interesting has to do with the pen signs. The numbered signs are painted red on the road side and blue on the pen side.

Jim drives down the lanes and when he spots a pen of cattle, that for some reason or another he prefers not to feed, he turns the number side around and, when the feed truck comes along, the driver knows that the blue number means "don't feed."

Visitors will enjoy a trip through the bright, lavishly furnished, new office building, but above all else, make sure you see the pop corn popper.

Jim Jacobs... ready for open house Saturday...

Joan Jacobs... book-keeper at Perryton Feeders...

CHARTER FOR PERRYTON FEEDERS WAS ISSUED ON JANUARY 7, 1969

Perryton Feeders, Inc., located 20 miles East of Spearman, will have Open House this Saturday. The entire public of Hansford County is invited to the barbecue, and dedicatory services at the feedlot, this Saturday.

Original stockholders for the big feedlot, include; Grady Yeary, Robt. Urban, Dale McLain, Vern Conner, Lawrence Ellzey, H. C. Brown, Jr., Frank Buzzard, Billy Conner, Kermit Johnson, Roy L. Johnson, Tom Slack, Dean Slaughter, Byron Tevis, Cecil Tevis, A. B. Hollins.

The directors and officers are:
 Grady Yeary..... President
 Robert H. Urban..... Vice-Pres.
 Dale McLain..... Secretary
 Vern G. Conner..... Treasurer
 M. Lawrence Ellzey... Director

School Must Offer Kindergarten If Students 'Qualify'

School Superintendent James Cunningham said this week that a Kindergarten class will be added to the school this year "if we come up with enough (qualified) children."

The Texas Education Agency is requiring kindergarten classes to be added to those schools which have enough non-English speaking students to make up a normal number of classroom students. Also eligible to attend the class would be children from families whose yearly income totals only \$3,000 or less.

These two requirements must be met by children who will be 5 years and 5 months old by September 1, 1970.

"I don't think Spearman will have enough students to qualify under these rules," Cunningham said. Allen Alford, elementary principal, has been surveying the city populace and has not come up with any.

Perryton schools have conducted a similar survey and found 2 students who would be eligible for such a kindergarten class.

This program is designed primarily for Mexican-American children who do not read, speak or comprehend enough of the English language for normal progress in the first grade.

Cunningham said that by 1975 all Texas schools must be able to offer Kindergarten classes to ALL children who would be 5 years of age by May 1 of that year. He went on to say that Spearman schools will have to instigate the class before that date if enough children are found to be eligible.

At the present, Kindergarten classes will be offered only if enough students can be found who do not speak english, or who are members of the low-income group.

If there are children in the Spearman School District who this year meet these two requirements, the Superintendent wants them to make themselves known by contacting him immediately.

1940 CLASS TO HAVE REUNION THIS SUNDAY

The Spearman High School class of 1940 will meet in the Home Demonstration Club room at 12:30 Sunday July 19 for a class reunion. Those attending are to bring covered dishes for dinner.

LITTLE LEAGUE GAME AT SUNRAY MONDAY: The Spearman all-stars, will play Dumas, at Sunray Monday night, 6 P. M. Coaches are Jones and Douglas.

Complete all-star list of players is in this paper.

FARMERS TO VOTE MARKETING QUOTA

Secretary of Agriculture, Clifford M. Hardin, on July 1, 1970, proclaimed July 27-31 as the dates for a mail referendum on 1971-crop wheat marketing quotas. By law, in the absence of new legislation, the 1971 wheat crop comes under the provisions of the Agricultural Adjustment Act of 1938, as amended. This Act requires that a marketing quota referendum applicable to the 1971 crop be conducted on or before August 1, 1970.

The Agricultural Act of 1965, as amended, extended its voluntary wheat program through the 1970-crop year, and specifically suspended marketing quotas for wheat producers only for the duration of the Act.

Previously announced for the 1971 crop wheat was a national wheat marketing quota of 1,210 million bushels, along with a national allotment of 43.5 million acres.

To be announced in advance of the referendum will be the price-support loan rate for 1971-crop wheat, estimated domestic certificate value, required acreage diversion percentages, and other program details. County ASCS offices about one week prior to the referendum will mail program

information to wheat producers, along with the ballot voting instructions and individual farm allotments. These individual allotments will be based on the 1971 national allotment of 43.5 million acres, as compared to the 45.5 million-acre allotment in effect for the current crop year.

Marketing quotas, to be put in effect, must be approved by two-thirds or more of those voting in the referendum. If quotas are approved, producers will be limited to their allotment acreage beyond which they cannot harvest without a marketing quota penalty. Any excess acreage production would be subject to penalty unless it is stored under bond. If they remain within their allotments and divert the required acreage, they'll be eligible for price-support loans and domestic wheat marketing certificate payments. If the referendum fails to carry, producers staying within their 1971 allotments and complying with other terms and conditions which may be prescribed by the Secretary, would be eligible for support loans at 50 percent of parity.

ASCS office manager Ellzey Vanderburg, said more detailed information about the program will be available within a week.

City Council Discusses Mosquitoes, Telephones

City councilmen, Mayor and City Manager met in regular session Monday night to go over departmental reports for the month of June.

The mosquito problem was discussed and the subject of aerial spraying was tossed around some but the council agreed to continue using the ground fogging operations instead of aerial. They discussed the possibility of treating lakes and ponds near the city if procedures can be worked out with land owners, etc.

Ambulance drivers reported 6 runs made in June.

A total of 57 cases were filed with City Court judge who assessed fines as follows: Themes \$49.50; \$25.00 worked out; \$21.50 not paid. Total paid, \$430.00

City police issued 54 traffic tickets, investigated 9 motor vehicle accidents and arrested 6 drunks.

Animal control officers picked up 23 stray animals last month. Three had been held over from May, 17 were destroyed, 5 paid out, 2 escaped and 2 have been held for this month.

Two regular fire drills were held in June. Firemen answered 4 calls. Two of these were cars and two were vacant houses located on north

Hoskins street. One house was gutted and one was completely destroyed.

Three Spearman firemen will attend the fire school held every summer at Texas A&M. This summer the dates are set for July 19-24.

Council members heard the report of street repairs which have been underway now for some time. Fifty city blocks of streets have been retopped with seal coating and various intersections have been repaired. All but a small portion of the work is complete.

City councilmen are requesting that officials of the General Telephone Company meet with them at the next regular meeting to talk with local officials concerning service in this area.

Rainfall 1.25 Here

A welcome thunderstorm, the second within a 4-day period, rumbled over Spearman early Monday morning dumping a total of 1.25 inches of badly needed rain in the official gauge. The weather man was a little stingy with

the moisture however, since the city of Spearman was about the only place in the Panhandle to receive help from the clouds.

A total of .34 fell from a thunderstorm on July 9 which brings the July rainfall amount to 1.59, and the year's total to 7.18 inches.

June's rainfall here measured 4.34. Three and a half inches of this fell July 15 in a violent storm and did little good except fill the ponds and lakes. The first 5 months of this year was the driest on record so the June and July rains have been received with thankful hearts.

The weather last week was hot and extremely humid and city residents turned air coolers up to the highest speed seeking relief from the heat. Community Service Public manager Charles William said kilowatt feet of electricity reached a peak of 4,032 on July 10 when the thermometers stood at a sizzling 105 degrees. The average KW demand runs around 3,800.

The weather chart as recorded by U.S. weather observer Mrs. H.P. Cates is as follows:
 July 9: high 97; low 67
 prec. 0.34
 July 10: high 105 low 69
 July 11: high 103; low 90
 July 12: high 93; low 70
 July 13: high 93; low 65
 prec. 1.25

SCHOOL HIRES NEW COACH

Members of the Spearman School Board employed another teacher and coach for the upcoming term at their regular meeting Monday night.

Mr. E.C. Jenkins was hired as a high school coach and teacher. Mr. Jenkins has been with the Pampa school system the past 3 years. The family will be moving to Spearman soon.

Mike Sanders Practicing Law In Clarendon

Mike Sanders, who received his degree from Texas University School of Law the past spring, is now a practicing attorney with offices in Clarendon, Texas.

Mr. and Mrs. Rue Sanders helped move their son to his new home last week. Mike is a member of Lowell, Lyle and Cobb, a Dumas law firm. Mr. Sanders is heading the firm's branch offices in Clarendon.

Firm To Build New Homes In Spearman

A building firm set up offices in Spearman this week with plans to "be here as long as there is a demand for homes".

Joe White and V.E. Patterson with the firm Lubbock Ready Built Homes, Inc. located on the Canyon road in Amarillo were in the city Monday and Tuesday going over abstracts and locating office space.

Joe White will be in charge of the Spearman building program and said the firm will start immediately on constructing two homes.

White said the company planned to build at least 25 new homes within the price of \$14,000.00 to \$25,000. He said they would build here as long as there was a demand for homes. White said the firm went into one Panhandle city with the intentions of building a few homes and were still there after 8 years.

The spokesman also said he would build to anyone's plans and within most any price range.

Houses to be constructed in Spearman will be of brick construction. The

\$14,000 home will be a 3 bedroom, brick, bath and a half, single garage. Homes within the \$20-25 thousand price range would be a 3 bedroom brick, double garage, refrigerated air, bath and 3/4. These are "turn-key price quotes" White said. He also stated that he could make financial arrangements with Perryton Savings and Loan, Farmers Home Administration, and other firms. The building firm spokesman said he was looking for commitments in this city.

DRY HEAT PROCESSING OF SORGHUM GRAIN STUDIED AT A&M

COLLEGE STATION--A search for a physical process of improving the utilization of grain sorghum by cattle has been going on for a long time.

A possible solution is recognized in dry heat processing of the sorghum by J.K. Riggs, J.W. Sorenson, Jr., and Price Hobgood, all of Texas A&M University.

A project, planned and enacted in 1967, provided an opportunity to study the equipment requirements, the effect of initial moisture content on popping characteristics of sorghum grain and the bulk densities of the various components of the popped grain mixtures.

The study also evaluated feedlot performance and carcass characteristics of cattle fed the dry heat-processed and nonprocessed grain in all-concentrate finishing mixtures. Rumens volatile fatty acid levels and grain digestibility were also determined in the work done cooperatively by the Departments of Agricultural Engineering and Animal Science at A&M.

An infrared-heated reciprocating steel table machine and a gas-heated vibrating-tray conveyor machine were used in the research to determine the feasibility of using dry heat in a popping operation to process the sorghum grain for finishing beef cattle.

Results of the study showed that the grain should be cleaned to assure an even flow free from foreign materials for efficient operation of the reciprocating-table machine.

A grain moisture content of 15 percent was optimum for obtaining the highest percentage of completely popped grain which was 45 percent. The weight or bulk densities of the loose-fill samples ranged from 49 pounds per cubic foot for the original whole grain to about 6 pounds per cubic foot for the completely popped grain.

When compared with non-heated, dry-rolled grain, the self-feeding of the popped grain mixture, either completely popped or partially and nonpopped grain, all crimped and in all-concentrate

feed mixtures to finishing steers resulted in a significantly reduced feed intake. The reduced feed intake was accompanied by an increase in efficiency of feed utilization but a nonsignificant decrease in rate of gain, final weight, carcass weight, dressing percent, carcass grade and fat thickness.

Rumens samples showed significantly lower levels of acetic and isovaleric acids but higher levels of propionic acid in cattle fed the dry heat-treated grains than in those fed the nonheated grains. The resulting narrower acetic propionic acid ratio coincided with the greater efficiency of feed utilization observed by the researchers in the cattle.

The cattle fed the dry heat-treated grains showed higher digestibility of dry matter, organic matter, nonprotein organic matter and nitrogen-free extract, but not of fat, fiber or protein.

No differences in digestibility were found among cattle fed the three heat-treated grain fractions. The researchers concluded that this indicated that dry heat rather than popping itself was responsible for the changes in performance.

"Dry Heat Processing of Sorghum Grain for Beef Cattle" is the title of a recent Texas Agricultural Experiment Station publication which explains the research. It is B-1096 and copies are available from the Department of Agricultural Information, Texas A&M University, College Station, Texas 77843.

Texas Teachers To Get Raises

School teachers in Texas who are on the state minimum salary schedule will get pay hikes this fall.

The raises average about \$1,050 per year for the coming school term.

Also, students will go to school and teachers will teach an extra five days--180 days instead of 175.

Changes in the year and basis for figuring teachers'

pay result from amendments to the minimum foundation program law passed in 1969 by the Texas legislature.

Under the minimum-pay program, a beginning bachelor's degree teacher will receive \$600 per month for 10 months, or \$6,000. Many schools in the state pay their teachers more than the state minimum salary schedule. Spearman is among

the state minimum salary schedule.

Spearman schools pay teachers \$1,000 above the state minimum, and that means that a beginning bachelor's degree teacher will receive \$7,000.

Texas was ranked 38th among states in average teacher pay in 1969-70. The 1970 raises and a long-range

improvement plan are expected to move Texas up to a more favorable position among states, it is forecast.

Coach Allen Simpson registered Monday for a 3-week summer school at WTSU, Canyon. If anyone wishes to commute between the two cities, give him a call.

4-H Horse Owners Reach All-Time High

Handicappers figure odds on horses by combining a lot of figures: age, track time, starts, wins, post position, weight and so on.

Another handicapper has figured out how many horses there will be in the U.S., starting with 7 million in 1970, which averages about one horse for every 30 people. By 1977 he predicts that the horse population will reach 10 million, when 82 million people are expected to ride a horse at least once a year.

Among those 82 million will be a sizable number of ex-4-H members who learned to ride, train, show and take care of horses as teenagers. They were in the national 4-H program supervised by the Cooperative Extension Service.

Enrollment in the 4-H horse program has jumped 600 percent in the last 10 years. Now 225,000 boys and girls between 9 and 19 years of age own or have access to one or more horses.

Two years ago, according to the Extension Service, nine of the 50 states reported horse program enrollment of less than 1,000 members. To-

day there are only four states in that category: Alaska, Delaware, Hawaii and Rhode Island.

But small in number does not necessarily mean small in performance. Last year one of six national 4-H horse scholarship winners was a Delaware girl.

Four states reporting the highest total membership enrollment ranging from 16,800 to 12,300 are: Tennessee, Ohio, Oklahoma and Michigan.

This marks the fifth year that the 4-H horse program is sponsored nationally by Merck & Co., Inc., of Rahway, N.J. The Company has cooperated with the Extension Service and the National 4-H Service committee in producing 4-H manuals on horse science and horsemanship.

The sponsor also provides funds for six annual scholarships of \$600 each, hosts the top state winners at the National 4-H Congress in Chicago and pays their expenses. The county horse medal last year was won by 7,846 young equestrians in 2,450 counties.

The 4-H'ers benefit not only from guidance of leaders in their horse clubs, but from

cooperation of horse breed associations.

Besides fun, comradeship and pride of ownership inherent in the 4-H horse program, there is preparation and conditioning for part-time jobs, or full-time careers in the fast growing equine industry.

Swine Feeding Study Underway

The second swine feeding study got underway last week at the High Plains Research Foundation.

Past swine studies at the Foundation tested the economics of raising swine in portable pens. Another feeding study, released in the High Plains Research Foundation's annual report in March compared feeding sorghum and Triticale as a base of feeding rations.

This study will compare wet and dry feeding rations utilizing sorghum based feeds.

The test will be in portable, raised slatted floor pens. Used in the study will be 100 head of swine from the Fred Breugel SPF swine operation at Dimmitt.

Special equipment necessary to meter and mix the wet feed or "gruel" has been installed for the study. According to Dr. Tom Longnecker, Foundation director, all water received by the 50 pigs on gruel feed will come from the feed and water mixture.

Let Me See by Sybil

Wasn't the rain nice? I couldn't imagine what the strange sound was early Monday morning, pounding on the roof and pouring off the eaves but it didn't take long to realize it really was RAIN. We've had so little of the wet stuff this year I had forgotten what it was like to lay and listen to it pattering down. Couldn't lay there long however, since my feet were wet. You see I sleep on the screened porch and my bed was slightly damp before the loud slaps of thunder stood on my uprights in a hurry, glanced at our new "inside" rain gauge and it was so much fun watching the glass fill up that I just went back to bed and didn't budge until the water reached the one-inch mark. Guess we've had a million rain gauges down thru the years which you mount outside on a pole. But every winter they freeze and break to our country cousins presented us with this new fangled kind not long ago. The rain gauge is mounted on the roof and the rain pours down through a plastic tube into the official gauge inside the house. We've been dying to see if it really did work, and Monday morning we got the chance. It's a dilly.

I'll bet Spearman is the only town in Texas which literally falls apart when it rains. Nothing works here if it gets wet. Especially the telephones. Our newspaper office phones were off duty all day Monday and the telephone in the back office rang constantly but we couldn't get anyone to answer! Several people tried to call our num-

ber and got Chambers Dry-goods every time. Out home when the phone rang it sounded 4 shorts! Like you were one of those country party lines.

Just after breakfast Monday morning I jumped in the shower and for the first time (I don't remember hearing it before) the tornado whistle began to blow. That was the quickest shower bath I ever had in my life and the first time I ever wore wet clothes to work. I made a fast sachet around the house and when I discovered no storm clouds I decided the fire alarm too must be acting up. Probably got water in it and was just sounding off about the rain. Anyway, now we know what the tornado alert sounds like.

Spearmanites are still taking off, and returning from vacations, and all have something unpleasant to say about the crowded highways. We have had more people taking early vacations this year, and if you are still planning yours, better hurry. Do you realize its just about time for school to start? Only a month from this weekend. Where has the summer gone? I don't know where, but I'm glad its about over. This has been a hot one.

If you travel in Texas, this little bit of info won't make you anticipate your trip; according to some statistics from Texas Automobile Dealers, there were 4,950,000 automobiles and 1,475,000 trucks on Texas highways in 1969. It takes them so long to figure, they don't have the 1970 totals yet! But when you start down the road, you'll meet everyone of them too!

How long has it been since your husband has softly whispered in your ear "honey, your slip is showing"? I bet its been a spell. With our new short skirts came the much shorter slips which seem to never show. With today's hemlines there is absolutely no way for a lady to bend, stoop, squat, relax, stretch, yawn or SIT. It hasn't been too long ago we were at this very nice dinner party and I was considering myself well dressed in a 4-year old dress (which used to be six inches longer). With the navy dress I had added a long string of pearls, dark navy hose and chunky heeled shoes which matched my chunky feet and I was feeling very chic and in style. I noticed my husband slowly making his way over

to where I was sitting and as he leaned down close as if to give me a peck on the cheek he whispered "honey your girdle is showing".

Maybe the girls my age won't despair much longer, all the latest fashion news tell us the hemlines will be down by fall. I don't know that I'll wear the middle-calf length, but at least I can dig out those I haven't yet hemmed up or cut off. Anyway, I'll be glad, for since that dinner party, I have sure been tired of, STANDING!!!

NEW ARRIVALS

Mr. and Mrs. Oran Clinton Burton of Gruver announce the arrival of a baby daughter on July 7th, 1970. Christalynn Dianne Burton was born in Hansford Hospital July 7th at 1:35 p.m. weighing 5 pounds and 11 ounces.

Linnie Bollinger On Dean's Honor Roll

Linnie Bollinger, daughter of Rev. and Mrs. G.R. Bollinger, Box 88, Spearman, has been named to the Dean's Honor Roll for the 1970 spring semester at Oral Roberts University in Tulsa, Okla. A total of 104 ORU students were named to the list. To be eligible for the honor roll, a student must have earned a 3.5 grade average or better while enrolled in 14.5 or more semester hours. Linnie, a freshman last semester, compiled a 3.5 grade average on a 4.0 scale.

Now in its fifth year of operation, ORU is a private, liberal arts university which offers the Bachelor of Arts in 13 majors, the Bachelor of Science in 5 majors, and the Bachelor of Music Education. Five pre-professional areas of study are also available.

Mr. and Mrs. Pat Gates spent Sunday visiting friends in Sayre, Oklahoma.

Cynthia Hutchison Completes Year as State 4-H Officer

Cynthia Hutchison, Spearman, Texas concluded her year's work as the State 4-H Girls' Vice Chairman recently at the 1970 State 4-H Council held on the University of Houston campus June 15-19. Cynthia flew to Houston four days previous to the official opening of the State Council to help plan the State Workshop along with the other State officers, before the new State Council members arrived.

Phil Hanson, Human Relations Specialist for Veterans Hospital spoke to the group. Recreation for the group was conducted by Iris Kalich, Assistant State 4-H Leader, Joanne Moore, Texas A&M. Art teacher conducted classes on tie-dyeing and batik.

Pennzoil United gives thirteen thousand dollars to the State 4-H Council each year to use at this workshop and to pay the expenses of 4-H representatives throughout the year.

After the business was concluded each day, the group enjoyed various entertainments--swimming, a night at the Astroworld and a banquet the last night.

The representatives from District I were Jane Hudson from Groom and Don Rader from Canadian.

The newly elected officers for 1970 were: Chairman-Randy Miller from Enburg; Girls' Vice Chairman-Bo Rose from Brackettville; Boys' Vice Chairman-Bill Bergfeld from Conroe; Secretary-Barbara Clavara from Divine; Information Chairman-Linda Stuhrenberg from Placidous.

PURSE WORKSHOP SET FOR JULY 31

A workshop for making paper mache purses will be held in the Homemaking Department of Spearman High School on July 30 and 31. Sessions will begin at 9:00 each morning and will be supervised by Mrs. Frances Hudson, Homemaking teacher.

There is no charge for the instruction. Come to the Homemaking Department any day after July 21st to see a display of purses, register for the course, and pick up a list of supplies needed. The department is open from 8:00 a.m. to 12:00 noon, 1:00 to 4:00 p.m.

An instruction class in sewing lingerie is scheduled at the Spearman High School Homemaking Department on August 13 and 14. Teachers will be representatives of Fabulous Fabrics in Lubbock. Instruction will be given in constructing gowns and robes, slips, and panites, and bras and girdles. This is a new sewing technique which will be of interest to anyone who sews. Fabrics will be available at the local fabric shop.

Registration fee for the 8 hour course is \$15.00 per person. Registration should be made with Mrs. Frances Hudson, Spearman High School, phone 3233 by August 10 to insure a sufficient number to have the course.

Hazelwood Reunion Held In Amarillo

Mr. and Mrs. Paul Hazelwood and children, Debbie, Mary Sue, Billy and Gregg and Mrs. Daphne Gates of Spearman attended a reunion of the Hazelwood family in Amarillo Sunday afternoon. The affair was held in the home of Mr. and Mrs. Clyde Hazelwood and daughter Sue in Amarillo. Also attending were Mr. and Mrs. Hugh Hazelwood and Mr. and Mrs. D.W. Hazelwood, Jr., all of Lubbock, Martha Hazelwood and Mrs. Jim Shelton and boys of Amarillo and Mr. and Mrs. Walt Chitwood of Pampa.

Rhonda Linn of Oklahoma City has been visiting relatives and friends in Spearman recently.

Swimming Lessons Will Begin July 20

Janie Beck, Marsha Schumann and Catherine Lyon will be instructors in a swimming class which begins July 20 for beginner and advanced swimmers.

Those interested in the course must register Saturday July 18 at the pool between 11:30 and 12:30. Cost of the lesson course will be \$7.50.

August Wedding Being Planned

Mr. and Mrs. G.E. Redwine announce the engagement and approaching marriage of their daughter, Wanda, to Mr. Dennis Kimbell, son of Mr. and Mrs. Phillip Kimbell of Whittier, California.

The couple will be married at 2 p.m. August 16 in the First Baptist Church, Spearman, Texas.

HOSPITAL NEWS

Patients in Hansford Hospital are: Thomas Gilbert, Cynthia Arnold, Esther Diaz, Vernia Faye Busby, Lillie Sloan, Cora Babbs, Henry Bentley, Roscoe Parks, John Cook, and Margaret Longoria. Dismissals were: Shirley Thompson, Maxine Cook, Dorothy Adair, Mike Dudley, Gloria Dudley, Lupe Sandoval and daughter, Marie Crawford, Cora Lindner, Anne Burton and daughter Jessie (Sonny) Keil, Cheto Anchando, Carmen Laird, Leroy McGarraugh, and Max Owens.

Mr. and Mrs. Edwin Simmons of Pampa were Spearman visitors Saturday. They called on Mrs. E.A. Greever who has been very ill.

Bridal Shower Honors Mrs. Kurt Shedek

You are cordially invited to attend a Bridal Shower honoring Mrs. Kurt Shedek, Monday, July 20. Come and Go from 10 to 8:30 p.m. Hospitality room, First State Bank. Witnesses: Mesdames: M. D. McLaughlin, Daniel Sheets, Elzey Vanderburg, Don Schumann, Dale Hawkins, E. J. Callaway, Jr., Glen Bohanan, Bill Swan, Archa Morse, Earl Ed Novak, and Bill Whitford.

FRIENDS INVITED TO SHOWER

Friends of Miss Madeline Stone are cordially invited to attend a bridal shower in her honor Saturday, July 18 at the home of Mrs. Roy Thomas, 710 Womble street in Gruver from 3-5 p.m.

Miss Stone is the bride-elect of Mr. Thomas Owen Bunn. The couple plan an August 15 wedding in San Antonio, Texas.

She is the daughter of Mr. and Mrs. Charles A. Stone of Gruver.

Arts & Crafts Guild Meeting

Mrs. Guy Fuller was hostess for the Friday July 10 meeting of the Arts and Crafts Guild.

Those attending the afternoon of china painting and visiting were: Mmes. P.A. Lyon, Sr., Fred Hoskins, Fred Daily, Clay Gibner, Bill Gandy and Guy Fuller. Mrs. Freeman Barkley was in the Fuller home Friday morning, as was Mrs. Ned Turner.

Mrs. Bill Gandy will hostess the Friday July 17 meeting of the Guild in her home.

Miss Brenda Wheeler, a junior student at Texas Tech, has completed the summer school term and is now at home with her parents, Mr. and Mrs. Ed Wheeler.

Mrs. Kizziar Is Hostess

The TEL Sunday School of the First Baptist Church met Saturday July 11 in the home of Mrs. Carl Kizziar.

The social and business meeting was opened with a prayer offered by Mrs. Billy Miller. Mrs. W.L. Mackie presented the devotional, from Psalms 34. The meeting was closed with a prayer by Mrs. J.L. Wagon.

Mrs. Kizziar served refreshments to Mrs. Edd Wilbanks, Mrs. Billy Miller, Mrs. Bob Baley, Mrs. W.L. Mackie, Mrs. Dennis Jones, Mrs. J.L. Wagon, Mrs. Otto Holland, Mrs. W.E. Hacker, Mrs. Lera Langston.

Smile And Warm Handshake Make This Man A Friend

Mel Marshall

You'll see him popping up here and there over the Panhandle with a wide smile flashing and his hand outstretched in hospitality.

A more amiable man you'll not find anywhere.

Most Spearman businessmen acquainted with Mel Marshall, roving writer, will tell you that.

And you'd have to look hard and far to find a better writer.

Take a look at his books and newspaper stories and you'll see this man's remarkable talent.

Mel is versatile as a writer, plain-spoken as a minister and sharp as a detective.

He comes through Spearman often, and leaves a bit of good cheer behind him with-

out fail. And the same is true in other Panhandle towns.

Living in Borger, he writes his books between travels; and through dedication, hard work, and there's no harder

work than good writing as some tend to doubt, he puts out one book after another.

He also writes regional stories for the Borger News-Herald.

Watch for his stories in that publication, and you'll be informed and entertained simultaneously. That's just one indication of a rare and original writing talent.

Mel writes Western novels, using the pen name: "Ray Cory". He goes by other names, too, with other books.

One he seems most proud

of these days is his recent cookbook, "The Delectable Egg". On this achievement he put his own name.

In his cookbook, Spearman housewives can find unique ways of cooking and treating eggs. It's incredible, what he's written about the craft of cooking eggs.

Look inside that book, you'll be astounded.

One of his Western books, titled "Longhorns North", also carries the Mel Marshall name. Now the book is being translated into Swedish.

This demonstrates this writer's high accomplishment. Mel maintains his office at his home and pounds his typewriter six or seven hours a day.

Any good writer will tell you that writing at peak enthusiasm and efficiency--with reflection periods of course--for only four hours amounts to a "day's work."

Originally from San Antonio, Mel moved to Borger in 1964 and has since become one of the Panhandle's leading personalities.

And it is well-known in the writing game that you find writers in "the darndest places"--You might even find one on top of some mountain in a cabin, writing. Or in a loft in New York City. Perhaps in New Mexico ghost town. Everybody in Borger is glad Mel's where he's at.

Writing is a hard, tough, competitive game, Mel said once. And it's a way of life not entirely understood by the public. Writers are different people--and bold in their actions, as is Mel; and some don't understand the nature and temperament of the writing game and those in it.

Mel's happy at his work. This shows in his work itself. And he's a great one for keeping other fellow-writers wondering about what he's writing about.

His writer-friends, you see, examining his past work, are curious to see what this man will do in future months and years.

For it's obvious that everything he does gets better and better.

ALL STARS PREPARE FOR DUMAS

The Spearman Little League All-Stars, under direction of Coaches Bill Douglas, Herschel Jones, and Calvin Bodey, are working hard this week, preparing for the Little League play-offs at Sunray, next Monday night. The local all-stars will meet their old rival, Dumas, in the 6 p. m. game at Sunray Monday night.

Members of the All-star team are; Roger Jones, Regie Robertson, Mark Fox, Don Cooper, Jeff Bedy, Roger Brown, David Deer, Bo Dunn, Calvin Bodey, Roy Avilla, Ricky Morris, Darrell West, Butch Reed, Philip Archer.

Alternates for the all-stars, are Eldon Allen and Ned Davis.

The all-stars will be clad in new uniforms for the big game Monday night, and the public is invited to come out each evening at the local little league diamond, and watch the practice sessions.

4-H Project Helps Span Generation Gap

There does not seem to be a generation gap between 4-H youths and their parents, according to reports from 4-H sources.

One of the reasons, observes a 4-H spokesman, is that 4-H boys and girls are always doing things, a requirement of 4-H membership.

Since 4-H is a "learn-by-doing" educational process, the youngsters decide what they want to do, talk it over with their parents, and DO it. And parents get involved too.

For example, members working on a field crops science project are learning how to make things grow where they did not grow be-

fore, or improving crops on the family farm.

Whether 4-H'ers live on a 1,000-acre spread or a 1-acre place, they study soil testing, planting, weed and insect control. They experiment with seed germination, effect of weather and light on plant growth, and different types of soil.

During the course of the project, parents learn new things, too. County extension agents and other specialists working for the Cooperative Extension Service supervise the 4-H program. What's more, dad or mother frequently volunteer as a project leader.

Helping to close the genera-

tion gap between industry and youth is the field crops science program sponsor, Amchem Products, Inc., of Ambler, Pa. Amchem officials, through the National 4-H Service Committee, are kept informed of achievements in the nationwide program.

The sponsor also provides annual incentive awards at the county, state and national levels. This year's awards consist of up to four medals per county, and a certificate of honor for the state winner.

Four national scholarships of \$600 each will be presented to the highest ranking individuals chosen from the four geographical sections of the U.S. during the 1970 National 4-H Congress, Chicago, next fall. The four national champions will be guests of Amchem.

Projects vary according to interests, needs and availability of land. A work unit entitled "Exploring the World of Plants and Soils" outlines fascinating experiments for non-farm 4-H members and rural youths as well.

Information on how to be a part of the 4-H scene can be obtained from the county Extension Service office.

Fritters are Versatile

Serve these banana fritters for breakfast, lunch or supper, as a main dish accompaniment or dessert.

Banana Fritters

- 1/2 cup sifted flour
- 1/2 cup corn starch
- 1/4 cup sugar
- 1 teaspoon baking powder
- 3/4 teaspoon nutmeg
- 1 cup mashed fully ripe banana (about 3)
- 1/4 cup water
- 1/4 cup corn oil

Sift together flour, corn starch, sugar, baking powder and nutmeg into bowl. Stir in bananas and water. Heat about 1 tablespoon corn oil in skillet over medium heat. Drop batter by tablespoons full into skillet, flattening slightly. Fry until golden brown on each side, about 3 minutes total. Add additional oil as necessary. Drain on absorbent paper. Makes about 14 fritters.

Texas Traffic Safety Recommendations

AUSTIN--A recommendation that drivers who are convicted of driving while-intoxicated have their licenses suspended has been submitted to the Governor's office.

Gov. Smith last week released copies of a special report, but had no immediate comment on it. He said he wanted a chance to study the matter more.

The committee report said, "Driving too fast for conditions and driving while drinking" are the major causes of fatal accidents and endorsed a recommendation made earlier by the Dept. of Public Safety to suspend the drivers licenses of those convicted of DWL.

Last year the Texas Legislature passed a law which suspends licenses if persons suspected of driving while intoxicated do not voluntarily submit to tests determining alcohol content of blood.

The state committee now has urged the DPS to do away with the 70-mph speed limit on narrow roads, farm roads or other areas "where drivers

are likely to look to the sign as their guide rather than to existing conditions which often make the maximum speed unreasonable and dangerous."

Other recommendations made included: mandatory liability insurance coverage for all drivers; investment income be included when insurance companies decide costs of their premiums; the state board of insurance strengthen its safe driver permit plan to more adequately regard careful and lawful drivers with lower rates and penalize those whose violations contribute to higher rates; give special attention to comprehensive insurance rates, the only category in which Texas has higher rates than any other state with a comparable number of vehicles registered.

The 17-page report, submitted for the Governor's traffic safety program said the current suggestions are "the best way to get the people of Texas to hold oreduce the rate of traffic accidents on our streets and highways."

You are cordially invited to attend the Open House to be held Saturday July 18th at Perryton Feeders Inc. 20 Miles EAST of Spearman.

Rebecca Hutchison Attends National Conclave

Phi Upsilon Omicron, the national honorary professional fraternity in Home Economics, recently held its twenty-sixth biennial Conclave on the Indiana State University at Terre Haute, on June 16-19, 1970. Representing Texas Tech University was Rebecca Hutchison, who was elected as the Omega Chapter President for the coming year of 1970-71. Rebecca is a Foods and Nutrition--Home Economics Education double major and will be a junior at Texas Tech University this fall.

While at Indiana State University the 48 college delegates were bused to Indianapolis for a tour of the Speedway. Each had a thrilling experience of completing one lap around the Indy 500 Speedway in a Volkswagen bus at the record-breaking slow speed of 40 m. p. h. Most surprising to those touring was finding a beautiful golf course in the middle of the track. The remainder of the 3-day Conclave was spent at numerous luncheons, banquets, and meetings to determine goals and programs for the coming 2 years. Each chapter plans annually a series of projects of service for the chapter, community, and Home Economics profession.

Qualifications for membership are based on scholarship, character and service. Each candidate must have a grade point average of 3.

MRS TOM ALLEN ATTENDED NRTA CONVENTION

Mrs. Tom Allen returned this week from Fort Worth where she attended the National Retired Teacher Association convention.

Mrs. Allen said 1,800 retired teachers were in attendance. Among those was her brother, J. A. Thomson, president of the Calif. association.

The legislative goal presented at the convention, a 45-point program, included Social Security, Medicare, retirement, health, consumer protection and national policy.

Mrs. Allen said all 50 states were represented. The most interesting and outstanding delegates were from Hawaii and Alaska. The Spearman woman said it was a very interesting meeting.

Mrs. Allen, who taught school 36 years before retiring in 1965, began her teaching career in Frederick, Okla. In 1934, she received her BA and BE degrees from Central State Teacher's College, Edmond, Okla.

Mrs. Allen taught for 15 years in the Spearman School system.

Mrs Frank Davis Presents Lesson On Independence

Mrs. Virgil Floyd was hostess for the July 13 meeting of the Dahlia Flower Club in her home. Club president, Mrs. A. F. Loftin, opened the meeting by asking Mrs. Fred Hoskins to read the quotation from the lesson.

Mrs. Guy Remy read the minutes of the previous meeting and they were approved by the club. A report was given from the Sunshine Committee on invitation by them during the month of June. The committee members for June were Mrs. John Bishop, Mrs. Deta Blodgett, and Mrs. Virgil Floyd.

Mrs. Frank Davis, lesson leader for the meeting, presented a very interesting program on Independence Day. She stressed the fact of how thankful everyone should be for the renewing of "Honor America Day", read parts of the Declaration of Independence and told of those who signed the document.

An arrangement of pink miniature roses in a miniature vase was displayed by Mrs. Major Lackey. She also displayed a floral specimen, a white Dahlia.

The meeting was closed with the reading of the club collect and the hostess served refreshments to 1 guest, Mrs. Lloyd Batson of Pampa, Mmes. Garrett Allen, Bob Baley, Deta Blodgett, Frank Davis, Major Lackey, Fred Hoskins, John Bishop, A. F. Loftin, Guy Remy, Earl Riley, Harry Sheedeck, and Jesse Womble.

Mrs. Mabel Edwards will host the July 27th meeting in her home.

mistic attitude that Benjamin Franklin once took when he was asked:

"What is the use of this new invention?" Franklin's reply was: "What is the use of a new-born child?"

Mr. and Mrs. Gordon Kirby and daughter of Midland visited in the home of his mother, Mr. and Mrs. W. H. Patterson, in Spearman over the July 4th weekend.

Mrs. Tom Mayes and children Tammy and Tracy of Rochester, N. Y. are here visiting her parents the John Pipkins, Mrs. Larry Stokes of Amarillo spent the weekend with them.

Mrs. W. A. VanCleave and daughter Ruth Jane of Portales, N. M. spent the week-end in Spearman visiting old friends. They are former residents.

Water Plan Is Meeting Some Opposition

The controversial Texas Water Plan due to be voted on again after initial rejection is meeting some stiff opposition from some Texas Ranchers.

Only recently a University of Texas ecologist questioned the "practicability" of such a plan--which would bring water to the Texas High Plains from the "muddy Mississippi", or as some have referred to it, the "sewer of North America."

The ecologist, Dr. W. Frank Blair, raised the issue of the quality of any water coming to the high plains via the plan. He also questioned the power source required to "revert the flow from Louisiana to the Texas High Plains."

He recently pointed out that the tremendous financial out-

put which would be necessary for implementation of the plan, hinting that monies might better be invested in enterprises involving weather modification, a practical recharge of underground pools, and better utilization of rain.

He made the foregoing statements during a meeting of the Texas and Southwestern Cattle Raisers Association June 12-13.

It was also said that the "cattlemen's biggest problem is convincing the urban areas that the present supply-demand system is essential to maintaining a dependable supply of quality beef at economic prices." He also said pressure is on to increase imports of beef--and that action would seriously cripple the U. S. cattle industry.

Leadership appears to be the art of getting others to want to do something you are convinced should be done.

Why?

There is no evidence either from experiment or observation that questions the scientific fact, yet the "scientific" theory is widely accepted. Even though the fact and the theory disagree, both are almost universally taught to be true.

Why?

Blind Faith

While science has determinedly destroyed all superstitions and mystical faiths it ever encountered, and done so often with open scorn and ridicule, how could scientists ever agree to a theory that conflicts with one of the most basic axioms of their thinking?

That's the worst kind of faith there is -- believing something to be true when the facts clearly indicate it is not so. It is for alleged "blind faith" like this that Bible-believers have been laughed at.

What are the scientific alternatives to this paradox? Basically there are two.

First, it could be held that the universe is not a closed system, that energy and matter

from beyond our universe have continually been entering to develop and sustain its order and complexity. Evidence that this has ever occurred, however, is not convincing--and it is certainly not occurring now.

Second, it could be held that some force has been operating in the universe to develop and sustain its complexity and order.

This second alternative is what the evidence most logically suggests, for it is abundantly clear that natural forces could not have this effect.

What could this mysterious force be that created the complexities of our universe? The Bible says it is God: "He commanded, and they were created." (Psalm 148:5).

Logical Outcome

It is surprising, isn't it, to discover that a belief in God should be a logical outcome of the study of science. After all, many scientists have been telling us the opposite for over a hundred years now.

Why has a belief in God become so rare among scientists today? I think it is because science has made it appear reasonable for people to do just about anything they want to -- and yet the logical outcome of a belief in God is that God made us and we should do what God wants us to.

And most scientists don't want to.

Willful ignorance is a high price to pay for independence. You wouldn't pay it if you were not also ignorant of the love of the God whom you want to be independent of.

Is This Theory Scientific?

By DAVE LLEWELLYN

Here is a scientific fact: Simplicity and chaos never develop by themselves into complexity and order in a closed system. Indeed, unless energy from an outside source is introduced into a complex and orderly system, it will tend to degenerate into simpler forms and chaotic relationships.

Here is a scientific theory: the universe, as a closed system, began as a disorderly mass of atoms and elements and developed by natural principles and without outside intervention into an extremely complex and orderly unit.

There is no evidence either from experiment or observation that questions the scientific fact, yet the "scientific" theory is widely accepted. Even though the fact and the theory disagree, both are almost universally taught to be true.

Why?

Blind Faith

While science has determinedly destroyed all superstitions and mystical faiths it ever encountered, and done so often with open scorn and ridicule, how could scientists ever agree to a theory that conflicts with one of the most basic axioms of their thinking?

That's the worst kind of faith there is -- believing something to be true when the facts clearly indicate it is not so. It is for alleged "blind faith" like this that Bible-believers have been laughed at.

Brent Kirkland Is Visiting Here

Brent Kirkland is spending this week in the home of his grandparents, Mr. and Mrs. Sam Patterson. Brent is visiting while his parents, Mr. and Mrs. Jimmy Kirkland, move to his new job at Friendship, Texas, in the Wolfsoth community near Lubbock. Jimmy will coach girls basketball in the Friendship school which is an AA high school. This weekend Mr. and Mrs. Kirkland, Belinda Thompson of Spade a member of the team coached, by Jimmy, and Sheila Patterson will attend the All-Star girls basketball game and the coaching clinic at Brownwood.

Mrs. Louis Karnes of Spearman was admitted to Northwest Texas Hospital in Amarillo July 12 for surgery due to a recent car wreck.

Peculiar Patents

Could you get a patent on an alarm clock that squirts cold water down a sleeper's neck? A man in Chicago did.

What about a balloon drawn through the sky by eagles? Or a stickpin made of candy, to be eaten after use? Or an automatic hat tipper for lazy gentlemen? These, too, all won patents.

To the inventor's neighbors, such ideas might seem pretty silly. And our patent law does say that, for an idea to be patentable, it must be "useful."

However, in deciding what is useful, the law is very tolerant

indeed. The law remembers (even if the neighbor's don't) that people laughed too at Alexander Graham Bell's first telephone and at the Wright brothers' first airplane.

True, you cannot get a patent on something that has no use at all. For example, an inventor claiming to have created a "perpetual motion machine" was turned down on this ground. The ruling pointed out that the machine could not possibly work, because it was contrary to the laws of nature.

Nor can you patent a device which is useful only to do evil. Thus, a court rejected a patent for a method of faking the appearance of tobacco leaves for the purpose of making them look better than they really were.

The judge said: "Congress did not intend to extend protection to (inventions) which confer no other benefit upon the public than the opportunity of profiting by deception and fraud. The invention must be capable of some beneficial use as distinguished from a pernicious use."

But for most inventors, the test of usefulness can be passed without too much trouble. The law generally takes the same opti-

THE MISS WHEATHEART OF THE NATION BEAUTY CONTEST WILL BE HELD IN PERRYTON, TEXAS. MANY PERSONS IN THE HANSFORD COUNTY AREA HAVE ASKED ABOUT THE RULES, AND DETAILS ON THE CONTEST. THEY ARE PRINTED BELOW.

1970 Wheatheart Will Receive

\$1000⁰⁰
College Scholarship

First Runner-Up Receives

\$500⁰⁰
College Scholarship

Second Runner-Up Receives

\$250⁰⁰
College Scholarship

One of the outstanding beauty contests in the Southwest, the selection of the Wheatheart of the Nation has been a highlight of the area since 1947. We invite entrants in the Wheatheart of the Nation Contest, staged in Perryton, in the center of the nation's wheat belt.

ELIGIBILITY:

Any single girl 16 years of age or older, with a good reputation and character, properly endorsed by any civic club or business firm is eligible for this contest.

The 1970 Wheatheart of the Nation will be selected on Saturday evening, August 22 in the air conditioned Perryton high school auditorium. Contestants will appear in the Perryton Celebration parade, will attend a noon luncheon, attend a practice and interview session in the afternoon, and will be judged in formals and bathing suits in the contest. Judging, by out-of-town judges, will be on the basis of beauty, personality, poise and figure. A recent photograph of each contestant is required, in order that proper publicity may be given. A short synopsis of the life of each girl will be appreciated. Only one contestant will be permitted from each town or city.

ENTRY DEADLINE AUGUST 1, 1970

Citizen Awareness Is Urged Here

The nation is obviously in serious trouble.

With crime, even though crime is virtually nil in this community, the spiralling rate of turmoil elsewhere and the obvious slackening of law and order in big cities of the U. S. indirectly affects every citizen everywhere.

Spearman Police Chief Leland Wood last week gave a local reporter FBI statistics on the crime explosion, and urged awareness of the seriousness of the country's problem.

He indicated the problems of the nation are the problems of citizens of Spearman, too. FBI reports issued recently show that "crime in the U. S. is increasing at a dangerous rate... a particularly tragic fact of the crime and violence problem is the increasing involvement of young people."

The latest nationwide tally shows serious crimes occur every seven minutes; violent crimes, one every minute.

A further breakdown shows:

murder, one every 43 minutes; forcible rape, one every 19 minutes; assault, one every 2 minutes; larceny, one every 2 1/2 minutes; burglary, one every 20 seconds; larceny, one every 30 seconds; and auto theft, one every 48 seconds.

Texas lawmen warn that crime in Texas' big cities have risen similarly.

However, thanks to those Texas lawmen, crime in our state has not reached the epidemic proportions it has in other areas. It's that Texans engaged in law enforcement work "just don't put up with what's going on elsewhere," as one officer recently stated.

There is yet another view that, "what's going on in other big cities--riots and unbelievable high crime rates--will eventually happen here."

Further, if it does happen here, Texas authorities are reported to have readied effective--hopefully--battle plans "to meet anything that comes up."

To give citizens an overall view of crime occurring in the country, here is a breakdown of crimes committed in 1967, as compared to figures recorded by federal officials in 1960:

Murders: 1960, 9,000; 1967, 12,100.
 Forcible rapes: 1960, 16,900; 1967, 27,100.
 Robberies: 1960, 107,400; 1967, 202,100.
 Assaults: 1960, 152,000; 1967, 253,300.
 Burglaries: 1960, 897,400; 1967, 1,605,700.
 Larcenies: 1960, 506,200; 1967, 1,047,100.
 Auto thefts: 1960, 325,700; 1967, 654,900.

The FBI reminds "it is the responsibility of every community to insure respect for law, order and authority."

The annual Faus family reunion will be held in Spearman at the Community Building on July 26. The family invites any who would like to visit to come during the afternoon.

Two Bills Are Okayed By House

Two bills affecting Panhandle residents have been approved by the House of Agriculture Committee.

One was sponsored by Congressman Bob Price and will permit Farmers Home Administration to make maximum farm and ranch purchase loans of \$100,000. Current limitation is \$60,000.

Price pointed out that few economical farm or ranch units can be purchased for less than \$60,000. "The Agriculture Department has stated that the average investment for 200-400 acres of land alone might run from \$40,000 to \$180,000. This means that the present relatively high

acquisition and development costs of land render the \$60,000 FHA loan limit obsolete. This increase is really quite modest when viewed in the light of farm sector credit needs," Price added.

A portion of the bill to raise the operating loan limit from \$35,000 to \$50,000 was deleted by the committee on a 15 to 9 vote.

The second bill will permit custom meat processors to sell inspected meat products without losing their custom processing exemption.

"At present the law prohibits a custom processor from selling so much as a can of soup made from meat even though the meat and product has been fully inspected.

Blazing Lights and echoing sound will roll through the Palo Duro Canyon again in the Fifth Season of

TEXAS

A wave of singers and dancers sweeps across the stage in the opening of "TEXAS", the musical drama of Panhandle history. This burst of movement and familiar song brings back the sights and sounds of the 1880's. During a performance, the company of 75 actors and singers reaches into the past to reveal the struggles of the settlers, the strengths of the cowboys, the land love of the Indians, and the burials, politics, business, and celebrations. Great lights and soaring sound recreate the blazing of a prairie fire, the crash of thunder and the flash of lightning as background for this story of battles against change and dust and drought and storm.

When working on the script for "TEXAS", the author, Paul Green, wrote: "Palo Duro is in my thinking day and night... it's great voice speaking... the tempest of wind and weather... man, the valiant striver... the warm creative earth... the lousy buffalo skinner of the late '70s would deride such words -- but -- it's his story too."

Mr. Green is the author of several other celebrated outdoor dramas: THE LOST COLONY, THE COMMON GLORY, THE STEPHEN FOSTER STORY, CROSS AND SWORD, AND TRUMPET IN THE LAND. Isaac Van Grove arranged the Music for "TEXAS".

ON THE WAY: In Canyon, visit the Panhandle Plains Historical Museum and the campus of West Texas State University. The road to the theatre is paved. IN THE PARK: Admission to the park is \$1.00 per car. After 6 PM, theatre patrons are admitted without charge. There are spectacular drives in the canyon, and provision for camping, hiking, horseback riding, for seeing the canyon spread-out from a sky lift and up-close from the Sad Muskey Railroad. The Goodnight Trading Post has food and souvenirs. AT THE THEATRE: Paved free parking, reserved seats, drinks, snacks, souvenirs, and photographs are available. Barbeque dinner is served before each performance from 6:45 to 8 PM.

is produced by the Texas Panhandle Heritage Foundation, a non-profit corporation, in cooperation with West Texas State University. It plays in the Pioneer Amphitheatre built as a memorial to the people of the Panhandle in cooperation with the State of Texas. It has received wide national recognition.

Reflections in Beauty

BY AUBREE McDONALD

Poise, self-confidence and a beautiful complexion are magic words to any teenager.

Complexion problems appear, all too often, just when she becomes acutely aware of her personal appearance and begins to take a real interest in make-up, hair-do and fashion.

If the skin condition is severe or if acne is suspected, a dermatologist should be consulted. But if her problem seems to be superficial, externally-caused blemishes, Fashion Two Twenty's Formula Nineteen will help her achieve that pretty complexion that means so much to a girl's self-confidence.

This marvelously beneficial lotion is designed to combat skin difficulties caused by improper cleansing, a primary cause of blemishes.

Teens often have over-active oil glands which secrete excess oil. If the face is not kept scrupulously clean, the pores tend to become clogged with oil and dirt, thus inviting blemishes.

Diet is also a major cause of teenage skin problems. Along with a proper cleansing routine with Formula Nineteen, I also advise teens to avoid rich, oily foods such as potato chips, French fries and cola drinks.

Use Formula Nineteen in place of soap and water morning and night. The proper way to cleanse your face is to moisten a cotton square with Formula Nineteen and work from the chin up to the ears using an upward and outward motion. For best results and to

insure the proper motion, keep your elbows raised while cleaning.

This medicated lotion, gently, yet thoroughly, removes oil, foreign matter and make-up. Oily secretions are absorbed and the complexion is left with a lovely, glowing freshness.

Formula Nineteen is available in an unbreakable pink tulip-topped bottle that any young woman will appreciate. Equally effective for the young man who is troubled with blemishes, Formula Nineteen also comes in a large 16-ounce bottle.

If you have any questions regarding beauty or grooming, I will be pleased to answer them with a personal letter. Address your correspondence to me, c/o Fashion Two Twenty, Box 195, Aurora, Ohio 44202.

A HAPPENING

The actions, attitudes and opinions of today's young people present a paradox to many of the older generation. On the one hand they may seem carefree and unconcerned, while showing great courage in support of beliefs which may be unpopular among the majority of the population.

Many may disagree with the demonstrated opinions of certain segments of our youth; nevertheless, their actions and opinions cannot be denounced without consideration. Tolerance and understanding may bridge the generatin gap; intemperate rejection can only widen it.

holt news

Mrs. Bertha Jenkins and Kathy Jenkins recently visited Mr. and Mrs. Bob Tevebaugh of Claude.

Mr. and Mrs. Dan Jackson were Thursday night guests of her sister, Mr. and Mrs. Bill Burnett of Vinson, Okla. On Friday the Jacksons attended the old Settlers Re-union in Mangum, Saturday Mr. and Mrs. Dayle Jackson and boys and Mr. and Mrs. Dan Jackson attended the Pioneer Re-union in the Sulphur Community.

Mmes Deta Blodgett of Spearman and Nolan Holt attended over the week-end the International China Show in Okla. City. The artist comes from all over the United States.

Mrs. Julia Davis of Portersville, Calif., and Mrs. Medlin Patterson were given a Birthday Party Saturday afternoon July 11 in the home of Mrs. Patterson. Gifts were

given to the honoree and refreshments were served to Mr. and Mrs. John Sims of Virginia, Mrs. Martha Batton of Spearman, Mrs. Julia Davis of Portersville, Calif., Mr. and Mrs. John Campbell, Owen Pendergraft, Phil Jenkins, Bertha Jenkins, Berda Holt, Dan Terry, C. W. Kirk, Medlin Patterson and Maude Rosson.

Mrs. Blanch Lamb, Mrs. Fromy Close, and Mr. and Mrs. Joe Mac Close and family of Spearman returned home Saturday from a week-end vacation. They visited the Ervin Lambs at Springer, N. M. The Closes also visited Mr. and Mrs. Jerrell Harris and family at Olathe, Colo.

Mr. and Mrs. John Sims of Virginia spent the week-end visiting his grandmother Mr. and Mrs. Cecil Batton of Spearman. The Sims were enroute to Norman, Okla. where he will enter College this fall.

Mrs. Julia Davis of Portersville, Calif. was week-end guest of Mr. and Mrs. Owen Pendergraft.

Mr. and Mrs. Pate Grigsby, and Mrs. Mabel Edwards of Spearman, Mrs. W. A. VanCleave and Mrs. Jane Lee of Portales, N. M., Mrs.

Bertha Jenkins, Mr. and Mrs. Wesley Jenkins enjoyed home made ice cream and cake Sunday afternoon with Mr. and Mrs. Phil Jenkins and Kathy. It was Wesley's birthday.

Mrs. Hazel Morton of Spearman was Saturday night guest of her daughter Mr. and Mrs. Hermon Lemons of Panhandle. Sunday guest of the Lemons were; Mrs. Larene Powell of Amarillo, Bobby Marton of Denver, Mrs. Joe Rutledge of Portland, Oregon, Mrs. Hazel Morton of Spearman, and Mr. and Mrs. Raymond Kirk.

Mrs. Mabel Edwards of Spearman was hostess to a salad supper and "42" party Saturday night. Guests were Mrs. W. A. VanCleave, and Mrs. Jane Lee of Portales, N. M., Mmes. Mildred Chamberlain, Margaret Shedeck, Altha Groves, Gladys Richardson, Willie Wallis, Myrtle DeArmond, Mathilda Entekin, Sadie Hoskins, and Alta Morse of Spearman.

Lynn Leverton of Dallas was Friday luncheon guest of Mr. and Mrs. Dayle Jackson. In the afternoon Lynn visited his grandparents Mr. and Mrs. Dan Jackson.

Sunday luncheon guests of

Mr. and Mrs. Owen Pendergraft were Mrs. Julia Davis of Portersville, Calif., Mr. and Mrs. Richard Gaines and Peggy.

Mmes. Ila Cook and Abbie Wynn of Higgins visited from Tuesday to Sunday with their brother, Mr. and Mrs. John Bishop of Spearman.

The Holt Community got a little over half an inch of wonderful rain Monday morning.

HOWARD GARNETT IMPROVING FROM GUN SHOT WOUND

Mrs. Stanley Garnett remains in Downsville, La., this week where she has been for the past several days at the bedside of her son who received severe injuries to his right leg in an accident 2 weeks ago.

Mr. Garnett reports that his son, Howard, was with a hunting and fishing party and was accidentally shot in the calf of his right leg. Howard was hospitalized for several days and underwent 3 surgeries to repair the shredded leg muscle. Physicians say he will have at least one more surgery and skin graft and that he will not be able to use the leg for quite some time.

Howard Garnett, 28, has been living in Downsville, La., with his grandmother for the past 2 years.

GOLF TOURNEY TUESDAY

Everyone come out and play in the Scotch Double Golf Tourney July 21. Tee off is at 6:30. Entry fee, \$1.00

Future Farmers Heading For San Antonio

Three Spearman Future Farmers, will attend the state convention, to be held at San Antonio, July 15-17. Pat Sloan, Jim Kunselman, and Seth Ralston left Tuesday of this week.

Three Spearman Future Farmers, will receive the Lone Star Farmer award at San Antonio; they are: Frank Wilmeth, Pat Sloan, and Jim Kunselman.

All of these boys are outstanding Future Farmers and will bring back a complete report from the State Convention.

POST OFFICE REDUCING CITY DELIVERY

The Dallas Region Plan for Fiscal Year 1971 which began July 1 concerns Saturday delivery services. Effective July 18, Saturday, delivery will consist mainly of preferential or priority mail. There will be no parcel post delivery or afternoon truck collection services on Saturdays. Collections on Saturday will be made only by the relay carrier in the morning and by the foot carrier during the normal course of delivery.

All mail should be deposited at the post office and not in the collection boxes on Saturdays, Sundays, and holidays.

City Residents Have Enjoyed Alaska Trip

Mr. and Mrs. C. E. Blackburn, who have been on a three week tour of Alaska, are expected home this week.

The Blackburn's daughter, Mrs. Bill Cessun, whose home is in Anchorage, sent them plane tickets to fly up and visit with her and see the country. This was the first plane ride for Mr. and Mrs. Blackburn, who have sent many picture post cards back saying what a wonderful time they were having.

Spearman Citizens use A Lot Of Water

Spearman residents have been using water during July to the tune of 476 gallons per day, per person. Take a family of three or more, and this is quite a lot of water.

It has been a hot, dry summer, but the peak water usage for the first 13 days in July was only 1,935,700 gallons. This was on July 7 when thermometers registered 104 degrees. This is compared with July 4 of last year when city water meters registered 2,096,900 gallons. But comparing this year to last, Spearman water users have been using much more this year. The first 13 days of July this year the city's total water use has been 17,757,000. Last year it was only 14,472,200.

Several days of 100 degree heat last week pushed usage of city water very high, but no where near capacity.

Spearman's 7 city wells can produce approximately 5 million gallons in 24 hours. The city has two overhead storage tanks. The one down town holds 75,000 gallons. The one in the south part of the city holds 250,000. Ground storage tanks can store 700,000 gallons. All the water that can be pumped, plus all the water that can be stored adds up to 6,025,000 gallons supply and reserve which is considered more than adequate for the city's population.

Spearman enjoys one of the best underground water systems in the State, with its 7 wells pumping water from the Ogallala water sand which underlays most of the High Plains area.

It takes a lot of water to keep a city going. Watering lawns and shrubs, cooling air conditioners, to bathe, do the washing, cook, wash dishes-- and fight fires. Every time a toilet is flushed, over 7 gallons of water is used.

The demand for water has been extra heavy because of the lack of moisture, and citizens have been pouring

water to lawns and gardens. Although Spearman did receive a total of 4.34 inches of moisture during June, 3.65 inches of this fell in about a 2 hour period on June 15th and most of it just ran off into ditches and did very little good except to fill up lakes and ponds.

July thus far has produced a total of 1.59 inches of rainfall. It is interesting to note the drastic reduction of water consumption just after a rain. Up to 1,935,700 gallons of water daily had been used by Spearman citizens beginning the first of July. On July 9th, just under a half inch of rain fell and the water use fell to 953,500 that day. Monday of this week we received 1.25 inches of rain and the total number of gallons of water used fell to 530,000 gallons.

The city of Spearman has a long range water program which will take care of the city water needs for many, many years to come. This program includes the securing of water rights on 200 acres of land belonging to John Sell, just north of town. This acreage was tested before rights were purchased, and revealed that plenty of water was available for at least 4

wells. Just across the road south of this property, the city purchased 17 acres of land from Mr. R. L. McClellan with the right to drill one well. "As long as our water level holds, we do not foresee drilling any extra wells probably for the next 20 years," City Manager Foshee said this week.

Spearman's water system is in good shape, a tribute to far sighted planning by city officials a long time ago. Spearman has plenty of water, even at a 4 million gallon per day usage... and we've never reached a need for this much.

Frank Lemons To Abilene

Coach Larry Wilson announced this week, that he will accompany Spearman Senior, Frank Lemons, to the State AAU Track Tournament, in Waco. Frank will run in the 100 yard dash, and the 220, on July 25th. Winners in this Abilene meet, will go to the National AAU tourney at Knoxville, Tenn.

Photographer Rice, Formerly of Spearman Still Well-Known

Not so many years ago, a young man named Don Rice came traveling through Spearman, from Oklahoma. He had been "shooting pictures" on his own, or freelancing, as is known in the trade, and already was a real "pro" in his work. He sought a new place where he could take and sell his photos.

In Spearman he found that place. Many folks around town remember him still, as he visits from time to time, shooting photos that often win awards. The former Spearman photographer now works at his profession in Borger south of here, and has become well-known across the Panhandle and the state for his photography.

His versatility is obvious, if you spot his work in the Borger News-Herald. He shoots everything from fiery car crashes to beauty queens in wheat fields. Some of his old friends in Spearman like to keep up with him and to watch him work. And they'll be glad to hear that he returned last week from a national photographers' meet held in Los Angeles.

Don and wife, Linda, and son, Donald Lynn, popped back into the Panhandle Sunday after a whirlwind, fun-filled trip across-country. What impressed Don the most, he said, was "a place to surf on water right smack

in the middle of the desert." "Who'd ever expect to find something like that in a place like that out west?" he asked with a chuckle. He didn't try surfing there; he had to many other sites to see and things to do. But he watched the activity for a time.

This was just one of many yearly trips Don and his family have taken to various photography seminars around the nation. On these trips he makes valuable acquaintances and gets "to see the country."

Once, he traveled right through the strife-ridden, riot-torn South to attend a meet on the East Coast.

In his quiet-mannered way, he said he "just drove through and observed and shot pictures and 'people watched'."

After all, that's his job. He won't miss the chance to get a good picture--when it comes his way. You won't see him without his camera around his neck--and that's just part of why he's won so many statewide awards.

He'll tell you in the newspaper game, sometimes stories happen literally in front of you, and the pictures are there, if you keep your camera loaded and ready at all times, as he does.

If you rifle the files of Panhandle newspapers, you'll find much of his work staring right at you.

And through the years, he's

made many Panhandle newspapers, you'll find much of his work staring right at you. And through the years, he's made many Panhandle friends.

Those friends, too, will tell you once Don Rice is your friend... he's your friend...

He's notably one of Texas' crack photographers, as many of the photos he's shot here in Spearman show...

Committee Studies problems of Press And Lawyers

AUSTIN--The University of Texas has appointed a committee to study mutual problems of the professions of journalism and law.

The committee may eventually come up with solutions concerning disagreement about what should or should not be printed in Texas newspapers and publications between the two professions.

Traditionally, the Fourth Estate--as the newspaper business often is called--sets its own standards. The committee will consider that.

The committee consists of three journalism professors and three law professors, selected by Dean Wayne Danielson of the School of Communication and Dean Page Keeton of the School of Law.

Industry Must Meet Demand

NEW YORK--The Oil industry must spend double the amount it did during the 1960's on exploration and development if it is to meet the growing worldwide demand during the next decade.

That statement resulted from a survey prepared by the Chase Manhattan Bank of New York.

The statement said, "The pace of spending may have to increase faster than the rate of market growth because of continued inflation, additional investment required for the purpose of controlling pollution and a higher level of leasing costs throughout the world."

The bank also reported that while the petroleum industry's net income dropped and the rate of return declined, 1969 taxes were more than twice as large as they were five years ago.

Eddie Gale Martin registered this week for the final summer school courses at WTSU where he is a Junior student.

NEW GRAIN LOAN STRUCTURE DESCRIBED

COLLEGE STATION--No longer is there a terminal loan rate system for "terminal price oriented grains." The old system has been replaced by a more efficient, more economical county loan rate structure, John J. Seibert, Extension grain marketing specialist, said.

The new system eliminates terminal loan rates and establishes county rates that consider terminal market price relationships, cash prices received by farmers, export marketing patterns and other factors which involve grain marketing.

The system will be in effect for the 1970 crop of grain sorghum, wheat, barley, rye, and flaxseed.

Such a system will have the concept of "county plus" with respect to determining loan and settlement values for grain. This is in contrast to the "terminal minus" previously used, the specialist said. County loan rates are available through the county

ASCS and county agents.

A USDA release on grain sorghum stated that in past years, county price-support rates for grain sorghum were established by subtracting from the applicable terminal rate the domestic interstate rail freight rate or export freight rate and truck receiving and loading out charges listed under the Uniform Grain Storage Agreement (USGA). Changing conditions in marketing, transportation and international trade have made the terminal-based rate obsolete.

Under the new system, grain sorghum moved by rail to warehouse storage will be subject to the freight paid-in plus USGA truck-receiving and rail loading-out charges which will be added to the rate for the county of origin.

When it is shipped by truck or barge, the loan will be based on the county rate where stored; and, when shipped by truck or barge to a designated terminal warehouse, the rate will be that of the county in which the warehouse is located plus seven cents per hundredweight.

The revision in the seven cent minimum price markup will bring the minimum re-

sale price for grain sorghum and corn more nearly in line with the anticipated future relationship between the national average loan rates for these two crops.

Adjustments of county loan rates from the 1969 level were made to more nearly reflect historical price relationships, to minimize sharp price breaks between counties, and because of various freight rate changes. For the most part, the 1970 county loan rates are unchanged from the 1969 rates in the major producing areas of Nebraska and Texas, while some county rates are decreased one to two cents in Oklahoma and Kansas, and increased one to six cents in California.

LADY GOLFERS WIN LOW AT LIBERAL MEET

Three Spearman women shot low-gross, first place at the Tri State golf meet in Liberal, Tues. of this week.

The three local sharp shooters were, Ann Sanders, Cricket Giles, Bertha Salinas.

These three women are outstanding golfers.

It's A Gold Season

Gold is everywhere this Summer. It's being used to enhance plain and fancy outfits, on chains, belts and pins.

For the personal touch, attention-getting monogrammed pins are definitely "IN". This one, for instance, is exquisitely designed, carefully polished 18K gold plate and shows off three initials, making it a great gift or for personal use.

If your fancy this Spring turns to thoughts of beautiful accessories, and you can't find it locally, write down your three initials (underline the initial of your last name) and send direct to the manufacturer. Check or money order should be directed to the Roman Company, for six dollars and 50c postage, Dept. D, 400 Mansion House, St. Louis, Missouri 63102.

You have a chance to change your mind -- your money back is guaranteed. Sorry, no "X-Y-Z".

Visiting in the home of Mr. and Mrs. J.L. Pierce in Spearman this month were: Mrs. Pierce's mother Mrs. Julia McManus of Big Springs, Texas, her sister Mrs. Rosie Pierce and children, David, Mike, Calvin and Richard of Clatskanie, Oregon, her sister Ruby Oakley and children, JoSan, Julie, Dixie, David and Susan of Canoga Park, Calif, and sister Phyllis Mann of Booker.

Weekend guests in the Jim Davis home included his sister, Mr. and Mrs. Burl McClellan and Luanne of Seminole, and his brother, Mr. and Mrs. Bill Davis and five children of Plainview.

Mr. and Mrs. J.D. Wilbanks hosted an ice cream supper Saturday night. Guests included Messers and Mrs. Max Baggerly, Billy Miller, Bill Walker and Muriel Fryer.

NOTICE TO ALL PERSONS HAVING CLAIMS AGAINST ESTATE OF ORVILLE W. MATHEWS, DECEASED

Notice is hereby given that original letters testamentary upon the Estate of Orville W. Mathews, Deceased, were issued to me, the undersigned, on the 9th day of March, 1970, in the proceeding indicated below my signature hereto, which is still pending, and that I now hold such letters. All persons having claims against said estate, which is being administered, in the County of Hansford, are hereby required to present the same to me respectively, at the address below given, before suit upon same are barred by the general statutes of limitation, before such estate is closed, and within the time prescribed by law. My residence is 3603 Linda, Amarillo, Texas 79109, and my business and post office address is Porter R. Underwood, Jr., 304 Amarillo Building, Amarillo, Texas 79101.

Dated this 14th day of July, 1970, Porter R. Underwood, Jr., Independent Executor of the Estate of Orville W. Mathews, Deceased, #1273 In the County Court of Hansford County, Texas.

GARAGE SALE Fri & Sat, July 17 & 18 at 1109 So. Townsend St. Itp

Mary Ellen Barkley Kinkland of San Antonio is in Spearman visiting for two weeks with her mother and father Mr. and Mrs. Freeman Barkley.

Mrs. Bob Phillips and son have been visiting with Mr. and Mrs. Allen Pierce while Bob is at ROTC camp at Lawton, Okla.

Mrs. Lloyd Batson of Pampa visited her sister Mrs. Frank Davis of rural Spearman this week.

Breezy Cox, and son Curtis check cattle at new Perryton Feeders feedlot.

HELPFUL HINTS FROM ME, TO THEE
By Vivian Warminski
Hansford Co. Home Demonstration Agent

Improving the flavor of chicken is almost an impossibility. About all you can do is make it taste differently from the last time.

You will particularly enjoy experimenting with broiler-fryers during July. The U. S. Department of Agriculture reports them plentiful.

Besides being abundant, broiler-fryers are convenient to fix, too. They are readily available whole or cut into halves, quarters or pieces. There are fresh-chilled chickens plus easy to store, quick-frozen birds. Even families of two can enjoy eating-perfect broiler-fryers, as they come in weights from 1 1/2 to 3 1/2 lbs. When shopping for chicken, follow these pointers from USDA's Consumer and Marketing Service:

1. Look for the USDA shield for quality and the official round inspection mark for wholesomeness.
2. Allow 1/2 to 1 pound "ready to cook" poultry per serving, depending upon kind of poultry and method of preparation.
3. In selecting frozen poultry, be sure wrappers are not torn or broken and the poultry is still solidly frozen.
4. Select the poultry class to suit the desired cooking method.

With the barbecue season now in full swing, it's a perfect time to have barbecued chicken. For barbecuing, select broiler halves or disjointed chicken parts. If you have a revolving spit, though, several whole birds can be threaded on the skewer. Thighs, drumsticks, whole legs, wings and breasts are the most popular portions of the disjointed chickens for barbecuing. Many homemakers reserve the backs and necks for inside cooking and transform these parts into tasty chicken casseroles and soups. Giblets also can be barbecued. Simmer gizzard about 10 min-

utes in slightly salted water, cut into halves or quarters and thread along with the heart and liver on a small metal skewers. Place the giblets over heat about 10 to 15 minutes before serving time. Barbecued giblets make excellent hors d'oeuvres.

Barbecue Sauce: An especially flavorful barbecue sauce can be prepared ahead of time. Pour contents of a large bottle of seasoned barbecue sauce into a sauce pan, add a stick of butter or margarine and a quartered clove of garlic. Simmer ingredients about 30 minutes, until as thick as you desire. Brown chicken on all sides before brushing on the barbecue sauce.

One problem facing the homemaker after serving chicken is what to do with the leftovers. Here are some ideas for using up leftover chicken in tasty ways.

Saucy Chicken Sandwiches make fabulous eating. Place two slices of buttered toast on a warm plate. Cover each with layers of thinly sliced cooked chicken, tomato and American cheese slices. Top with hot mushroom soup sauce. Garnish with parsley.

For a tasty fruit salad dressing, mash one ripe banana with 1/4 cup honey. Blend in one cup small curd cottage cheese, 1/4 cup orange juice and 1/4 teaspoon celery salt. Chill at least one hour. Makes 1 1/2 cups. The Consumer and Marketing Service says honey is plentiful.

During the summer months, homemakers should be especially careful to keep food properly refrigerated in order to prevent spoilage, cautions the U. S. Department of Agriculture. Poor food handling in the home can cause illness. Such foods as meat, fish, poultry, eggs, dairy products and salads are particularly susceptible to spoiling.

Safety Council notes that the theme for this year's national week is -- "Protection! Make it Work for Safety." What can individuals do to observe the event? Do as the theme suggests and use all protection available to make life safer. Encourage your neighbors to do likewise, advises the Council. For your own life depends upon how carefully you carry out your work, warns the Council.

Members Of "Texas" Cast From Panhandle

Several members of the "Texas" cast have roots in the Panhandle which enable them to have a real comprehension of the forces which moves the characters in Paul Green's drama of the plains.

David Schuette, the horse wrangler who rides to the top of the cliff each evening with his flag to herald the opening of the performance is the grandson of Fred Schuette, and early settler. He was a cowboy on the T-Anchor Ranch, one of the earliest spreads. The T-Anchor Ranch house, one of the earliest buildings built in the area, stands on the campus of West Texas State University, still sturdy, made of logs cut in the Canyon.

Linda Rockwell is the great niece of Montie Rockwell of Canyon. Her maiden name is Montie McBride and McBride's Canyon is named for her family. She was an early teacher there.

Harold Orr's grandfather was a missionary in the southern panhandle.

Wick McFarlin is the great-granddaughter of Mr. and Mrs. J. L. McFarlin, early settlers in Moore County.

Dean Kelley, who plays "Uncle Henry", is married to the niece of Mr. and Mrs. O.

H. Finch, longtime panhandle ranchers and philanthropists who live in Borger.

Ruth Ann Carroll is the grandniece of Gus Freeman of Hereford.

Edward Dalton is almost a pioneer himself. He has worked for forty years as a cowboy in the panhandle, spending years on the Yellow House spread near Littlefield, and being on the crews of the Bivins and Masterson ranches.

Two members of the cast belong to families having experiences in the Palo Duro Canyon itself. Mike Wilson (Abel Tatum) is the great-grandson of the founder of the McSpadden Ranch just south of Canyon. The McSpadden cowboys exchanged work with the Marshall cowboys and the Marshall land is still adjoining the Canyon. In 1941 and 1942, the state leased grass lands in the Palo Duro State Park area and the McSpaddens ran some cattle there. Some strays wandered into the area where the theatre is now. Gene Morrison, the father of the Gene Morrison who sings in "Texas" this year, remembers driving several strays up the trail which the rider in the show uses every night. He was one of the McSpadden cowboys at the time. They also went into the Canyon to vaccinate cattle and mules during the epidemic in 1941.

Services Held For Brother Of Spearman Man

Services were held in Stockton, California, Monday of this week, for Thomas Tindell, brother of Ira Tindell, of Spearman. Thomas lived in Stockton, and formerly attended school at the Spearman schools.

Survivors included his wife, five children, 12 grandchildren, 4 brothers and 2 sisters. Thomas Tindell was 57 years old, at the time of his death.

TINDELL'S ENJOY 4-STATE TOUR

Mr. and Mrs. Lawrence Tindell, and family Teresa and Stephen, recently returned from their summer vacation. Mrs. Tindell stated that they spent the 4th of July at Red River, N.M., then toured the states of New Mexico, Wyoming, Nebraska, and returned home via Dodge City, Kansas, where they toured Boot Hill and the wax museum.

FARM SAFETY WEEK

COLLEGE STATION-- The efficiency of American agriculture and the quality of life for agricultural workers is threatened today by the continued high rate of farm accidents. Both the human and the financial costs of these accidents are intolerable, noted President Nixon in his proclamation designating the week of July 19-25 as Farm Safety Week in the United States.

He added that a quarter century of experience in organizing for rural safety has shown that most farm accidents could be prevented through the use of sensible practices and protective devices. Safety information and mechanical safeguards are readily available and their consistent use should be actively encouraged, he said.

"I urge all farm families, and every person and group allied with agriculture, to make every effort permanently to reduce the number of accidents which occur at work, in homes, at recreation, and on the roadways, emphasized the President.

Texas Governor Preston Smith in his proclamation calls on Texans to reverse the farm accident trend. He urges all farm and ranch families to become more safety conscious--to take advantage of modern technology designed to remove many of the hazards in agricultural enterprises and to make use of the Slow Moving Vehicle emblem on their equipment when moving it on the state's rural highways. The Texas Farm and Ranch
