IT'S THE LAW
in Texas
A public service feature of the State Bar of Texas

"Assuming" A Loan

You can give some of your rights to other people, for example, the right to collect a bill; but it's a different thing with your duties. You need your creditor's OK firmly to assign your debts to another. You can sell what you own, all right, but you can't shake a debt merely by getting somebody else to promise to pay it for you. Your creditor—who is a party to your contract—has something to say about who takes over your obligations.

Thus, your cousin, say, borrows from you and promises to pay the money back. He can't get out of it by getting his neighbor to say he will pay you for him unless you agree—and this takes a written contract. Suppose you bought Abel's house on time for \$15,000 and had paid off \$5,000. Then, with \$10,000 left to pay, you get Joe Blow to buy the place. How could Blow pay you for it?

Well, for Blow it would be just dandy for you to let him take over the \$10,000 debt, pay you back your \$5,000 equity, and then pay off Abel the rest of your \$10,000 debt. Blow would save the cost of a new loan—if his credit was good enough to get one in the first place. So you set it up that way.

One day Blow blew; and you, yes you, hold the bag. True, your could turn over your equity to Blow without Abel's consent.

But your agreement with Blow to pay the balance is not binding on Abel. He can hold you to your original deal. Pay up \$10,000.

Don't let someone "assume" your loan unless you protect yourself by an agreement with your lender, or unless you are willing to risk holding the sack.

Your buyer is often a good enough risk for you to let him assume the loan—but don't do it thinking you are free of your debt.

About Your HEALTH

A monthly public service feature from HENRY A. HOLLE, M. D., Commissioner of Health

It will arouse the wrath of sun worshippers, but this must be said: The healthful effects of a suntan aren't worth the time and trouble it takes to get one. After all, a sunburn—like any other burn—is a manifestation of a skin injury.

True, a sensible bask in the sun makes a fine mental pick-me-up, and there is no denying the supple appeal of a tawny life-guard. But to overdo it can lead to trouble. In fact it can kill you. More than one person has succumbed to prolonged and unaccustomed exposure to the sun.

Even at best, overexposure can mean two or three miserable days when a mere shirt or blouse is torture, and a friendly pat on the back can end in pudor.

The medical term for sunburn is "erythema solaris." It's the ultra-violet light in sun rays which does the damage. And since clouds don't remove all ultra-violet rays, it is possible to get burned even on overcast days in mid-summer.

Some people are physically unable to tan. Known medically as "heliophobes", they could spend the entire summer on Padre Island, and all they'd get would be blisters on their

blisters. The reason: Their skins lack the pigment necessary to produce the tan tint. They never had a tan and they never will, so they ought never attempt one. Each new exposure will only mean a new burn.

Assuming you are the type who can tan—a "heliophilic," that is—the well-known rule about doing it by progressively longer exposure times is valid and should be followed.

Sunshine is a source of vitamin D, as most people know. What is apparently misunderstood is that ordinarily healthy people can get all the D vitamin they need through routine activities such as hanging out the family wash, mowing the lawn, or walking to the store.

For persons suffering from pellagra, lung tuberculosis, high blood pressure, or hyperthyroidism, sunlight may be definitely harmful.

In case you have wondered about the source of freckles, here's the answer: The color of everyone's skin is determined by the amount of pigment in skin cells. Dark complexioned people have considerable, blondes very little, and albinos none at all. Under a microscope

Kathy Kelley Reports From Seven Weeks European Tour

By KATHY KELLEY

(Editor's Note: Miss Kathy Kelley, a senior at ACC and daughter of Mr. and Mrs. O. L. Kelley, is traveling in Europe for 7 weeks and the following is a letter she wrote to her parents and brothers, Chris and Phil.)

"We are settled in Berlin and it is Sunday afternoon. It seems like a month since last Tuesday (the day Kathy flew from New York to Paris, France). I never dreamed that I could see so much!

We had a good time in New York. We took a tour, went to Radio City, the Music Hall and saw the Rockets, went upon the Empire State Building and made Fifth Avenue and Times Square! All of this seems "far away" and "common place" after getting to Europe!

It was so exciting meeting the other 25 members of the party. They are the most interesting people!

The plane, Air France, was a luxurious ship, but Tuesday night was an awfully short night. We left New York at 2:30 p. m. New York time. At 8:30 N. Y. time we went to sleep and at 1:30 N. Y. time we were awakened for breakfast and it was 6:30 A. M. in Paris, France. We lost 6 hours somewhere out over the ocean!

The food in France was starting! We nearly starved until we got to London. In France bread is cold and hard, meat was raw and you can't get ANY WATER, the cheese was fermented and the only thing good was candy and sweets! (I forgot to tell you I was air sick coming over for about 5 minutes until I got rid of the "French dinner" we had been served).

When we landed in Paris it was raining and cold. It took us two hours to get to our hotel downtown. We simply left our bags and went sight seeing. The oddest sight was seeing every other Frenchman walking down the street with a 2 foot, long thin loaf of bread—unwrapped—carrying it as if it were an umbrella or a stick.

We learned by the end of the day just how dirty the French people were! Our hotel was clean but simple and old (which I liked) but the people looked sad, old and degraded.

I must tell you about the Eiffel Tower! (It was built in 1889 for the Paris exhibition by a Mr. Eiffel. It is one of the 7 wonders of the world and was at one time the tallest structure on earth, 984 feet high). You can never imagine how massive it is when one is standing at the bottom looking up. We all (27 of us) went up on an elevator—a little tall for walking—but 6 of us decided we would see just how far a paper plane would go. So we made one. We had a real "charge" watching it go and go and go about 7 blocks and hit the ground. It seems silly, I know, to do such a childish thing, but it is one of those moments you can't describe, but will never forget.

The other highlight of Paris was the ride on the METRO or subway. Americans don't know what rushing is! We traveled from one side of Paris to the other on the Metro, trying to squeeze a group of 27 people on an already crowded car because "the Americans will have to stay together or they will get lost"—and then every time one got off or on a door slammed. We were all hurting with laughter when we finally got back to the hotel. Every American in France is like a 'cherry in a bunch of lemons'—they stick out—and we found ourselves being watched, but always admiringly. The French seemed to like us and were very nice, but they are quiet and never laugh in public. Well, we managed to get up a few grins and one or two hearty laughs.

We flew from Paris to London and a chartered bus was waiting for us, so we lost no time. We ate the first good food we had had "European Style"—the fork is in the left hand, turned over backward and the knife in the right. The

the pigment in skin cells looks like tiny flecks of brown paint. Sometimes, especially in children, it is manufactured unevenly and collects in the spots we know as freckles.

Ultra-violet rays can be filtered, fortunately, by smearing a thin film of olive oil over exposed skin. So if you're a heliophilic, and if you just have to have that golden sheen this summer, it might pay you to try it.

Grant Simmons, son of Mr. and Mrs. G. W. Simmons of Crosbyton, visited last week in Spur with his grandparents, Mr. and Mrs. Henry Simmons and with Pat Barrett.

and Mrs. Clayton Baum and Paul Simmons of Lubbock and Mr. and Mrs. G. W. Simmons and children, Grant, Teresa and Brenda of Crosbyton.

Visitors in the home of Mr. and Mrs. Henry Simmons over the holiday week end were Mr.

Mrs. W. P. Foster spent July 4 in Hamlin with her son, Mr. and Mrs. W. P. Foster, Jr. and sons, Lanier and Lanny.
