## Wheat Farmers to Vote on Wheat Parity

The wheat growers in Dickens County will have the authority to say by their vote whether or not the wheat parity program shall continue. This vote has been set for Saturday of this week, May 31.

All farmers who have more than 15 acres of wheat planted this year, are eligible to vote. A new ruling has been made on that qualification. The former ruling was that a farmer had to produce as much as 200 bushels. The ruling says he shall have planted more than 15 acre for 1941 crop.

The polls for voting shall be open by eight o'clock Saturday morning and shall remain open until seven o'clock in the afternoon. Voting places shall be at the Directors Room in the Spur Security Bank in Spur, the school house at McAdoo, the school house at Patton Springs, the court house at Dickens, and Miller's store.

Penalty wheat has been defined as excess wheat times normal yield, or times actual production, whichever should be the smaller. The penalty is one half of the loan rate. The producer may put wheat under loan at sixty per cent of the loan value.

## Spur Round-Up to Feature County's Golden Anniversary

The main theme of the annual show of the Spur Round-Up Association this year is the celebration of the Golden Anniversary of the organization of Dickens County. The management is trying to emphasize this historical event in a way that will be appreciated by everybody who may be present for the event June 20-21.

The first officers for Dickens County assumed their official duties in April 1891, and they made a set-up which has been the pride of every citizen in the county since that date.

The early settlers will have their part in the rodeo which will be staged on the above dates. As many activities as will bring back the memory of early days as possible have been outlined by those in charge. All of them are people who know the early customs and activities of the West when Dickens County was organized.

The Old Cowboys' roping contest has been especially outlined for the early-day cowboys. No one under the age of 55 years may enter this event, and the real purpose is to give theme an opportunity to exhibit the "Old West."

People of Dickens County are working diligently to give the visitors to the rodeo the best time they have ever enjoyed at any show. Every cooperation is being manifested and the sentiment is as if one man were speaking. Citizens of neighbor towns have a welcome extended them to come and enjoy a real wild west performance in a well organized manner. Come! You are welcome.

**Citizens Petition for Band Tax**

A petition has been circulated and signed by more than ten per cent of the voters of the City of Spur asking the Commissioners to submit a band tax proposition to the citizens. This petition is being submitted to the City Commission for action. Also, a subsequent petition signed by the same voters requests that the tax be not to exceed one mill on the dollar. That tax would amount to ten cents per hundred dollars and one dollar per thousand dollars of taxable valuation. The average home owner in Spur would pay about one dollar per year as a band tax. A home taxed at \$1,500 would pay \$1.50 band tax each year. Most anyone could afford that amount in order to have a good band for Spur.

Under our present condition it is to secure and retain a good band instructor because the limited amount of funds the schools have to expend for the band. Yet there is no feature of the school work that is meaning more to this community than the work that is being done with the school band.

There is another feature that should be considered. The town needs the band in summer more often than in the winter. When school is out the band instructor's work is over and usually he goes on a vacation usually more because his pay has been stopped than from any other reason. The band tax will enable us to keep the band director here and get more real work from the band.

Also, there are always extra instruments that have to be purchased, and the people have been doing this by way of donations. The band tax will take care of these extra instruments and furnish a few uniforms each year and keep our band in good condition. Then the band director will not feel cramped in entering our band in contests, or taking them to various places to give program. Also, other communities usually need a

**Long-Term Loans  
 to Buy Farms  
 to Be Made by F S A**

Loans with which worthy tenant farmers may buy family-size farms are again to be made in Dickens County, according to an announcement received today from J. Otha Winslar, Jr., Farm Security Administration supervisor.

For the second year, Dickens County, according to an announcement of Agriculture, Claude R. Wickard, as one in which this program will operate. Loans which bear three per cent interest and are repayable over a 40-year period are to be made to worthy tenants, sharecroppers, and farm laborers to establish themselves on their own land.

This program is very important now that we are engaged in this defense work," Mr. Winslar said. "Ownership of land by people who farm it is a good defense against foreign 'isms' as well as possible invading armies."

Loan applications may be had from the Farm Security office located on the second floor of bank building, Spur, Texas. Both white and negro farmers are eligible for these loans.

Mr. and Mrs. C. W. Hinson, of Kalgary, were meeting friends and trading here Saturday.

**Ventilate Poultry  
 Houses in Summer**

Owners of poultry should plan now for the comfort of their laying hens during the hot months just ahead.

George P. McCarthy, Extension Service poultry husbandman, says the main source of comfort is ventilation of hen houses, especially near the floor which will allow a steady flow of air at a level where it will do the most good. Hens, like humans, get hot in summer. They do their best to show it by pearching near the front of the poultry house with wings extended, or congregate in the shade of trees away from their feed, water and nests. Absence of proper ventilation often is responsible for sum-

mer colds that are hard to control. As a result, hens drop off in feed consumption and egg production.

Another element of the ventilation problem is nests. McCarthy says it has been found that where nests are built at least four inches from the walls of the poultry house and the

back part is of wire or slats, it is considerably more comfortable for laying hens. Some poultrymen are removing partitions in nests and leaving long, trough-like nests. The reason is that several hens cannot crowd into a small section but will distribute themselves. In that way they will

**Funeral for J. A. Brown Monday**

Funeral services for John A. Brown were conducted Monday afternoon at the First Methodist Church. Rev. H. L. Thurston, the pastor, was in charge of the services. Interment followed in Spur cemetery with Campbell's Funeral Home in charge of arrangements.

Mr. Brown became ill in September of last year, and it appears that he never could make recovery. He went to Amarillo and spent some time at the Veterans' Hospital and then returned home. Afterward he went to the Veterans' Hospital at Waco where he remained several weeks. He was there when he passed away Saturday afternoon at 6:30 o'clock. The body was brought to Spur by a Campbell ambulance.

He is survived by the widow, Mrs. Bertie Marrs Brown and three children; J. C. Brown of Spur, Mrs. Alton Spraberry of Girard and Mrs. Oran Bethel of New Harmony, Indiana. There is one brother, Arthur Brown, and one sister, Mrs. Beulah Scott, both of whom live in Tennessee.

Mr. Brown was a native of Tennessee and was born at Rhea Springs March 30, 1874. He was 67 years of age last March. He met Mrs. Bertie Marrs Brown and they were married while in Tennessee in 1910. Mr. Brown was a soldier in the Spanish-American War, serving from his native state.

Mr. and Mrs. Brown moved to Dickens County in 1918 and bought a farm in Midway community. They moved to Spur in 1933 where they have made their home.

He was converted at the age of nineteen and was a member of the Methodist Church when he passed away. He lived a devoted Christian life, and his children spoke of him as a faithful and kind father.

**Rattlers Can Kill Quickly**

That rattlesnakes can be deadly and that their poison can act very quickly is reaffirmed by a report of a Texas Game Warden. While patrolling near Pearsall recently the warden saw a large calf reach down to take a bite of grass, jump and then run toward him. The calf dropped within ten feet of the warden after running seventy-two paces and was

dead within five minutes. Two cowboys nearer the calf than the arden when it was struck found a six and a half foot black diamond rattler which had fourteen rattlers. The warden killed it.

The snake evidently had not struck at anything for some time and its poison sacks were filled with venom. The warden's report concluded: "It is not because boots are pretty that the southwest Texas game warden wants to wear them while patrolling."
