Poll Tax Indicates Voting Strength Of 4000 In County

Haskell county's voting strength in the coming primaries and elections will be around the 4,000 mark this year, according to estimates based on the number of poll tax receipts issued by the County Tax Collector.

Assessor-Collector R. A. Coburn reported Tuesday that an even 3,800 poll tax had been paid to January 31, final date for payment of the voting franchise. Exemptions should easily push the total above 4,000, he estimated, and total voting strength in the county could probably exceed that figure. This is a considerable increase over last year, when poll tax payments were under the 3,000 mark, the Collector said.

Nancy Sue Wair Is Bride of Samuel E. Wilson Jr., In Sunday Ceremony

The marriage ceremony of Nancy Sue Wair, daughter of Mr. and Mrs. A. H. Wair of Haskell, to Samuel Emmett Wilson Jr., son of Mr. and Mrs. S. E. Wilson of Venus, was solemnized Sunday evening at 7 o'clock in the Haskell Methodist church.

Wedding vows were read by the Rev. J. E. Harrell, pastor before a background latticework of salal combined with baskets of white gladiolus and potted palms. Light for the ceremony was from white tapers in floor standards.

Pre-nuptial musical selections were presented by Ruth Francis of Stamford, organist. She played Serenade and Clair de Lune. Miss Francis also presented accompaniment for Katherine McNeill of Houston, a member of the North Texas State College cappella chorus, as she sang "Love Thee by Grief; Because by D'Hardelot; and The Lord's Prayer by Malotte. The organist played the traditional procession and recessional.

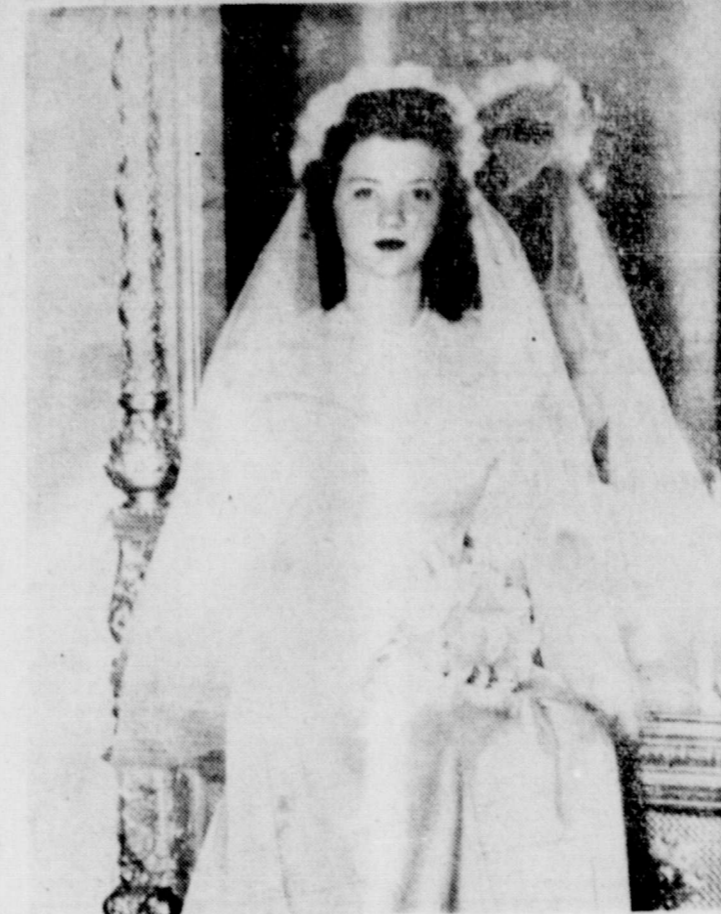

Candles were lighted by Charlene McLeroy of Fort Worth and Mrs. Hugh Wair Jr., of Denton, cousin and sister-in-law of the bride. They wore rose satin dresses fashioned with off-the-shoulder necklines and full ballerina skirts. White blossoms formed halos for their hair.

Given in marriage by her father, the bride chose a dress of ivory satin styled with high neckline and full skirt extending into a full train. The Chantilly lace yoke outlined with an embroidered design of seed pearls, and small self-covered buttons extended down the back of the fitted bodice and fastened the petal-point sleeves. A Juliet cap of seed pearls held the double fingertip veil of illusion.

The bride's bouquet was of gardenias surrounded with white roses and tied with satin ribbon showered with sweetpeas.

Mrs. Donald N. Wackwitz of Washington, D.C., sister of the bride, served as matron of honor. She wore a dress of copper satin fashioned with long sleeves and bouffant ballerina skirt. She carried a bouquet of Wedgewood blue iris surrounded with acacia.

Wearing dresses of turquoise satin styled with off-the-shoulder yokes and gathered ballerina skirts, bridesmaids were Carolyn Williams and Janice Pace of Haskell.

Mrs. Samuel E. Wilson Jr.

Bobbie King of Quitman and Mrs. J. I. Davis of Jacksonville. They wore satin halo hats and matching mittens. Their bouquets were Picardy gladiolus.

Flower girl was Kay Kenry of Haskell. She was dressed in a miniature copy of the bride's dress, with short sleeves, and carried a basket of rose petals. She wore short white mitts.

Carol Lloyd Wilson of Venus served as best man for his brother. Ushers were Hugh Wair Jr., A. J. Ballard, Joe Cook of Waxahachie and Richard Barneby of San Antonio.

Immediately following the ceremony, the bride's parents were hosts at a reception in their home. The table was laid with an

Italian hand-slipped linen cloth and centered with a four-tiered wedding cake. The cake was topped with a miniature bride and bridegroom and encircled with pink sweetpeas. White tapers burned at each side of the cake.

The newlyweds left for a wedding trip to New Orleans. The bride wore a cocoa brown gabardine dressmaker suit accented with an imported multi-colored silk blouse and brown accessories. The couple will live in Denton where they are attending North Texas State College. Miss Wair is a graduate of Haskell High school and attended Hardin-Simmons University.

Mr. Wilson is a graduate of Midlothian High School and served 37 months in the United States Navy with 30 months in the Pacific theater.

Out-of-town wedding guests included Mr. and Mrs. W. K. Wair, Mr. and Mrs. Al Milch, Mrs. Bessie Mae Sellers, Sue Sellers, Nancy Cunningham, Mrs. Roy Shook and Ruby Fitzgerald, all of Abilene; Mr. and Mrs. S. E. Wilson and son, Edward, Mr. and Mrs. A. N. (Louise Newman)

If you are one of these people who say salt is salt and buy the first package you pick up, you might not be a wise shopper. Salt, like many other food products, is being made to suit a particular use.

About half the salt now being sold for table use is iodized. The addition of iodine or potassium iodide to salt was found to be one of the simplest methods of preventing goiter. A nationwide campaign to educate the public on the need for iodine and the convenient use of iodized salt was so successful that goiter has practically disappeared in many sections of the country where it had been common, but physicians and nutritionists believe that people have forgotten the need for iodine and the story must be told again to remind people to look on the label of their salt box to prevent the rise of goiter in the future.

Iodized salt is suited to table use and seasoning but is not recommended for use in canning or pickling. The iodine and any ingredients added to prevent lumping affect the color and fermentation of vegetables.

Use dairy or cheese salt if possible for both canning and pickling. If these are not obtainable, ask your grocer for a pure salt which does not contain magnesium carbonate or any other similar ingredient.

Twenty different foods are expected to be on the abundant list during February, and should be comparatively low in cost. On the "fresh fruit list" are oranges, grapefruit, lemons, apples and pears. Fresh vegetables are cabbage, carrots and celery. Canned items are citrus juices, grapefruit segments, the lower grades of peas, pumpkin, squash, sweet potatoes, and tomato juice. Dried prunes, raisins, peaches, figs, walnuts and pecans make up the dried fruit and miscellaneous division. Honey and peanut butter will be plentiful.

In a recent letter to all county extension agents, Ted Martin, extension poultry husbandman for Texas A. & M. College, pointed out that it is a waste of time and money to feed hens that do not pay off in eggs. A 200-egg hen will produce a dozen eggs on five

Texas PCA Groups Clear Government Loans

Weekend student in Texas spent the weekend with his parents, Mr. Frierson.

Nine production credit associations in Texas, including the Stamford PCA, have voluntarily returned their last dollar of government capital to the U. S. treasury and the other 27 associations expect to pay out in the next year or two, according to Virgil P. Lee, president of the Production Credit Corporation in Houston. "During the past four years capital stock held by the government in the associations in Texas has been reduced from \$6,560,000 to a nominal figure of \$135,000," he said. "They are now 98% owned by some 32,000 Texas farmers and ranchmen who own \$7,073,285 in capital stock backed by \$4,315,144 in surplus."

Mr. Lee stated that farmers and ranchmen now hold about \$4,000,000 more capital stock than is actually required in connection with their loans, about half of which was voluntarily purchased in order to hasten full membership ownership of the associations. The 36 associations loaned more than \$100,000,000 to finance Texas farm and ranch production during 1927 and collected approximately the same amount, leaving them with \$31,190,865 in loans outstanding at the end of the year.

C. G. Burson of Haskell, president of the Stamford Production Credit Association, says that farmers and ranchmen in this area are proud of the progress they have made in retiring their government capital and that they plan to pay off the last dollar in the next year or two. He says the association now has \$392,009 paid in capital and earned surplus. The Stamford association serves Dick-

The Menefee Class Room of the First Methodist church was arranged in a beautiful setting for the new Mission study topic of W S C S, Committed Unto You. The worship table with the open Bible and a large globe of the world, with lighted tapers at each side added a spirit of reverence.

The study course, Committed To Us, by W. Lamont, was presented as a whole by Mrs. Fields. High points of the introduction were tactfully given in a series of questions. She queried: How Does Christianity affect Life? What Influence Has Christianity Over Life As A Whole? What Is Evangelism? The course will prepare the layman to better understand God's purpose.

Where would you look for a lonely farm?

City folks used to think farm life was a lonely life. Today, automobiles, telephones, and—above all—electric service—have nearly ended loneliness on the farm. Low-cost, dependable, electric service turns dark into day, pumps water, milks cows, grinds feed—does dozens of other chores—brings entertainment and market reports. Who brought electric service to the farms? The business-managed, self-supporting electric companies began the job some 60 years ago. They did the pioneering... developed new methods and equipment... learned to meet the problems of weather and distance... and continued to bring better and cheaper electric service to more and more farms and ranches. In 1936 the Rural Electrification Administration was born. With Rural co-operatives, it joined in the job. Today, electric service is available to more than three-quarters of American farms. The majority of those farms are being served by business-managed, tax-paying electric companies. It has been the policy of the West Texas Utilities Company, not only to supply the low-cost, dependable electric service which makes the farm a happier place in which to live... but also to help the farmer make the best possible use of electric service, to lessen the burden of farm work and to increase production and profits... and in turn the purchasing power of the area we serve.

H. D. Agent Gives Hints For Teen-Agers' Food

Teen-agers are eternally on the search for fun—and food.

It's possible to fill their need for both in the wholesome atmosphere of the home. Louise Newman, County Home Demonstration agent says that a well-stocked pantry, with foods that are easy and quick to prepare, and freedom of the kitchen will result in kitchen parties that will be more tempting to the gang than the hamburger stand.

Such canned goods as luncheon meats, fish, milk, fruits and vegetables, apple and cranberry sauces head the list. Ready mixes for hurry-up snacks, such as pancakes, biscuits, waffles, gingerbread, muffins, and cornbread are necessities. Crackers of all varieties are good and go with them, sandwich spreads of cheese, peanut butter and meat.

Casserole dishes are tops whenever there is a crowd to feed, and spaghetti, macaroni and rice should be on hand as bases.

Sweet spreads of jellies, jams marmalade and preserves served with hot muffins or biscuits will take the place of a more complicated dessert. Sauces of all kinds, chili, mustard, catsup pickles and olives, are particu-

larly liked by children of all ages.

Don't forget the fresh fruit, Miss Newman says. Apples, bananas, oranges and grapefruit are favorites, as well as tomato, orange, grapefruit, prune and apple juices.

With these foods on the pantry shelf, teen-agers will find it fun to say Lets Go To My House To Eat.

4-H Club Boys Will Check Rain-fall In Wilbarger

Ten 4-H club boys of Wilbarger county are off on a new project. On January 1st, these ten boys were issued a simple rainfall

gauge and entry sheet on which to keep a record of the rainfall in his community. After each measurable rain, the boys will telephone a report to George H. Veto, assistant county agricultural agent, who will, in turn, relay the report to local newspapers. Each boy will receive credit for the reports he makes.

Veto says that the service will be of local interest as well as provide helpful information regarding the planting and harvesting season. Each boy will have the information to maintain a chart of the annual rainfall in his particular community.

How women and girls may get wanted relief from functional periodic pain

Cardui, many women say, has brought relief from the cramp-like aches and nervous strain of functional periodic distress. Taken like a tonic, it should stimulate appetite, aid digestion, thus help build resistance for the "time" to come. Started 3 days before "your time", it should help relieve pain due to purely functional periodic causes. Try it!

NOTICE TO THE PUBLIC—Any erroneous reflection upon the character, reputation or standing of any firm, individual or corporation will be gladly corrected upon being called to the attention of the publishers.

Possible Explanation

The captain of a liner, arriving in New York, reports mysterious forty-foot waves in a saucer-shaped area of the Atlantic some 700 miles in circumference and about 300 miles east of New York.

The mystery is broadened by the declaration of Harry Manning, master of the liner and veteran of many sea voyages, that "it was a big dead sea, without white-caps." He was mystified as to the origin of the waves that his ship encountered.

We have no explanation of the phenomenon, but it is just possible that the sea monster recently observed off the coast of North Carolina had proceeded further north and was turning around to resume a southerly course.

Let's Support The Boy Scouts

This is rather blunt. We hope, however, that you will take it in the spirit intended.

The Boy Scouts of America will be 38 years old on February 8th—a date to remember. The boys, their parents and leaders will celebrate Boy Scout Week with them.

Will we? If, as so many of us do, we take the Boy Scouts for granted, they'll mark the occasion by themselves. For nearly four decades we have seen the Scouts quietly performing worthwhile service. Have we really watched—and appreciated?

Certainly, the boys themselves ask for no specific recognition—Their "Duty Good Turns" have always been without reimbursement. "A Scout is Helpful". Nevertheless, do they not merit more than a friendly, distant approval—or a casual acceptance of their efforts to be better citizens, a model for all?

Their theme this year is: "The Scout Citizen at Work: In His Home, His Community, His Nation, and His World".

Let's focus our thoughts on them now—give them our wholehearted support now—and help them succeed in their character-building mission the year 'round.

Tax Collector H. H. Langford reports that poll tax payments amounted to 2,500, with 50 ex-

emptions. This is an increase of about ten per cent over last year.

A bell will be used as a fire alarm by the city in the future.

The old Baptist church bell has been fitted up with a motor, and will be placed on the city water tower within a few days. The alarm will be controlled by a switch in the telephone office.

Rev. O. W. Dean, John Couch, and T. B. Russell motored over to Aspermont Sunday where Rev. Dean filled the pulpit in the Baptist church.

The Commissioners Court will meet in regular session Monday. Mr. and Mrs. J. S. Keiser left Thursday for Arkadelphia, Ark., where Mrs. Keiser will undergo treatment.

Whose Hands?

Gas men's and women's.

By the work they do they are joined to bring natural gas from deep in the earth to the burner tip of gas appliances in your home.

In this era of rapid agricultural, industrial and community growth in the territory served by Lone Star Gas Company, these hands are working in a great expansion program.

They're busy in 333 communities and along 5,000 miles of pipeline pushing forward \$40,000,000 worth of improvements to keep Lone Star Natural Gas Service ahead of demand in a rapidly growing territory.

Building pipelines and compressor stations...drilling wells...building new town distribution plants...and a wide variety of other projects—that's the work of the Lone Star team, more than 4,500 pairs of hands strong.

This is the second year of this system-wide program in which more hands than ever before will be working to continue supplying dependable natural gas service to you and to bring service to new homes and communities not yet enjoying natural gas service.

Sterling Edwards Asks Reelection As Constable

Sterling Edwards, present constable of Precinct 1, this week authorizes The Free Press to announce his candidacy for reelection in office, subject to the action of the Democratic primaries.

The veteran Haskell officer and member of a pioneer Haskell county family, is well and favorably known to a majority of the voters in this section. During the time he has served as constable, he has established a reputation as an efficient and impartial peace officer, discharging his duties in a capable manner at all times.

In making his announcement for reelection, Mr. Edwards stated that he wished to express his appreciation for the past support and cooperation of the citizenship, and solicited their continued cooperation. Before election is held, he will endeavor to make a thorough canvass of the precinct to discuss his candidacy in person with the voters.

In the meantime he solicits and will appreciate any consideration given in his behalf.

Motorists Warned Against Danger Of Carbon Monoxide

To minimize the danger of carbon monoxide poisoning during winter weather, motorists and commercial drivers are urged by Dr. Geo. W. Cox to check up now on the exhaust systems of their automobiles for defective connections and leaks.

He said warming up a car in a closed garage is the greatest cause of carbon monoxide deaths. Leaks from manifold connections, cracked manifolds, defective mufflers, leaks from loose muffler connections and leaks from hot air heater connections are potential sources for release of carbon monoxide and should be checked.

Pay particular attention to those items and remember that proper carburetor adjustment causes minimum production of carbon monoxide and that the highest proportion of this gas is produced by an idling motor.

The State Health officer said that headaches which occur during long drives may be an indication that carbon monoxide is leaking into the car. Sleepiness, dizziness, fatigue, and in extreme cases, paralysis are other symptoms of carbon monoxide leading into the car. Truck drivers making long drives are particularly vulnerable, he said.

Doctor Cox described this gas as being colorless, odorless, and tasteless. When in the air it gives no sign of its presence and is taken into the blood instead of oxygen. Suffering or collapse result from lack of oxygen.
