LIONS CLUB STAGES ANNUAL FOOTBALL BANQUET AND LADIES NIGHT PROGRAM TUESDAY EVENING

Lions Club members and their wives, members of the 1949 District Champion Haskell Indian football team, coaches, and members of the high school faculty were present Tuesday evening for the annual dinner honoring the local high school football team.

This annual meeting is a custom of long standing with the local Lions Club, and the occasion this year also honored the wives of club members and was designated as Ladies Night.

The dinner was served in the activity building of the high school cafeteria by the school Homemaking class which is under the sponsorship of Miss Lucille Watson.

Entertainment was provided by high school students that included specialty numbers by a girls trio composed of Doris Nell Camp, Rose Ann Johnson, and Sue Busby; with musical accompaniment by James Hobbs, high school band director.

With a county-wide organization of volunteer workers completed, final plans were drafted this week by the Haskell County Chapter for Infantile Paralysis for launching the annual nationwide March of Dimes campaign to raise funds for the fight against polio.

John M. Crawford, chairman of the County Chapter, last week announced the partial list of workers in the various communities for the campaign, which will be launched January 16 and continue through January 31. Mr. Crawford today announced the following workers in the communities listed:

Irby—Peter Moeller, chairman; Alfons Peiser, Earl Atchison and A. W. Klose.

Weinert—Mrs. Pearl Monke, chairman; W. B. Guess, Fred Monke, Bob Baldwin, and "Toots" Earls.

Mattison—L. W. Norman, chairman; Rhody Sorenson, Henry W. Smith, Troy Ash, and Hub Merchant.

It is planned to launch the campaign simultaneously in all communities of the county Monday, Jan. 16, Chairman Crawford said, with an effort being made to contact every man, woman and child who will accept a share in raising a substantial quota in Haskell county to combat the dread crippler of children.

"We feel that the people of our county have a privileged duty in addition to a humanitarian responsibility in joining generously in this campaign," Crawford pointed out as chairman of the County Chapter.

He cited figures to show that from August, 1948, to August, 1949, Haskell county contributed \$4,427.68 to the National Foundation, while for the same period the National Foundation furnished \$13,998.69 for treatment of Haskell county polio patients. This is almost \$10,000 more than the county subscribed.

No quota has been set for the county, but Crawford pointed out that every individual in Haskell county must have a part in the program, if a substantial goal is attained.

Religious Freedom In Italy

An Eyewitness Account

The following report was sent to the Christian Chronicle by Cline R. Paden, Supt. of Orphanage, Frascati, Italy. (From Christian Chronicle, July 6, 1949.)

An Appeal to All Freedom Loving Americans

Three hundred and twenty-one years ago 102 Puritans landed upon this continent seeking religious liberty denied them in Europe. This great nation of ours was then conceived to be brought forth 155 years later at the cost of "sweat, tears and blood"

WHAT CAN I DO?

You will no doubt ask "What Can I Do?" We are not asking any special concessions or considerations as a religious group. We only seek for our workers and people the rights and privileges which are supposed to be guaranteed to all peace-loving, law-abiding citizens among the nations embraced in the "United Nations," the Atlantic Charter and the doctrines of the "Four Freedoms."

I talked today with the interpreter. She said that there were more people in the streets of Monte Compatri last night than she had ever seen. The children carried pots and pans and tin cans, and they were beating them together with great noise.

Employed Over 65 May Be Eligible For S-S Benefits

"Sixty-five year old workers may be eligible for monthly social security benefits even though they are still employed part of the time," states Ralph T. Fisher, manager of the the Abilene social security office.

"Too frequently we meet a worker who believes that he has to be permanently retired before he can receive his old-age insurance benefits," Fisher continued. "Because of this misunderstanding, we have had cases where the worker did not file his application when he became insured and consequently lost hundreds of dollars in payments. You see, only three months back payments can be made when a person is late in filing his application."

"As long as the insured worker is employed on a job not covered by the Social Security Law, he can receive his monthly old-age benefits. Such jobs are found in agriculture, government, as domestic servants in private homes, in certain religious, charitable and non-profit organizations, and among the self-employed."

"I strongly urge that all workers, who have done some social security work, get in touch with our office as soon as they become sixty-five," Fisher continued. "We will be glad to discuss their rights with them and determine if they are eligible to receive insurance payments. By doing this they can prevent the loss of payments."

A representative from the Abilene social security office will be in Stamford on Thursday, January 19, at the Post Office, at 3:00 p. m. Anyone wishing to apply for benefits or obtain further information about social security should call at that time.

Brownwood Stock Show Opening Slated Next Week

The 1950 Brownwood Livestock Show opens at 8:00 P. M. Wednesday, January 18, in Brownwood, Texas.

The show continues Thursday, Friday, Saturday, and Sunday, with showing and judging of the best cattle, sheep, goats, and poultry raised in the southwest. Quality of animals shown is exemplified by the fact that the Reserve Grand Champion Steer of Brownwood's Show in 1940 was Grand Champion Steer of Houston's Livestock Show that year.

The greatest damage from rats is not what they eat but what they waste or cause to be wasted.

Trading In Spot Cotton Active Past Week

Trading in spot cotton was fairly active last week for this time of year according to the U. S. Department of Agriculture's Production and Marketing Administration.

Inquiries from both domestic and export sources were rather numerous. Also farmers offered the spot cotton they hold more freely as well as equities of cotton placed in the government loan program.

Prices moved within a narrow range during the week and closed Friday steady to stronger than the previous Friday. Quotations on Middling 15-16 inch offerings dropped \$7.50 to \$11 per bale lower than a year ago during the same week.

One of the chief features of the good domestic and export demand was the increased interest in low grades of current ginnings.

Sales in Dallas Houston and Galveston totaled about 93 thousand bales last week against about 83 thousand the previous week. Export sales at the two Gulf ports accounted for the increase.

Junell Resigns Post at Tech

Frank Junell, assistant to the president at Texas Technological college since September, 1948, has resigned his post and will become an executive with the Caprock Broadcasting company of Lubbock.

Pers. D. M. Wiggins said Junell's resignation will become effective later this month. Junell came to Tech from El Paso where he was associated with a broadcasting firm. He also served on the staff at Texas Western University before joining the El Paso company.

Junell said he will remain at Tech until his successor is chosen. The vacancy may be filled at the Board of Directors meeting in San Angelo Jan. 28.

"Junell has served the college faithfully during his tenure here and his resignation is a genuine loss to Texas Tech," Dr. Wiggins said.

Mrs. Junell is the former Miss Maxine Simmons of Haskell, daughter of Mr. and Mrs. I. N. Simmons of this city.

Mrs. Paul Russell and daughters and Mr. and Mrs. H. C. Sanderson and Sharon were in Abilene Monday to attend a church rally.

Turner-Everett Wedding Solemnized In First Baptist Church Here Sunday

The First Baptist Church was the setting Sunday afternoon at 4 o'clock for the marriage of Carolyn Turner, daughter of Mr. and Mrs. Elmer Turner, and Roy T. Everett, son of Mr. and Mrs. Trav Everett of Haskell.

The Rev. Allen O. Webb, pastor of the church, read the double ring ceremony before an altar of yellow mums and trelis of greenery.

Ted Smith of Abilene was organist, playing traditional music. He was accompanist for Sam Turner of Stamford, who sang "I Love Thee" and "Because." He sang "Wedding Prayer" at the close of the ceremony.

Other attendants were Georgia Turner, cousin of the bride, Pat Harrison, and Eddy Fouts. They wore dresses styled identically to that of the matron of honor, in copper iridescent taffeta.

Felton Everett attended his brother as best man. Ushers were Jerry Cahill, Gordon Johnston, and Glenn Mann.

Following the ceremony, a reception was held in the Magazine Club. The bride's table was laid with a floor-tipping lace cloth. The cake, decorated in yellow roses, was surrounded by the bouquets of the bridesmaids.

The bride attended Hardin-Simmons University and is now secretary of the First Baptist Church.

The bridegroom attended North Texas State College and is now employed in the Haskell post office.

After a short wedding trip the couple will make their home in Haskell.

Housewives Should Make Simple Test Of Can Openers

One of the "most used" gadgets in the average kitchen is the can opener and it is doubtful, says Mrs. Vee J. Howle, county home demonstrators ever check by a simple test the quality of the job that is done by the gadgets they use.

For example, cites Mrs. Howle, many can openers, whether cheap or expensive, permit slivers of tin-plated steel to fall into the can's contents during the opening process.

Here is a simple check that you can easily make to see if your can opener is working satisfactorily. First, Mrs. Howle says, empty the can of food. Then hold the can firmly upon a sheet of white paper—with the opened end down—and open the bottom of the can with the can opener that you are checking.

Any slivers of metal released by the opener this time will fall upon the paper where they can be seen, says Mrs. Howle. If more than the barest amount of tin-plated steel shows in the paper, you'll know the can opener is not cutting as it should.

During the time he has served as Commissioner, Mr. Cobb has made an efficient and capable official, and the affairs of his Precinct and the Commissioners Court, of which he is a member, have been handled in a businesslike manner. Through the experience gained in the past, Mr. Cobb

is qualified to give of Precinct 3 continued service in the future. During the coming year the primary is to be held. Drawing a Designer's Dream

Like many 'teen age boys throughout the nation now are doing, John Anderson, Ind., is creating the design of a model car to enter the 1950 competition of the Fisher Body Craftsman's Guild. With his manual and a model he built last year beside him, he sketches his idea of what should be the automobile of the future. University scholars and cash awards are at stake in the competition, in which boys 12 through 19 years old may enroll by writing to the Craftsman's Guild, General Motors Building, Detroit 2, Michigan.

R. A. Coburn To Ask Re-Election As Assessor-Collector

Announcing his candidacy this week for re-election is County Tax Assessor-Collector R. A. Coburn, who seeks the office for another term on the basis of his record during the time he has served in that capacity.

Mr. Coburn, capable and popular young county official, has combined experience and efficiency to achieve an outstanding record during his administration of the affairs of the responsible office of Assessor and Collector.

In authorizing his formal announcement this week, Mr. Coburn stated that he expressly desired to convey his appreciation to the voters for the confidence expressed in honoring him with the office he holds, and for the many pleasant associations with the citizenship of Haskell county.

As time and the duties of his office will permit, Mr. Coburn plans to make as intensive a campaign as possible in order to thank the voters personally for their past support and to solicit their continued friendship and support.

In the meantime he solicits and will appreciate any consideration given his candidacy.

Commissioner Ira Blair Is Candidate For Re-Election

The Free Press is authorized this week to announce the candidacy of Ira Blair for re-election as County Commissioner of Precinct No. 1, subject to action of the Democratic primary.

Mr. Blair states that he has no formal statement to make at this time concerning his candidacy, other than that he is truly grateful for the expression of confidence and friendship of the voters of Precinct 1 in honoring him with the office he now holds. If re-elected, it will be his continued effort at all times to give the people of his precinct an honest, efficient administration as Commissioner, consistent with the best interests of the precinct and the county as a whole.

A resident of Haskell county and Precinct 1 practically his entire lifetime, Mr. Blair needs no introduction to the voters. He is well acquainted with the needs of

his precinct insofar as they pertain to the office of Commissioner and is well qualified by experience to discharge his duties in an efficient manner.

Until such time as he can meet the voters personally to discuss his candidacy, Mr. Blair solicits and will appreciate their careful consideration.

1950 Outlook For Poultry Affected By Recent Changes

Recent changes in the poultry support price program have somewhat confused the outlook for poultry in 1950, says E. D. Parnell, professor of poultry husbandry of Texas A. & M. College. Egg prices last year were supported at 90 percent of parity and the 1950 support program price will be based on 75 percent of parity. Parnell says this means a reduction in support prices of about eight cents per dozen.

He points out that the reduction was not expected and had actually been recommended by some groups to bring supplies more nearly in line with demands. Prices on most major poultry markets dropped considerably and January egg prices are the lowest for several years. Since eggs are the major source of income to the poultry industry, it is easy to understand how the recent change in prices has disturbed the poultryman.

Parnell also sees a brighter side. He believes the better quality feed and the improvements brought about through poultry breeding and selection programs will increase the egg production per hen and this in turn will cut production costs.

It Pays to Buy Best Planting Seed, Farmers Told

Farmers will soon be buying seed for their spring plantings and are urged to examine the tag that is attached to the sack of seed. This tag, according to E. A. Miller, extension agronomist of Texas A. & M. College, has printed on it some very valuable information.

Seed that has been tested for mechanical purity and germination will be tagged and the percentage for each item will be given. Miller says the assurance that the seed being purchased is free from all noxious weeds is worth considerable to the farmer who has worked to keep his farm free from noxious weed infestation.

He says that planting seed with high germination test is also a big aid in fighting weeds.

Polio Poster Children Will Form March of Dimes Honor Guard

March of Dimes poster children of the past four years will form an honor guard to escort the 1950 March of Dimes poster girl, Wanda Wiley of Austin, Texas, on a tour of seven Eastern cities on behalf of the National Foundation for Infantile Paralysis during its forthcoming drive, January 16-31, it was announced today.

The five children, all of whom have helped with March of Dimes funds, will lead the nation-

wide appeal for greater contributions to continue patient care research and educational programs sponsored since 1939 by the National Foundation. The recall of poster children from the past emphasizes the need for increased funds following the nation's worst polio epidemic last year. The cities they will visit include: Washington, D. C.; New York, N. Y.; Boston, Mass.; Philadelphia, Pa.; Cleveland, Ohio; Chicago, Ill.; and Detroit, Michigan.

Eight-year old Wanda Wiley is the second consecutive poster child chosen from Texas to symbolize the annual March of Dimes. Her selection points up the fact that polio may strike an area in successive years and that, while the majority of patients make quick and complete recoveries, thousands, like Wanda, face a prolonged and costly uphill fight long after the epidemic has subsided.

Wanda was stricken in 1948 two weeks after her 16-year-old sister was hospitalized with polio. Both girls were respirator cases for several weeks; both were sent to Georgia Warm Springs Foundation for convalescent care, with

all expenses paid for by the Travis County Chapter of the National Foundation. More than \$8000 in March of Dimes funds has been expended to date for the care and treatment of the two Wiley sisters. Wanda is now able to get about on crutches and in a wheelchair. She is the daughter of Mr. and Mrs. N. E. Wiley, 3708 Webberville Road, Austin.

Wanda's honor guard in the 1950 March of Dimes include the 1949 poster girl, Linda Brown of San Angelo, Texas, who will celebrate her fifth birthday on January 13th. Stricken three and a half years ago, Linda has only a slight limp as evidence of her bout with polio. Her treatments, regular hospital checkups and corrective surgery have steadily improved her condition. She is the daughter of Mr. and Mrs. Leonard Brown, Jr., 2234 Cromwell Drive, San Antonio.

The other poster children participating with Wanda and Linda in the 1950 March of Dimes are: 5-year old Terry Tullos of Laurel, Miss., 1948 poster boy; 7-year old Nancy Drury of Louisville, Ky., 1947 poster girl; and 9-year old Donald Anderson of Warm Springs, Oregon, 1946 poster boy and first patient ever chosen to symbolize the national appeal.

Terry, stricken in 1945 before he had learned to walk, has made continuous progress in overcoming crippling after-effects and now has progressed sufficiently to discard one of his two leg braces. He is the son of Mr. and Mrs. Clarence Tullos of Laurel, Mississippi. Nancy, victim of the 1947 Kentucky epidemic, has completely recovered from her polio attack. Regular physical therapy at home and in the hospital for several years has restored her limbs to full functional use. She is the daughter of Mr. and Mrs. Frank Drury, 2533 Rowan Street, Louisville, Kentucky.

Donald, stricken in 1943, wears a body brace part-time and has never been hampered from participation in active sports. He is still under medical care and visits the hospital clinic for checkups every six months. He is the son of Mr. and Mrs. Edward Anderson, Warm Springs Indian Reservation, Warm Springs, Oregon.

NEW YEAR'S SUPPER

Mr. and Mrs. H. C. Sanderson and daughter were hostess to a supper given in their home. Those present to enjoy the occasion were Mr. and Mrs. Glendon Yarborough and Rodney, Florence Jenkins, Kenneth Russell, Mrs. Paul Russell and Barbara.

Mrs. Glendon Yarborough and Rodney, Mrs. H. C. Sanderson and Sharon, Florence Jenkins, and Mrs. Paul Russell were in Stamford and Haskell last Wednesday shopping.

Dairy Cows Need Rest at Intervals, Specialist Says

A dairy cow needs a six to eight weeks rest and a good ration during the dry period to produce well during the next lactation and to produce a strong calf.

The dry cow has three important jobs to do, says A. M. Meekma, assistant extension dairy husbandryman of Texas A. & M. College. She must recover from a heavy milk producing period, build a calf and store up reserves for the next milking period. How well she does these jobs depends upon how long a dry period she gets and how well she is fed during the dry period.

During heavy peak production, a good cow will deplete her body reserves of nutrients and minerals, says Meekma. And unless she is given sufficient rest and proper care to rebuild these body reserves, lower production during the next lactation period will result. The health and condition of the calf will also be affected.

The problem of feeding the dry cow is practically solved if she has access to a good pasture. If good pasture isn't available, hay and silage should be fed liberally, says Meekma. The amount of continuous grain to feed upon the condition of the cow, but generally it is practical to feed the same grain mix to the dry cows as is fed to the milking herd.

Every dollar that is put into a good, dry cow ration is a wise investment, states Meekma. A cow that is well fed and cared for during the dry period will often produce as much as 25 percent more milk during the next lactation.

Mr. and Mrs. Gene Pendleton and son of Abilene spent last Tuesday in the home of Mr. and Mrs. H. C. Sanderson and daughter.

Small amounts of leafy alfalfa hay of good color, added to the ration, will protect growing and fattening cattle from vitamin A deficiency.

Denver Railway Buys New Freight Equipment

In an expansion of its policy of constantly improving its service, the Fort Worth and Denver City Railway will spend \$3,170,000 in 1950 to secure 250 new

steel-sheathed box cars and three 6,000-horsepower Diesel-electric heavy-duty freight locomotives. It was announced today by R. Wright Armstrong, Vice-President, Fort Worth.

Anticipating heavy demand for suitable cars to handle the huge Texas grain and cotton crop, the cars are expected to roll from the assembly lines in ample time to

help speed the low of grain to elevators and ports this summer and be ready for the cotton harvest in the fall.

The purchase of the new Diesel-electric locomotives will permit the extension of the present Denver to Fort Worth high-speed freight service southward to Teague and expedite the movement of freight to and from

Texas Gulf ports to Houston as City and Galveston.

Farmers can cut their fertilizer bill by growing their own. Fall or spring seed-gume crops can convert limited free nitrogen in the soil to usable plant food. Inoculate seed and use phosphate for best results.

Making Gas Service Dependable Requires Endless Preparations

For indoor comfort and health protection you face winter without fear. Automatically—or with a twist of your hand—your natural gas heating appliances flood your home with inviting warmth.

You store no fuel; make no preparations whatsoever. Nevertheless preparations are necessary. They go on day after day, the year around. So vital are these preparations that neither time, money, nor manpower is spared to make them.

These pictures taken on Lone Star Gas System record a few of the daily happenings which make your gas service dependable, your comfort secure.

ONE OF SEVERAL NEW PIPELINES recently completed to keep gas service ahead of increasing demand. Since V-J Day, Lone Star has invested over \$100 per customer in new facilities to assure each a dependable supply of gas. Yet for a year around average of less than 15¢ per day, you enjoy carefree heating, silent refrigeration, automatic cooking and abundant hot water supply using Lone Star Gas Service.

LONE STAR GEOLOGIST saves "core" from well being drilled for further study. "Core" reveals information vital to proper completion and operation of wells. This picture was taken on the rig at right, the night the well was successfully completed.

ROUND-THE-CLOCK drilling operations on this well were in their eighth week when this picture was taken. Months of painstaking, intensive work preceded the drilling. It has taken years of exploratory activity to obtain 1,140 wells (in over 100 gas-producing fields) that now supply you natural gas. Ceaselessly this continues.

BEHIND YOUR GAS SERVICE there is something to build, paint, or repair every day—oftentimes in remote places. Above, a crew cleans up debris around control valves which are part of a new compressor station.

COMPRESSORS ARE THE "HEART" of your gas service. Their beat sustains the flow of natural gas from fields to this city. Every summer Lone Star operators recondition every compressor so that when winter rolls around their beat will again be firm, strong and steady.

Diabetes Is Major Cause of Death, Doctor Asserts

Diabetes is among the first ten reported causes of death in Texas. There are many more people receiving treatment for this disease. Probably there are hundreds of undiscovered cases in the State, says Dr. Geo. W. Cox, State Health Officer.

Early recognition of diabetes pays. In the experience of doctors, those discovered early before they had complications lived three times as long as those discovered after some blighting affection drove them to a doctor. If you are the relative of a diabetic, or if you are approaching the fair, fat, and forty era of life, go to a doctor before you get sick, and find out if you have diabetes. If you do have it, control the disease in season and out of season. It pays.

Don't be caught napping. Find out if you have diabetes! If you do have it, make it an asset! Prove that you can live longer with it than without it. Then you will be helping not yourself alone, but also other diabetics.

What is diabetes? When a person has diabetes, his body has lost some of its ability to turn the sugar into food into heat and energy. The sugar which should be used by the body goes into the blood stream until there is so much sugar in the blood that the sugar overflows into the urine. Because a lot of the sugar is not used, various bodily organs such as heart, liver, kidneys and eyes do not get good nourishment.

The person whose diabetes is not treated may get cataracts and other eye diseases, kidney trouble, hardening of the arteries, or gangrene. Be sure to consult your family physician.

THANKS

I am certainly grateful for the gift that I recently received from the citizens of Haskell. I realize that few places would take the time to show their appreciation for the work that it takes to build a better band, as you people have shown. The best way I can thank you is to do the best work I can possibly do in the future. Again I want to thank you for all that you have done this year for me in your cooperation and for the gift.

New Plymouth Models Go On Display Today

The 1950 Plymouth car, with important styling changes and improvements for safety and riding comfort, will go on display in dealer showrooms throughout the country January 12.

In Haskell, the new models are on display in the showrooms of Cox Motor Co., Chrysler-Plymouth dealers, and Pitman Motor Co., Dodge-Plymouth dealers.

There are new lines in the silhouette which give the new Plymouth a longer, lower, more streamlined appearance. The changes are readily apparent whether viewed from the front, rear, or side.

Rear fenders, which are bolted on for economical removal in case repairs are necessary, have been restyled and engined. A larger rear window on club coupes and four-door sedans, slightly greater over-all width, and alterations on the rear deck provide a longer, heavier, road-hugging appearance for all models. The grille has been simplified and made more massive. It consists of two large horizontal bars with a curved, down-top member and a single vertical bar at the center. Above the grille the Plymouth nameplate appears in larger block letters, and a bigger, more colorful medallion has been placed over the nameplate.

Described as "Packed with value and ready to prove it," the new Plymouth was characterized by D. S. Eddins, president of Plymouth, as "The greatest car value ever offered the public."

"When we speak of value," Eddins said, "we mean we have combined beauty with sensible styling, that we have achieved big-car performance with small-car economy, and that the mechanical excellence of which we have always been proud has maintained its high level."

The front and rear tread have been increased, a factor which increases stability, eases tire loading stresses on curves, and enhances the car's general appearance. Thirty-two percent larger than on previous models, the new rear window increases visibility and its lines blend into the car's new streamlining motif. The window is set in

Plymouth Has Massive Look

The front of the new Plymouth has a massive appearance. The grille has been simplified, and the bumper is larger. There's a new name plate in larger block letters, and a bigger, more colorful medallion. The cars look new "both coming and going."

A newly designed locking rubber seal.

There are larger bumpers on both front and rear. In addition to providing greater protection for the grille, rear deck and fenders, the bumpers add materially to the general appearance of massiveness.

Question—I intend to apply for a GI loan to go into business. Is there any limit to the period in which I must repay such a loan?

Answer—If your GI loan is a non-real estate business loan, it will have to be repaid in 10 years or less; a real estate business loan may run up to 25 years.

Q—Why do I lose all the money I paid in premiums on my term insurance when I convert to a permanent plan?

A—While your term insurance was in force, you received insurance protection against death at a very low rate for that period. Term insurance was intended to provide no more than that.

Q—I am receiving compensation from VA for a service-connected disability. My dependent parents reside in a foreign country. In event of my death, who should they contact to get the compensation to which they may be entitled?

A—They should contact the U. S. Foreign Service in the country in which they reside. The U. S. Foreign Service cooperates with VA in the administration of benefits available to veterans, their dependents or beneficiaries in foreign areas.

Q—I was honorably discharged without disability after World War II service. Since my discharge, I was partially disabled in an automobile accident which prevents me from holding down a full-time job. Am I entitled to any VA benefit for this disability?

A—No, but if you should become permanently and totally

Animal Psychology Indirectly Affects Income of Farmer, Studies Show

Animals, just like human beings, have their own ways of making adjustments to the problems of life. How much the farmer knows about the physiology of his animals may be reflected in his income from livestock, says Dr. W. C. Banks, extension veterinarian of Texas A. & M. College.

Correct handling usually adds more money to his income and incorrect handling cuts income.

Generally speaking, says Banks, we know that animals are influenced perhaps more than humans by emotional changes caused by fear, jealousy, pain, suspicion, frustration and the dominance of stronger members of their species.

Dozens of examples can be cited on livestock farms. A good example, points out Banks, is the dairy cow. When she is subjected to a sudden change or something happens to upset her, she gives less milk. A number of things can drop unusual noises, rough handling, change of caretakers or even a dislike for the milking time attendant may affect her production.

Believe it or not, says Banks, the relationship between cows is important. In every large herd, he says there are a few outstanding characters. One cow may try to dominate all the other cows; one may enjoy hurting others. Some cows require a great deal of affection from the owner before they produce at their best while some resent being petted.

It seems that some sheep don't like to take their pills any better than some humans. When they are given a large medicated pill and then turned loose, they may wait until the owner is out of sight and then get rid of it.

Banks says when dealing with pigs, it is well to remember that they are comfortable looking animals and only when they are comfortably housed and properly cared for, will they turn feed and

water into the maximum amount of pork.

Dr. Banks believes that one of the secrets of successful livestock production comes from knowing your animals and then taking advantage of this knowledge to get from them their maximum production.

disabled for reasons not traceable to your service in the armed forces, you may be entitled to a pension, providing your income does not exceed \$1,000 if you have no dependents, or \$2,500 if you are married or have a minor child.
