Jasper Lasater and Richard Wagner, who last week rode into Jackboro, stated that they had killed John McMurtry, and surrendered to the officers, had their examining trial before Justice Crawford, at that place last Friday and Saturday. They were admitted to bail in the sum of \$2500, which was immediately given, and Lasater returned to Graham last Saturday night.

Citizens of Young, Montague, Clay and Jack counties, friends of the defendants, were present, eager to make bond for them in any amount.

The details of the killing, as well as the causes leading to it, will not be made public until the trial of the case, which will probably take place at the September term of district court at Jackboro. Both parties express themselves as anxious for a speedy trial. They have many friends, who confidently expect for them an acquittal.

Best Family Flour at

At Rest.

John Oatman Jr., was born in Harrison county, Ind., Sep. 3d, 1815, and died at Farmer, Texas, June 11th, 1897.

Bro. Oatman came to Texas in the early fifties, settling in Llano county, and during all the trials of the early settlers he remained faithful to his duty as a man of God. He was a wonderful man in many respects. He was brave and generous, patient in every trial of life, and possessed a faith like that of Job or Daniel.

At one time he counted his wealth by the thousands, but his true riches consisted in that which is better than gold which perishes.

His property was all swept away, yet he never lost hope. Then his sight failed him and still his faith grew stronger. Finally his hearing and speech were almost destroyed, but he still believed in God, and just before he crossed the river he called for the last chapter of the bible to be read, that once more he might hear the promises of God. He loved more than all those beautiful words of John the beloved: "Blessed are the dead which die in the Lord from henceforth: yea saith the Spirit that they may rest from their labors, and their works do follow them." May his life be an inspiration to those who survive him. IRA ADAMS.

THE LEADER desires to remind those of its readers who are in arrears that it will mail them statements of their accounts about July 1st, and trust they will give them their attention and settle them up. We have been as lenient in this matter as we possibly could, and now that a good crop is assured we expect them to do the right thing toward us in the matter.

Refreshed Locals.

From the Graham Leader, Feb., 1877.

Owing to the non-arrival of our paper we are unable to get out a full-sized issue this week. It has been on the road for nearly a month, and is doubtless somewhere between here and Fort Worth stuck in the mud. No one regrets this more than we do, but it can not be helped.

As soon as the Texas & Pacific railway reaches this region it will supply all Texas with coal—being only half the distance it is now being supplied from Kansas and the northern part of the Indian Territory.

He went out last Sunday night to see his girl. It was dark—terrible dark. Going home he got into red clay, and finally after walking three miles—guessed measure—got wound up among some mules. Propps says the next man he catches hanging up among his mules after night, he will shoot.

Brochel has commenced work on his stone building on the north side of the square.

He had paid his addresses to the lady for some time, and at last popped the question. The lady in frightened manner exclaimed, "You scare me sir!" He did not wish to frighten the lady, and so remained silent for some time, when she said, "Scare me again!" We did not hear how the affair turned out, but should think it was pretty near his time to be scared.

The Old School Presbyterians are preparing to build a church. They already have nearly \$500 subscribed. We predict that before the summer is ended we will have two neat and commodious church buildings and a school house. There is nothing that adds more to the prosperity of a town than good schools and churches.

Some of the boys about town had a little fun the other night shooting off their pistols. It only cost them \$25.50 apiece.

Since our last issue a barber and a watchmaker have arrived in town and commenced business.

Dr. J. Dunlap has just returned from a trip to Round Timbers. He says he saw a herd of buffalo near the Timbers.

Mail service has been increased on this route to three times a week, commencing April 1st.

J. R. Baker deserves credit for the timely warning given yesterday that the Indians were advancing on Graham. He was at the creek getting water when he first saw them. Thinking he could make better time on foot, and knowing how anxious the citizens would be to know the Indians were so near, left his horses and lit out. There was also another one anxious to get the report in first, and had no further use for the horses he was watering, that was Colonel Kramer & Richards' stable man. The citizens are thankful for their thoughtfulness, but information was received the day before that the Tonks would pass through on their way to Fort Worth, and these were the Tonks. The gentlemen will find their hats somewhere between here and Salt Creek.

Gents' Neck wear in endless variety.

Bitter Creek.

There have been fifteen days of nice weather since the heavy rains ceased. We had a nice, slow shower yesterday and again last night, which was needed by growing crops. Corn looks fine and cotton looks well although somewhat in the weeds.

Farmers have been very busy the past few days harvesting their grain. The crop promises a fine yield. The estimate on oats is from thirty-five to sixty bushels per acre, wheat at from fifteen to twenty bushels.

Messrs Jones and Brown started their threshing Friday. They will begin at Seymour and move down the river.

Ben Moseley Jr. passed through here on his way to Seymour with a load of wool for Jeffery & Buckley.

Goose Neck Bend.

We had a very hard rain storm last night that laid the corn flat and blowed the grain shocks down, washed the ground into deep gullies and did other damage too numerous to mention.

Corn is good, and a full crop is almost assured after this rain. C. Eon has been checked by cool nights and is later than it ought to be, but is growing fine now.

The wheat and oat crops are about harvested and in the stack and shock. Wheat will make a good yield and oats were never better.

Our fruit crop is immense, and if this country had a market for its fruit we would be strictly in it. The quality is not so good this year on account of the trees being too heavily loaded.

L. McJilton was the choice of this community for trustee at last Saturday's election. Mr. McJilton will make a good trustee, and a better choice could not have been made.

Levi and Isaiah Aynesworth have been helping us out of the grass since the school was out. They make good hands wherever they are put.

G. H. McLaren will attend the normal at Graham this summer. Mrs. Ida Foster has been very sick, but is about up now.

It has rained so much lately and the weeds are so rank in the fence rows that we can't see over into our nearest neighbor's field. We heard some one cry out the other day over the fence, "A lost man!" We made our way over the fence and found "Phat Charlie" up to his chin in weeds and grass, but the snakes were too bad in that wilderness for us to venture in, and we only offered a few words of encouragement. And then Charlie held his way out.

Grass is good and cattle are fat. The roads are in a deplorable condition and will likely stay that way until the farmers get their crops clean. The road hands have a hard time of it, as there are such a small percent of the travelling public who are subject to road duty. A. J.

There is reason to suspect that many working men who marched to Canton last year will steer clear of that town in 1900.

After much debate, the uniform text book measure has become a law, receiving the governors' approval Thursday, June 10.

Reports from 2,000 planters and cotton dealers in the south indicate that there is an increase in cotton acreage this year over last year of 370,000 acres.

A shortage in the wheat crop is the general report from all the great wheat producing countries, which will likely make wheat high on the market.

A northern editor in speaking of the many advantages of the South remarks: "There is no necessity for a man in the South committing suicide. If he is tired of life just let him make love to another man's wife."

W. M. O'Leary, who is after the revenue collectorship for the Dallas district, was during the campaign, secretary to the Texas republican organization. E. H. R. Green says that O'Leary is one of the finest political writers in the country, and that all campaign documents from Texas republican headquarters, and for which Green was given credit, are really the work of O'Leary. Green says he will exert himself for O'Leary, and Green's influence is supposed to almost mean appointment.

It seems that the men who shot to death the white prisoner at Tyler are to be prosecuted to the full extent of the law. Eleven of the ninety citizens have been arrested and their examining trial set for next Wednesday. Seven hundred citizens went to the court house with them and swore if the accused were refused bail they would liberate them by force.

"Fifty million human beings starving to death—one tenth of that number already beyond all suffering—that is the frightful story to be recorded in telling of the present famine in India. It is a black spot in British history and naturally the British papers are anxious to hide the true state of affairs," writes a correspondent of the New York Journal.

Get Married and The Leader. In order that we may demonstrate the interest in the upbuilding and development of Young county we have decided to make the following very liberal proposition: To every couple who marry in Young county and reside in the county we will send THE LEADER for six months free of charge. Tell all your young marriageable friends and as soon as married have them send their name and date of marriage and we will send the paper to their address. This is a liberal offer and now is the time to accept. Boys, now get up courage and secure two prizes, the girl and THE LEADER.

The Senate's Duty.

Senator Tillman's disposition to indulge in reckless plunging interferes somewhat with the effectiveness of his pluck in his work of stirring up the corruption in the senate, but he can do good public service by sticking to his task as prodding the senate to a performance of its duty.

It is impossible to escape from the horns of dilemma which Senator Tillman has presented. Either senators have made money on the opportunities of their offices or the newspapers which publish the stories of senatorial speculations are guilty of slander. It is the duty of the senate to discover the truth and punish the guilty.

Senator Aldrich's denial that the shaping of the sugar schedule was influenced by the trust or that information concerning the intention of the finance committee escaped from the committee room amounts to nothing more than a denial that Senator Aldrich was influenced by the sugar trust or gave out information concerning the schedule.

The corruption of the national legislature in the interest of greed is fatal to good government. The suspicion of the corruption of congressmen by legislative lobbies or by individual desire to make money on legislation is fatal to public confidence in government. It breeds revolution. The senate must purify itself of corruption or suspicion. It must expose the guilty or expose the slanders.

Senator Tillman is engaged in useful work. More power to his pluck.—Republic.

Unusual Service in Emergencies. Great weakness and distressing disorders generally, Parker's Ginger Tonic gives gratifying results than any other medicine. R. J. Van Buren, Albany, N. Y., writes: "I have used Parker's Ginger Tonic of some benefit. It has cured my stomach and bowels. It has given me strength and vigor. It has cured my indigestion and I could find no permanent relief until I began to use the Tonic. My wife also suffered with disorders that gave her great distress, and would have been gone before now if not for your Tonic, for nothing else would help her. It is the best preparation I have ever used in my whole 50 years."

Don't Neglect Your Hair. Neglect your hair and you lose it. Parker's Hair Balsam restores the growth and color.

Money in the Treasury. At the close of business on May 29th, the cash in the United States treasury was classified as follows: Gold, \$181,037,891; silver, \$619,794,937; paper, \$147,289,920; bonds, (disbursing officers' balances, etc.) \$18,129,555. Total, \$867,260,288.

Against this there were demand liabilities outstanding of \$1,000,000,000. The net amount in the treasury is \$230,113,812. By which it will appear that there are \$172,883,111 in silver more than all the gold, paper and bonds combined, and live silver still accumulating. Of what use is this vast accumulation of silver in the treasury. We cannot redeem our notes with it, nor yet pay it out as interest on our loans. How is it that such a vast sum of silver has been allowed to be piled up in our vaults to remain there unproductive, doing neither the people or the government any good? Is it the object of the sound money theorists to absorb all the silver in the country and then pass a law wiping it out forever as a circulating medium? If so, there are at least seven million American voters who will rise up and test against it.—Weatherford Republic.

Stands at the Head. Aug. 7, Boggs, the leading druggist of St. Joseph, Mo., says: "Dr. King's New Discovery is the only thing that cures my cough, and is the best sold in the world." J. F. Campbell, merchant of Safford, Ariz., writes: "Dr. King's New Discovery is all that is claimed for it; it cures colds and is a sure cure for Consumption, Coughs and Colds. I cannot say enough for its merits." Dr. King's New Discovery for Consumption, Coughs and Colds is not an experiment. It has been tried for a quarter of a century, and today stands at the head. It never disappoints. For trial bottles at D. R. Allen's Drug Store.

Denver, Col., June 11.—Four railway washouts, a \$25,000 fire and a host of minor losses epitomize the evil results of the storm which prevailed in Denver and the southeastern section of the state generally from 7 o'clock last evening until a little after midnight.

Electric Bitters. Electric Bitters is a medicine suited for any season, but perhaps more generally needed when the languid, exhausted feeling prevails, and when the liver is torpid and sluggish and the need of a tonic and alterative is felt. A prompt use of this medicine has often averted long and perhaps fatal illnesses. No medicine will act more surely in counteracting and freeing the system from the national poison, Healthful, Indigestion, Constipation, and Diarrhoea yield to Electric Bitters. 50c. and \$1.00 per bottle at Allen's Drug Store.

Unless something is done right away the populist party in Texas will be a thing of the past.—Southern Mercury.

It is already a "thing of the past." It has been as dead as a salt mackerel ever since the leaders voted for McKinley, and many of them got a "whack up" for so doing. These leaders, by acting just as corrupt leaders do in all parties—that is, by advancing personal interests—thus robbed thousands of honest people who believed in and followed them. And now they are engaged in the hopeless task of trying to resurrect a corpse. And should they succeed in resurrecting it, it would only be to mark it again by another salt name and date of marriage and we will send the paper to their address. This is a liberal offer and now is the time to accept. Boys, now get up courage and secure two prizes, the girl and THE LEADER.

The Local Option Law.

Weatherford News. A ripple of excitement was created early this week by the announcement that the legislature, before the expiration of the regular session, had passed a law under which, when a county had adopted the local option law for the entire county, an election could be held immediately in any subdivision of such county to determine whether or not such subdivision would adopt or reject the law.

As most towns are usually the voting places of the liquor element, the gamblers, and men who usually oppose any law in the nature of restriction or prohibition, it goes without saying that such a law would kill the effect of the local option law where it was most needed, and make it practically useless to adopt the law. And as at the last election, the Weatherford justice precinct cast a majority against prohibition, the anti-liquor element would not be surprised if the law were passed.

The following letter from Mr. Mead, the leader of the anti-liquor element in the House of Representatives, is a matter of record. He says: "It seems from reports over the state that the anti-liquor element are running a grand bluff or the prohibitions are very badly misinformed as to laws passed by the legislature. No law has passed killing local option or materially changing it. The only change is by a bill introduced by Mr. Staples, which prescribes that hereafter in voting on subdivision local option, established laws must be followed, adopting the local option.
