### PINES FOR MEN.

Blacked butes, 1 sent, segars in pocket, 1 sent; watchin gum, Waterbury, 1 sent; wachia gum, 1 sent; stand up koller, 5 sents; russet shews, 2 sents.

### REFRESHMENTS.

Fruite Cream, Karamel Kake, Lemonade, Kokonut Kake.

It is a pleasure to me to sell Drugs to persons who know when they are getting first-class goods at lowest possible figures. Many thanks to my patrons and only ask them to come again and bring others with them to the place where they can get the full value for their money.

### C. G. KING,

at P. O. Building, Graham, Texas.

Immediately after the republican convention last Saturday, two prominent republican applicants for the Graham postoffice, who were not present and who claim they had been given no notice of the convention and were not permitted an opportunity to present their claims for local endorsement, awake to the fact that something had "drapped." Verily, the political mill grinds slowly, but the fellow who falls between the cogs gets ground to powder.

We understand that ten republicans constituted the convention.

### Stray Note.

I have in my possession one brown mare mule, about 4 years old, 14 hands high, brauced E.O. on left shoulder with rear. The brand is recorded in this county. The owner is requested to come and get her. J. R. McCLUNKEY, South Bend Texas, June 15.

### Notice to Trustees.

Newly elected trustees should qualify on July 1st, or as soon thereafter as convenient, and before contracting with a teacher must organize in accordance with terms of section fifty (50) school laws of 1895.

### O. E. FINLAY,

County Judge Young Co.

### Hail's Great Discovery.

One small bottle of Hail's Great Discovery cures all kinds of kidney and bladder troubles, removes gravel, cures diabetes, seminal emissions, weak and lame backs, rheumatism and all irregularities of the kidneys and bladder, in both men and women, regulates bladder trouble in children. If not sold by your druggist, will be sent by mail on receipt of \$1. One small bottle is two months treatment, and we will cure any case above mentioned. E. W. HALL, Sale Mgr., P. O. Box 218, Waco, Sold by Wadsworth, Bains & Co. READ THIS.

Weatherford, April 8, 1896.—We the undersigned have used Hail's great discovery for kidney and bladder trouble and cheerfully recommend it. E. M. Woodward, N. B. Johnson, W. C. McFall, H. S. White, J. C. McConnell.

Sit down hard on the fellow whose knife is worn out on dry goods boxes, whose pantaloons caboose is worn sleek, and whose tongue is every ready to malign his country to every stranger that comes hunting for a home.

You can now pay your subscription in wheat.

### Awarded

Highest Honors—World's Fair.

## PRICE'S

# CREAM BAKING POWDER

MOST PERFECT MADE.

A pure Grape Cream of Tartar Powder. Free from Ammonia, Alum or any other adulterant. 40 Years the Standard.

## ROYAL BAKING POWDER

Absolutely Pure.

Celebrated for its great leavening strength and healthfulness. Assures the food against alum and all forms of adulteration common to the cheap brands. ROYAL BAKING POWDER CO., NEW YORK.

### Rehashed Locals.

From the Graham leader, April, 1877. Capt. Holmes killed two bears on Flat Rock, about five miles from town one day this week.

Several of the cow boys got on a lute last Tuesday night, but fortunately for them there was no shooting done. Since the boys have learned that it costs \$26.50 per shot, they keep remarkably quiet.

A buffalo calf was brought into town this week.

Mr. J. H. Glasgow was examined this week and obtained license to practice law. He stood a good examination, admitting the fact that he was well versed in the principles of law. His prospects are very flattering and he has our best wishes for future success in his chosen profession.

The buffalo trade, amounting to half a million dollars or more, will be fully established at Graham the coming season.

Mr. Garrett is building a neat residence just south of the square.

Some parties from Missouri and Indiana have purchased lots on the southeast corner of the square and intend building a hotel. We understand the building will be of brick.

Mr. Jeffery opened his ice house the other day and was surprised to find that his ice had all melted.

Latest Rail Road News. HENRIETTA, Tex., June 29, 1897. EDITOR LEADER: Please accept my thanks for the little puff you gave me in the columns of your paper last week, in connection with the enterprise of building the railroad from the T. & P. to Mineral Wells, Jacksonburg and Henrietta. Somebody has misinformed you. We are working now and grading the line from the Texas & Pacific to Mineral Wells, and in the next 20 days will be laying iron. As to the Henrietta and Archer City road, I never had any connection with it whatever. Why is it you wish to bring me in disrepute through the columns of your paper without a good cause I cannot understand? If I have ever given you a reason for so doing I should be pleased to know when and where it was. Hoping you will give me the justice I deserve after making diligent inquiry, and set me right, I am, Yours respectfully, W. A. SQUIRES.

Speaking of what a newspaper does for its community, the late United States Senator Davis, of Illinois, made an address that remains ever green in the memories of newspaper men. He said: "Every year every local paper gives from \$500 to \$6000 in free lines for the benefit of the community in which it is located. No other agency can or will do this. The editor, in proportion to his means, does more for his town than any other man; and in all fairness, man with man, he ought to be supported, not because you may happen to like or admire his writings, but because a local paper is the best investment a community can make. It may not be crowded with great thoughts, but financially it is more of a benefit than both preacher and teacher. To-day editors of local papers do more for less pay than any man on earth. Patronize your home paper, not as a charity, but an investment.

Rev. Bee Hawkins of Lacy, was in town yesterday. He has just recovered from a severe spell of sickness.

Graham is very dull now. The farmers are all busy with their cotton and threshing and do not come to town unless compelled to do so.

J. D. Short went to Henrietta this week.

### Farmer Facts.

Everything is quiet in Farmer this week. We are needing rain. We must have the telephone. Our business men should get to work for it.

Mr. A. C. Neeley, of Olney, was here Wednesday night on his way to Fort Worth to visit relatives.

A. A. Seward and wife, and Mr. Cates and wife, of Degatur, were here Thursday night on their way to the steen farm in Archer county, which they have recently purchased.

Dr. J. W. Gallagher, of Graham, was called to see J. D. M. Martin, of the Oak Grove vicinity, Thursday. Mr. Martin is better at this writing.

White Ganaway, of Lacy, came in from Weatherford with groceries for J. B. Wear & Co. last week.

Miss Ella Peery returned home Thursday from near Graham, where she has been visiting her aunt during the past month.

A. M. Horner, travelling representative for the DeWitt medicine company, was doing business in Farmer Friday.

Joe King and family returned from the Brazos Saturday, where they have been gathering plums.

Mr. and Mrs. J. L. Steen, of Red Top, passed through Farmer Friday on his way home from Denton county.

Ike Tenny, John Dan, W. J. Bethany and Henry Rogers, all of Markley, passed through town Saturday en route to Ben Waters' to attend the sale.

Jim Rutherford and wife, from near Indian mound, were in town Saturday buying supplies.

A great deal of business was done in the future great Saturday. The business of Farmer seems to be improving, and when we get our telephone line from here to Graham we will join it.

We won't be cut off from the outside world any longer.

The Baptist brethren are working on their arbor preparatory to the protracted meeting, which will begin the latter part of this week. Everybody is cordially invited to attend. A protracted meeting will begin at the Methodist church on Friday night before the fourth Sunday in July. A good meeting is expected.

Mr. Rogers filled his regular appointment at the Methodist church Sunday and Sunday night. J. L. Jordan started to Weatherford Monday.

The modern art company's photographic gallery is here.

Messrs Eichelberger and Cook were here Monday and reported some of their cattle dying, and many more sick.

Dr. J. L. Wilson went to Plum Grove on business Monday.

Will Clarin and family have gone to Belknap this week.

G. E. McNew and family returned Tuesday from the river, where they have been gathering plums.

Prof. Fairly, who is to succeed Prof. Ainesworth in the Farmer school, is moving into the Ray house this week. We hope the professor will have a good school. Let all the patrons work for the school and co-operate with the teacher. Farmer is worthy of a good school and why not have one? Such a school is the life of the town as well as of the community at large. Children, be ready to start in the first day and attend regularly all the term, and don't blame the teacher for everything when you are really at fault yourself.

W. A. Pritchett's baby is very sick.

Mr. and Mrs. J. E. Barrett, of the Olney neighborhood, were in town tuesday.

Mr. J. A. Jones, of the north side, was in town Tuesday, and reported the wolves catching his chickens. Give them a dose of strichnine.

Rev. Bee Hawkins and wife, of Lacy, were shopping in town Tuesday.

There was singing at the Baptist church Sunday evening. A large crowd was present.

Mrs. Clayton and Miss Sallie Williamson - were shopping in Farmer Tuesday.

Fred Daily, A. C. Casey and A. L. Donnell started to the Falls this morning.

SKIPPER. Plant your ad, in THE LEADER and reap a rich harvest.

### Republican Mass Meeting.

In response to the call of the county chairman, the republicans of Young county assembled in mass meeting at the court house last Saturday at two o'clock. A mass meeting of the republicans of precinct No. 1 having been called for the same time and place, on motion the meetings were united. W. J. Treue was elected chairman and M. S. Handy secretary.

C. W. Johnson, as county chairman, stated the object of the meeting was to take action in reference to endorsements of postmasters for the different postoffices in Young county, it having been requested by republicans in authority that such action be taken.

On motion the chair was instructed to appoint a committee of five persons from the different parts of the county to recommend parties to be appointed postmasters. The committee consisted of W. C. Jeberman, chairman, J. B. W. Gray, at Farmer, J. C. Fisher and C. W. Johnson. The committee returned the following report: "We, the committee appointed by the republican mass meeting of Young county, held at the court house on the 29th day of June, 1897, in pursuance of a call for said meeting, submit this report:

We suggest the following persons as proper parties to be appointed postmasters, viz: J. T. Cunningham, at Graham, John W. Casey, at Farmer, Hoyt Brown, at Olney, T. L. Richardson, at Trapp, George T. Wood, at Belknap, John W. Profit, at Profit, William H. Elkins, at Eliasville, J. L. McDaniel, at Markley, Dana McGray, at South Bend.

"We recommend that the county and precinct committees, or a majority thereof, suggest names of suitable persons for other postoffices in Young county, and that their action be ratified and fully endorsed as the fair expression of the preference of the republicans of this county for the postmasters at places not designated above.

"The committee has had under careful consideration the importance of this matter, and with some reluctance recommended for nomination and further consideration the following named persons, not fully identified with the republican party, but they are, in every instance, present, industrious, and are faithful and efficient officers, and the republicans who are patrons of said offices have signified their disapproval, and further, because we believe it to be the political duty of every republican to serve his country by holding office and otherwise when called upon to do so without hesitation or complaint at the burden cast upon him, and such considerations have prevailed upon Mr. Elkins to accept the service if he shall receive the appointment.

"We respectfully request that the parties above recommended for postmasters who have not already done so, to forward to the county chairman, a written application for the appointment, accompanied by a petition of the patrons of the office, otherwise the county organization will treat the default as a desire not to serve under this administration, and will endeavor to have some other suitable person appointed.

W. C. LEMMON, J. C. FISHER, J. E. WITTENBERG, Com. W. H. ELKINS, C. W. JOHNSON.

On motion the report of the committee was accepted and the committee discharged, and the above named parties are duly recommended to be appointed as postmasters at the respective places above named.

The secretary was requested to furnish a copy of these proceedings to each of the newspapers in Young county for publication, and there being no further business the meeting adjourned sine die.

W. J. TREUE, Chairman. M. S. HANDY, Sec.

### Get Married and The Leader.

In order that we may don't strain a great deal in the upbuilding and development of Young county we have decided to make the following very liberal proposition: To every couple who marry in Young county and reside in the county we will send THE LEADER for six months free of charge. Tell all your young marriageable friends and as soon as married have them send their name and date of marriage and we will send the paper to their address. This is a liberal offer and now is the time to accept. Boys, now get your court and secure two prizes, the girl and THE LEADER.

### No Gripe

When you take Hood's Pills, the old-fashioned, sugar-coated pills, which bear the name of the famous physician, Dr. J. C. Hood, you are not in it with Hood's Pills. Hood's Pills are easy to operate, is free of all drugs, and is the only medicine that can be taken by the most delicate and sickly. Hood's Pills are the only pills that can be taken by the most delicate and sickly.

## Hood's Pills

Don't forget the Racket Store. Our prices this week are: 1 Coffee Mill, 25 cents. 5 papers Needles, 30 " Extra fine tan Slippers 50 " Extra fine linen Collars, 5 " Gents' linen cuffs, 5 " 7 papers pins, 5 " 11 qt. dish pan, 30 "

WANT TO NEARLY DIE LAUGHING.—That's what you'll do when you look at anybody through the Laughing Camera, mailed free with every three months subscription to that popular humor-industrial weekly, Texas Sanitely. Fifty cents in stamps, sent at our risk, will get them both, postage paid. If you don't say you got a double barrel, the Karnat laugh gun, pronounced us a pack of liars and draw for the stamps. SANDWICH PUB. CO., Dallas, Texas.

## THE LEADER.

Published Weekly by J. W. GRAVES.

Subscription \$1.00 a Year.

### LITTLE LOCAL LEADERS.

Advertise in THE LEADER.

Mrs. B. S. Doty and child are both on the sick list.

Don't buy your groceries until you get Ford Bros. prices.

Miss Grace Holmes was married last Friday at Palo Pinto to Mr. White of Stephens county.

You can always find everything in the grocery line at Ford Bros. without any damage to their Bostonian enamel. HENEGER, The Blacksmith.

### Private School.

Some of our citizens, who are dissatisfied with the management of the public school at this place, have gotten up a private school and employed Prof. R. Lindsey as teacher. The school will open on the first Monday in October, in the old school house.

Prof. Lindsey is one of the best teachers in the county, and we have no doubt of the success of the school.

For Sale or Trade. A very heavy, two-horse, top buggy. Apply to W. C. BURNS.

The Tonka, they picnic for today, announced last week, has been postponed.

Wild Goose Oil possessing the most wonderful healing properties for Cuts, Burns, Sprains and Sores of any Medicine on the market. For sale by C. G. King, Graham.

Street Commissioner Taylor says his levee on North Elm street still stands and he is not afraid of it breaking unless we have more rain.

One dozen Cabinet Photos of yourself and a nice Crayon Portrait from any old picture for \$4.00, at CHISM'S GALLERY.

Wheat! Wheat! Subscribers in arrears to THE LEADER can now pay their subscription in wheat, at the market price.

Best flour in half and full patent, made from last year's wheat at MATTHEWS, TIDWELL & NORMAN'S.

Jonas Ely is reported quite sick. Miss Carrie Finly is on the sick list this week.

For Sale or Trade. A good McCormick mower—in good repair—for sale or trade for a horse. Apply to T. E. DOWDLE, at the Brick Livery Stable.

S. T. Nowlin, living on the old Bob Byrd place in Goose Neck Bend, dropped dead last Tuesday while going to the cow pen.

Call on M. H. Chism for Dental work. Gold crowns, a specialty.

M. S. Handy has sold his residence to Harve Stewart and has moved into the Finlay house.

Best Family Flour at FORD BROS.

Ford Bros. is the place to get the best and freshest groceries at the lowest prices, and don't you forget it.

**The Graham Padcr.**

J. W. GRAHAM, Publisher.

GRAHAM, - - - - - TEXAS.

A man should keep his friendship in constant repair.

We may have to annex Hawaii for the sugar there is in it.

A selfish man, like Noah's dove, can find no rest for the sole of his foot.

About the only people in the world at the present time are the savages.

An Atlanta cashier, named Harry Casen cut two wide a swath and finally got in front of the register himself. His father-in-law tried to save him, but he was not equal to the emergency, and poor Harry was finally thrown into prison. He spent thousands of other people's money and was called a God fellow while it was going. Now it's different. The best plan is to let every person spend his own surplus.

A mini for making bogus silver dollars has been uncovered at Axtell, Mich. After a successful operation of several years. The man who operated it was known about town as a gentleman of leisure, and his dollars appeared to be just as good as any other man's. He finally made a fatal error when he went to Chicago and paid eight of them to one man. The best of money makers, it seems, will occasionally make mistakes.

There are various developments of the "stamp craze." The queen of the Netherlands, who is only sixteen years of age, is reported to have said: "I should like very much, my dear minister, to have a new series of stamps which will show to my people just what I am at present." Her idea is to appear in her large collection. The engraving on official papers will not be changed, it is said, until her marriage. When royalty has its disappointments, like other stamp collectors, the queen has ungratified desires.

The Connecticut legislator who proposed that the acts of the general assembly should be translated into foreign languages for the benefit of those who cannot read English, forgot that one of the first duties of every citizen is to work, and that it is his duty to acquire a knowledge of the English tongue. There could be no objection, however, to a provision that the enactments of the Connecticut legislature should be translated into good and unimpeachable English.

An interesting literary experiment is being made in the women's department of the University of Chicago. The women who served with food similar to that served to men's athletic teams when in regular training, all the food is carefully weighed and analyzed before it is served, and the vitamins arranged according to their relative value as muscle strengtheners. Each girl must eat the precise amount of fat and albumen each day, which has been found by careful study to be needed by the human system, and eating too much is an evil which is especially guarded against.

The following definition of a bucket shop is given: An establishment conducted nominally and ostensibly for the transaction of a grain or stock exchange business. The proprietor usually takes one side of every deal that is made in his place, while the patron usually takes the other. The bucket shop is usually situated in the market, and the proprietor is usually a man of considerable capital, who is usually a man of considerable capital, who is usually a man of considerable capital.

**TALMAGE'S SERMON.**

**A BAG WITH HOLES—LAST SUNDAY'S SUBJECT.**

From the Text: *Haggai 1:3* as Follows: *He that earneth wages, earneth wages to put it into a Bag With Holes.*

N PERSIA, under the reign of Darius Hystaspes, the people did not prosper. They made money, but did not keep it. They were like people who have a sack in which to put money, not knowing that the sack is torn or eaten of moths, or in some way made incapable of holding valuables. As fast as the coin was put in one end of the sack it dropped out of the other. It made no difference how much wages they got, for they lost them. "He that earneth wages, earneth wages to put it into a Bag With Holes."

What has become of the billions and billions of dollars in this country which have been hoarded for years by the millionaires? Some of them have gone for houses, rent, or the purchase of home-steads, or wardrobe, or family expenses, or necessities of life, or to provide comforts in old age. What has become of the billions which have been hoarded for years? Wasted at the gaming table, Wasted in intoxicants. Put into a bag with a hundred holes.

Wasted in money that the working classes have spent for drink during the last thirty years and I will build for every working man a house, and lay out for him a garden, and I will buy for him a pair of shoes, and I will dress his children in silk, and place at his feet a pair of dancing shoes, and I will give him a pair of dancing shoes, and I will give him a pair of dancing shoes.

There are various developments of the "stamp craze." The queen of the Netherlands, who is only sixteen years of age, is reported to have said: "I should like very much, my dear minister, to have a new series of stamps which will show to my people just what I am at present." Her idea is to appear in her large collection. The engraving on official papers will not be changed, it is said, until her marriage. When royalty has its disappointments, like other stamp collectors, the queen has ungratified desires.

Some Up-to-date Hints About Cultivation of the Soil and Yields Thereof—*Horticulture, Viticulture and Floriculture.*

In response to notices sent out for samples of corn to test germination, thirty-two samples have been tested from various parts of the state. Germination tests indicate that the crop of 1936 is not as good as has generally been supposed. It germinated where it has been kept in dry places. A few tests are here given: Calico corn, an early maturing variety, sown at cribbing time; two germination tests were made. First test, 93 per cent in laboratory; second test in greenhouse, 93 per cent. Yellow Dent, collected in 1935 and kept in crib since time of collection; germination, first test in laboratory, 99 per cent; second test, in greenhouse, 100 per cent.

White Dent, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent. Calico corn, crop of 1935, gathered after frost, kept over chicken coop during first test in laboratory, 99 per cent; second test in greenhouse, 96 per cent. The latter probably in middle of shock.

White Dent, 1935, stored in corn crib collected earlier, first test in laboratory, 95 per cent; second test, in greenhouse, 94 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 98 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

**THE GREELEY COLONY.**

**Independent Men and Women—Equality of Independence and Social Equality.**

In considering the net results of Greeley colony it is first important to note that it has been thoroughly and carefully analyzed. It presents a striking contrast to the Fourier experiments, from which it may be said to have descended. Each man prospered according to his merit and what the community undertook to do by means of co-operation it accomplished. It cannot be said that the latter principle has applied extensively in the past, but in the Greeley colony it is being realized in a very practical manner.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

**SUGAR BEET SOIL.**

**The query that presents itself to most people when the matter of growing sugar beets is raised is, in what kind of soil is best to raise them?**

The answer to this query is, in general, that any moderately fertile soil, such as will grow wheat, corn, etc., will be found to be suitable for sugar beets, and even soils so sandy or alkaline to grow these crops will produce good results. Sugar beets do not require a good top soil, but they do require a good subsoil, and a good subsoil is a good thing to have.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

White Dent, 1935, gathered after frost, kept in crib; first test, 100 per cent; second test, in greenhouse, 100 per cent. Same variety, 1936, germination, first test in laboratory, 99 per cent; second test, in greenhouse, 96 per cent.

### Products of Hawaii.

Besides sugar and rice, the staple products, coffee, bananas, oranges and other fruits are largely grown. Food products are abundant, especially of the kind suitable to a hot climate, says Paradise of the Pacific. The native food consists largely of the taro plant, of which the best varieties are grown in the shallow ponds of fresh water. From this plant is made the poi, which is the ordinary food of the Kanaka. The sweet potato grows abundantly among the rocks and flourishes abundantly in good soil, while the common potato sometimes grows well, though it is often injured by worms. The quality of the coffee raised is equal to the standard. The climate is also very favorable to the growth of the long staple banana and the sugar cane. The banana is indigenous, and is the most abundant of the fruits. If there are the apple—also a fruit peculiar to the Pacific islands, soft, juicy, and mildly acid—many varieties of pineapples, of the best quality, the Scotch melloe, the papaya, the traveler's tree of Madagascar and other foreign plants.

### FOR WOMEN ONLY.

Many women are sick. More than one-half of the women are at some stage of disease. The great majority of these can find a remedy in a small bottle of Dr. Williams' Pink Pills for Pale People. Each bottle contains a full course of treatment, and is guaranteed to give relief in every case. Dr. Williams' Pink Pills for Pale People are a complete and reliable remedy for all the ailments of women. They will cure all the ailments of women, and will give them a new lease of life. They are a complete and reliable remedy for all the ailments of women, and will give them a new lease of life.

### OPIMUM AND MORPHINE.

The only Universal Cure for the Habit. It is Guaranteed. Seating in a chair, the patient is told to read the book. The book is a small, portable, and easily carried. It is a complete and reliable remedy for all the ailments of women, and will give them a new lease of life.

### TO-BE BUILT FOR FIFTY YEARS.

Seating in a chair, the patient is told to read the book. The book is a small, portable, and easily carried. It is a complete and reliable remedy for all the ailments of women, and will give them a new lease of life.

### PROF. LUCIAN I. BLAKE OF THE CHAIR OF ELECTRO-CHEMISTRY OF KANSAS UNIVERSITY.

Seating in a chair, the patient is told to read the book. The book is a small, portable, and easily carried. It is a complete and reliable remedy for all the ailments of women, and will give them a new lease of life.

### SWEET ON MILLIONS.

THEODORE HAVEMEYER HAD A PENCHANT FOR RICHES. He Amassed a Fortune of \$100,000,000.000 the Result of Speculation in Sugar—Known All Over the World as the American Sugar King.

HE later Theodore A. Havemeyer was the grandson of the Havemeyer who founded the great American sugar industry. He created so much wealth for himself and his descendants.

His fortune was made in the sugar business. He was a great speculator in sugar, and his fortune was made in the sugar business. He was a great speculator in sugar, and his fortune was made in the sugar business.

### CHARLESS JAPAN.

An American Woman's Experience with Furniture Made to Order. "One of the funniest experiences I had in Japan," said a woman recently who has been connected with missionary work in that country, according to the New York Tribune. "was with chairs. It had never entered my mind that what is with us such a common article of household furniture should be an unknown quantity to any of the subjects of the mikado, and it was with dismay that I discovered the house I was to occupy was quite chairless."

The woman described the difficulties she faced in finding furniture in Japan. She had to have her furniture made to order, which was a time-consuming and expensive process.

She described the process of having her furniture made to order, from the selection of the wood to the final assembly.

She described the process of having her furniture made to order, from the selection of the wood to the final assembly.

### Thrown From a Horse.

Miss Bertha Whitwood. Mr. H. Kuhn, of Marion, Kansas, writes: "About three years ago my granddaughter Bertha Whitwood was thrown from a horse, receiving a wound of the scalp. Under the treatment of physicians the wound seemed to remain about the same, until it finally became very angry looking, and broke out into a running sore. This soon spread to other parts of the scalp, and ran down the side of the neck, increasing in severity, and finally discharging her."

Miss Bertha Whitwood was cured of her scalp condition by Dr. Williams' Pink Pills for Pale People.
