NUMBER 6

GOOD HIGH SCHOOL FOOTBALL TEAM TO PLAY HERE FRIDAY

Football has come into its own with the advent of school and Graham High has a team which bids fair to take a leading place among the teams of this section.

The boys started before school opened under the direction of R. H. Taylor, so when Mr. Harrison took charge on September 12, he found a bunch already in condition and showing good form. Since then the boys have been working hard and in the two games which they have played, they brought honor to Graham High.

The first match was with Burk Burnett whom they defeated by a score of 51 to 7 in four quarters of eight minutes each and in the last two quarters, nearly all of the second string had a chance at the visitors. The only feature which marred this game was the small crowd which turned out to witness the match. It costs money to bring teams here and practically the only means the high school has of raising funds is from gate receipts.

The next match was with North Fort Worth in Fort Worth on October 1. This team expects to win the championship of the state high schools and expected an easy victory over Graham. Notwithstanding the long tiresome trip on the train, the Graham boys got busy from the first kick-off and for three quarters carried the fight into Fort Worth's territory. It was a hard fought game, with much open playing and the ball changing hands frequently because of intercepted forward passes. At no time, however, during the first three quarters was the Graham goal in danger, while the Graham team frequently had the ball within fifteen or twenty yards of Fort Worth's goal.

The North Side team was penalized several times for rough playing and for being offside while Graham was penalized only twice. Fort Worth had over thirty men out in uniform and actually used about twenty-two men during the game while Graham had only two available substitutes. In the fourth quarter Malcolm Williams, who had been a tower of strength for Graham at fullback both on offense and defense, had to be taken out on account of an injured shoulder. This necessitated a rearrangement of the team and from then on Fort Worth had Graham on the defensive. With a fresh team due to numerous substitutions the Fort Worth bunch was able to put the ball over Graham's goal for two touch-downs in the last few minutes of play. This resulted in a score of 14 to 0 in favor of Fort Worth. However, defeat in this case was not bitter as the Graham boys outplayed Fort Worth at every point until their team-work was spoiled by Williams' removal from the game. It was a good game from every standpoint, though the Graham boys displayed better sportsmanship by playing cleaner football. However, the North Side bunch entertained their visitors royally and the local bunch came home with nothing but good will for Fort Worth though they got the larger end of the score. The glory is not in whether you win or lose but how you play the game.

It would be hard to pick out individual stars for Graham as the bunch showed wonderful teamwork with every man doing his part well. However Dickenson at end, Johnson at center, DeHaller at tackle, and Williams at fullback showed up well. But the good showing made by the Graham team was due almost entirely to teamwork rather than individual playing. Coach Harrison says that he has never traveled with a more gentlemanly bunch of boys than the high school team and this reflects honor and credit on the players as well as the school.

The next game will be with Jacksonville on Graham Friday, October 7, at 4:15 p. m. in the City Park. The crowd at this game for a full support of the team and also for financial reasons. Let everyone who can come out and help the team win this game.

Mr. and Mrs. J. J. Woods are entering the new year at their home on The South Side, Houston.

CHAMBER COMMERCE WORKS DILIGENTLY FOR IMPROVEMENTS

The Secretary of the Chamber of Commerce states that the end of the campaign to raise money to help the Graham schools is in sight. He believes that he will be able to make a full report in the next issue of The Leader. He has worked faithfully this week for the schools and we are glad to learn that before many days the desired amount will be subscribed.

It was stated last week that \$8,000.00 is needed to take care of present needs. He hopes to be able to secure the full amount soon. He is making an effort to see every friend of the school. If he has not yet seen you, be prepared to subscribe when he calls.

Secretary Walker states that as soon as this is completed he will begin on another project that is of vital importance to Graham. The increased activity in the Bunger field has greatly increased the traffic on the Graham and Bunger road and the secretary will begin to solicit funds for the improvement of this road. A small force is at work now but to put a large force to work.

The Chamber of Commerce is working for Graham and Young County and needs the hearty cooperation of every Graham booster.

PROCLAMATION BY THE MAYOR

It is the custom throughout the nation to observe October 9th, anniversary of the Chicago conflagration of 1871, as Fire Prevention Day, in which connection the Governors of the several states and mayors of cities and towns issue their proclamations to emphasize the need for eliminating fire hazards.

Each year in this country several thousand persons are burned to death or maimed for life by fire and heavy toll is taken of our natural and created resources because many of us do not pause to count the cost of tolerating conditions that cause fire. Never in our history have we suffered so severely as within the last twelve months when approximately 20,000 lives were lost and \$500,000,000 worth of property values were burned.

Therefore, I, E. S. Graham, Mayor of the city of Graham, do hereby proclaim Sunday, October 9, 1921, Fire Prevention Day in our city and call upon every citizen to join in its appropriate observance.

On that day it is proper that ministers of the Gospel throughout the city arrange for addresses from pulpits and before Bible Schools covering safety from fire. Let the 8th day of the month of October this year be known as the day for safeguarding against fire during which let us place our homes and business properties in order against damage or destruction by a careful examination and repair of chimneys and flues and heating and lighting apparatus and equipment, by making provision for the safe handling and storage of volatile liquids and explosives, by clearing away rubbish and trash and other agencies that cause fire.

It is important that our board of education and teachers in all public and private schools inaugurate fire drills, and instruct the children in their care how to avoid fire. In cooperation with the City Fire Marshal and Chief of the Fire Department let all Fire Insurance agents, the Chamber of Commerce, Women's Clubs, Labor Councils and other organizations plan and execute appropriate activities to impress the need for fire prevention.

And henceforth let us set ourselves diligently and constantly to the task of eliminating preventable fire waste.

In testimony whereof, I have hereunto signed my name and affixed my seal of office, on this the 3rd day of October, A. D. 1921.

E. S. GRAHAM, Mayor.

Mrs. D. B. Thomas of Throckmorton, is building a modern bungalow on Cherry street and will make Graham her home as soon as her residence is completed. Graham is glad to have this estimable lady make her home here. She is a sister of Mrs. W. P. Stinson, and is well known to this section of the country.

GAS COMPANY IS READY TO SERVE GRAHAM PEOPLE

Are you using gas? This question has been asked many times in Graham during the past few days. The Ranger Gas Company completed their gas system in Graham last week and several were anxiously awaiting for the natural fuel to be turned on.

The company is now ready to serve the people. The verdict of those now using it is that it is satisfactory. The company states that every effort will be put forth to give the city satisfactory service.

The Young County Hardware & Furniture Co. gave the first cooking demonstration in their store last week as soon as gas was turned on. Norris-Johnson Hardware Company and the John E. Morrison Company gave demonstrations this week. Every demonstration has been satisfactory and has shown conclusively that our merchants are carrying good lines of gas stoves. Other stores in Graham have good lines of gas stoves and supplies and are ready to explain the good qualities of the goods handled. The best goods on the market are in Graham. "It's in Graham" is as true here as in the other places over the state.

If you want gas, it's in Graham. Read the advertisements in The Leader and you will find the very best advertised.

GRAHAM INSURANCE AGENCY IN D. & F. BLDG.

The Graham Insurance Agency has been bought by John A. Abernathy and Obie Dodd and will be moved to the D. & F. Building on the east side of the square. These gentlemen recently purchased the Haupt-Boyd Insurance Agency and will combine both of these with the Beachamp & Dodd Insurance.

Mr. Abernathy and Mr. Dodd will assume active management of the combined interests and will retain the name of the Graham Insurance Agency which has been in Graham many years. All of these companies have enjoyed a good business and with these companies combined The Graham Insurance Agency claims to be one of the strongest insurance companies in Northwest Texas.

MARGUERITE ELLEDGE WINS \$10.00 PRIZE.

The guessing contest in connection with the cooking demonstration at the Norris-Johnson Hardware store Monday, Tuesday and Wednesday attracted considerable attention. The company offered a \$10.00 prize to the lady who guessed nearest to the time required to bake biscuit in a Detroit Jewel stove with the oven door open. Much interest was manifested in the contest and the guesses ranged from two minutes to twenty minutes. Miss Marguerite Elledge won the prize, her guess being eight minutes and twenty seconds.

C. F. NEWMAN GETS FIRST TAX RECEIPT.

D. D. Cusenbary opened the Tax Collector's office Saturday morning. He was there with that happy smile of his to wait on the people.

C. F. Newman of Lovings was the first to receive a tax receipt for this year. John Craig of Graham was the first to get a poll tax receipt. The first day started off fine. The advance in the price of cotton and of oil will make tax paying easier this year.

Practically all institutions depending upon the payment of taxes for maintenance are now in need of funds and will appreciate the prompt payment by property owners.

OIL CITY GROWS RAPIDLY; 9 MILES SOUTH OF GRAHAM

The hustle and bustle of circus day is seen and heard around the new town of Oil City in the Bunger pool, nine miles south of Graham. It sprang up overnight and just seemed as if every one took it for granted that the spot selected was the logical one to best serve the wants of the oil field workers of the district. So from a shack on a corner lot, it has suddenly developed into a well plotted little town of many buildings, and if present indications are to be taken to mean anything, there are to be many more buildings of a more substantial construction.

Gas has been piped to the town already, and the Stephens County Water Company is laying a four-inch line through the streets to their gravity storage tanks nearby, which will insure sufficient water for all purposes. The town now boasts of two service stations, two restaurants, two drug stores, one general merchandise store and many smaller business houses of various kinds. An electric light plant is being installed which will be able to take care of the light problem, while lumber yards, supply houses and other concerns have bought locations and will begin building at once.

The town proper will be confined to the 300-foot drilling line, or in other words will be along the Graham-Breckenridge road so as to be clear of oil operators, who have the prior lease on the townsite, and who contemplate drilling this block at once. The many tents also remind one of a circus, but it is not, it's only an oil town being built up while you wait.

MRS. CHAS. E. HINSON HONORS HER SISTER, TUESDAY AFTERNOON

Mrs. Chas. E. Hinson entertained Tuesday afternoon in honor of her sister, Miss Lois Morrison, whose engagement to Mr. Finley Scruggs of Oklahoma City has been announced. Four games of bridge were played. Mrs. M. K. Graham winning high score and Mrs. J. P. McKinley the guest prize. Two dainty bud vases were presented to the honorees.

The hostess was assisted by her mother, Mrs. E. H. Morrison, Mrs. Ira T. Gilmer and Mrs. J. P. McKinley. A salad course was served to the following guests: Mesdames Frank Forbes, Q. Street, H. Wadsworth, E. S. Graham, M. K. Graham, Will Norman, Henry Criswell, C. P. Hutchison, Leslie Scott, and Robert Lee Morrison. Misses Lois Loving, Kathryn Craig, Buelah Allen, Gladen Garrett, Ida Chadwick, Fatine Dowdle, Eloise Morrison, and the honoree.

HALLOWEEN CELEBRATION

The Graham High School faculty and students are planning a mammoth Halloween Carnival for the evening of Friday, October 28, for the purpose of raising funds for the High School football team, which is badly in need of support.

The team, the students and the faculty respectfully request that the other organizations of the city refrain from scheduling any event which will conflict with this celebration on Halloween night. A "sure enough" show will be "pulled off" that night and the co-operation of the entire city is asked in order that it may be the success along all lines that the school so much desires.

COMPLETION OF WATER LINE HELPS BUNGER OIL FIELD

NOTED CARTOONIST FRANK LOGAN, SAW FUNNY SIDE OF WAR

Frank B. Logan, the doughboy who saw the funny side of the war, was a newspaperman and cartoonist before going to France as an officer in Uncle Sam's army. Through force of habit, he spent his idle moments in France sketching the peasants, the doughboy, the English "Tommy," and the little scenes about him which attracted his attention. His buddies seized upon these sketches, and one day one of them reached the office of the LeMans Bulletin, the newspaper published at this embarkation point. Logan immediately was given a cartoonist post with the Bulletin, and his drawings attracted much attention in this paper.

Mr. Logan is to give his famous chalk-talk and cartoon lecture here on the evening of October 15 at the high school auditorium.

His work is a little bit different from that of any other cartoonist. His pictures are artistically correct, and they sparkle with keen humor and irony. He works with lightning rapidity, and talks almost as fast as he works. He illustrates several of the Robert Service Poems, reading them as he works. He is a master of splendid color effects.

The Estevan, Sasks, "Progress," said of Mr. Logan following his appearance there. "His lecture covers many and varied subjects, ranging from rural farm characters and scenes to the soldier's life in France."

NEW DRUG STORE ON WEST SIDE SQUARE

The Ramsey Drug Company is opening on the west side of the square this week. Mr. Ramsey, who has been the efficient manager of the Graham Paint and Paper Company, will have charge of the new drug store.

Mr. Ramsey is moving his paint and paper store from the 600 block to the same building in which the new drug store is located. He has arranged his store into departments and has everything conveniently arranged for the convenience of his patrons. He has no curtains or partitions in his building. Every department is open to all his customers.

The company has opened a commodious rest room for the convenience of lady customers and invites the ladies from the country to make this store headquarters when in the city. Mr. Ramsey states that he will at all times keep in mind SERVICE, COMFORT AND CONVENIENCE for his patrons.

MILITARY INSTRUCTOR KILLS YOUTH AGE 15

An unfortunate affair happened at the Training School at Gatesville last week. H. G. Twyman, military instructor at the school, killed Del Thames, of Beaumont, by punishing him too severely because he did not drill to suit some of the boy officers.

The boy had been in the institution only a few days and, according to the father, did not know how to drill. From reports the boy was severely beaten with a strap on his bare back and then choked by the officer. The boy fell several times while trying to drill and told the officers that he was too weak to stand. The officer insisted that he drill and soon after the choking the boy fell and was unable to stand any more and soon died.

Governor Neff is assisting the investigation and every one concerned is anxious for justice to be given. The father sent the boy to the training school because it had been recommended as a good place to send a boy who was not interested in attending public schools.

Twyman in the Bunger field last Sunday afternoon for a time looked under a large tree for a well. He found one but the damage was not heavy and he did not drill.

MID-TEX BRINGS IN WELL AT ELIASVILLE.

Reports reached our office yesterday that the Mid-Tex Petroleum Company had brought in a good well on the Baldwin lease near Eliasville. The well is reported to be making 200 barrels of oil and 7,000,000 cubic feet of gas. This company has brought in several good wells in the South Bend field. The company has good acreage in the county and has been one of the most successful operating here.

The advance in the price of crude posted last week will stimulate drilling in the Young county fields. The advance came as a surprise to many and it will take some time to get everything in readiness to put on the campaign that is sure to follow the increased price of oil.

Drilling has been delayed in the Bunger field for some time on account of the lack of water but it is believed that this has been overcome as a four-inch line has been completed to the Bunger field. Several new wells have spudded in since the completion of the line this week. Several locations have been made and the operators could not begin work until water was supplied. Many other wells, that have been shut down, have resumed operations since water has been secured and will soon be on the stand.

The producing wells in this new field are holding up well.

Rosell Petroleum Company-Owens No. 1B is drilling around 1450 feet.

Rosell Petroleum Company-Grimshaw No. 1, is drilling at 1100 feet.

Rosell Petroleum Company-Askew No. 1 is now at 1175 feet.

This same company has others wells that we were unable to get reports on this week.

The Godley Oil Company-Owens No. 1 is drilling at 450 feet.

Applegate & Harlan are drilling at 700 feet on their Whittenburg No. 1.

B. A. Mann et al have completed rig on the Harvey survey.

Burton and Florrie are rigging up on their Whittenburg No. 1.

Leslie Spoons et al are moving in rig on their location on section 34.

Barnes Production Company is laying water line and will soon be in position to resume drilling operations. This test is looked on with much favor and if production is secured an extension of more than a mile will be gained for the Bunger field.

After some delay on account of water the following companies will resume operations this week: Browning Hodges-Durham No. 1; Simms Oil Company-Owen No. 1; Hedrick 3; Cheney & Miller-Grimshaw No. 1; Oil Corporation-Delmar Nos. 2 and 3; Sun Company-Driver No. 1; Gulf Production Company-Grimshaw No. 1; Rosell-Grimshaw No. 1B.

North Young County

Oil conditions in every part of the county are looking good. We some times forget our shallow field in the north part of the county. John S. Hoff and H. W. Preston, who are drilling on the J. R. Garvey land, Block 1857, T. E. & R. survey, were in the city Monday and reported a good showing at 540 feet. They are setting eight-inch casing and are something a producer. There are also rigs on within one and one-half miles of their well. The wells in this section are not heavy producers but after several wells at a depth of 200 to 300 feet with high quality of oil are making investments. They expect that the oil in this shallow field has always sold from 50 to 75 cents a barrel higher than the oil from the deeper wells.

Street and Company were so well pleased with their new ad and large poster last week that they are doing the same thing again this week. Mr. Street is a firm believer in advertising.

His bones was filled with mistakes Saturday and Monday and he has had a good business all the week. The oil has a large stock to select from and only a careful reader can get the best of this issue.

MASONRY AND KU KLUXISM

In numerous instances leaders of Masonry have felt called upon to emphasize to the public that the Masonic order has no connection with the Ku Klux Klan and no sympathy for the methods of the Imperial Wizard and his 'klegle corps. It would seem that the announcement should have been made unnecessary in the mind of any thoughtful person by even a casual comparison of the known modes of procedure of the two organizations.

One is built upon voluntary application for membership with strict examination of all candidates, while the other is based upon a mercenary system of solicitation of memberships on a commission basis with initiations confessedly by the hundreds, and even, in some instances, by the thousands. One is known for the secrecy with which it confers its benefactions upon those in need, while the other seems to have made a practice of forwarding all donations for charity through newspapers so that nothing may fail "to be seen of men." One makes the acknowledgment of membership a matter of pride to be signified by emblems understood by all the world, while the other resorts to the disguise of the highwayman and of the pranking schoolboy to conceal a sworn allegiance to an empire invisible. One has an intimate relation to the fundamentals of religion such as to attract in all lands those whose lives stand highest in the cause of the good and the true; the other has furnished, through its existence if not through participation, the inciting berry which has brought discredit upon our own and other states.

But go further with the contrast, cites the Dallas News. Only the unthinking could have failed to note it. Only the unthinking could have been gulled into joining the Ku Klux Klan through the intimation that it had either a connection with the Masonic order or the indorsement of Masonry. Ku Kluxism is doomed to pass away because of its own unworthiness. It is a momentary distemper of a feverish and ill-ordered time. It will die with few to regret and none to give it praise. But Masonry will live because it feeds on higher things than distrust, hate and hypocrisy.

SEYMOUR STILL REMEMBERS

Seymour has not forgotten the war. All business was suspended and 2,000 people attended the last rites last week over the bodies of two Seymour boys who fell in France under the hail of Hun bullets. It was probably the most impressive testimonial of appreciation that Texas has known since the war closed.

CHEERFULNESS.

Learn to laugh; a good laugh is better than medicine.
Learn how to tell a story; a good story, well told, is as welcome as a sunbeam in a sickroom.
Learn to keep your own troubles to yourself; the world is too busy to care for your ills and sorrows.
Learn to stop croaking; if you cannot see any good in the world, keep the bad to yourself.
Learn to hide your aches and pains under pleasant smiles; no one cares to hear whether you have headache, earache, or rheumatism.
Learn to meet your friends with a smile; a good-humored man or woman is always welcome, but the dyspeptic is not wanted anywhere.
Don't cry; tears do well enough in novels, but are out of place in real life.
Above all, give pleasure; lose no chance for giving pleasure.
You will pass through this world but once.
Any good thing, therefore, that you can do, or any kindness that you can show to any human being, you had better do it now; do not defer or neglect it.

FOR YOU WILL NOT PASS THIS WAY AGAIN.

Labor reports show there were 447,000 unemployed factory workers in June for New York State. In Illinois the number was 203,000; in Ohio, 204,000; in Pennsylvania, 371,000; in Michigan, 108,000; in Wisconsin, 78,000; in Indiana, 79,000; in Minnesota, 37,000; and Iowa, 25,000, says Sugarman's Indicator.

MILLIONS NOT IN SCHOOL

Dr. J. Tigart, United States Commissioner of Education, in addressing the National Educational Association declared that there are more than 7,000,000 children, of reasonable school age, in the United States who are not enrolled in any school. Presumably the commissioner, with the facts and figures available for his reference, knows what he is talking about. That seems a large number of girls and boys out of school who ought to be in school—a prodigiously enormous proportion of American children receiving no training for future citizenship. The argument in favor of education of the coming citizens, and now the women as well as the men will be in full possession of the rights and liable for the same responsibilities as the men—need not be re-counted and re-emphasized.

The pertinent question is, "What can be done about this condition?" Communities, the states and the nation are at fault in a degree; they have taken upon themselves the duty of popular education, they have in many cases passed compulsory education laws; they have provided means of education in a way. The community and the state and the nation co-operating, can do more than they have hitherto done; they can provide better teachers and pay them more and thus build up a better, stronger force for teaching; they can do much in a systematic way to encourage the people to take full advantage of the opportunities offered, they can pass more stringent laws to compel school attendance and they can more thoroughly enforce those laws.

But the community, the state and the nation are not alone to blame for the 7,000,000 children out of school, and growing up in ignorance. The real trouble is in the homes and with the parents. The parent who earnestly covets for his children an education always finds a way to get his child to school. Thousands of parents do sacrifice and make real denials that their children may have the opportunities of training.

The compulsory law well enforced will do much. But that will not inspire the best spirit of desire on the part of the parents to co-operate with the state in the education of their children, the state's future citizens. There is needed systematic education among the parents, education that will reveal and demonstrate and emphasize the absolute necessity for education as a part of the equipment of the boy and girl for life ahead.

CHARACTER COMES FIRST; ASSETS ARE SECONDARY.

This is the rule by which the late J. Pierpont Morgan judged the man behind a business proposition. Reputation is often manufactured propaganda. Character is not. If a man is worth millions, and if that is all he is worth, he is the kind of man Morgan did not want.

Build up a real character of your own. Emulate, but do not imitate, others.

It takes real character to buy stocks when they are on the bargain list and nobody wants them.

But if you do, the day will come when everybody wants them at your price, advises Sugarman's Indicator.

TOO BUSY FOR SCANDAL

The bigger the news item the less important it is.

The story of the creation was told a half dozen or so words.

The Arbuckle case has filled more space in the newspapers than did the battle of the Meuse-Argonne.

A Fort Worth morning paper the other day carried three columns of Arbuckle, while a half dozen lines, buried inconspicuously on the market page, gave the first tidings from Pittsburg about the advance of crude oil. It required a detective to find it.

The Arbuckle case doesn't mean a thing to this section of the country—or any other section for that matter. But the little news item about Pennsylvania crude was the biggest piece of information the country west of Fort Worth has had in several months.

With another advance or so in crude oil, we small citizens in this neck of the woods expect to have something else to do besides allowing ourselves to get shocked every few days by the news of scandalous going-ons which the big town-papers gather from the four corners of the globe. These yarns from San Francisco and New York make good light summer fiction, but they are no good for a busy town in the fall.

Astronomers are reporting numerous dry spots on the planet Venus. Which may make some people hope they won't go there when they die.

It has been remarked that this is the age of women. But she is not telling it.

About the only way to get rid of bad neighbors is to move off and leave them.

THE BEST THING THAT CAN BE DONE

The proposal to use precinct bonds to build roads in this section appears to meet general favor on the streets of Eliasville, but the movement has not gotten beyond the stage of discussion.

In our opinion the most valuable thing that Eliasville can do today is to get a good road to the Woodson country. Woodson is eager for it. People in the vicinity between Eliasville and Woodson, those who would share the cost, have expressed themselves favorably to it. The only way to ever get this road is by a precinct bond issue. There is talk of a county wide road building campaign, but we doubt if it would carry. In the event it was successful it would take a year or so to get down to actual work. And then would Eliasville get the roads she wants?

A \$30,000 bond issue would be sufficient for the needs in this precinct, it is estimated. Constructing the Woodson road would not cost much more than \$500 per mile. It would cost about the same to gravel the Lake City-South Bend road to the river ford. That is as far as this precinct reaches on the north, but it is far enough to give Cluskey City and people in the fields there a pike road to Eliasville. There can be no doubt that this would divert in this direction a great deal of the traffic out of the shallow field which now goes to South Bend and Graham. A traveler will take a six or seven miles drive over good roads any time in preference to half that distance on a rough road.

If the Chamber of Commerce would spend its entire time for three months in working up this precinct bond issue it would be worth ten times the trouble.—Eliasville Journal.

FROZEN CREDITS ARE THAWING OUT.

J. Ogden Armour is quoted as saying, in a recent address, that the tide of business has, at last, turned for the better. This also seems to be the prevailing viewpoint in Metropolitan banking circles. Credit is once more being made available on terms attractive to business, and the whole country is definitely easing up from its long spell under "frozen" credits on fundamentally improved conditions that are positive evidence that we are approaching very much better times, writes Sugarman's Indicator.

HENRY CHAPEL

Rejoice with us as we have had a ring, in a recent address, that the in some tanks. The poor old farmers are smiling.

W. A. Ribble and H. L. Ribble shipped calves Monday from here. Bill Williamson has forty acres of land broke for wheat. J. F. Gilmore has 15 acres already sowed. H. T. Glidewell has between fifty and sixty acres ready to sow. Most of the cotton is picked.

Our school is progressing nicely under the management of Mr. Wm. Stepp and wife.

Mr. and Mrs. W. H. Jarnagin and children spent Friday night and Saturday with his mother and family. Mrs. H. T. Glidewell, Mary and Hugh spent Saturday evening with home folks.

If any of the readers want to know how to get a toad frog out of their well just ask Arthur Vick.

Mrs. Ada Smith of South Bend visited her parents, Mr. and Mrs. J. T. Shahan, of this place the past week.

Anderson Wade and family will leave soon for Oklahoma to make their future home.

Clay and Lee Anderson visited grandma Anderson Monday. Grandma returned home with them.

Mr. and Mrs. Zell Kimball gave the young people a candy breaking last week.

Health is very good here.

FARMER.

STEPHENS COUNTY ROAD BONDS SOLD.

Breckenridge, Texas, Sept. 30.—The contract for the sale of \$1,400,000 road bonds for Stephens County was closed Saturday by the Commissioners' Court. The bonds were sold on a cash consideration to J. L. Arlitt Company of Austin.

Work on the thirty three miles of highway across the county will begin within thirty days, it was said. The bonds were voted in November, 1919.

Toasted

Notice this delicious flavor when you smoke Lucky Strike—it's sealed in by the toasting process

LOLA B. LISLE.

Lola B. Lisle, daughter of Mr. and Mrs. F. F. Lisle, died last Saturday at a sanitarium in Dallas, where she had been carried for treatment. Her remains were brought to Newcastle and buried in the City Cemetery Tuesday afternoon. The Sixth Grade pupils of the High School were dismissed to attend the funeral.

She had been troubled for a long while with leakage of the heart, and while not wholly unexpected her death came as a shock to the many friends of the bereaved family. The Register joins them in their sympathies.—Newcastle Register.

HANDSOME TOMBSTONE FOR JAKE L. HAMON

Ardmore, Oklahoma, Oct. 5.—A five thousand dollar tombstone will grace the grave of Jake L. Hamon, who was killed here last November, according to Frank L. Ketch, administrator for the Hamon estate who let the contract today. The stone will be a simple monument bearing only an epitaph and the name of the deceased.

CITATION BY PUBLICATION

THE STATE OF TEXAS
To the Sheriff or any Constable of Young County—Greeting:

YOU ARE HEREBY COMMANDED to summon E. P. Harris by making publication of this Citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your County, if there be a newspaper published therein, but if not, then in any newspaper published in the 30th Judicial District; but if there be no newspaper published in said Judicial District, then in a newspaper published in the nearest District to said 30th Judicial District to appear at the next regular term of the County Court of Young County, to be holden at the Court House thereof, in Graham, on the First Monday in October, A. D. 1921, the same being the Third day of October, A. D. 1921, then and there to answer a petition filed in said Court on the 11th day of August, A. D. 1921, in a suit, numbered on the docket of said Court No. 897, wherein the Ranger Gas Company, a corporation, is Plaintiff, and E. P. Harris is Defendant, and said petition alleging that on June 1st, to July 1st, inclusive, at the special instance and request of defendant, the plaintiff furnished him with gas to operate defendant's oil well located on the G. G. Woods farm, Young County, Texas, and that the amount of gas so consumed by defendant for said month amounted to the sum of \$273.00, and that the same was due and payable on the 1st day of July, 1921, and payment demand, and defendant refused to pay the same or any part thereof, to this plaintiff's injury and damage in the sum of \$273.00 as above stated.

Wherefore, premises considered, plaintiff prays the court that the defendant be cited to appear and answer herein, and that upon hearing hereof, it have and recover of and from defendant its judgment in the sum of \$273.00, cost of suit and general and special relief in law or in equity, and it will ever pray.

Herein Fail Not, but have before said Court, at its aforesaid next regular term, this writ with your return thereon, showing how you have executed the same.

Witness, W. H. Kennedy, Clerk of the County Court of Young County. Given under my hand and the seal of said Court, at office in (L. S.) Graham, this 9th day of September, A. D. 1921.

W. H. KENNEDY,
Clerk, County Court, Young County.
By WILLARD MATTHEWS, Deputy.

FISH CREEK DISTRICT ABOUT TO BE OPENED UP; GULF WILL PIONEER THERE, REPORTS SAY

That the Gulf Production Company will take the initiative in the development of the Fish Creek area north of Eliasville is the effect of rumors the past week, supported by the inspection of various leases by Gulf officials.

This district has practically been proven up by the New Domain Oil Company's well on the Graham lease, the completion of which will be made at once. The company will resume work on the well this week.

The Gulf has had all other companies in a resumption of drilling operations in the field. Its activity along this line came as a surprise to other companies. The company has been inactive during the past year, and last fall for a time it was offering all of its Stephens and Young county leases for sale. They were later taken off the market, however.

Reports say that if the Fish Creek area tests out profitably the Gulf will centralize its operations in that neighborhood, where it holds thousands of acres under lease. It will institute a development program similar to that which the Mid-Kansas undertook south of Eliasville.

The New Domain remains a mystery well. In resuming work on it the company will undertake to shut off the water which broke in from above the pay when the casing was pulled from the pay. The well shot over the derrick when the drill hit the top of the pay. The casing was pulled immediately, with the result that the water broke in. Efforts to lower a six-inch casing failed because the hole was too small. The well has made several flows since work on it ceased, reports say.

Employment has been given to many in Stephens county the past week, marking the resumption of activity in the fields.

Work will start at once on the Cunningham well of the Glascock Production Company, southwest of Eliasville. This lease is being drilled in conjunction with the Texas-Pacific.—Eliasville Journal.

DOLLAR OIL VS. HORSE SENSE; BETTER DAYS COMING SOON

The fellow who thinks that perfectly good 38 to 42 gravity oil is going to remain at a dollar a barrel for any length of time has another guess coming. The deflation period in the oil business has about run its course, and the law of supply and demand cannot longer be ignored.

The following facts and figures based on statistics, should be evidence enough from which any thinking man could quickly form his own conclusion:

There is today in the United States, approximately 250,000 producing oil wells, the average production from these wells is in the neighborhood of five barrels each, while 150,000 of the wells produce less than one barrel each.

After forty years of history making production, the great fields of Ohio are fast going dry, they are at best, small pumps with a small yield.

California which has ranked second in production, no longer produces sufficient crude to take care of the demands of the state, and it is a well known fact that much of the refined product used there is shipped in from Texas and Oklahoma.

Texas, Oklahoma, Louisiana, Wyoming and Kentucky are barely holding their own in daily production, and it cannot be denied that the oil resources in these five states are being rapidly depleted. Arkansas is as yet an unknown quantity, but conceding it to be one of the largest producing states in the Union, would not be sufficient to offset the deficiency in either one of her sister states. The great oil states of Pennsylvania, West Virginia and Illinois are no longer to be reckoned among the large producing states, as statistics show that most of the possible recoverable oil has been taken from the ground in these fields.

Mexico's great fields are now furnishing the United States with the deficiency, or the balance needed for home consumption, and also furnishes the oil for our export trade. There is no secret, however, about what is going on in the Mexico fields, while the average production from the wells there is tremendous, salt water is fast making inroads, and the life of this source of supply may be figured in the short space of a few

years at best. The demands on our available supply is steadily increasing, fuel oil is taking the place and relieving the coal shortage over the country, while the daily use of gasoline goes by leaps and bounds. The supply is not inexhaustible, it is just a question of how long Texas, Oklahoma, Louisiana, California and Arkansas will be able to meet the great demands for crude and the refined products. Every known structure accessible to geologists have been worked out, and are now owned by companies or individuals, who are constantly testing out their holdings, and in a great majority of cases they are found dry or barren. The consequences are that we are today facing one of the greatest oil famines the world has ever known, and every barrel of oil in the ground has an appraisable value of from \$3 to \$5 a barrel. There is not one mite of evidence, not the least fact, upon which any company or corporation, can honestly base a statement that there is today, an overproduction of crude oil.

The whole thing is simply camouflaged manipulation, and the past twelve months of unsettled conditions, covering a re-adjustment period, coupled with the financial stringency of the country, has been an opportune time for the "powers that be" to swoop down upon the smaller companies and independent operators and rob them of the profits that were justly theirs. The world needs no affidavits to prove that the opportunity offered was taken advantage of, we all know the job was well done.

However, the law of adjustment, of supply and demand, will at no great future distance step in and balance the scale. Money and manipulation cannot forever suppress, retard or control an industry of this magnitude.

There is nothing today which offers a better opportunity than the oil resources of Texas, of Young county, and the man who has the grit and backbone to stick it out will eventually win out.—Contributed.

(Editor's Note: The above timely oil article was handed in some time ago by E. C. Reed, and was written before the first advance in crude. For lack of space we were unable to publish it in our last issue.)

Taking Prisoners To Fort Worth Is a Great Expense

The handicap which the Sheriff's Department of Young County is working under in trying to do "business" with a jail one hundred miles away, may easily be imagined by the report from Sheriff Saye that transportation and meals alone incurred last week by prisoners and deputies between Graham and Fort Worth cost \$235.00. On top of that, the cost of maintaining prisoners in the Fort Worth jail is much more than it would be at Graham.

"They can't get this new jail finished too soon for me," said the Sheriff Tuesday as he surveyed the new structure. "The cost of going to Fort Worth is not only tremendous for the county but my share of it is more than I can stand. But the worst part of it is the inconvenience of not having a jail here at home. It means more guards and a general handicap all around."

The new three-story jail, now within sixty days of completion, will rank as one of the most imposing structures in Graham. The brick work was completed this week.

FIRE ALARM FROM GRAHAM LAUNDRY

(Crowded out last week)

The fire department received a call from the laundry about 8 o'clock Friday night. The alarm was caused by a fire in the coal bin. The damage was slight. About 10 o'clock the same night the second alarm came from the same place. The fire originated this time also in the coal bin. Very little damage was done and the laundry was in running order by morning. The fire was probably the result of instantaneous combustion.

The reporter was near the Christian church on the square when the first alarm was turned in. Immediately after the alarm was given cars were running in every direction trying to locate the fire. When the fire department came out of the station it was difficult to pass through the square on account of the large number of cars running in every direction and at a rapid rate. This is very dangerous and also delays the fire department in reaching the fire. When the alarm sounds every one on or near the square should drive to the side of the street and stop until the fire department has passed. The fire boys should at all times have the right of way and when the fire is reached too many boys who do not know anything about fighting fires rush in to assist the boys and thereby hinder them.

A letter elsewhere in this issue tells of our good insurance rate secured through the good work of our fire department. We can help most by not hindering the boys while they are extinguishing the flames when a building is burning.

Rock Island Stops Sunday Schedule of Oil Field Train

The Rock Island's Oil Field Special, operating between Graham and Bridgeport, went back to an exclusively week day schedule Saturday. Elimination of the Sunday schedule was announced from the Rock Island offices at Fort Worth Saturday. Slack business on Sunday was given as a cause. The mixed passenger train will continue to operate on Sunday, but it will carry no mail.

HOME BREW MAKING DECLARED ILLEGAL

Washington, Sept. 30.—Home brewers are hereby handed a prohibition decision with a real "kick" in it.

Intoxicants, says the Internal Revenue Bureau, can not legally be manufactured in the home. The well established "home brew," as well as homemade wines and distilled spirits, even though they boast but one-half of 1 per cent alcohol or less, are illegal unless authorized by special permit.

Nonintoxicating fruit juice seems to be the only thing that can mark modern cellar activities and still be within the law.

This is the purport of a complicated home brew chart for the law-abiding issued Monday by the International Revenue Bureau.

"Nonintoxicating fruit juice can be made in the home," the bureau holds. "Intoxicating wine, home brew and distilled spirits may not be made."

"Two hundred gallons of non-intoxicating fruit juice may be manufactured tax free by the head of a family by registering with the Collector of Internal Revenue." Sections of the law are quoted authorizing the manufacture in the home of "nonintoxicating cider and fruit juices exclusively for use" in the home, without permit.

FOOD PRICES FALL

Washington, Oct. 3.—Retail food prices in ten cities showed a tendency to decrease during September, according to a report made today by the Labor Department. In the cities where figures were obtained September 15, only one, Richmond, Va., had an increase over August prices and this amounted but 2 per cent.

In Chicago and Baltimore the department reported the prices as 3 per cent below those of the previous month; in Manchester, N. H., 2 per cent; New York, Butte, Bridgeport and Province, 1 per cent, while in Washington and Peoria, Ill., the drop was nearly one-half of 1 per cent.

Retail food prices are still much above those of 1913, however, the bureau stated, fixing those in Washington today as 6 per cent, New York 57 per cent and Chicago 55 per cent above the pre-war level.

FLOOD PROTECTION FOR BRAZOS DENIED

Washington, Oct. 3.—Flood protection for the Brazos river in Texas was dealt a death blow today by an unfavorable report submitted to congress by Secretary of War Weeks.

The secretary's report was merely an approval of the unfavorable reports made by Colonel H. C. Newcomer, division engineer, and by Brigadier General Lansing H. Beach, chief of engineers.

Colonel Newcomer reported that it would cost approximately \$200,000 to make only a comprehensive survey and estimate of the cost of any improvements looking to flood protection.

The Brazos is the only Texas river flowing directly into the Gulf of Mexico. The others all flow into bays or natural breakwaters.

The Leader receives from time to time cards from its loyal friend, Felix Ury. He sent a telegram from Memphis, Sunday afternoon giving the results of the big ball game there. He is an ardent fan and boasts for Fort Worth in the big games.

STUDEBAKER

THIS IS A STUDEBAKER YEAR

We have been asked the question how we account for the tide of Studebaker popularity which has swept the country.

Among others, two fundamental causes explain it:

1. The outstanding cause is the value of Studebaker Cars in quality, style, performance, durability, and price, demonstrated by the complete satisfaction and enthusiasm of nearly one-half million owners who know values.
2. The universal respect for and confidence in the integrity of the name STUDEBAKER which for seventy years has been the symbol of quality and fair dealing.

Crowning proof of the dependability of Studebaker Cars is reflected in our diminishing in service parts.

With approximately 116,000 more Studebaker Cars in operation on September 1st, 1921, our parts business the first eight months of this year was 3 per cent less than in the same period two years ago.

While our car manufacturing plants operated this year 41 per cent ahead of last year, our service parts manufacturing plant has operated at from one-half to two-thirds of last year. Studebaker Cars are standing up in service and staying out of repair shops, to a degree unexcelled, we believe, by any cars of whatever price.

OIL IS UP AND STILL GOING

The depression is over and choice lots will be harder to get. Of course you will always be able to get lots some where in Graham but the lot you want may be off the market or the price you will have to pay will be higher. If you are contemplating building that new home why hesitate? Graham is still growing in spite of the dull times and city property will never be lower than it is today. Call and let us show you some good residence sites.

CONSTABLE'S SALE THE STATE OF TEXAS

County of Young
By virtue of an Execution issued out of the Honorable Justice Court of Young County, Precinct No. One on the 19th day of September, 1921, by the Justice of the Peace of Precinct No. One, in the case of C. W. Johnson vs. G. W. Bishop No. 2236, and to me, as Constable, directed and delivered, I will proceed to sell, within the hours prescribed by law for Constable's Sales, on the 1st day of November, 1921, it being the First Tuesday in said month, at the Court House door in Graham in said County, the following described property, to-wit:

Lots Nos. 1, 2, 3, 4, 5, 6, 7, and the East 1-2 of Lot No. 12, all in Block No. 6, all of Block No. 6, and all of Block No. 5 (5) all in the Bishop Addition to the City of Graham in Young County, Texas, as shown by the corrected plat of Bishop Addition to Graham, Texas, on file in the Deed Records of Young County, Texas, on Page 384 in Volume 64 to which reference is thereto made for a more complete and better description thereof, and said lots and parcels and block of land as aforesaid being part of the T. J. Cockrell Survey in Young County, Texas, as described in said plat levied on as the property of G. W. Bishop to satisfy a judgment amounting to \$104.52 in favor of C. W. Johnson and costs of suit.

Given under my hand, this 28th day of September A. D. 1921.
6-8c J. D. DAWSON,
Constable Precinct No. 1, Young County, Texas.

Not only does "Lorain" make "absent cooking" possible, but its 44 controlled oven heats insure perfect baking. No "unlucky" days with a "Lorain"—equipped

QUICK MEAL GAS RANGE

THE John E. Morrison Company

Prosperity Is Knocking

The largest oil companies make their big profits by buying oil during the depressions when there is little demand and the price is at its lowest. It would well pay us to take a leaf out of their book and apply it to our own sphere. For example take farm land or city lots. How very few buy during a dull period just exactly when they can do so to the best advantage. But no, only the farsighted grasps the opportunity and then we enviously say they are lucky when as a matter of fact their success is due to superior judgment combined with a faith in their country and community. Some towns and cities grow slowly and steadily, others grow as waves in an incoming tide but practically every town grows and continues to grow in spite of temporary setbacks and it is the man who looks and figur— ahead who wins out.

Here in Graham we have passed through a long depressing summer and optimism was certainly a scarce commodity but a glance over the record of the city's accomplishments during the past two or three years should convince the most skeptical that Graham has more than kept in line with progress and today our future looks brighter than ever.

We have a better water and light system, hundreds of good new houses have been built and are all occupied, a gas system has been installed, one of the most imposing churches in the state is being erected, and last but not least, a brand new oil field is being developed at our doors. With oil up and still climbing our real prosperity is at hand.

GAS RANGE DEMONSTRATION.

Large crowds have visited the demonstration of the Quick Meal gas ranges at the John E. Morrison store this week. Our people are showing unusual interest in these demonstrations that are being given by our merchants to show the merits of the stoves they handle.

The John E. Morrison Company appreciates the interest manifested by the large number of ladies who visited their store.

MUSICAL CLUB.

The B Sharp Musical Club met last Thursday afternoon at 4 o'clock with good attendance.

We have the study of Mozart, the great musical composer.

The following program was rendered:
Tommy Allen—Solo.
G. D. Hinson—Reading.
Margaret Steen—Solo.
Catherine Birdsong—Reading.
Catherine Steen—Solo.
Bonnie Milam—Reading.

MULE BUYER.

F. A. Harp will be in Graham Saturday and Monday to buy mules.

CONSTABLE'S SALE THE STATE OF TEXAS

County of Young
By virtue of an Execution and Order of Sale issued out of the Honorable County Court of Young County, on the 26th day of Sept., 1921, by the Clerk of the County Court, in the case of L. L. Kinnebrew vs. C. S. Hill No. 717, and to me, as Constable, directed and delivered, I will proceed to sell, within the hours prescribed by law for Constable's Sales, on the 11th day of October, 1921, it being the second Tuesday in said month, at court house door in Graham, Texas, in said County, the following described property, to-wit:

One frame building situated on the north half of Lot No. Eight (8) in Block No. Twenty-Three (23) of the town of Graham, Texas, levied on as the property of C. S. Hill to satisfy a judgment amounting to \$216.68 in favor of L. L. Kinnebrew and costs of suit.

Given under my hand, this 27th day of Sept. 1921.
6-8c J. D. DAWSON,
Constable Precinct No. One, Young County, Texas.

WHAT IS A GOOD CITIZEN?--

Fifty years ago the man who kept money at home or on hand to lend to his neighbor was a good citizen.

The man who merely hoarded money was never a good citizen at any age; but today, in an age of banking, it is certainly one of the first requisites of good citizenship for every man, woman and child to put every dollar they have in some bank.

If you haven't a bank account, come in—make the start TODAY

NATION-WIDE PROBE "KU KLUX KLAN" BY FEDERAL AUTHORITIES

Washington, Sept. 30.—Affairs of the Ku Klux Klan are being probed by thousands of federal agents and local police in an effort to determine whether the government shall stamp out the organization, Attorney General Daugherty declared tonight.

Practically every branch of the organization is under surveillance, Mr. Daugherty said, and every move of its members is under investigation.

Agents of the bureau of investigation of the department of justice are getting a mass of data relating to the activities of the clan.

Two classifications of this data are being made for the information of the attorney general. The first, and that of greatest interest to federal authorities, relates to possible violations of the federal conspiracy statutes and the war laws still in effect, covering activities calculated to overthrow by force or violence the government of the United States and the operation of its laws.

The second is largely a matter for local and state officials. It covers the obtaining of money by fraud or under false pretense.

State and municipal authorities will be asked to aid and co-operate in this direction, and they will in turn have the assistance of federal court attorneys and agents of the bureau.

A third phase of the inquiry relates to the possible use of the mails for illegal purposes. Postmaster General Eays has ordered a thorough investigation of this by postoffice inspectors.

Though Attorney General Daugherty still has under consideration the advisability of summoning to Washington Imperial Wizard Simmons and other officials of the clan to give such information as they are willing to impart, the government investigation is proceeding in rapid and orderly fashion.

O. C. KNIGHT HOLDS RESPONSIBLE PLACE WITH HIS CHURCH

The Leader is in receipt this week of a copy of the Bulletin published by the Baptist church at Denton, of which our former townsman, O. C. Knight, is the efficient secretary. The following clipping is taken from the bulletin:

"Mr. O. C. Knight is at the head of the department of finance. The financial system of the First Baptist Church is recognized to be the most modern and most successful method of church financing known. Mr. Knight has been eminently successful in handling the finances of this ever increasing institution. The success of the project is due to the splendid co-operation of the large constituency. The per cent of the enlisted membership will compare favorably with any large church in the country. The amount per capita is not so high, but there is a disposition on the part of many to tithe, which we sincerely believe will bring the amount per capita up to the standard. You will be pleased to know Mr. Knight personally."

North and South Meet In Football

Dallas, Texas, Sept. 26, 1921.—The first football game ever played between an Eastern institution and one of the Southwest is to be staged at the Dallas Fair, October 15th. The game will be played by Baylor University, Waco, Texas, and Boston College, Boston, Mass. Boston has not lost a game in the past two years and each year has taken one from YALE. Baylor's squad now in training, gives promise of a strong team and those best informed in football circles are expecting the boys of the Southwest to give the Easterners a hard fight. The game will be staged in the new stadium which has a seating capacity of 16,000, and every indication is that the teams will play to a full house.

Yep, the man who runs a still hopes the authorities will keep still.

The disabled veterans are able to make themselves heard, all right.

And in these days when a man goes fishing he is generally successful in catching some good fish.

Has anybody consulted the Irish re public on the question of disarmament?

VALUATIONS OF COUNTY JUMP TWO MILLIONS

Young county valuations this year show an astounding increase of \$2,143,000, according to the books opened up for tax collections at Graham Saturday.

County valuations for the two years are shown as follows:

This year: \$12,800,000.

Year 1920: \$10,657,000.

The increase of over two million dollars is due largely to the building up of Graham, Eliasville and South Bend and the development of the adjoining oil fields.

Officers Get "Vest Pocket" Distillery

Breckenridge officers captured last week what is said to have been the smallest still in captivity. It was a perfect model of tin and copper and had a capacity of one gallon per day. Officers, tipped off, found it hidden in an oil well. It had been lowered into the well at the end of a cable. A jury at Breckenridge Thursday released from custody J. H. Hanson, charged with moonshining in connection with the discovery of a 320 gallon still discovered lately. This was said to be the largest in captivity.

HOW TO SELECT LAYING HENS

College Station, Sept. 15.—F. W. Kazmeier, Poultry Husbandryman, Extension Service, A. & M. College, has the following to say relative to selecting hens for laying purposes:

Every farmer and poultry raiser should make it a point to closely cull his flock in the fall of each year. It is often possible to discard a third of the number, or more, thus reducing feed bills without noticeable affecting egg yields. The following proven facts should enable anyone to detect the best layers:

1. Hens that molt late, and quickly are the best layers. By this is meant hens molting during the latter part of September, October and November are better layers than those molting earlier. It is poor judgment to keep these birds molting early and sell those molting late although this is done on many farms. Experiments have repeatedly proven that 200 egg hens do not begin to molt until November.
2. Individual hens with pale colored shanks, in such breeds as the Rocks, Wyandottes, Reds and Leghorns, are considered better layers than those with bright yellow shanks. This indication is true only when applied in the fall of the year, and among breeds with yellow shanks.
3. The above principle applies also to the color of ear lobes in breeds with yellow, creamy or white lobes. The many varieties of Leghorns can be divided by this indication. The Rocks, Wyandottes, and other American, Asiatic and English breeds have red ear lobes, hence this indication for these breeds is valueless. Experience has shown that Leghorn varieties with white ear lobes in the fall are better layers than those with yellow or creamy colored ear lobes.
4. A constitutionally strong bird, one that passes through the molt quickly and easily, is a better layer than one that develops all kinds of ailments during this period.
5. Hens that show the least broodiness are better layers than those that are broody a large part of the time.
6. A bird with closely worn toenails is considered a better layer than one with long nails.
7. A hen that goes into the molt with worn and ragged plumage is a better layer than the bird with no such marks that bespeak hard work during her preceding year.
8. A bird first off the roost in the morning and the last to return to it at night is considered a better layer than the one that spends the major portion of her time on the roost, or stands around with a "humped up" appearance in a corner of the pen or basks all day in the sun.
9. A sineing and working individual is always a better layer than the quiet lazy kind.
10. Hens that go to roost with a full crop are good layers, hence the saying: "A heavy eater is a good layer."
11. A fowl must carry a little fat in order to be in laying condition. A poor or lean hen can never be a laying hen.
12. Rather large comb and wattles for the breed is considered another characteristic of a good layer.
13. Pullets that commence laying early are considered better layers than those that mature late, hence the statement: "Keep the early laying pullets."

STATE FAIR OF TEXAS SEASON IS AT HAND

Outline of Big Show of Year For Texans Reveals Interesting Events.

The State Fair of Texas, with all its alluring round of entertainment and interest-gripping educational features, is upon us.

The great Fair of the year for Texas is ready to go. Its dates, October 8 to 23—are so near that it seems that just a few hours intervene between the time we'll take "the rattlers" for Dallas and make the rounds of the big show.

Reports from State Fair headquarters declare that the grounds are a beehive of activity, with exhibitors and concession men from the four corners of the earth pouring in to arrange their offerings. Then, too, the agricultural and educational exhibitors are getting on the grounds, while the Mexican National Exhibit is practically in place.

From the general viewpoint of the visitor—or rather, prospective visitor, to the Fair—the 1921 exposition of October 8 to 23 offers a greater variety of entertainment and practical education than any of its predecessors. This comes of the natural expansion of the Fair from year to year, and from business conditions, the sudden revival of the past few weeks leading to many new demands for an opportunity to show commercial and educational exhibits, and amusements, to the million or more visitors of the Texas exposition.

On the educational side of the Fair the 1921 season will see many important factors at work. Chief among them will be: the Mexican National Exhibit, a general showing of the wealth and resources of the Southern republic, and its progress in the agricultural and industrial field; the general agricultural exhibit by Texas counties and individuals; the implement, machinery and automobile shows, rated the world over as the representative events of their kind for the Southwest; the textile and fine arts exhibitions; the boys and girls educational encampments, which wings 1,000 boys and girls to study the educational features of the Fair; and the inspiring Texas Centennial Pageant, which will formally open the Fair of October 8, with the historical drama which will bring 5,000 characters into play.

As an amusement center the 1921 Fair will be worthy of the great crowds who find occasion to patronize it, according to Mr. Stratton's view. The range of entertainment will be all the way from the proverbial eight-legged calf to gridiron clashes between some of the major college teams of the South. Some of the major events will be: an unusually attractive musical revue in the Coliseum, running the entire Fair Season of October 8 to 23, a show which comes straight from a phenomenal success in Chicago; three days of automobile racing and one of motorcycle racing; four major college football games; a night scenic to be staged before the grandstand, known as "Montezuma," or "The Last Days of the Aztecs," being a historical presentation of the Spanish invasion of Mexico; a profusion of outdoor carnivals led by Wortham's shows; an outdoor circus before the grandstand which includes a wealth of variety; and several bands of international reputation, of which the great Estado Mayor Band of Mexico is the outstanding.

The general program of special days at the Fair offers much of interest. It is as follows:

- 1st Day—Saturday, October 8th—Opening Day Texas Centennial Pageant Music Day
- 2nd Day—Sunday, October 9th—Manufacturers & Wholesale Merchants' Day Press Day
- 3rd Day—Monday, October 10th—Orphans' Day Motorcyle Races
- 4th Day—Tuesday, October 11th—Dallas Day S. M. U. vs. A. & M. College Auto Races Columbus Day
- 5th Day—Wednesday, October 12th—Cattlemen's Day Oak Cliff Hi School vs. Waxahatchie Hi School Fine Art Day
- 6th Day—Thursday, October 13th—Texas School Children's Day Kidd-Key Day Texas Swine Breeders' Ass'n. Day Boys' Club Day Bryan Hi vs. Muskogee Hi Southwest Military Academy vs. Sherman Hi
- 7th Day—Friday, October 14th—International Day Traveling Men's Day Auto Races Texas Chamber of Commerce Day Boston College vs. Baylor West Texas Chamber of Commerce Day Associated Ad Clubs of Texas Day Whitesboro Day
- 8th Day—Saturday, October 15th—International Day Auto Races Scandinavian Day
- 9th Day—Sunday, October 16th—G. A. R. & Woman's Relief Corps Day Native Texas Dry Housewives' Day State Orphans Home Day Odd Fellows Orphans Home Day Oil Men's Day
- 10th Day—Monday, October 17th—Confederate Veterans' Day Patrons of 1896 Day Farm Bureau Day Agricultural Day
- 11th Day—Tuesday, October 18th—Elks' Day Oak Cliff vs. Greenville Hi Texas Congress of Mothers' Day Pioneer Texan Day Realtors' Day Holstein Day Hunt County Day
- 12th Day—Wednesday, October 19th—Girls' Club Day American Legion Day Forest Hi vs. No. Ft. Worth Hi City Federation Day
- 13th Day—Thursday, October 20th—S. M. U. vs. Austin College
- 14th Day—Friday, October 21st—Texas vs. Vanderbilt Fun Fest
- 15th Day—Saturday, October 22d—Closing Day

One of the particular factors of the year's Fair will be the visiting of the Mexican delegation and excursions of business men. This is being planned at the present time by the various government departments and the Chamber of Commerce of Mexico.

FAMOUS FRENCH PRODUCER PROVES "GOOD PICKER"

"Smiles of 1921," as the State Fair Coliseum Show is known, is a musical revue that will run the entire State Fair season—Dallas, October 8

to 23. It is a lively sort of performance, with lots of clever dancing, beautiful costumes, and handsome and costly stage settings. All of this, though, just makes a background for the startling beauty of the chorus that Emile de Reat, its famous producer, selected.

This chorus of forty girls is called "the rose garden of the West." Emile de Reat spent 45 days selecting them, it is said, and interviewed nearly twenty thousand young women before finally indicating his choice. It is this chorus that makes the show so sparkling. They sing, dance and play well in the numerous roles the clever little Frenchman assigns them. This musical revue is one of the principal attractions of the State Fair season. It plays matinee and evening performances, so that all visitors will have an opportunity to see it.

CENTENNIAL PAGEANT TO BE INTERESTING

One of the most interesting events on the catalogue of the State Fair of Texas—Dallas, October 8 to 23—is the spectacular Texas Centennial Page-

ant, which will formally open the season of 1921. This affair comes on the evening of October 8, and will be held in the new Athletic Stadium.

The Pageant will portray in a vivid fashion the history of Texas in the last hundred years—since the days when Stephen F. Austin and his little band of colonists came to settle the State for Anglo-Americans. Five thousand people will take part in this event, and will be gorgeously costumed for the various characters. Beautiful and appropriate music has been outlined for a background for the tableaux scenes.

The big new Stadium will seat 15,000 people and the indications are that a huge crowd will see this wonderful play. All parts will be played by Texas people.

FUN FEST TO FEATURE BIG NIGHT AT FAIR

Folks to get to the State Fair of Texas on the evening of Saturday, October 22, will enjoy a novel ex-

perience. They will have the opportunity to enjoy the "Fun Fest" which will be held on that occasion.

The State Fair will on that date block off a portion of the grounds for the exclusive use of pedestrians and will institute the Mardi Gras spirit into the proceedings. There will be concert singing, dancing, bands, confetti, paper streamers, costumes, horns and bells and whistles, and everything that goes into the making of an evening of hilarity. Freedom and unconventionality will mark the whole course of the evening.

Good order will be maintained throughout the evening, however, and only the spirit of good fellowship will be tolerated. The State Fair officials

T. P. MAKES A NEW LEASE ON TRACT OF CUNNINGHAM

Drilling will be resumed in a few days on the Cunningham No. 1, of the Lee Glascock Production Company, a mile southwest of Eliasville.

The Texas & Pacific has just signed a new lease with W. W. Cunningham for the entire 320 acres of his farm, situated in Stephens county on the Young county line. The lease calls for the completion of a well within 18 months.

This lease is half a mile north, on the opposite side of the Clear Fork, from the S. H. Hill land which has proven prolific in oil for the Mid-Kansas. One of the Hill wells, which came in for about 750 barrels last winter, is still producing 600 barrels daily. The Cunningham test will prove another important detail in the effort of oil companies to establish the point where the famous Stephens county pay crosses the Clear Fork.

The Texas & Pacific held this lease originally. In an effort to get a test down before the lease expired September 21, the Texas-Pacific gave 80 acres to the Glascock Company. However, when the lease expired the hole registered a depth of only 800 feet.

BEXAR COUNTY HAS RAPID FIRE GUN TO STOP KLAN.

San Antonio, Texas, Oct. 3.—In answer to rumors that a parade of the Ku Klux Klan might be attempted in San Antonio, both Chief of Police Munsey and Sheriff Tobin of Bexar county, declared today that no such parade would be permitted.

Chief Munsey said: "While there may be no real harm in permitting a parade of masked klanmen, it would be in violation of the law. I propose, as head of the police department, to enforce the law at all hazards, and if necessary to use every man in my department and any necessary force to prevent such a parade as was staged in McLennan county."

Sheriff Tobin said: "There will be no parade of masked Ku Klux members if I can prevent it. The law forbids any person to appear masked upon the highways of the state, or in any public place, and it is my intention to see that the law is obeyed."

Sheriff Tobin also announced that he has a machine gun which would be used, if necessary, in halting any attempt to stage a parade here, provided the marchers wore masks.

Fresh Air Baking—

What It Is and What It Does

All Estate Gas Ranges bake and roast entirely with heated and sterilized fresh air. There are no openings in the side linings of the oven and no communication of any kind between the bake oven and the burner compartment.

The advantage of FRESH AIR baking are as follows:

1. The air passing up the flue in the rear of the Broiler Compartment absorbs practically all of the heat radiated from the rear wall of the broiler, this utilizing the heat which is wasted in other constructions.
2. Direct radiation of heat through the oven bottom is reduced to the minimum. An even distribution of heat through the oven is secured, so that food will bake uniformly, no matter in what part of the oven it is placed, and even though but one oven burner is used.

 W. H. FOLWELL.

NOTICE IN PROBATE—WRIT THE STATE OF TEXAS

To the Sheriff or any Constable of Young County—Greeting:
 YOU ARE HEREBY COMMANDED to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the County of Young, State of Texas, and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:
NOTICE
 The State of Texas,
 To all Persons interested in the Estate of Reno Cherryholmes, and I. B. Cherryholmes, Minors, Gladys C. Sims has filed in the County Court of Young County, an application for Guardian of the person and Estate of Reno Cherryholmes and I. B. Cherryholmes, minors, which will be heard October term County Court at the Court House thereof, in the City of Graham, at which time all persons interested in said Estate may appear and contest said application, if they see proper.
 Here Fail Not, under penalty of the law, and of this Writ make due return.
 Given under my hand and seal of office, in the City of Graham, (L.S.) this 22 day of Sept. A. D. 1921.
 Attest W. H. KENNEDY,
 Clerk County Court, Young County.

THE HOME!

The big thought of America now is the thought of "The Home." We're all reaching out for, persistently seeking happiness for ourselves and those we love.
 Home-making is the greatest individual thing in the life of each of us. You should consider the fact that lumber prices are at rock bottom which makes this the logical time for you to decide to own a home of your own.
