Local Postoffice Burglarized

The Newcastle Postoffice was burglarized last Monday night. Entrance was made by forcing a door on the west side of the building.

The would-be burglars attempted to get into the postoffice safe, and managed to peel the outside of the door off and were getting in shape to open the safe, when they were undoubtedly scared off leaving their tools behind.

Postmaster Hankins said nothing was missing. He discovered the attempted burglary next morning and notified officers and postal inspectors, who are working on the case.

B. L. 'Ben' Northcott Announces For Justice of Peace

Gene A. Kinser Completes Pilot Training

Warrant Officer Candidate Gene A. Kinser, whose wife, Bette, lives in Newcastle, completed a helicopter pilot course at the Army Helicopter School, Fort Wolters, Tex. Feb. 19th.

During the 16-week course Kinser was trained to fly Army helicopters and learned to use them in tactical maneuvers.

The warrant officer candidate is scheduled for advanced flight training at the Army Aviation School, Fort Rucker, Ala. Kinser entered the Army in August 1959.

The 23-year-old soldier, son of Mr. and Mrs. Jack Kinser, Route 2, Tulia, is a 1959 graduate of Newcastle High School.

Methodist Study Mission Program

A study of the Mission program of the Church was begun at the evening worship services last Sunday. The pastor is leading in a study of the book, "Claimed By God For Mission," by Eugene L. Stockwell.

We will study the present structures of the congregation and how they developed in history. We will then look at the present world and what the church is doing, and then look at the future and see what changes the church must make to face it as a Christian congregation.

The study will continue through March. We invite you to come study with us.

Voter Registration Going Smoothly

Texas' first big free voter sign-up is under way.

But top state official still are "fighting mad" because F. B. I. agents were assigned to keep an eye on registration procedure in selected counties.

A three judge federal court granted Carr's requests for a 30 day stay of its order abolishing the poll tax as a voting requirement. Stay was granted in order to allow time to put the new registration law into effect. Therefore, the old poll tax will apply through most local elections this month.

All indications are the initial 15-day free registration (March 3-17) is going smoothly. Intensive registration drives are under way in the major counties, with all factions trying to sign up more voters who reflect their own views.

Reversing earlier instructions, the attorney general said Texans over 60 years of age in cities of 10,000 or more who failed to get exemption certificates before January 31 still can sign up free.

Reliable estimates of the number of new voters who will qualify by March 17 have been raised to around 500,000.

Pvt. Raymond W. Blankenship Completes Radio School

Pvt. Raymond W. Blankenship, son of Mr. and Mrs. Earl Blankenship, Newcastle, completed a radio relay and carrier operation course at the Army Southeastern Signal School at Fort Gordon, Ga., March 4. During his 12-weeks of training, Blankenship learned to operate different types of field telephone, telegraph and radio relay equipment. The 19-year-old soldier, a 1965 graduate of Newcastle High School, entered the Army in September 1965. He completed basic training at Fort Polk, La.

Mr. and Mrs. Preston Johnston and family of Lubbock, visited here last week-end with his parents, Mr. and Mrs. Ed Johnston.

Kite Flyers Should Observe Safety Rules

Kite-flying can be fun, as all kids (and some grown ups) know, but it also be dangerous if basic safety rules are not observed. An appeal to parents to caution their children about flying kites near electric wires has been made by Hal Hayes, Community Public Service Company local manager.

"The windy season brings

kite-flying time and this traditional activity is great sport, but youngsters are apt to forget that this innocent pastime can lead to grief if safety rules are not followed" Mr. Hayes said. "The most important rule is never to fly kites where there is a possibility of their getting tangled in electric wires."

Other dangerous practices in connection with kite-flying include using metal string or wire for kite string, making the kite frame of metal, flying kites in the rain when even a cotton string can become a dangerous conductor of electricity, and trying to retrieve a kite if it becomes entangled in electric wires."

It pays to patronize the advertiser.

Mr and Mrs Clyde Stephens, who have recently moved to Graham from Wichita Falls visited here last Wednesday with with Mrs J. W. Anderson and Margaret. Mrs Francis McCord and L. J. Streetman of Wichita Falls, also visited in their home Tuesday of last week.

- 1 Always use dry string, wood and paper in your kite...not wire or metal.
- 2 Always fly your kite on days when there is no rain.
- 3 Always avoid busy streets and highways while flying your kite.
- 4 Always fly your kite away from TV and radio aerials, electric or power lines.
- 5 Always keep away from fallen wires.
- 6 Always call your power company if your kite gets snagged in a power line. Do not pull the string or climb power poles.

LENTEN MEALS

Now that Lent is here, what shall we eat on the days when we are to forego meat, or when we choose to forego meat as a voluntary sacrifice? That is the lament of many a homemaker as she faces the problem, not too easy at any time and now intensified, of giving her family a varied and tasty as well as nutritious diet. In any family there are bound to be food dislikes, allergies, necessary dietary restrictions, prejudices, and perhaps budget limitations, which the housewife must take into account. When a basic foodstuff like meat is out of consideration on frequent occasions, the problem is compounded.

meat may be restricted only on certain days. Since meat includes poultry, we must look farther for the necessary supplies of protein to supply the seventy grams daily recommended for a 154 pound adult male doing average work and living in a temperate climate. (The protein recommendation is 1 gram daily of protein per each 2.2 pounds of body weight.) For our 154 pound man this means about two and one half ounces of protein per day. None of the commonly available foods are pure protein, so we cannot just weigh the food, and assume that its full weight is protein.

However, it isn't so bad. Large numbers of the world's population see very little meat at any time; few countries have the unlimited supply available to the American people. Even in Lent,

The accompanying table lists approximate weights of proteins found in the ordinary 100 gram (3 1/2 ounces) serving of some foods usable in planning protein-rich meals without meats:

FOOD #	GRAMS *	FOOD #	GRAMS *
Almonds	19	Finnan haddie	23

Fruits and vegetables, necessary in a balanced diet, can, as noted, also make small contributions. But the main reliance in planning for protein in Lenten meals will be on fish, eggs, cheese, milk, beans and other legumes, nuts, cereals and breads. Good, satisfying, nutritious Lenten meals shouldn't be too hard to plan.

TIME Means Every Thing

Fast recovery from illness often depends on how quickly your prescribed medicine can be made available. That is why a prescription is always a "rush order" here.

Your medicine is prepared in a matter of minutes thus enabling you to obtain its benefits sooner. Time waits for no man—and when you are ill, it can mean every thing.

WYNNE CHESTER SAYS:

Use Your Pen And Save Your Gun!

There is a bill pending before the U. S. Senate that prohibits all mail order sales of firearms to individuals, thus harshly restricting law-abiding citizens who wish to buy sporting arms by mail. And, if passed, this bill could easily open the way to fingerprinting, registering the serial numbers of guns, and police permits for ownership or use.

The bill, S.1592, is intended to amend the Federal Firearms Act. That Act already covers the licensing of firearms manufacturers, dealers and importers, regulates firearm and ammunition movement in interstate and foreign commerce, and prohibits the shipment, transport or receipt of firearms and ammunition by felons, fugitives and the like.

S.1592, however, besides penalizing farmers, ranchers and others who need mail order guns, would hand over to the Secretary of the Treasury, without restraint, the authority to recommend regulations concerning all traffic in firearms. This provision could lead to any restriction one can imagine.

Sportsmen throughout the country are protesting to President Johnson, to Senator Eastland, Chairman of the Senate Judiciary Committee, and to their own Senators and Congressmen, pointing out that penalties should be directed at the misuser, not at the firearm! Isn't it about time for you to write, too?

Automatic Sweet Talk

New remote control console for FM two-way radio system compensates electronically for changes in outgoing voice levels of different dispatchers, and provides anti-blast protection for incoming calls. Designed by General Electric at Lynchburg, Va., for use by businesses, governmental agencies and others, it's all-transistorized, easier to operate and more functional. Another automatic feature, electronic voltage regulation, keeps the console's performance steady and provides extremely stable characteristics for messages to cars and trucks on the road. For multi-office locations, additional consoles may be used.

Funeral Rites For Glen Q. Street

Funeral services for Glen Q. Street, 77, life-time resident of Graham whose parents helped settle Young County were held at 2 p. m. Thursday, Mar. 3 from First Methodist Church.

Street died Wednesday morning in a Graham hospital after a lengthy illness.

Officiating was Dr. D. L. McCree. Burial was in Oak Grove Cemetery under direction of Morrison Funeral Home.

A retired bookkeeper, Street was a member of First Methodist Church.

Born Jan. 18, 1889 in Graham, he was the son of the late Mr and Mrs S. B Street, pioneer Graham and Young County residents.

Street was married in 1911 to the former Fay Wheat of Memphis, Tex. She survives, in addition to one brother, S. Boyd Street, Graham; a daughter-in-law, Mrs. Betsy Street of Canton, Miss; and three grandchildren, Glen Q. III, Frank Smith and Kathy, also of Canton.

Make Tomorrow's Breakfast Today

Make tomorrow's pancake breakfast tonight? It's easy with most modern self-rising flours. At one better-making session, you can prepare enough pancakes or waffle batter to last (under refrigeration), for three bountiful breakfasts. And the batter on the third day will be as light and lively as the day you made it!

The key is an unusual new phosphate leavening agent which most mills are incorporating in their already versatile self-rising flours. The new leavening agent, from the food laboratories of Monsanto Company, lies quietly until triggered by griddle heat, then it releases leavening power at just the right time to give pancakes and waffles full and flavorful lightness.

For Delicious Pancakes

2 cups of self-rising flour ¼ cup cooking oil or melted butter,
 2 tablespoons sugar margarine, or
 2 eggs shortening
 1¼ cups milk

Put eggs and sugar in a mixing bowl and beat lightly with rotary beater. Blend in milk and oil. Add flour. Blend together and beat until batter is nearly smooth. Do not overbeat. Usual batter for pancakes is cream-like in thickness.

Pour batter into a closable container, covered tightly to prevent surface drying, and place in refrigerator. Before each frying, stir to eliminate any separation.

Pour batter on hot griddle or frying pan (about 400°). Turn when bubbles rise to surface in center. Griddle is not hot enough if pancake is not brown when turned. It is too hot if bubbles at edge of pancake break before bubbles rise to surface at center. It's not necessary to add more milk or water while frying the pancakes.

For refrigerated batter to produce succulent waffles, use above recipe with these changes: 1 tablespoon sugar; 1½ to 2 cups milk and ¼ cup cooking oil, butter, margarine or shortening. (Waffle batter is usually thinner than pancake batter).

Red, white, and blue arithmetic

If you're looking for safety in numbers, try these figures on United States Savings Bonds.

The value of Savings Bonds adds up at a safe, steady rate. When your Bonds are held to maturity, you get back \$4 for every \$3 that you invest. And that interest is guaranteed.

Furthermore, you don't pay any state or local income tax on E Bond interest. The federal income tax income may be deferred until you cash them. When you need the cash, your Bonds convert in a jiffy.

But the best part of the Savings Bond equation doesn't show up on the tables—the pride you can feel that your money is put to work helping to strengthen freedom's cause throughout the world.

It all adds up to the fact that United States Savings Bonds are a mighty hard-working investment. Millions of Americans have found Bonds the star-spangled way to save. That figures, doesn't it?

Quick facts about Series E Savings Bonds

- ✓ You get back \$4 for every \$3 at maturity
- ✓ You can get your money when you need it
- ✓ Your Bonds are replaced free if lost, destroyed or stolen
- ✓ You can buy Bonds where you bank, or on the Payroll Savings Plan where you work
