Good News

In connection with its April educational and fund-raising Crusade, the American Cancer Society has announced that there are one million Americans alive today who have been cured of cancer. Twenty years ago, there were only 180,000.

But there is more to the story. The Society considers "cured" only those alive and without evidence of the disease five years following diagnosis and treatment. By this standard, it is estimated that an additional 600,000 cancer patients diagnosed and treated within the last five years will live to enter the ranks of those cured. This means that today there are actually 1,600,000 men, women and children cured of cancer, although 600,000 will not formally be counted until five years from the time of treatment.

Twenty years ago, only one out of seven who developed cancer was saved. Ten years ago, it was one out of four. Today it is one out of three. It is estimated that 160,000 Americans will be saved from cancer this year.

This is good news indeed. But, unfortunately, there also is bad news.

The dark side of the picture shows that 85,000 men, women, and children will die needlessly of cancer this year because their cancers will not be diagnosed in time and promptly treated. It is possible to save half of all those who develop cancer through early diagnosis and proper treatment.

But the good news in cancer control is not the result of accident. It has come about through cancer research and education. More and more men and women are having annual checkups as the best possible protection against cancer at the urging of the American Cancer Society.

Let us cut down on the bad news and increase the good news by supporting the 1960 Crusade of the American Cancer Society. Guard your family — Fight Cancer With a Checkup and a Check!

We Propose A Club Project

How many times have you met with a club and heard them searching for a community project?

We have one for some enterprising organization in the City of Stanton. We have a project and wish to suggest it. We hope that some civic group in Stanton sponsors a clean-up campaign.

FARM REVIEW AND FORECAST

It's fishing time. And it's just as important to give farmers and ranchers warning to get fishing licenses before wetting a hook in the pond of water as it is to warn folks in any other business.

Wardens of the State Game and Fish Commission checking these fishermen find that most of them have their licenses. A few, however, have put off buying their licenses and it is necessary to charge them with violation.

Fishing licenses are required of all persons, except those under 16 years and those over 65 years, fishing with rod and reel in any Texas waters.

Non-residents pay the same fee for their license as Texans—\$2.15—which permits fishing in either fresh or salt water.

The dry land farmers of Martin County have about arrived at the point killing a snake and turning its stomach face-up to the sun—it is said one way to charm the rain god into sending a rain. One farmer said it was getting dry and he would appreciate a good rain.

"But, we'll get it," he said in an optimistic vein. Avoiding the challenge of dry weather, the irrigation farmer has his water roll to turn on to send a shower of rain over his cultivated land.

The Livestock Carriers Assn. of Texas has been granted a higher rate on truckloads of livestock going to Fort Worth by the Railroad Commission at Austin. Seven counties are included in the higher truckloads increase to Fort Worth: Crane, Upton, Jeff Davis, Pecos, Terrell, Brewster and Presidio.

Shippers are now protected by a new regulation: if the shipper requests a certain length vehicle and the carrier doesn't have the equipment asked, the carrier can't charge any more for it, for example, he hauls the stock with two shorter vehicles instead of the one long one requested.

If the carrier is required to load and/or unload livestock, a charge of 5 cents per 100 pounds is added to the previous rates; if the carrier has

to load grain in the field, the shipper will now have to pay an additional 5 cents per 100 pounds.

At the dedication ceremony of Texas' only vehicular tunnel in the Big Bend National Park held recently, Thomas A. Allen, regional director of the National Park Service, spoke of 50 per cent of the improvements in the national park had been completed. The National Park Service plans to spend another six million dollars before the improvement program is completed in 1966.

The tunnel, 301 feet long and wide enough for two-way traffic plus two walks each 4-foot wide, replaces Ernest Gap and Dead Man's Curve leading into the Boquillas Canyon.

Other recent improvements are the Rio Grande Village, which is to be developed in to a winter resort and three bridges over Tornillo Creek.

The attendance was estimated between 1,000 and 2,000.

More than 900 rural communities in Texas are finding community improvement projects are easier to

accomplish when everyone joins hands in helping each other. Reagan Brown, extension rural sociologist, says 213 of these communities are now participating in the Texas Community Improvement Program sponsored by electric utility companies in the State and the Texas Agricultural Extension Service.

"When I attend a community improvement meeting, the faces look the same, whether in East Texas, the Panhandle or along the Rio Grande," Brown says. "They all look happy and you find yourself thinking, 'This is a good neighborhood in which to live and raise a family.'" These words mean a lot. In fact, no greater compliment can be paid a community than to say it's a good place to live.

Can your production costs be cut? The tough problem is to find ways to hold the margin between receipts and expenses. One method is to watch closely for ways of cutting expenses that effect potential profits. A safe guide is to aim at the maximum production from a given "package" of resources—the land, labor, facilities and equipment controlled by the operator. For example, investment in a 4-row tractor would be uneconomical for a 100-acre cotton-grain farm, and the operator's labor would never be fully employed on this size unit. Thus, some investments costs may be lowered by proper equipment selection.

Now to the flower garden. Harland E. Smith, Extension Plant Pathologist, writes on the subject "Plant Disease of the Week." Black spot is one of the most common diseases of roses. It is likely to be more serious on susceptible plants in areas of high rainfall.

Black spot is controlled by spraying once a week with Dithane M-22, Manzate or Phaltan. Time between sprays may be longer during periods of little rainfall. Adding a spreader-sticker to the spray will provide better coverage. It is important that both upper and lower sides of the leaves be sprayed.

Grassroots Opinion

Corvallis, Ore., Gazette-Times: "Constitutional provisions prohibit a president from knocking single items out of appropriation bills. Consequently, Congress always lumps a lot of appropriations together and submits them as one bill. It usually contains some undesirable or selfish items mixed in with the necessary ones. . . . The Federal government is far behind most state governments in this respect. The governors of some 39 states . . . exercise item veto power."

Dayton, O., Labor Union: "Have you ever wondered about advertising that made you want to buy something you thought you couldn't afford? Well . . . pause and be thankful for it. It's this very ability of advertising to prod us into wanting something better that keeps our economic machine whirling away at top speed. . . ."

"Few can deny that we have achieved a 'good life' in this country. . . . We will continue so long as we keep up this urge for self-betterment."

Fifteen Years Ago

Mr. and Mrs. Walter Graves spent several days in Dallas visiting Mr. and Mrs. Henry Bridges and daughters.

Mr. and Mrs. Bart Smith came in Tuesday from Temple, where Mr. Smith had gone for a checkup at Scott and White Hospital. Returning home they went by the way of Grand Prairie and visited a daughter, Mrs. Arlo Forest.

Mrs. Cecil Hamilton and little son, Horace, came in Friday from Kansas City, Mo., for a few days visit with home folks.

Pastors and delegates from the 23 churches in the Sweetwater District, met in the Methodist Church, Stanton, Thursday of last week for the district conference. Dr. Harold G. Cook, president of McMurry College, Abilene, brought an inspiring message on evangelism. A fine meal was served to over 200 pastor, delegates, and visitors.

Mr. and Mrs. Gordon Stone and daughter, Caroline, visited Mrs. Stone's sister, Mrs. Duane Johnson, in Fort Worth last week.

Friday evening, April 20, the Sen-

Philosopher Speculates On The Value Of Looking At Clouds From Top Side Instead Of Bottomside

Editor's note: The Martin County Philosopher on his grass farm on Mustang Draw has found out about the new weather satellite now circling the earth, his letter this week reveals.

Dear editor:

I'm always in favor of progress, provided it doesn't disturb the way I'm living already, and consequently I was pleased to learn that the United States now has a weather-viewing satellite circling the globe every 90 minutes, sending back pictures from 400 miles up.

A lot of professional weathermen are saying this will open up a new day in weather forecasting, but I read in a newspaper last night, along toward the bottom of an article about the new prospects, that one scientist said he had his doubts, that most weather is fairly local.

I don't know exactly what he means by this, but I do know that most people, including me, are a lot more interested in the weather immediately overhead and a few miles on all sides, than they are in the weather 1,000 miles away or 400 miles up. It's sort of like a scandal. The closer it is to your area, the more fascinating it is.

As I understand this new satellite, it photographs clouds from up above, looking down, and while this may have some meaning I can't grasp, I'm not sure that looking at a cloud from the top down instead of from the bottom up will tell you whether or not it's going to give down any rain. At least I know that from a life-time of studying them from the ground looking

up. I haven't been able to tell any more about what they're going to do than a long-range forecaster. I've seen a day dawn bright and clear without a cloud in the sky, and before noon had a cloud-burst. On the other hand, I've seen it stay cloudy for a week without getting more than a mildewing mist.

I guess it's going to be interesting to have a photographic record of where the clouds are all over the world, but there'll never be a substitute for clouds overhead when you need a rain, and it doesn't take a satellite to tell me that, all I have to do is tilt my head and look up, and if I'm lying flat of my back out in the open, I don't even have to go to that trouble.

Yours faithfully,
J. A.

Tax-Man Sam Sez:

One of the things the tax folks are perturbed about is tips. Some folks forget to include their tips and a few just plain don't want to pay tax on tips. When the tax folks get to looking it pay to have them look at somebody else. Don't forget to put in your tips.

CHEVY! YOU CAN'T BUY ANY CAR FOR LESS ... UNLESS IT'S A LOT LESS CAR!

Anyone who's looked around knows the majority of Chevrolet models—6's and V8's together—list for less than comparable models of other low-priced cars. But the price tag alone is only one of a whole raft of reasons a Chevy does better by your dollars.

Nothing near Chevy's size and price can match the Full Coil cushioning of its ride, or the fine, finished workmanship of its Body by Fisher. That even applies to some cars that cost a lot more. You're up in the higher price brackets before you find a car that moves as quietly as a Chevrolet or offers the inner space that Chevrolet does.

Or look at the extras Chevy gives you — at no extra cost — that others in its class can't offer at any price. Shock-cushioned steering. Safety Plate Glass in every window. Keyless locking of all doors. Crank-operated vent windows. Chevrolet offers the widest choice of power teams, too. Drive a Chevy just once. You'll have a tough time settling for anything less.

remission of sins. But I say unto you, I will not drink henceforth of this fruit of the vine, until that day when I drink it new with you in my Father's kingdom. MATTHEW 26:26-29.

GOOD FRIDAY

And when they were come to the place, which is called Calvary, there they crucified Him, and the malefactors, one on the right hand, and the other on the left. Then said Jesus, Father, forgive them; for they know not what they do. . . . And it was about the sixth hour, and there was a darkness over all the earth until the ninth hour. And the sun was darkened, and the veil of the temple was rent in the midst. And when Jessu had cried with a loud voice, he said, Father, into thy hands I commend my spirit, and having said thus, he gave up the ghost. LUKE 23:33, 34, 44-46.

SATURDAY OF HOLY WEEK

Now the next day, that followed the day of the preparation, because the chief priests and Pharisees came together unto Pilate, saying, Sir, we remember that the deceiver said, while ye was yet living, After three days I will rise again. Command therefore that the sepulchre be made sure until the third day, lest his accend. It has come by night, and steal him away, and say unto the cation. More and is risen from the dead: so the last error shall be checkups as the b way, make it as sure as ye can. Sy they went, and Let us c, the sepulchre sure, sealing the stone, and seeing a news by suppl. MATHEW 27:62-66.

EASTER SUNDAY

Behold, there was a great earthquake: for the angel of the Lord descended from heaven, and came and rolled back the stone from the door, and sat upon it. His countenance was like lightning, and his raiment white as snow! and for fear of him the keepers did shake, and became as dead men. And the angel answered and said unto the women, Fear not ye: for I know that ye seek Jessu, which was crucified. He is not here: for he is risen, as he said. Come, see the place where the Lord lay. And go quickly, and tell his disciples that he is risen from the dead. MATTHEW 28:2-7.

Soil Conservation Local - - -

(Continued from page 1)
The program provides for technical and cost-sharing assistance to farmers and ranchers in developing and carrying out a conservation plan. The contract with the farmer or rancher includes the conservation plan, a time schedule that establishes, by years, an order of priority for installing practices, and the amount of cost shares to be paid by the Federal government. The program guarantees cost shares for applying needed conservation measures for an extended period, not less than three years nor more than 10 years. A major goal is to convert land unsuitable for continuous cultivation from such use to permanent vegetation.

Snooter Knows

(Continued from page 1)
culating me with Spring fever — a sort of sleeping sickness ailment. The only relief I gain is from an easy chair and a cool breeze. The Spring fever germ becomes so deeply rooted in me it rarely leaves me until Fall of the year, when it's something else again.

HOW COME THE DISORDERLY appearance to mar the civic attractiveness of Stanton as it enters the Spring season of the year? Well, sir, it's spent a year gathering filth, loose waste paper, empty tin cans, bottles, discarded wash tubs, dishes, old dead trees, grass and high weeds on vacant lots. Oh, well, fact of the matter, the old town needs a week to devote to a general Clean Up, Paint Up, Fix up campaign.

THE LION SPENT HIS LAST DAY of the month (March) in a fit of fury. He pawed sand high into the air and roared his defiance with a wind that reached the speed of a gale at times. He left scars of bare ground by blowing the top soil off dry loose farm lands. During the month of March the lion moved in and created disturbances at intervals during the period, ruffling the feelings of the populace with high winds and blowing dust.

MR. AND MRS. JOHN CULBERSTON MOTT announce the engagement and approaching marriage of their daughter, Sara Jane, to Mr. Charles Thomas (Corky) Blocker, son of Mr. and Mrs. Horace Blocker, on the eleventh of June, 8 a.m. at the First Baptist Church of Stanton, Texas. Mr. A. Ellmore Johnson, minister, Stanton Church of Christ, will perform the ceremony.

Film Made In Holy Land To Be Displayed

A film made in the Holy Land will be shown at the First Baptist Church in Stanton on Wednesday evening at 8 p.m.

Miss Arah Phillips, Big Spring, well known area woman, will display the film and deliver a lecture of the scenes as they are flashed on the screen.

The film and the appearance of Miss Phillips in Stanton is being sponsored by the Homemakers Class of the Baptist Church.

The public is cordially invited to be in attendance for this film which has been described by those previously viewing it as one of the finest ever shown in this area.

Midland Airfield Veterans Plans First Reunion

Personnel stationed at Midland Army Air Field during World War II and still residing in the Midland area will have a special reunion luncheon April 30 as part of the dedication of the new Midland Air Terminal facilities, Albert S. Kelley, chairman of the Military Affairs Committee of the Midland Chamber of Commerce announced today.

Guest of honor will be Brig. Gen. Isaiah Davies (USAF Ret.), former commander of Midland Army Air Field.

The luncheon, a family affair, will be held in the Southwestern Air Rangers hanger immediately north of the new Terminal Building beginning at 11:45 a.m. Former personnel at MAAF may either purchase tickets at the Midland Chamber of Commerce office in the Scharbauer Hotel or order tickets by calling MU 3-3381. The price of the luncheon ticket is \$1.75.

Again this year, the American Cancer Society has adopted the slogan, "Guard Your Family — Fight Cancer with a Checkup and a Check," for its April Crusade.

About 45,000,000 Americans now alive will develop cancer if present rates are permitted to continue. Support the American Cancer Society in its effort to conquer this disease.

Commissioner Phillips Asks Voters Support

The following statement has been presented to The Stanton Reporter for publication as political advertising by Martin County Commissioner H. O. (Hub) Phillips.

"As many of my friends know, I am a candidate for re-election to the commissioner's place in precinct one.

"I hope to see and talk with as many of the residents of the precinct as possible before the first primary election on May 7.

"I want to meet the new people and to invite them to review my record in office and to solicit the support, vote, and influence of every resident in precinct one."

Phillips concluded: "If I fail to see you, please know that it was not intentional and rest assured I'll do the same job for all the people I have done during the past term if re-elected."

H. O. (Hub) Phillips, Candidate for Re-election Precinct 1 Martin County, Texas. (Pol. Adv.)

Bible Comment

Jesus Taught 'As One Having Authority'

At the conclusion of the Sermon on the Mount it is said that the people were "astonished at His doctrine: for He taught them as one having authority and not as the scribes."

Among the amazing things concerning the teaching and ministry of Jesus none is more remarkable. The scribes were the official interpreters of the law, and were supposed to speak with authority.

Jesus, in fact, recognized their authority as those who "sat in Moses' seat," though He warned the people that they should do as the scribes said, but not according to their works, for they said, and did not.

But even in what was said those who heard Jesus realized a difference. They felt that He had an authority which those who claimed authority did not possess.

He had the good education that was the heritage of every Jewish boy of that time in the schools associated with the synagogues.

But he possessed, apparently none of the outward credentials of authority which both then, now and always have assumed so much importance in the eyes of men. He was neither a scribe, nor a rabbi and it is certain that no school of the time would have given him an honorary D. D.

Yet to those who heard Him, He spoke with an authority which none of the possessors of the outward credentials of authority could command.

The secret of the authority of Jesus was that it rested on truth. His authority was that of the great Revealer of God, speaking in harmony with the truth of God and the uni-

verse, the foundation of all authority.

Covers All Phases Of Crippling

Easter Seal Research Seeks Reasons For Birth Defects, Preventives

How? Why? What could have caused it? Anguished parents and their handicapped offspring never stop asking themselves and medical authorities these questions following the birth of a crippled or deformed child. And all too often, there is no answer.

Modern medical science, for all its progress and vast knowledge, is the first to admit that it does not have the answers.

True, it has been generally known

for many years that some types of birth defects and crippling are hereditary — "it runs in the family," we often hear people say.

But what are the mysterious reasons which cause these conditions to occur in some families while others are free of such fears?

And why are defective or malformed babies so often born to parents whose families show no previous history of birth defects on either side?

How can we insure ourselves and

Six-year-old Cindy Inman of Sherman, born without arms and legs, is Texas' 1960 Easter Seal girl. One of more than 6,000 crippled Texans served in almost 100 local Easter Seal programs and 32 treatment centers in the Lone Star state in 1959, Cindy is taught to use her artificial limbs at the Sherman Easter Seal center, where she also receives physical therapy to strengthen her body and muscles.

babies of the future against these dread possibilities? What can we do for parents and children who have already come face to face with birth defects?

One of America's great national voluntary health organizations has been wrestling with these problems and seeking the answers to these questions for almost 40 years, and many more years of research and study undoubtedly will be needed before all the answers are known.

A search into the reasons babies are born crippled or deformed is among the major aims of the national Easter Seal Research Foundation, in which the Texas Society for

Crippled Children and Adults and its almost 100 local chapters play an important part.

Revealing clues which point to oxygen deprivation of the unborn child as a factor in birth crippling or deformities have already come out of projects financed by grants of the Foundation. And studies of tooth-rings similar to the growth rings found in trees to establish a time-table of prenatal injury also offer promise of helpful new knowledge.

Since it was established in October of 1916, the Foundation has awarded 50 grants to research scientists in 35 universities and institutions for 43 basic and clinical research projects, totaling more than a half million dollars.

Each state and local chapter of the National Society for Crippled Children and Adults, parent Easter Seal organization, contributes two per cent of contributions to their annual local Easter Seal Appeals to the Foundation. Since 1956, Texas chapters have contributed almost \$25,000.

The Foundation's voluntary board of trustees is composed of many of the nation's most highly respected medical authorities, including the dean of American medical educators, Dr. William T. Sanger of the University of Virginia medical college, who is chairman of the trustee board. The board appraises all requests for financial support of research studies.

Although the principal purpose is to attack the overall problem of crippling, the Easter Seal Research Foundation's projects fall into five broad areas of investigation including congenital crippling and malformation (birth defects); bone and joint formation, malformation and healing; the relationship between injury and disease; improved educational methods and appliances for the crippled; and research professorships.

At the same time that the Foundation is trying to uncover information about crippling conditions, their cause and prevention, attention is also being given to those who are already crippled.

New kinds of appliances, including improved artificial limbs and braces, are being designed; new educational methods are under study; and more effective means of vocational and physical rehabilitation are being sought.

Practical individual help is given almost 250,000 crippled American children and adults in Easter Seal treatment centers all over the nation as they are taught to overcome their handicaps through physical, speech and occupational therapy.

One of the most important phases of Easter Seal services is the education of the parents of crippled children. Even more than the ordinary parent, they are overwhelmed and confused by their responsibilities.

These tortured mothers and fathers are given insight and understanding of their own and their children's problems through organized programs of study and education sponsored by the Easter Seal Society, so they may help their children and each other adjust to the specific situations which life has thrust upon them.

Fathers are taught to build specialized pieces of furniture and equipment often needed in the home by crippled children. Mothers are taught simple exercises which they may use to strengthen weak little muscles or straighten crooked little bodies in between visits to the therapist at the Easter Seal center.

The Easter Seal Society is the only national organization founded to help all types of physical handicaps, whether caused by birth, accident or disease. Its services and facilities are available to anyone who is or who becomes crippled. Texas parents of crippled children, or crippled adult Texans, are urged to contact the Texas Society headquarters at 429 North Central Expressway in Dallas, or their local Easter Seal chapter for information and services.

Mr. and Mrs. Wade Reid and Mrs. Edwards of Big Lake were in Stanton for the One Act play contest over the weekend. They were guests of Mrs. Reid's son, Jack Scannell.

Irrigation Efficiency One Answer To Profitable Cotton Production

"Irrigation efficiency is one of the answers to profitable cotton production," James Valliant, Assistant Water Engineer at the High Plains Research Foundation, stated in the 1959 research reports just released to supporters of the Foundation.

Irrigation applied preplant and at peak bloom produced the best grade and highest income in 1959. Production from this irrigation method ranged from 85.3 to 94.3 pounds of line per acre inch of supplemental water applied.

The return from the preplant, peak bloom method of irrigation ranged from \$161.00 to \$181.00 per acre. Pumping costs were figured at \$8.00 per acre foot at Halfway. Some authorities, however, report this cost as high as \$9.00 per acre foot.

These results indicate that the time

of application, not the total amount of irrigation water applied, controls dollar returns from irrigated cotton.

Cotton irrigated at a total of 17.2 and 21.5 inches returned less income in 1959 than the 8.6 inches applied in the preplant, peak bloom method. From these results it is evident that a more profitable cotton crop can be grown with less water, less labor, and less pumping costs in a year like 1959. Time of irrigation and fertility level are two of the major controlling factors in irrigated cotton profits.

"This experiment will be conducted over a period of several years before definite conclusions can be made regarding the recommended irrigation methods and fertility levels needed for most efficient cotton production," Mr. Valliant said.

Sesame Seed Now Available To Landowners

A seed mixture of early and late maturing sesame has been prepared by the Texas Research Foundation for landowners and sportsmen to plant for feed and cover for dove and quail this fall and winter. Announcement of the new mixture is made in the Texas Game and Fish magazine, according to the director of information and education.

The mixture coming from the research farm at Renner Texas, contains three varieties of semi and non-shattering sesame, which will begin releasing seed in September, according to Dr. C. L. Lundell, director of the Foundation.

"All three varieties are heavy producers, and a continuous supply of seed they provide will carry game birds through the dormant season in excellent condition for the spring mating season," he said.

The mixture now is being put up in 5 to 100 pound bags for distribution to landowners. The best planting date is during May, according to Dr. Lundell.

He urges proper preparation of soil beforehand, with conventional farm equipment. Small areas should be prepared with a rake. The seed bed should be rolled or firmed after the seeds have been planted.

The feed was developed after field observations showed bird preference ceased basic training at Fort Riley, the Foundation.

New Mammal Book Is Published By Game Commission

A new bulletin of the Game and Fish Commission, entitled "The Mammals of Texas," will be ready for distribution shortly, according to the director of information and education, Texas Game and Fish Commission.

The 252 page bulletin was written by Dr. W. B. Davis of the Texas A. & M. College. Dr. Davis is professor and head of the department of wildlife management at A. & M.

The bulletin, No. 41, covers all the mammals of Texas, and their distribution is shown on outline maps of the State. It will be sold at the cost price of 50 cents each, by writing to the Game and Fish Commission in Austin.

Pictures of all the important mammals in Texas also are shown, with full descriptions of them, their habitat, food and range.

"This book will be invaluable as a handbook to nature lovers, and can be used in classrooms on wildlife subjects," the director said.

Mr. and Mrs. Bob Latimer spent the weekend with relatives in Breckenridge.

Mrs. Archie Butler and sons, Rodney and Mark, have returned home after a visit with her grandmother, Mrs. Bill Odell in Weatherford.

Quail Hunting Depends Upon Work Done Now

Landowners who expect to harvest a quail crop for the 1960 hunting season will do well to begin work immediately, according to the assistant executive secretary of the Game and Fish Commission.

"To have a good quail crop plenty of cover and feed are required," he said. "This can be developed, along with other crops. Many landowners planted multiflora roses last fall. Others will provide food crops along fence rows, or suitable cover on their pasture lands."

He said present indications point to a heavy carry-over of brood stock from last year. In many places the 1959 season was the best for quail in years. Although many were killed by hunters, there were no heavy freezes or bad weather to kill off a great number of the carry-over birds.

Quail also will be available from the State hatchery this year, he said. Application should be made to the Austin office for these birds. They will be sold to landowners at 50 cents each, which is about half the production cost.

Before a landowner gets the birds, however, a warden must first inspect his place to see if he has sufficient cover and a good probability of feed.

"If we get a favorable weather season this year, we'll have another bountiful crop," he said.

Stanton Rebekahs Appear On Program

The Stanton Rebekah Lodge 287 participated in the West Texas IOOF and Rebekah Association in Midland, Saturday.

Stanton Rebekahs had charge of presenting the Bible. Mrs. Kenneth Fincher had the leading part in the ceremony. Escorts for Mrs. Fincher were Mrs. C. E. Christopher and Mrs. Lela Shankle. Mrs. Walter Graves, presided at the piano.

Stanton members awarded certificates for repeating memory work during the Association were Mrs. Fannie Graves, Mrs. C. E. Christopher and Mrs. Walter Graves. Other Rebekahs attending from Stanton were Mrs. Leroy Fincher, Mrs. Mason Coggins and Mrs. Leman Henson.

PERSONALS

Mr. and Mrs. Owen Thompson and Mrs. Vera Osman spent Sunday with relatives in Andrews.

Mr. and Mrs. James Jones are attending market in Dallas this week. They will go Franklin, Texas for an Easter visit with Mr. and Mrs. Bill Clements before returning to Stanton.

Bracero Misuse Is Attacked

Federal authorities have launched an attack of Texas farmers who mistreat Mexican "bracero" laborers brought to this country to augment the labor force during peak harvest periods.

Tracy C. Murrell, regional director of the Department of Labor's Bureau of Employment Security made the announcement in revealing recent action against a Muleshoe, Bailey County, cotton farmer.

"We have taken similar action against 300 individuals and organizations in the past two years for failure to abide by the law governing employment of braceros," he said.

The Muleshoe man will never again be allowed to use the Mexican agriculture workers because he mistreated a worker and failed to keep accurate employment records, Murrell said.

"We've declared others ineligible for paying sub-minimum wages and for not providing adequate housing for the braceros."

The Mexican nationals, Murrell explained, are brought into this country under contract each year to work in areas where sufficient domestic help is not available. In Texas, most are employed in the Rio Grande Valley and West Texas.

Most of the approximately 150,000 come to the state yearly during the 3-month period, September through November.

"An individual worker is brought here to do a particular type of job . . . and no other," Murrell continued. "In the Muleshoe case, for instance, a worker was brought here to be a tractor driver and an irrigator."

"The farmer, however, used him in a cotton gin where there was sufficient domestic help available. This was in direct defiance of the law."

Murrell said that department is not equipped or staffed to "police" in the manner they'd like to.

"We have to depend mainly on complaints we receive from individual Mexican workers through the Mexican consulate and the periodic inspections trips our people are able to make."

And the 300 cases, he explained, do not reflect the true number of offenses. "These are only the ones we caught. There are many more, we know."

Murrell does not blame the individual farmers entirely for the infractions. "Many of them are not familiar with all the facets of the law when they sign a contract for bracero labor. They acquire the people through their mutual labor organizations, set up specifically to contract a group of workers for farmers in a certain area."

These organizations are not, in all cases, informing their member-users of what they must provide under the Migrant Labor Agreement of 1951, he said.

His department has declared three such organizations — one in Lamesa, two in the Rio Grande Valley — ineligible for participation in the program during the past year because of infractions.

Murrell said the bracero is not a "wet-back" in any sense of the expression.

"These workers are brought over here under mutual agreement between the United States government and the Mexican government. We guarantee to Mexico that none of them will be mistreated and we have to stand behind the wage agreement."

His department has declared

Why Install a Gas Light?

If you are a home owner who takes justifiable pride in the appearance of his property . . . if you have a regard for the convenience and safety of folks who come to see you . . . and if you have a keen sense of economy as well as for things functional . . . then a Gas Light will be a satisfying addition to your yard.

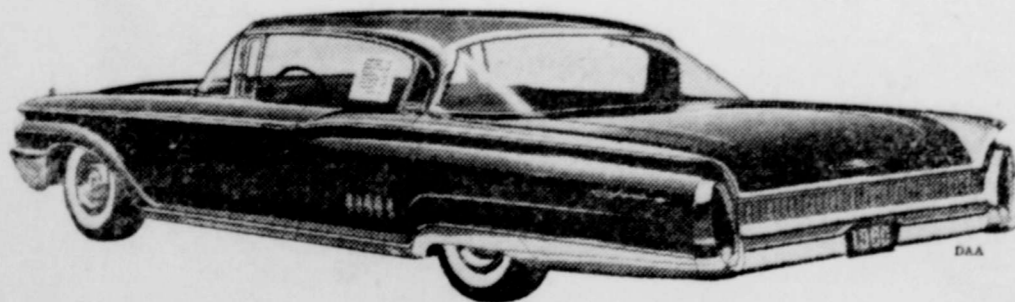

Neighbors welcome its glareless illumination . . . insects give its soft, mellow glow a wide berth. And regardless of the architectural style of your home, gas lights provide an indefinable "something" that adds noticeably to the appeal of any residence, at an amazingly small cost of operation.

Why not call Pioneer tomorrow and find out all the details about Gas Lights? Special Budget Prices start at just \$49.50, installed.

I, G. B. Shelburne, City Treasurer of the City of Stanton, Texas, do hereby certify that the above and foregoing statement is true and correct to the best of my knowledge and belief. Witness my hand and signature, this the 5th day of April A. D. 1960.
G. B. Shelburne, City Treasurer
Stanton, Texas.

Highlights and Sidelights FROM Your State CAPITOL

A 30-member committee appointed by Gov. Price Daniel will meet May 16 to begin work on a tall task.

Assignment of the State Finance Advisory Committee will be to suggest every possible economy in state government and recommend a tax program to put the state on a sound financial basis.

For the immediate future the tax program is to wipe out the general revenue fund deficit, which the governor estimates will be \$40,000,000 at the end of this fiscal year, and provide \$35,000,000 for teacher pay raises.

Committee is to be made up of leading citizens in both public and private life. Six already have been named. They are Secretary of State Zollicoffer, who will be chairman; Jess Irwin, the governor's budget director; Joe Ford, administrative assistant to the governor; John R. McKee of Dallas, Ford Motor Co. executive; and Hugo Lowenstein, Amarillo real estate man.

Gov. Daniel said he would ask the committee to search for revenue sources other than a general sales tax or state income tax.

He hopes, said the governor, that the committee will work out some recommendations soon so that a special session can be called this year to pass teacher pay raises. Under Texas' requirement for pay-as-you-go financing, the Legislature would have to pass taxes to wipe out the deficit before it could vote funds for the school improvement program.

TEACHER RAISE ENDORSED — Nearly three-fourths of the candidates for the Legislature this year have told the Texas State Teachers Association they favor a pay raise for teachers.

Some qualified their statements to indicate that getting the pay raise might be and easier-said-than-done proposition.

Of 401 candidates for the Senate and House, 336 answered TSTA's questionnaire, and 283 said they approved the Hale-Aikin school program.

Asked if they would vote the necessary taxes for it 232 promised support outright. Others added conditions on the kinds of taxes they would approve.

LOAN PLAN DISAPPROVED — Third Court of Civil Appeals has held the certificate plan used by some loan companies is unconstitutional. Loan companies involved in the test case are expected to appeal to the State Supreme Court.

Under the certificate plan, the borrower of \$100 would agree to repay his loan through monthly payments on an investment certificate for \$110. This, according to the Attorney General's Department, forces the borrower to pay more than the permitted 10 per cent interest because the interest does not drop as he pays off the principal.

Loan companies, which won the first round in district court, contend that the same procedure is used by banks, saving and loan associations.

Attorney General's Department replied that there is no specific provision prohibiting other institutions from computing interest in this manner.

SCHOOL BUYING CRITICIZED — Clothing purchases at the Texas Blind, Deaf and Orphan School for Colored in Austin were far in excess of use during the past 18 months, State Auditor C. H. Cavness reported.

Cavness said his audit turned up excessive clothing purchases totaling \$3,624. In all, he said, 3,042 articles of clothing were bought, but only 75 articles were issued to the children.

He said he had received no "reasonable explanation" for the discrepancy. Cavness suggested that the Texas Youth Council, which oversees state schools for needy and handicapped children, make an inventory and transfer surplus items to other schools.

CITIZEN INTEREST URGED — Texas Law Enforcement Foundation has called on individual citizens to feel responsible for the way the law is observed in their communities.

Citing on specific instances, the TLEF executive committee said that "a breakdown in citizen responsibility must precede any breakdown in law enforcement."

Three new members have been elected to the TLEF executive committee. They are Neill Mastern Jr. of Houston, Weldon Jones of San Antonio and Radcliffe Killam of Laredo. Dolph Briscoe Jr. of Uvalde is new secretary of the committee.

Plans are under way to expand the foundation's board to include representation from every part of the state and to set up a program to assist families of law enforcement officers killed on duty.

Census Records May Help Prove Age, Relationship

You may be glad some day that the census taker counted you way back in April, 1960.

People who can't locate a birth certificate often find that the Census Bureau can furnish an acceptable substitute — a copy of the information listed about them in census files.

Almost 1,000,000 names together with identifying data, are filed in an agency warehouse at Pittsburg, Kan. The 1,000,000 names include many duplications, of course; since a census is taken every 10 years.

You can find out what the files say about you by paying \$3-84 if you want the information in a hurry. Before sending any money, you should get an application form by writing to the bureau's Personal Census Service Branch, at Pittsburg.

Alphabetical Filing — If you were counted in 1950, 1960 or 1970 finding your file should be a simple matter. WPA workers during the depression filed all the reports for those years in alphabetical order.

For other years, records are filed according to the communities in which people were counted. When you send in an application, you must give your address at the time of the census involved and the names of the people you lived with.

You can only apply for information about yourself. However, you can have your report sent to someone else. Even then, you will be notified if the records show something that might embarrass you. Some people, for instance, are counted in jail.

PERSONALS

Mrs. G. R. Phillips was a recent guest in the home of Mr. and Mrs. H. C. Grata in San Angelo. She attended a book review presented by the A&M Mother's Club. Mrs. Phillips is a former member of the club.

A. R. Coats of Abilene visited friends in Stanton Monday.

Guests of Mr. and Mrs. Bill Wilson Saturday were Mrs. Wilson's daughter, Mrs. Stator Vann and son, Marvin, of Midland.

Mr. and Mrs. Bill McLaury and sen. Troy, of Jayton, visited Mrs. Vera Osman and Mr. and Mrs. Owen Thompson Saturday.

Cantata To Be Presented Here

"On the Passion of Christ" is the Cantata by David H. Williams that will be sung by the choir of the Reorganized Church of Jesus Christ of Latter Day Saints on Friday, April 15, at 8:00 p.m. The Cantata is the story of the Crucifixion and is all scripture in song containing three parts called, "The Last Supper," "The Betrayal," and "The Crucifixion."

Colored slides depicting the passion of Christ will be shown that will correspond with the words in the cantata. All are invited to attend.

Mrs. Jack Gray Mu Lambda Group Hostess Thursday

Mrs. Jack Gray was hostess to Mu Lambda chapter of Beta Sigma Phi Thursday evening at the home of Mrs. D. M. Costlow.

The Ritual of Jewels was conducted for Mesdames H. J. Barbee, D. M. Costlow, John Ferguson, Bill Lookadoo, James Manning, and Max Graham.

Present were Mesdames H. J. Barbee, D. M. Costlow, John Ferguson, Jack Gray, Robert Herzog, Bob Johnson, Bill Wheeler, Bill Lookadoo, James Manning, Leland Nelson, Homer Schwalbe, Mrs. Floyd Sorley, Mrs. O. L. Snodgrass Jr., and Max Graham.

Reedley, Calif. Exponent: "It could be that in years to come we'll all be working for the Government. In California there are no less than 382,000 people on the public payroll. The Federal Government has a quarter of a million and the State of California 112,000. Even though the State is playing second fiddle in numbers it's catching up."

Dismissed: Lupe Estrada, Mrs. Lela Clardy, Mrs. J. W. Blocker, Mrs. Lillian Blake, Mrs. Lum Fennell, Mrs. Louise McMurray and baby, Mrs. Carolina Acuna, Jamie Padron, Kay Southerland, Billie Louise Bohanan, Dale Bohanan, Claude Carnes, Calvin Scoggins, Sammy Villa, Pedro Valasquez, Ramiro Garcia, and Georgie Quiroz.

Brownie Troop 356 Met On April Fifth

Brownie Troop 356 met April 5 in the Grady Scout house.

The girls shellaced their plaster of paris palques they had made.

Games were played and refreshments served by Ann Haggard to 18 girls and leaders, Mrs. Marvin Standefer, Mrs. Joe Ramos and Mrs. Houston Woody.

WCSO Met Tuesday At Methodist Church

The Women's Society of Christian Service met at the First Methodist Church Tuesday afternoon.

The last lesson of their study, "Luke's Portrait of Christ," was discussed.

Mrs. Bob Cox led the study and Mrs. Gene Perry led the worship service.

Those attending included Mesdames Bob Cox, Ellis Wayne Britton, Bill Wheeler, Roy Pickett, G. W. Alsop, Gene Perry and Calvin Jones.

Both circles of the church will meet next Tuesday for a social.

MRS. LOIS POWELL of Stanton announces the engagement and approaching marriage of her daughter, Kay, to Nolan Simpson, son of Mrs. Rubye Simpson, of 1713 Harvard Avenue, Big Spring. The wedding is to be in the First Methodist Church, Stanton, on June 30.

The Launching Pad

By NEAL ESTES

Contact the candidates who have announced in the local newspaper and find out how they stand on the issues you are vitally interested in. The time is short before the first primary election. We suggest you talk to the candidates who have used the columns of the official county paper of Martin County to give their views and platforms. Frankly, we wouldn't waste anytime on anyone "running" who has not brought qualifications out in the open so all could read, study and then form judgment.

LP
Did you ever hear of a rabbit hunt or shoot, getting started at 8 p.m. in the evening—that's after dark in Martin County, and it is definitely against the law, and anybody ought to have brains enough to know it—even if he comes from north of the Mason-Dixon, That is exactly what one of the joy-boy, head-in-the-clouds, way-out-there, platter-spinning, how-am-I doing Daddy, disc jockets started mouthing several hours after a rabbit shoot got underway in Martin County the past weekend. How you like some of this information you get on the air these days? Last year a TV announcer had folks runnings to get under the beds and busting their heads against door facings when he reported a tornado "just ten minutes out of town." These broom closet weather forecasters are about as reliable as a toy pistol in the hands of a Texas Ranger, and sometimes cause as much commotion as a polecat at a lawn party.

LP
We talked with a colored fellow the other day who is familiar with our East Texas background and having left that area for a life in West Texas a number of years ago he understands some of the fundamentals we hold to be true and sacred. We asked him if he had been enumerated. And he answered: "I ain't even been 'ingrated' yet." We explained that the census was now in progress and that someone was supposed to talk with him and get some information on his life, birth date, race, last, first and middle name, names of persons living in his house, etc. Again, he said: "Look- heah, MR. NEAL, if they comes after me will you put down what I is and 'bout me." We answered: "Yes indeed."

LP
GLEN RUTH REID, daughter of MR. AND MRS. STANLEY REID, was by the newspaper office Saturday afternoon and it was our privilege to congratulate this talented young girl on her fine achievement in winning the Texas Home Demonstration Association \$500 scholarship. MISS REID passed a "scoop" along to the column. She will attend Texas Tech and further her studies in the field of home economics.

Mrs. Dick Madison and Richard Cross were in Big Spring on business last week. They also visited friends in Midland Monday. Mrs. J. B. Shewmake, of Odessa, visited her parents, Mr. and Mrs. J. H. Parrish, and Mr. and Mrs. S. Bevers and family last week.

Bull Riding Honors Shared By Andrews, Snyder Boys

Jackie Dyer of Andrews and John Billy Coonsman of Snyder tied for top honors in the bull riding event of the Stanton Junior Rodeo held Saturday and Sunday.

A tie for third and fourth places in the contest resulted between Gilbert Pather of Ballinger and Floyd Bolton of Odessa. Bobby Kelly of Stanton finished in fifth.

Bulls, the most feared of all rodeo animals, drew nery 40 performers. Contestants in all 10 events totaled approximately 200.

Cub Reporter

By GUY BROWN

Editor's Note: — The following article was submitted to The Stanton Reporter by Guy Brown. Guy is a student and the son of Mr. and Mrs. Glenn L. Brown.

JUNIOR RODEO — BROWN, REPORTER — APRIL 9-10, 1960.

The first rodeo in a good long while in Stanton spurred many contestants from Stanton, Midland, San Angelo, Fort Worth and traveling cowboys into a rusting, bustling rodeo here the past weekend.

The rodeo was held on the local rodeo grounds from 5:30 p.m. Saturday until about 1 o'clock a.m. Sunday morning.

Juniors were really riding, roping and wrangling. From around 1:30 p.m. to around 7:30 p.m., Seniors were doing the same. Events were as follows: racing, bronc-busting, calf roping and bull riding.

Mrs. Bob Haislip Hostess To Xi Alpha Beta Group

Xi Alpha Beta chapter of Beta Sigma Phi met Thursday in the home of Mrs. Bob Haislip.

During the business meeting, presided over by Mrs. Bob Latimer, president, the club voted to make a contribution to the Cancer Fund.

Mrs. Jiggs Hall, program chairman, introduced Mrs. Woodford Sale, who spoke on "Natural Resources and Agriculture of Hawaii." Mrs. Hall then introduced Mrs. Leo Turner who spoke on "Natural Resources and Agriculture of Alaska." As a special feature Mrs. Turner presented Annette Koonuknowruk, who was born in Point Hope, Alaska. She is here with Mr. and Mrs. Travis Mauldin, who brought her here recently from Alaska. Mr. and Mrs. Mauldin have taken over the operation of the Buffalo Drive-In. Miss Koonuknowruk was very gracious in answering questions about her native state of Alaska.

Refreshments were served to the following members: Mesdames J. M. Yater, J. N. Woody Jr., Houston Woody, John Wood, Leo Turner, Jimmy Stallings, Woodford Sale, Stanley Reid, Elma Nichols, Bob Latimer, Wallace Kelly, Jiggs Hall, Glenn Gates, Elmer Long, Glenn L. Brown, and Bob Haislip.

The next meeting will be April 21 in the home of Mrs. Ralph Hedrick in Big Spring.

9,000 Attend Centennial In Independence, Mo.

Over 9,000 persons registered for the Ambey Centennial world conference of the Reorganized Church of Jesus Christ of Latter Day Saints in Independence, Missouri April 3-10. Delegates from 50 states and several foreign countries met as the main legislative body of the church. Douglas Church, of Stanton, was a delegate from Western Texas District. Mr. Jerry Gibson, Mr. and Mrs. Roy Koonce, Mrs. Carl Leonard Jr., Denton Hines, and Mrs. Gearl Koonce, of Midland, also attended the conference. The conference meets bi-annually.

The week of conference activities included prayer meetings, classes and musical programs, as well as the afternoon business sessions. A special evening pageant and music was presented to commemorate the centennial of April 6, 1860 when Joseph Smith III came to Ambey, Ill., conference to accept the leadership of the church 16 years after the death of his father, Joseph Smith Jr., the first prophet of the church.

Tarzan Do And Learn Club Met On April 6

Tarzan Do and Learn Club met April 6 in the home of Mrs. O. Robertson.

The girls discussed demonstrations they would give soon.

Refreshments were served to Sandra Jones, Susanne Jones, Lou Wanda Pierce, Carolyn Nichols, Carol Ann Pribyla, Mary Pribyla, Sandra Pugh, Dena Robertson, Janelle Tate, Anita Woody and Mrs. O. Robertson, leader.

ANNOUNCE ENGAGEMENT—The Rev. and Mrs. Noah L. Range of Stanton announce the engagement of their daughter, Reba Joan, to James E. Stark, son of Mr. and Mrs. E. F. Stark of Midland. The wedding will be solemnized June 3 in the Courtney Baptist Church.

Patronize your Stanton merchants all the year around and realize profitable buying.
