## Deduction Table For Sales Tax

The Internal Revenue Service announced a plan for automatic income tax deduction to compensate for Texas' new 2 per cent sales tax. The plan involves a table whereby the taxpayer can deduct certain amounts according to his adjusted gross income.

Frank White, IRS regional commissioner, announced the plan. White said taxpayers who itemize their deductions on form 1040 will not have to keep their state sales tax records, providing their Texas sales tax deductions do not exceed those on the tax table.

"Texas taxpayers making state sales tax payments in excess of the amounts shown on the table may take deductions to which they are lawfully entitled," White said.

However, these taxpayers must keep sales tax records and be able to prove their deductions in the same way as they would be required to verify any other deductions on their tax return.

"Taxpayers using the standard 10 per cent deduction would not be entitled to deduct the Texas sales tax payment," White said.

The tax table gives average amounts spent by Texas residents for sales taxes and is arranged according to various adjusted gross income brackets.

Since the Texas sales tax law did not go into effect until September 1 of this year, the IRS tax table covers the period between September 1 and December 31, 1961. A new table will be published for 1962.

The table does not include such deductible items as the Texas state tax on gasoline, which is five cents a gallon, or the state tax on cigarettes, eight cents a pack, which was effective August 23, 1961.

White said that the time-saving Texas sales tax table will be available for general distribution at IRS district offices in Austin and Dallas by December 6.

The following table shows the adjusted gross income (form 1040, line 9, page one) at left and the sales tax deductible at right:

Under \$1,000	\$3	8,000-8,500	16
1,000-2,000	4	8,500-9,000	16
2,000-2,500	5	9,000-9,500	17
2,500-3,000	6	9,500-10,000	18
3,000-3,500	7	10,000-11,000	19
3,500-4,000	8	11,000-12,000	20
4,000-4,500	9	12,000-13,000	21
4,500-5,000	10	13,000-14,000	22
5,000-5,500	11	14,000-15,000	23
5,500-6,000	12	15,000-16,000	24
6,000-6,500	13	16,000-17,000	25
6,500-7,000	14	17,000-18,000	26
7,000-7,500	15	18,000-19,000	27
7,500-8,000	15	19,000-20,000	28

## Basin Rotary Activity Up

Twenty-six more rotaries, 255, were running in the Permian Basin Empire Friday than the previous week's 229.

This also topped this time last year's 232 active units in West Texas and Southeast New Mexico. Lea County, N. M., with 39 rotaries making hole, led basin drilling.

The county-by-county survey, with previous totals in parentheses, includes:

Andrews 23 (21), BORDEN 3 (3), Coke 3 (1), Concho 4 (3), Crane 19 (27), Crockett 7 (5), Crosby 1 (1), DAWSON 12 (12), Dickens 1 (0), Donna Anna 1 (1);

Ector 7 (7), Eddy 10 (11), Fisher 2 (3), Gaines 11 (11), GARZA 2 (2), GLASSCOCK 1 (0), Hockley 2 (2), HOWARD 3 (3), Irion 1 (0), Kent 3 (1);

Lea 39 (37), Loving 2 (1), Lubbock 1 (1), MARTIN 5 (3), Midland 6 (6), Menard 0 (1), MITCHELL 1 (2), Lynn 2 (2), Nolan 3 (2), Pecos 18 (11);

Reagan 1 (0), Reeves 7 (6), Roosevelt 3 (3), Runnels 2 (3), Scurry 5 (4), Schleicher 2 (3), Stonewall 4 (4), Terrell 5 (5), Terry 1 (1), Tom Green 2 (2);

Upton 10 (3), Ward 5 (5), Winkler 10 (6), Yoakum 5 (4). TOTALS 255 (229).

## Sul Ross Plans Norm Cash Day

"Norman Cash Day" will be celebrated with all the vigor of the Old West at Sul Ross State College, Alpine, on November 11, with a special student assembly, a barbecue, and a football game between the Sul Ross Lobos and the Texas A&I Javelinas.

Cash won the 1961 American League Baseball batting crown with a .361 average for the season which has just closed. With 41 homers and 193 hits to his credit, he eclipsed the all-time record for left-handed hitters for the Detroit Tigers. Acquired from the Cleveland Indians just before the 1960 season started, Cash quickly became one of the most exciting batters in the Tiger lineup. The stocky Texan played football and baseball at Sul Ross from 1953 through his graduation in 1956.

The climax of "Norman Cash Day" in Alpine will be reached when he is awarded the Baseball Hall of Fame plaque by the National Association of Intercollegiate Athletics, which will be presented by A. O. Duer, of Kansas City, secretary of the national intercollegiate association. Word of this signal honor has been received by President Bryan Wildenthal and baseball coach Ray Van Cleef, and arrangements have been made to have the award given during the half-time period at the football game. Alpine citizens plan to present Cash with a horse "so he can ride his Texas fences during the off-season as he rests from his successful season of poling hits over fences."

The Alpine Chamber of Commerce is assisting Sul Ross in sponsoring this event.

Mrs. G. A. Bridges has been a patient in a Big Spring hospital.

## Butcher Rites Held Sunday In Odessa

Funeral services for Wayne Ruben Butcher, 25, of Odessa and formerly of Stanton, were held at 4 p.m. Sunday at the Crestview Church of Christ in Odessa.

Butcher, who had resided in Stanton about 14 years, died at 7 a.m. Saturday in an Odessa hospital. He had been ill for over a year.

He was born January 23, 1936 in Big Spring, and moved to Stanton with his family in 1940. He graduated from Stanton High School in 1954, and was married to Shirley Nutter of Odessa in June, 1955 in Hobbs, N. M.

The couple resided in Hobbs two years, and also resided in Fort Worth. They moved to Odessa in 1960 from Fort Worth.

Burial was in an Odessa cemetery.

Survivors include the widow; a son, Billy; a daughter, Kimberly Ann; his mother, Mrs. Travis Roberson of Stanton; a brother, Jimmy Butcher of Stanton and a sister, Connie Butcher of Stanton.

pallbearers were Bill Graves and J. C. Graves, both of Fort Worth; Virgie Polson of Crane, Wayne Petree of Midland, Robert Lomax and Billy Parum, both of Odessa.

A number of Stanton residents attended.

Members of the 1954 graduating class of Stanton High School attended the services as a body.

## Post Office Helps Count Livestock

Rural mail carriers from the Stanton Post Office will leave some livestock survey cards along their routes beginning November 16.

"Information reported on these cards is used to set the yearly inventory of livestock and poultry on Texas farms," Postmaster Leta B. Eidson explained.

Rural carriers distribute the cards at random in boxes along their routes.

"This means that not every box will get a card," Mrs. Eidson said. "For this reason, it's important for everyone who gets a card to return it filled out so that USDA can get a true sample of the State's livestock holdings."

Carriers assisting with the survey are: Mrs. Oma H. Johnson, Route 1, D. H. Rogers, Star Route.

Facts and figures secured in this survey are the basis for the Texas and National pig crop report and inventories of livestock and poultry on farms as of the first of the year. Stockmen and many others use this information in making business decisions.

Survey results will be widely distributed through Texas Crop and Livestock Reporting Service releases, newspapers, farm magazines, radio, and television.

"This annual survey has been a joint undertaking of the Post Office and the Agriculture Departments since 1924," concluded Mrs. Eidson.

## Lemon Paces Flower Grove

Dan Lemon scored three touchdowns and passed for three more to lead the Flower Grove Dragons to a 66-26 District 3-B win over Merton Saturday night.

Lemon hit pay dirt on runs of 68, 37 and 29 yards, bringing his total points to 216 for the season.

Dave Wilson scored three of Merton's touchdowns with B. Davis plunging over on a pair of extra-point conversions.

Both teams went into the game with unmarred records in district play. The win cinched a tie for the district crown for the Dragons, who meet Christoval next week.

Mrs. C. B. Jones and her sister, Mrs. Tilman Carter of Lubbock, visited during the weekend in Wichita Falls and in Denton with their mother, Mrs. W. E. Loveless.

Virgil Miller, who is a student at Texas A&M College, visited during the weekend with his parents, Mr. and Mrs. Clyde Miller and Clinton.

## MATTRESSES

# FARM REVIEW and FORECAST

The Plant Disease Short Course, which is designed to meet the needs of agricultural chemical company representatives and others, will be held November 20-21 in Texas A&M's Memorial Student Center. In making the announcement, Harlin Smith, extension plant pathologist, said one of the features of the Short Course will be a special exhibit of plant diseases.

More emphasis will be placed on results of recent plant disease research than formerly, but a large part of the course will still be devoted to the identification of diseases in the field, said Smith.

The identification and control of vegetable and cotton disease will be thoroughly discussed. Other sessions will cover diseases of peanuts, guar, sesame, oats, wheat, rice, shade trees, shrubs, flowers and lawns. Nematodes and their control will also receive greater emphasis than in the past. Smith said there will also be discussions on collecting, packaging and shipping plant disease specimens, and on quarantine regulations and their use in controlling diseases.

The Texas A&M Department of Plant Sciences, headed by Dr. D. W. Rosenberg, coordinates the sponsorship of the Short Course.

A new and improved procedure utilizing a volatile chemical, propionic anhydride, to repel bees from combs while harvesting marketable honey has been developed. Scientists of the U. S. Department of Agriculture working in cooperation with staff members of the Arizona and Wisconsin Agricultural Experiment Stations are responsible.

The procedure employs an absorbent pad, impregnated with propionic anhydride and placed in a special fume chamber. The chamber is then fitted over the super and

air is forced by bellows into the fume chamber, driving the bees into other supers or into the brood chamber below.

When the chemical is used, bees become gentle and easy to work. They are repelled from sealed honey supers in one to two minutes, in shade or sunlight. There is no residue problem and no change in the honey flavor or odor can be detected.

The scientists said the new procedure is more efficient than methods used by beekeepers for over 30 years and that future research may make its use applicable for apiary inspections. When combs were left on the hive after the removal of the fume chamber, bees returned to cover the combs within minutes and no indication of any detrimental effect upon the colony was noted.

The scientists said the new method should result in economic savings to beekeepers and may help promote needed expansion within the industry to provide increased numbers of honeybees for pollinating agricultural crops.

Agricultural researchers have developed a milk purification process they hope they will never have to use. This process would be used to remove the strontium 90 that would contaminate milk following a nuclear attack. The process was worked out jointly by the Agricultural Research Service, Atomic Energy Commission and U. S. Public Health Service. It is now being tested on a pilot-plant basis at USDA's Beltsville Research Center, reports A. M. Meekma, extension dairy husbandman.

The pilot plant studies are based on laboratory studies, which showed the ion-exchange resins are effective in removing radioactive strontium from milk containing an increased amount of acid. In these basic studies, scientists charged a resin with calcium, sodium, potassium and magnesium — the major metals in milk.

Milk which had been experimentally contaminated with radioactive strontium was passed through columns containing this resin. Free strontium moved from the milk and displaced the ionized metals on the resin. This ion exchange occurs because the resin attracts strontium more strongly than it attracts other metals, explains Meekma.

Because only about 60 percent of strontium in milk occurs in free form, citric acid was added to the milk to ionize the rest of the radioactive element. This enabled the resin to attract and remove 98 percent of the strontium from the milk. After the strontium is removed, the milk is treated with dilute potassium hydroxide to neutralize the acid, then pasteurized and homogenized.

These treatments do not noticeably alter flavor. Pure milk run through the experimental pilot plant to standardize the procedure proved as palatable as commercial market milk.

These studies are slated to continue until a process is developed that can be operated continuously and economically in milk plants, the specialist concludes.

Unsettled weather ruled over the state the past week and delayed harvesting but brought needed moisture, reports director John Hutchinson of the Texas Agricultural Extension Service.

The moisture was welcomed by Panhandle wheat producers and by farmers and ranchmen in South Central and South Texas counties where the rains were spotted. The overall situation was good, said Hutchinson, and the harvest rate continued above that of last year.

Up to half of the Panhandle grain sorghum has been harvested in some counties. Cattle and range conditions are good. Cotton picking is beginning.

Rain and fog moved into the South Plains and stopped all harvesting. Cotton stripping was starting and reports indicate bumper yields of cotton and sorghums.

Wheat made good growth in most Rolling Plains (Vernon) counties and grazing of early planted fields was increasing. Machine harvesting of cotton increased.

In North Central Texas, the cotton harvest neared completion and stalk destruction and the planting of small grains continued. Some early grain was being grazed. Livestock, pastures and ranges were in good condition.

Cotton, corn and sorghum harvests are about complete in Northeast Texas. Oats are coming up, some are still being planted, while some early fields are large enough to graze. Pastures are average.

The cotton and sorghum harvests are on in far West Texas with good yields. Grains are providing grazing and livestock conditions are good. Most lambs and calves have been marketed; some land is being plowed and the pecan harvest has started with yields spotted.

Moisture is adequate in all Central West Texas. Gins ran at capacity. Grains are making good growth. Some early fields are being grazed. Pecan yields range from poor to good with prices considerably below last year. Lambing and calving has started. Livestock and pastures were in good to excellent condition.

Moisture is adequate in Central Texas. The cotton harvest is about over and yields had been poor to good depending upon insect control and cultural methods. The peanut harvest is near the peak and yields have been good. Grains are furnishing some grazing; grasses are mature but winter feeds and cool season grasses have started growth.

LEGAL NOTICE

THE STATE OF TEXAS

To: Charles Edward Shippy, Defendant. Greeting:

YOU ARE HEREBY COMMANDED to appear before the Honorable District Court, 10th Judicial District of Martin County, Texas, at the Courthouse thereof in Stanton, Texas, by filing a written answer at or before 10 o'clock A. M. of the first Monday next after the expiration of forty-two days from the date of issuance of this citation, same being the 20th day of November, 1961, to Plaintiff's Petition filed in said court, on the 28th day of September, 1961, in this cause, numbered 2330 on the docket of said court and styled Roxie D. Shippy, Plaintiff, vs. Charles Edward Shippy, Defendant.

A brief statement of the nature of this suit, is as follows, to-wit: for divorce, alleging as grounds therefor the cruelty of the defendant, and for custody of Judy Fay Shippy and John Charles Shippy, children of plaintiff and defendant, as is more fully shown by Plaintiff's Petition on file in this suit.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this writ shall promptly serve the same according to requirements of law, and the mandates hereof, and make due return as the law directs.

Issued and given under my hand and the seal of said court at Stanton, Texas, this 6th day of October, 1961.

(SEAL) DORIS STEPHENSON, Clerk, District Court, 10th Judicial District of Martin County, Texas.

## Harvest Was Delayed But Moisture Up

The scientists said the new method should result in economic savings to beekeepers and may help promote needed expansion within the industry to provide increased numbers of honeybees for pollinating agricultural crops.

## Texas Masons To Level Infirmary Cornerstone

Cornerstone leveling of the new infirmary building being erected in Fort Worth on the campus of Masonic Home and School of Texas is scheduled November 11, it has been announced by George R. M. Montgomery of Fort Worth. Past Texas Grand Master and president of the home's board of directors.

William G. Proctor of McKinney, Grand Master of the Masonic Grand Lodge of Texas, will level the cornerstone. Completion of the building is expected in late Spring of 1962. It will serve 196 students now at Masonic Home and School, whose rising enrollment has almost doubled in the last three or four years.

The new 40-bed infirmary will have completely modern clinical facilities. The ward wings are designed so movable walls can be adjusted to provide various numbers of isolation rooms with private bathrooms. There will be two medical treatment rooms, one consultation room and a medical records room.

Separate facilities are to be provided for a dental office and a dental laboratory. A patient diet kitchen is provided, and a play area for convalescent children is planned. Nurses will have separate quarters within the building, with three private rooms, their own sitting room and kitchen. A modern audio monitoring system will enable nurses to be in constant communication with patients.

The cornerstone leveling is planned for 2 p.m. Saturday, November 11. The traditional Masonic leveling program will be under the auspices of Fort Worth Lodge No. 148, A. F. and A. M., original donor of

## Denver City Champ Again

Mighty Denver City clinched another 2-AA title and its 24th straight victory Friday night with a 60-0 romp over Tahoka.

The Bulldogs were never in the game as Denver City jumped to a 21-point lead in the first quarter and then coasted in for the win as Stanton was defeating Slaton to give the Mustangs a clear conference championship.

Practically every Denver City back figured in the scoring, led by Pat Hubbard, Kim Freeman and Bobby Hummick with two TD's each. Hubbard passed for another, a 35-yard strike to George Curtis.

Scoring by quarters:

Denver City	21	7	13	19	60
Tahoka	0	0	0	0	0

## 60 Per Cent Texas Cotton Is Harvested

Sixty per cent of the 1961 Texas cotton crop is out of the fields, ahead of the 55 per cent mark at this time last year, the U. S. Department of Agriculture says.

The Southern High Plains crop is one-third harvested. In the Lubbock area, 20 per cent of the cotton is picked and 85 per cent of the bolls open.

El Paso Valley crops are about half harvested with farmers busy trying to keep up with the opening bolls.

## Turkeys Are Plentiful Food This Season

Turkey makes a wonderful Fall dish, and to make things even better, turkey prices have been low for the past few weeks. F. Z. Beans, extension poultry marketing specialist, says this low price is due to an extra large supply, and does not in any way reflect on the quality of birds offered for sale.

All sizes of birds are available, and they can be either roasted, smoked or barbecued. If a large bird is preferred, the homemaker can have the butcher saw it into halves or even quarters, depending on the family's needs.

A quarter of a turkey can be used in making many different, tasty dishes. Turkey spaghetti is a wonderful dish to serve to family and friends. For those who like more highly seasoned dishes, try turkey chow mein or turkey creole. Then there's always the old standby of turkey salad sandwiches.

The specialist points out that turkey is not only a convenient item for serving large groups, it also makes the food dollar go further. Turkey also lends itself to making many combination dishes, and it is one of the highest protein foods available today.

The next time you have a crowd in for a football weekend, or just for a short visit, try serving them turkey, says Beans. They will like it, and it will save you time and trouble when mealtime approaches.

## PERSONALS

Mr. and Mrs. Ted Gross and children of Big Spring, visited recently with Mr. and Mrs. L. C. Stovall.

Visitors with Mrs. Eula Eubanks have been Mr. and Mrs. J. C. Newland, Barbara, Karen, David and Diane of Monahans.

Approximately 860,000 disabled workers, their wives, and their children are now receiving monthly social security payments, H. P. Thomas, district manager of the Odessa social security office, stated today.

Many other disabled workers and their families, however, are not receiving payments because an application has not been filed with the social security office by the disabled person or by someone on his behalf.

Thomas pointed out that one possible reason for disabled persons not filing for cash payments is a lack of understanding of the social security law.

Before November 1960, a disabled worker and his family could not receive monthly benefits unless the worker was 50 years of age or older. Thomas hastened to add that the law was changed last year and that this requirement for payments was removed from the law. Disabled workers under 50 years of age and their families have been receiving disability benefits since November 1960, under the new law.

Thomas also said that applica-

tion for benefits can only go back as far as 12 months from the month of filing. He urged all disabled workers to contact the social security office right away and file before November 30, 1961, especially those who have been disabled for more than one year, to avoid the loss of payments which may be due. The office in Odessa is located at 1428 East 8th Street, telephone FEederal 2-9423.

## SOIL CONSERVATION DISTRICT NEWS

## OUR SOIL ★ OUR STRENGTH

MARTIN-HOWARD-MIDLAND SOIL CONSERVATION DISTRICT  
 Jack Buchanan, Bob Cox, Bernard Houston, Larry Shaw, J. D. Crawford.

Patrick Henry once said, "He is the greatest patriot who stops the most gullies." We should consider this very carefully coming from such a patriot as Patrick Henry. You may do your part by joining a conservation district and apply a conservation plan to your farm.

A democracy operates on the principle that the people who will benefit of a public program will benefit or suffer from the effectiveness of a public program will determine the policy decisions and determine objectives. Soil Conservation District law provides that locally elected landowners are responsible for its administration. Just as patrons rather than teachers form school district policies, landowners rather than the public employees formulate the policies of Soil Conservation Districts.

The farmers and ranchers who own the land are the people who actually use the necessary measures to protect and improve it. They accept and use the Soil Conservation District program and plan of work because they develop it themselves.

The Soil Conservation District is the medium through which the states have chosen to fulfill their obligation toward conserving soil and water resources. States can and do provide funds, personnel and materials to Soil Conservation Districts to encourage and make possible aggressive informational and technical programs.

The Martin-Howard Soil Conservation District is serving farmers and ranchers in Martin County assisted by the Soil Conservation Service.

## Webb Air Base Will Use Supersonic Jet Trainers

The vanguard of 72 T-38 Talon supersonic jet trainers arrived at Webb Air Force Base in Big Spring Saturday.

The trainers will replace the subsonic T-33 in a new pilot training program to begin in February.

Webb is the first Air Force flying training base to receive the new aircraft, and an enormous task immediately will confront mechanics. Because of the radical departure in design and construction of the T-38, maintenance crews face at least three problems never encountered in the old T-bird.

They are the use of liquid oxygen for air supply, employment of an external low pressure air starting unit and the MD-3, and external power generator which starts the two-engine-driven generator systems.

Current plans involve the training of approximately 500 aircraft and engine mechanics.

Also increasing in tempo is the race to have 75 T-38 pilots trained and available for student classes to begin February 9. Ten Webb pilots already have completed the T-38 instructor's course at Randolph Air Force Base.

The new program is being put in operation because student pilots trained on the T-33 lacked the experience necessary for the safe transition to the higher speed F-100's. With the T-38, the student will have the benefit of those flying techniques peculiar to the aircraft he later will fly.

The two-place Mach 1.2 aircraft, the T-38 is powered by two General Electric J85 engines, equipped with after-burners. It has a 7.3 thrust to weight ratio, the capability of climbing at the rate of 30,000 feet per minute and a ceiling of 55,000 feet.

Lt. Col. Benjamin F. Yeargin Jr., commander of the 3561st Pilot Training Squadron and one of the 10 pilots completing the instructor's course on the T-38, said the new aircraft, although remarkably fast for a trainer, is not difficult to fly.

He also noted the two engines provide extra reliability and serve as an important safety feature, particularly when the instructor demonstrates an air start to his student.

## ADVANCED THRUST

**MORE WAGON ROOM . . . MORE WAGON ZOOM!**  
 Know why Buick's new Invicta Estate Wagon has so much more easy-living room? Advanced Thrust! It places the mighty Wildcat V-8 forward over the front wheels — makes the floor nearly flat! ### Stanton HD Club Met In McCoy Home

Stanton Home Demonstration Club members heard a program on "Table Decorations," when they met Wednesday, November 1 at the home of Mrs. Jim McCoy.

Mrs. Mildred Eiland, home demonstration agent, presented the program.

Roll call was answered with "One Rule of Etiquette I Frequently Break."

The next meeting will be November 15.

Refreshments were served to Mesdames W. T. Wells, N. L. Riggan, Stanley Reid, Les Durham, Lewis Carlie, Roy Linney, Jim McCoy; one guest, Mrs. Bill Rhodes, and Mrs. Eiland.

### Mrs. Tubb Hostess To Lakeview Club

Mrs. Horace Tubb was hostess to a meeting of the Lakeview Home Demonstration Club Thursday, November 2 in her home.

"Gift Wrapping" was the topic of the program given by Mrs. Tubb.

Plans were made for a Christmas party to be held December 8 at the home of Mrs. Bill Melvain.

Refreshments of Cokes and cookies were served to Mesdames Ray Russell, Claude Russell, Floyd Martin, Walter Hildreth, Horace Tubb, W. D. Bryant, and two guests, Mrs. Tom O'Brian and Mrs. Roy Price.

Mr. and Mrs. Norman Blocker and daughter of Ozona, visited during the weekend with his parents, Mr. and Mrs. Horace Blocker.

Mrs. Smiley Smith and children of Lubbock, visited during the weekend with Mr. and Mrs. T. D. Morgan.

### Local Woman Writes Story Of Gardening

By MARIE WILSON  
When I say that the Stanton Garden Club really appreciates the nice "free plug" Neal Estes gave in the paper urging the public to buy the fruit cakes the club is selling, I know I express the sentiments of each member. Every year he is one of the first to buy a cake. Thanks from all of us Neal. See you again next year, huh?

Most of us, I'm sure, at one time or another have wondered just what minerals in the soil produce certain parts of plant and flowers. Nitrogen in soil produces height in plants, phosphorus produces the fruit or flowers, and potassium is the regulator in the soil.

The soil in West Texas is alkaline, and organic matter should be added; this includes barnyard manure, peat moss, sawdust, compost and cotton seed burrs. Organic matter produces acid when it decays and neutralizes alkaline soil. Sulphur is also recommended as an acid producer. If the soil is too acid, add bone meal, wood ash or lime.

I learned this interesting fact and will pass it on to you. Our water is alkaline too, and the more water we add, the more alkaline we add to our soil. Constant watering dissolves the material in the sub-soil, and then through the upper movement of water and evaporation, these alkaline materials are carried to the surface and deposit a white encrustation on the top soil. Mulching will prevent this condition.

If the leaves on plants are turning yellow, apply sulphur and copperas mixture to the soil.

A few general directions for planting and care of plants:

Never allow roots to dry out before planting.

Dig holes large enough to accommodate roots without being cramped.

Place top soil around roots, as it is rich and contains oxygen.

Never use fertilizer when planting and lightly the first year.

After planting flowers and shrubs, fill the hole with top soil, then put the water hose in the bottom of the hole, as the water comes up the soil goes down gently working its way through and around the plant. This works on balled plants, as well as bare roots. When the water dries, place more soil and pack.

When planting make large water basins around each plant. Water everyday for five days; twice a week for four weeks, then once a week for the first year.

Is the ground isn't mulched, rake it when it begins to dry out, this conserves the moisture.

West Texas doesn't have many dewes, so spray the tops of evergreens every time you water the roots and remember that 90 per cent of all plants that die in West Texas, die for the lack of water.

### PERSONALS

Mr. and Mrs. James Glynn and children of Ozona, visited recently with his parents, Mr. and Mrs. Tom Glynn.

Mrs. Eddy Butler and Mrs. B. Herring returned home Thursday from a month's stay in Putnam.

### Miss Coolbaugh Married In Midland Oct. 21

Norma Jean Coolbaugh and Rudolph William McQuatters Jr. of Midland, were married in a single ring ceremony October 21 in Midland.

Rev. Travis LaDuke of Midland, officiated for the ceremony, which was held in the LaDuke home.

The bride is the daughter of Mr. and Mrs. Charley C. Coolbaugh of Stanton. She attended Midland High School.

Parents of the bridegroom are Mr. and Mrs. Rudolph W. McQuatters of Midland. He is a graduate of Midland High School.

For the ceremony, the bride wore a brocade satin dress with three quarter length sleeves. The bodice had a white fur collar. Her shoulder length veil was attached to a halo of fur matching the collar. She carried pink carnations on a white Bible.

Barbara Sherman, bridesmaid, wore a turquoise nylon chiffon over taffeta dress in street length. It was styled with a fitted bodice and neckline.

Charles Goodwin was the best man.

The reception was held in the home of the bridegroom's parents.

The couple is residing at 705 South Atlanta Street, Midland, after a wedding trip to Carlsbad, N. M.

# HUNTERS

## SCOUT SEASON'S HERE

It's the best hunting buddy a hunter can have.

The SCOUT by INTERNATIONAL will get you there and back in solid comfort. Weather-tight tops (there are four of them)—steel or soft vinyl cab or full-length Travel-Tops—keep you snug and dry. A high capacity heater/defroster warms you on the way to the blind.

Great as it is in the field, the SCOUT will also shine for you at a wide variety of workaday tasks—from delivering to servicing, family shopping to church socials.

Its four cylinder, 93 horsepower Comanche engine gives it the oomph for plowing snow, pulling a 3-gang mower or hauling a trailer. Optional all-wheel-drive gives it the added traction for heavy work or for going 'cross country, beyond the roads. A full assortment of accessories enables you to equip your SCOUT for your needs. See us today about your SCOUT.
