Variety

By NEAL ESTES

Our neighbors in Arkansas are scheduled to have an old-fashioned August 25 political election that could find former chief executive ORVAL E. FAUBUS opposing Gov. WINTHROP ROCKEFELLER. FAUBUS won the election for a sixth term on the Democratic ticket in 1964 over the wealthy ROCKEFELLER, but retired after that term in office. He is one of 13 candidates striving to capture a major party nomination to get another shot at the mansion.

The first jumbo jetliner was hijacked Sunday and managed to land safely in Havana with 400 aboard. The pilot got the grounded plane off Cuban soil after about thirty minutes and a personal visit with CASTRO. The big steel bird of the sky landed in Miami, Florida, for about three hours and proceeded to destination in San Juan, P. R. Just about the time the captured jet was winging its way toward Cuba after being skyjacked Hurricane Celia was headed for the southern coastline off the Gulf of Mexico after striking in parts of Cuba. One can imagine the anxiety of the passengers and crewmen on the giant jet as the airliner headed in the general direction of the third quick hurricane of the season. Hurricanes are named for women and the next one is due to start with the letter D, following Celia.

CHARLES WILLIAMSON, son of MR. and MRS. LAWTON WARE, this city, is in John Hopkins U. S. Hospital in Silver Springs, Maryland. The young soldier recently returned from duty with the Army in Vietnam. While serving there he received service connected injuries that will call for back surgery and extensive treatment for a number of months. MRS. WARE is at the bedside of her son.

MR. and MRS. PATTI STOVALL and children are real residents of Aransas Pass, Texas, one of the towns in the path of Hurricane Celia. PHIL was attending a coaches school in Houston, and his wife, MARGARET, and children were visiting in Austin, when Celia struck. They missed the big blow and it is fortunate that they did because Aransas Pass was one of the cities almost wiped out by the force of the hurricane. MARGARET is the daughter of MR. and MRS. TROY PIERCE of this county.

MRS. FLORENE KING, a teacher in our local school, and resident of Midland, advised the paper this week that she will be among the teachers who are attending the State In-Service Education Conference of Homemaking Teachers being held in Dallas this week. MRS. KING is a most efficient instructor and never misses an opportunity to advance her career.

I chanced to meet JOHNNY McMEANS on the street the other day and he told me he planned to enroll at Angelo State College. RUSTY HICKS and ALLEN GREGSTON, two other good football players and fine lads, will also enter school there in the fall.

Voice: "A good rain will do more to cool things on the farms and in the city than anything else we can think about."

City To Lease Recharge Facilities

NEGOTIATIONS UNDERWAY — The City of Stanton launched negotiations with the U. S. Geological Survey to operate the recharge facilities on the reservoir located in south Stanton. The reservoir, for many years identified by Stantonites as Mexican Lake, shown above, was expanded surface wise and dug to a depth of 20 feet under an urban renewal grant in the amount of \$450,-

000 in 1967. The funds were provided by the government after application for the project was approved as a flood control measure. Four injection wells were installed to put the surface water underground and filter purifier equipment was installed. The U. S. Geological Survey team will supervise the management of these facilities for a period of five years at no expense to the city if negotiations go through as planned.

Geological Survey Team To Supervise

In action at a special City Council meeting, the City of Stanton entered into a tentative agreement with the U. S. Geological Survey to operate the recharge facilities located on the reservoir in south Stanton.

The Geological Survey is currently operating a program in the South Plains area in regard to artificial recharge from the playa lakes common in the area. The Geological Survey has needed an area with filtration facilities available to test the Ogallala formation for water absorbency. Tests in other areas had been hampered by sediment in the recharge water.

Bufs Slate Practice Sessions

Stanton High School football coaches, Bill Young, Don Goodrum, and Tommy Gregory are ready and so are the Buffaloes for the 1970 football season to begin.

Workouts are scheduled to begin August 17, and shoes will be issued at the high school gym August 12.

There is approximately 70 Buffaloes turning out for the 1970 season, with 17 lettermen returning. Some of these and their positions are: Robby Dickenson, guard; Steve Fryar, tackle; Larry Adams, end; Ricky Mims, guard; Roy Kelly, halfback; Mike Adams, linebacker; Glen Ray, quarterback; and Franky Barnhill, linebacker.

The Buffaloes are looking for a better season, and should have one. The spirit of the team is high, with each player getting ready for the first game of the season with Tahoka. The game will be played on the home field.

Band Activities To Start This Coming Week

Band activities for the school year get underway in the coming week for instrumental players of the Stanton schools.

An orientation meeting is scheduled Monday, August 10, at 8:30 a.m. for new incoming members who will be in the Marching Band this fall. This group will continue through the week. High school drummers will meet at 11:00 a.m. on the same date.

Full scale rehearsals for all members of the high school band begin on Monday, August 17, at 7:30 p.m., and be continued each week day until regular curriculum periods are started.

Beginner band hopefuls will meet at the high school band hall at 9:30 a.m. on Thursday, August 20, where all phases of the program will be discussed in preparation for the starting classes.

Cadet band members of the sixth and seventh grades will not have any pre-school rehearsals this year.

Under terms of the proposed contract, the Geological Survey will maintain and operate the pumps and filter system without cost to the city for an initial period of five years.

Representing the Geological Survey at the meeting were A. G. Winslow, Associate Chief U. S. Geological Survey, Austin; Richmond F. Brown, Project Chief, Lubbock, and Warren W. Wood, Research Hydrologist, Lubbock. Also in attendance was Gunnar Brune, Assistant to the Director, Ground Water Division, Texas Water Development Board, Austin. The Texas Water Development Board was instrumental in arranging for the city to participate in the endeavor with the Geological Survey.

The city was represented by Mayor J. C. Epley, and other council members.

The final agreement is to be drafted by the Solicitor for the Interior Department, and submitted to the city for ratification.

The June 29, 1967 issue of The Stanton Reporter, used a banner headline to herald the awarding of a \$450,000 contract for the purpose of excavating what is known as Mexican Lake to a depth of 20 feet to impound any flood waters and to hold them for injection into underground formations.

The lake basin was also supposed to be converted into a park area which could be used after the waters had been placed in underground storage.

The project approved by the then city council was considered the first phase of Stanton's urban renewal program for the south side of the city. The \$450,000 project was a part of an ultimate project to total \$1,745,204.

The lake was to be cut to a depth of 20 feet with a 600 by 600 base.

Located adjacent to the basin a filtration - purification system was installed plus four injection wells around the lake. The purification was said to be necessary to prevent plugging of the underground formations. If and when flood water drained into the bowl, the wells were supposed to go into action and once the water was pumped out, the bottom of the basin would become a park center.

The half million dollar project has not been operated by the city, and what to do with the facility posed the problem which councilmen decided at the special commission meeting held last week when lease negotiations were launched with the U. S. Geological Survey people.

Basin Drilling Activity Continues At Brisk Pace

Texaco Inc. will attempt to open Fusselman production in the Hi Lonesome South multizone pool of Midland County with the re-entry and plugging back to 12,925 feet, at No. 1-B-1 C. Scharbauer, depleted Ellenburger opener in the field, nine miles southwest of Midland.

Drilled to 12,963 feet, it was completed by Texaco in 1966, to flow 500 barrels of 42-gravity oil, with gas-oil ratio of 987-1, through a 1/2-inch choke and Ellenburger shot holes at 12,941-12,945.

It spots 1,987 feet from south and 1,980 feet from east lines of section 35, block 40, T-2-S, T&P survey, 3 1/2 miles southwest of the marginal Fusselman opener and lone well from that horizon in the Hi Lonesome field.

The Hi Lonesome strike, Texaco's No. 6-R Scharbauer was completed in 1966 from the Fusselman, to flow 55 barrels of 49.7-gravity oil daily, with gas-oil ratio of 2,040-1, through a 15-64-inch choke and perforations at 12,510-12,520 feet. It was dually completed to open Mississippian production in the field.

McGarth & Smith, Inc., operating from Midland, plans No. 1 Lockhart, an 8,000-foot probe in northwest Howard 5/8 miles east of a Fusselman oil discovery.

Drillsite, 1,320 feet from south and east lines of section 38, block 32, T-3-N, T-P survey, is four miles north of Luther.

Sun Oil Co. plans No. 10-B L. C. Denman as a location in the Iatan-East Howard field of Howard County. Drillsite is 990 feet from south and 1,040 feet from west lines of section 16, block 30, seven miles east of Coahoma. Scheduled depth is 3,050 feet.

Roanoke Oil & Gas Corp. of Dallas, plans No. 1 Ina Anne Rathiff, as a 3,250-foot searther in Glasscock, 14 miles south of Big Spring.

Location is 1,980 feet from south and 660 feet from east lines of section 186, block 29, W&NW survey, 1 3/4 mile south of the Howard - Glasscock

field. Western States Producing Co. of Midland, completed No. 2 Reese as a 1/2-mile east extension to the Sale Ranch area.

On 24-hour potential test, it flowed 225 barrels of 36-gravity oil and 35 barrels of water, with gas-oil ratio measuring 920-1, through a 24-64-inch choke and shot holes at 8,112-8,977 feet, which had been treated with 3,000 gallons of acid and 80,000 gallons and 180,000 pounds of fracture material.

Western States plans three outposts in the Sale Ranch part of the Martin County portion of the Spraberry Trend Area.

All three projects, slated to 9,100 feet, are nine miles northwest of Stanton, and are in block 37, T-1-N, T&P survey.

No. 1 Collins, 3/4 mile southeast of production, is 1,320 feet from north and east lines of section 38.

No. 1 Cross, one mile east outpost, is 1,320 feet from south and 1,170 feet from west lines of section 36.

And No. 2 Cross, one mile northeast, is 1,320 feet from north and west lines of section 36.

Adobe Oil Co., completed two projects in the Martin County part of the Spraberry Trend Area, some 12 miles northwest of Stanton.

No. 1 Hastings a 1/2-mile north extension, was finished to pump 263 barrels of 39.9-gravity oil and 20 barrels of water per day, through perforations at 8,062-8,953 feet, which had been fractured with 80,000 pounds of sand. Gas-oil ratio was 826-1. It was drilled to 9,125 feet.

Location is 1,320 feet from south and east lines of section 30, block 37, T-2-N, T&P survey.

Cox plans No. 1 J. N. Woody, one mile west of production on the north side of the extension area, 1,326 feet from north and 1,370 feet from east lines of section 38, block 37, T-2-N, T&P survey. It is slated to 9,300 feet.

J. M. Huber Corp. No. 1 Saemedan - Glasscock, a wildcat in Martin County is drilling below 9,665 feet in shale. Drillsite is 1,980 feet from south and east lines of section 44, block 37, T-1-N, T&P survey nine miles west of Stanton.

Texas American Oil Corp. No. 3 Faye Holt Flynt, outpost to the opener and lone well in the Lacaff (Dean) reservoir or Martin County, location is 1,980 feet from north and 660 feet from east lines of league 319, Garza CSL survey, 25 miles northwest of Stanton, was

240,000 pounds. Gravity of the oil was 39.8 degrees and gas-oil ratio measured 873-1. It spots 1,320 feet from north and east lines of section 2, block 37, T-1-N, T&P survey.

Adobe Oil staked sites for two offsets to the area, about 12 miles northwest of Stanton.

Both projects, in block 37, T-1-N, T&P survey, area slated to 9,200 feet.

No. 2 Williams, 1/2 mile south offset, is 1,320 feet from south and west lines of section 46.

No. 1 Yater, 1/2-mile west offset, is 1,320 feet from south and east lines of section 34.

George Walker Attends 23rd Convention

George Walker, director of the local bands, recently returned from the 23rd annual meeting of the Texas Bandmasters' Association held at the Convention Center in San Antonio.

Newly published musical works were read by the USAF Air Academy Band, Colorado Springs, Colorado; Fourth U. S. Army Band, Ft. Sam Houston, Texas; Lackland Air Force Band, Lackland AF Base, Texas, and USAF Airmen of Note Dance Band, Washington, D. C.

Marching band clinicians included Dr. Wm. Foster, who has received international recognition in developing the Florida A&M University Marching Band, and Dean Killion, director of bands at Texas Tech University. Killion will serve as president of TBA in the coming year.

Guest conductors of the sessions included Frank Erickson, W. Francis McBeth, and G. T. Gilligan of Kermit, who was named Texas Bandmaster of the Year 1970.

Special clinics were provided by Philip Farkas, University of Indiana; Alan Raph, professional performer on bass trombone; Joe Morello, the nation's top percussionist, and Rich Matteson, jazz exponent of the tuba.

Walker is a former officer of TBA, having served three terms as secretary-treasurer of the nation's largest organization devoted to the exclusive interests of band directors.

Specialist McKenzie Wins Commendation

U. S. Army, Vietnam (AHT-NC) July 10 — Army Specialist Five Calvin D. McKenzie, son of Mr. and Mrs. Calvin E. McKenzie, Stanton, recently received his second award of the Army Commendation Medal while serving with the 4th Infantry Division near An

Footballers Scheduled To Meet August 12

A meeting of the Stanton High School football team will be held at 6 p.m., Wednesday, August 12. All boys who plan to play football this fall must be there.

Shoes will be issued at the end of the meeting.

The High School coaching staff would like to meet with the parents of all high school football players on Thursday, August 13, at 7:30 p.m. at the high school cafeteria. The coaches would like for the mothers and fathers both to attend the meeting. Also any interested fan is welcome to sit in on the meeting.

Formal football practice will begin Monday, August 17, at 6:00 a.m. Two workouts a day will be held the first week.

Practice scrimmages will be held with Wink in Wink, and Roscoe in Stanton.

1970 Schedule Of Local Schools Is Released

The 1970 football schedule for the Stanton High School, and Junior High Buffaloes has been released, and a copy appears elsewhere in this issue of the paper.

Parents and interested fans of the football team are urged to clip the schedule and place it somewhere in their home so they will have the opposing team, date, and time handy for reference.

The district games will start on October 16, with the Buffaloes opposing their rival, the Coahoma Bulldogs. Other district teams include Crane on October 23; McCamey, on October 30; Ozona, on November 6, and the final district game of the season will be with Big Lake, November 13.

This year, let's all get behind the Buffaloes and show them that they have 100 percent of our support.

Farm & Ranch Review

Biennial Extension Conference—All Agricultural Extension Service employees in Texas will be on the Texas A&M University campus, Aug. 10-14 as participants in the organization's biennial conference. Director John E. Hutchison said the conference program has been developed under the theme: "Shaping Our Environment in the 1970's." Special afternoon sessions, involving all workers, will then delve into the many aspects of physical, economic, and social environment.

Larsen, extension horticulturist, suggests giving seedless watermelons a try. He says they are generally sweeter and have a longer shelflife than do seeded melons. And, in addition, he adds, there is no problem with seeds.

Pricklypear A Range Problem — Some 20 million acres of Texas rangelands are now suffering from infestations of pricklypear; but, says G. O. Hoffman, extension range brush and weed control specialist, they are a problem on another 55 million acres. Severe problems, he notes, often exist where mechanical brush control methods have been used. Best control measures have been obtained by bruising the plants and following with a herbicide. Hoffman says local county agents can supply detailed information on recommended controls.

More Cattle On Feed In Texas — The number of cattle being fed for slaughter market in Texas in July was 13 percent above the number of a year ago. The Texas Crop and Livestock Reporting Service reported the July 1 total at 1,353,000 head. In the 22 major beef feeding states, the increase was only 2 percent. Cattle placed on feed in Texas from April to July increased 10 percent over a year earlier. Cattle marketed for the same period were up by 23 percent.

Hurricane History In Texas Recalled

The story of Celia is updating a history of hurricane heartbreak and destruction on Texas' Gulf Coast that began in 1818 when Pirate Jean Lafitte's stronghold on Galveston Island was ravaged.

Salt water flowed four feet deep in the village. Of six vessels and two barges in the harbor, only two dismasted hulks remained. Lafitte moved into one of them so his own house could become a hospital.

Details are sketchy on the 19th century hurricanes in Texas as outlined in a federal climatology report issued in Austin.

In 1844, all houses at the mouth of the Rio Grande were destroyed. Seventy persons died.

In 1854, four lives were lost in Matagorda and nearly all the buildings in the town

were washed away. Ships in the Gulf went down carrying their entire crews to their deaths.

In 1864, a hurricane raked the entire Texas coastline, wiping out Bagdad and Clarksville near the Rio Grande's mouth. The two Clarksvilles now on the Texas map are in the northeast.

In 1875, three-fourths of Indianola in Calhoun County was swept away by flooding. The death toll was 176.

Two hurricanes hit Texas in 1880, both near the Rio Grande's mouth. Brownsville was nearly destroyed.

Indianola was hit again in 1886, a fatal blow. Every house was destroyed or damaged and the town was never rebuilt.

With the start of the 20th Century came the first really

CHAIN SAW TIPS TO THE HOMEOWNER

Now is a good time to attend to all those chores around the house that you've been putting off the past few months. And one of the more popular time-savers for homeowners is the modern chain saw. At one time the highly sophisticated tool of the professional timber cutter, the chain saw has joined the ranks of the household hand tool arsenal which the homeowner relies upon to solve traditional backyard chores.

Like low hanging branches, for example. With today's lightweight portable chain saw (8½ lbs. less bar and chain), trimming troublesome limbs is a snap.

Homelite, the chain saw people, recommend an easy two-step procedure. First make the initial cut on the underside of

the limb—approximately one-third of the way through. Then complete the cut from topside. This permits limb to fall without catching saw blade in cutting area.

For the best possible performance Homelite recommends that saw chains be kept sharp. You'll cut faster and more effectively if you sharpen your saw chain cutters every three hours or so. Generally, you can tell if your chain is dull by the size of the chips. If they're large, the chain is sharp. If not, then it's time to sharpen.

Homelite also cautions users to keep chain saw clean, particularly after an afternoon of cutting wood for the fireplace or building a fence or picnic table for the patio area. With minimum care your chain saw will give maximum satisfaction.

Forty Years Ago

Stanton received its first bale of the 1930 crop Monday. The bale was raised and brought to town by Curtis Hancock, on the George Tom farm, southeast of Stanton. It sold for 10.5 cents per pound.

In the run-off primary election held Saturday the following county officials won over their opponents: Milt Yater, sheriff; W. T. Epley, tax assessor; W. M. Henson, commissioner precinct 1; F. C. Collins, commissioner, precinct 2; A. B. Brown, commissioner precinct 3.

For governor: M. A. Ferguson, over R. S. Sterling.

Mr. and Mrs. W. C. Glazener and son, Stanton, arrived in Stanton Wednesday afternoon. They spent the vacation period in South Texas. Mr. Glazener will have charge of the science department in the Stanton school again this year.

The emergency landing field located on the I. G. Peters place two miles north of Stanton on the Lamesa highway, has been accepted and will be lighted in the near future. On the Stanton field there will be boundary lights and a beacon, which will keep these night flying ships on the direct route.

We are here to help you with your stories and ads, and help you anyway we can.

Between 6,000 and 8,000 lives were stuffed out by the Great Galveston Storm of 1900. It came aground south of Galveston and struck inland through College Station, Dallas, and Gainesville.

Galveston Island was inundated by storm tides 20 feet above sea level. Not a single structure escaped damage. The south, east and west parts of Galveston were washed clean — not a house left standing.

A CALENDAR OF Fact And Opinion

"Talent in itself is not enough. Talent in the service of truth or beauty or justice is one thing; talent in the service of greed or tyranny is quite another. In other words, neither intellects nor talent alone can be the key to a position of leadership in our society. The additional requirements is a commitment to the highest values of the society."—John W. Gardner.

F & O

The Construction News announced that, "If we could eliminate all causes of high accidents but one, we would

Tech Agronomist Estimates Value Feedlot Manure

A Texas Tech University agronomist points out in a recent study the availability of a great tonnage of feedlot manure to area farmers, its nutrient content and extremely practical expense in its use as a fertilizer.

The Department of Agronomy at Tech now has available a new study on the "Value and Problems of Feedlot Manure as a Source of Plant Nutrients," prepared by Dr. William F. Bennett, agronomy professor.

According to Dr. Bennett's research, the analysis of the manure and results of demonstrations indicate that it has potential values as a source of plant nutrients.

"The nutrient content of manure," he said, "together with the results obtained from its use indicate that it should have a value of around \$1.50 to \$3.50 per ton when applied on the farmer's field. "General guidelines established in the past have indicated that approximately \$3 to \$3.50 per ton could be paid for its application."

Dr. Bennett also states that, "the manure will usually have a beneficial effect on the organic matter content, water infiltration rate, water holding capacity, ease of tillage, and similar characteristics."

"Organic matter," the agronomist said, "also increases the cation exchange capacity of the soil. Manure also contains other elements necessary for plant growth. These include potassium, calcium, magnesium, and sulfur, as well as the micronutrients."

Dr. Bennett pointed out in his study that there were also potential problems related to disposal of large quantities of feedlot manure. "One problem is the fact that the waste contains salts," he said. "If the quantity of salt or sodium is sufficiently high," he said, "there could be some detrimental effects on plant growth."

Manure also has a slight acidifying effect on the soil which could have a beneficial effect on the alkaline soils of West Texas, the professor said.

This new study is made still be faced with 50 percent of the problem—drinking and driving."

"Big government" and not "big business" or "big labor," is seen by the public as posing the greatest threat to the nation in the future, according to (a) Gallup opinion poll.

The president of the American Gas Association stated, "The natural gas industry is confident it can meet customer requirements far into the 21st century." Noting that estimated proved reserves of natural gas declined last year for the first time, the gas industry spokesman said, "We will not run out of natural gas if we make the essential effort to translate undiscovered natural gas resources into proved reserves inventory. . . . The challenge is one of finding them with the drill bit."

F & O

Mr. John W. Barriger, president of the Missouri, Kansas-Texas Railway, commented: "It is a paradox that there should be super-highways and super-markets and super-everything-else that is a part of modern America's burgeoning economic life, while there are not super-railroads. And yet, economical railroad transportation is the foundation on which "super-everything" in present-day American economic life is based."

Ponds Honored With Going-Away Party Recently

Rev. T. L. Pond of the Courtney Baptist Church, was honored with a surprise going-away party. The party was also in honor of the Pond's 41st wedding anniversary.

Rev. Pond has been pastor of the Courtney Baptist Church for the past five years, and also a member of the Mission Board for the same number of years. Mr. and Mrs. Pond will be leaving soon for their new home in Gleen Cove, Texas, near Coleman.

The serving table at the going-away and wedding anniversary celebration was decorated in red and white with an arrangement of red roses and a miniature wedding cake.

The more than forty guests and members of the church were served wedding cake, punch, and home made ice cream.

Guests were present from California, Arizona, Midland, Greenwood, Sweetwater, and Stanton. The members of the church presented the Pond's with a patio set as a going away gift, and in appreciation for the fine things the couple have done for their community.

LEGAL NOTICE

THE STATE OF TEXAS) COUNTY OF MARTIN)

In compliance with the provisions of the Texas Election Code, Art. 13.29, I hereby publish the names of the candidates that have been certified to me by the Chairman of the County Democratic Executive Committee.

You are hereby notified that the following names will appear on the official ballot to be used in the General Election held in Martin County, Texas, on the 3rd day of November A. D., 1970, as the nominees of the respective party and for the respective offices hereinafter named:

- Carroll Yater — County Judge and Ex-Officio County School Supt.
- Doris Stephenson — County and District Clerk.
- Elmo Reed — County Treasurer.
- M. D. Coggin — Commissioner of Prec. No. 2.
- G. E. Cave — Commissioner of Prec. No. 4.
- Martin L. Gibson — Justice of the Peace of Prec. No. 1.

Given under my hand and seal of office this 3rd day of August A. D., 1970. (SEAL) DORIS STEPHENSON, County Clerk, Martin County, Texas.

Approximately 4.2 million persons have migrated to India from East Pakistan since 1947, according to an official report.

County Agents Column

By BILLY REAGOR
County Agent

With dry weather reducing summer pasture growth in many areas of Texas, including Martin County, winter pastures will be more important than ever, reminds County Agent Billy H. Reagor.

Winter pastures don't "just happen." They are well planned in advance. Winter grazing comes from forage growth during the fall; consequently, winter pastures should produce abundant growth during early fall months, if they are to be profitable, he notes.

Growth begins with good-quality seed. And seed should be planted early in the fall to utilize fall rains and favorable temperatures for growth. These conditions are favorable for insects, such as fall armyworm; however, this pest can be easily and economically controlled with safe pesticides. The expense of an insecticide application is well justified when one considers additional growth obtained from early planting.

High fertilization is an essential for profitable forage production. Because of the high protein content of winter pastures, abundant supplies of nitrogen are necessary. At least 60 to 80 pounds of nitrogen is needed to obtain adequate fall growth. A soil test to determine exact amounts of nitrogen, phosphorus, potash, and lime, and other nutrients needed for optimum

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH MARTIN-HOWARD-MIDLAND SOIL CONSERVATION DISTRICT

People often ask "what good is terracing?" A certain field in Hubbell, Nebraska, may have the answer. The interesting thing about the certain field is the nine inch depth of its topsoil.

Other fields in the area with the same slope and the same soil type have lost so much soil that what remains can no longer be identified truly as topsoil.

The Conklin field was terraced in 1933 in a demonstration that attracted 400 landowners. Francis Wiedel of the Soil Conservation Service and a conservation contractor moved into the field to begin a retracing job.

The old terrace system had 12 foot channels and eight foot side slopes. A steel-wheeled tractor and a pull grader were used. Wiedel observed that the soil, with its better tilt and moisture holding capacity, worked more easily. Fertility was intact, proof enough of the value of terracing as a conservation measure to protect the soil resource, he reported.

Terracing has changed a great deal since this field was terraced 37 years ago. Today, practically all terraces are being built parallel and offer more toward soil and water conservation. Parallel terraces are built from the back side only, and does not remove the top soil from the land. They are built parallel to each other and this eliminates most of the point rows.

These terraces are engineered to fit modern six and eight row equipment. Parallel terraces are designed to spread the water evenly over the land and hold it instead of channeling it out of the field. This type of terracing is a combination of terracing and land leveling. The Soil Conservation Service through the Great Plains Conservation Program, can cost - share 70 per cent of the cost of parallel terraces. This conservation practice would be a great asset on any farm in Martin County.

Cindy Pickett Honored With Bridal Shower

Miss Cindy Pickett, bride-elect of Richard B. Quay, was honored with a bridal shower Saturday, July 25, in the home of Mrs. James Jones.

The table was covered with a white cut work tablecloth with a centerpiece of blue and yellow flowers.

Debbie Hazlewood presided at the bride's register. Others in the house party were Mary Fern Powell, Frances Deavenport, Pam Rhoades, and Angelle Arausa of Abilene.

Hostesses for the event were: Mrs. Jess Angel, Mrs. B. E. Coggin, Mrs. Bob Cox, Mrs. Bill Decker, Mrs. James Biggs, Mrs. Ross Hay, Mrs. Cliff Hazlewood, Mrs. Prentiss Hightower, Mrs. Corene Manning, Mrs. R. S. Lewis, Mrs. Claude Straub, and Mrs. James Jones.

Out of town guests attending were the bride-elect's sister and niece, Mrs. Don Williams and Robin Gayle of Roscoe, and the prospective groom's mother, Mrs. Newell B. Quay, of Abilene.

The couple plans to be married August 22 at the First United Methodist Church, Stanton, at 8:00 in the evening.

Robertson Reunion Held

The annual reunion of the Robertson family was held the first week end in August in the home of Mrs. G. W. Robertson. All nine children were present for the reunion.

Saturday was the highlight of the reunion with a barbecue dinner. Those present were: Mr. and Mrs. G. H. Robertson, Houston; Nita Bailey, Houston; Mr. and Mrs. J. H. Robertson, Houston; Mr. and Mrs. A. T. Wingard, Shiro; Mr. and Mrs. John King, Plainview; Mrs. James Hale, Jamecy; Joey, Debbie, Floydada; Mr. and Mrs. Dewitt Robertson, Brownfield; Mr. and Mrs. Eugene Robertson, Tracy, Terry, and Robin, Odessa;

Also: Ollie Robertson, Marble Falls; Jimmy Robertson, Tarzan; Brenda Hopper, Lakewood Community; Ray Robertson and David, San Antonio; Mrs. Rena Clary, Bryan; Mr. and Mrs. Eldon Welch, Rosalind, Leslie, Faye Ann, and Kara, Tarzan; Mr. and Mrs. Sammy Yates, Jody, Tana, and Donald, Nichols, Jo Lynn, Ben, and Tammie, Florey; Mrs. G. W. Robertson, and Ruth, Tarzan; Mr. and Mrs. Joe Glaze, Tarzan; Mrs. Mattie Welch, Tarzan; Mr. and Mrs. Lewis Brown, Toby, Arburn and Romana Gay, Midland.

Draft Calls To Dip Below 10,000 Mark

Secretary of Defense Melvin R. Laird said draft calls for the rest of 1970 will average below 10,000 a month, a return to pre-Vietnam levels.

Laird made this forecast in a speech for about 550 students working as summer interns with the government.

"In the remaining months of this year," Laird said, "I

anticipate that draft calls will be compared with the calls made in 1969."

In the past, he has predicted that total draft calls this year will fall between 150,000 and 170,000 young men compared with the 290,000 drafted in 1969.

Aids said Laird still sticks to that forecast. Through August, draft calls this year have totaled 124,500.

In his talk, Laird assured the students that "We are doing all we can to plan and implement a program that will reduce draft calls to zero and enable us to establish an

all volunteer force."

But he cautioned that, in order to make the shift, Congress must provide a major increase in the defense budget.

Laird offered no forecast as to when this might happen. However, the trend is toward smaller defense budgets and stronger pressure from Congress to cut defense spending.

Lower draft calls are tied to the U. S. withdrawal from South Vietnam and a concurrent reduction of total U. S. military manpower.

The secretary stressed once again that by next spring U. S. forces will be down to 284,000 troops or fewer - about half the U. S. garrison in Vietnam when the Nixon administration took power in January, 1969.

By NEAL ESTES

MR. and MRS. HUGH McCANN are now living in Friona, Texas. She is the former **FRANCES ESTRADA** and was formerly associated with the Midland Memorial Hospital. Her sister, **LUPE**, is a nurse at the Midland hospital at the present time. The **ESTRADA** girls are members of a family known in Martin County as ambitious and qualified to do any job they undertake. **FRANCES** mailed in a check for the **McCANN** subscription for another year.

Preliminary 1970 air pollution rankings list Stuebville, Ohio, as the dirtiest and New York City the most fouled with corrosive oxides. The other top nine cities in the dirtiest category are all located in the north and eastern parts of the country. The ten cities with the worst composite sulphur dioxide levels are in the northeast also. Not a single southern or southwestern city is included in the two groups. At last, the population below the Mason-Dixon line have something to be thankful for because the newscasters who love to degrade this section of the nation can't accuse the southland as being dirty.

Muleshoe, Texas, has been one of the most interesting small cities in the state. The town of 5,225 population was knocked off the postal map the other day and the residents started a protest offensive that caused the city to get its postmark back. The West Texas town had its postmark removed several weeks ago when the Post Office Department implemented what a spokesman called a "mail service improvement activity." Under that system, letters mailed in Muleshoe were sacked and shipped to the new mail processing facility in Lubbock for sorting by a big, expensive machine. All the letters ended up with a Lubbock postmark. Then the angry citizenship went into action. They declared that a letter to Dallas from Muleshoe, under the new system, took six days for delivery and besides the Muleshoe postmark was gone. Now the postmark is back where it belonged all the time and these days when a letter is mailed one knows that Muleshoe is still around and growing.

SHS football end **LARRY ADAMS** provided information for the article appearing elsewhere in this issue of the paper concerning the 17 returning lettermen at the school for the approaching 1970 season. **LARRY** is optimistic about the Bison's chances of having a winning team. He also advised us that about 70 candidates would appear for opening practice on August 17. The Buffaloes open the season on the home field on the evening of September 11 with Tahoka being the opponent. The Buff supporters are invited to turn out for the lid blaster and the community is expected to back the Buffaloes all the way again this year.

A very gifted grandmother is graduating from Hardin-Simmons University, Abilene, on August 14 at 8 p.m. She is **LADIE FRED CAFFEY**, wife of the Baptist preacher, **RALPH**, mother of some very attractive and talented children and a youthful grandmother too. **LADIE FRED** was our former county librarian and while she served in that capacity her work was recognized throughout the state. She was one of the most dedicated persons the editor has ever known and wrote a column for the newspaper every week she called "Library Lines." Her messages were always inspiring and interesting. The staff here in the newspaper joins the editor in sending genuine congratulations to **LADIE FRED** for her accomplishment in winning a degree, and to **RALPH** for his good judgment in selecting this worthy lady for his wife.

The editor receives several newspapers weekly from West Texas towns. I intend to write each publisher I know a letter as soon as possible to determine the tax rate, water rate, garbage collection rate, rate of pay paid city employees, and find out how Stanton compares with other places. Our water rates were upped a flat dollar on each customer this week. I do not question the need for extra revenue at city hall. The salaries around there are way above the average paid retail establishment employees in our town. I am, however, concerned about the ever rising expenses the average man is called on to absorb and pay without hope or thought of asking his boss for a raise in salary. The people have had it.

I hesitate to think what the taxpaying citizens of Stanton would do to a bond issue on election day if one was called for any purpose with the cost of living rising in the land as it presently is doing. No information concerning the causes, if yet determined, about the collapse of the breezeway at Stanton High School has been forthcoming. It is hoped that any insurance the school might have will amply cover the damage. Some parents are of the opinion that an inspection of the auditorium for structural soundness following the collapse of the attached breezeway would be in line at this time for the safety of students in mind.

Holder New Superintendent At Bishop High

Harrell L. Holder has recently assumed the duties of Superintendent of Schools for the Bishop Consolidated School District. He is the son of Mr. and Mrs. Truett H. Holder of 405 W. 1st in Stanton.

Bishop is located in Nueces County near Corpus Christi. The school district operates one of the Premier AAA school systems in the entire state of Texas.

Holder moves to Bishop from San Antonio, where he was superintendent of the Southside District for the past three years. His major accomplishments while at Southside were in leading the district in a building program, and the addition of seven new vocational programs in the secondary schools.

A 1959 graduate of Stanton High School, Holder, is married to the former Martha Sue McGuire. They have two children, Robert 11, and Barton six. He is also a former Stanton High School faculty member, having taught mathematics and chemistry during the 1957-8 school year.

FORD TORINO NOW \$200* LESS

New lower-priced Torino

New special included in West Texas Ford Dealer Economy Clearance

Our big, beautiful family-size Torino was priced \$200* less even before our clearance sale began. Now you'll save still more at year-end prices... on big Fords, Mustangs, even Mavericks, too!

*Based on comparison with Ford's former lowest suggested retail price for a 2-door Torino.
