By NEAL ESTES

HERB SORLEY, member of the Morton Cutpers, softball state ASA champions will be traveling with the elite diamond kings to San Antonio the last of the month to participate in the regional play-offs to be held in the Alamo City. Winner of the regional title will get to go to Clearwater, Florida, where the national champions will be determined. PEGGYE, wife of HERB, and the SORLEY sons, DAREN and DEREK, will go to San Antonio the weekend of the regionals. These softball wives are kindred sisters to the real professional baseball players. Most of the ASA players are married and the wives are the best fans. Players from all teams knew each other well and their wives have sort of society among themselves. When a softball tournament of any importance is scheduled anywhere in this part of the state the players and their wives enjoy the sessions like members of a large family does when a reunion is scheduled. Since PEGGYE started working in the newspaper office and HERB started slugging out home runs and winning softball trophies, such as the all-state second baseman's award — the editor has also latched on to the game as a fan. I understand one star hurler in the league is 43 years of age. The editor is past the playing age but nevertheless enthusiastic about the game. We are in the same class age wise, with the late SENATOR EVERETT MCKINLEY DIRKSEN, who once said about his presidential ambitions, replied: "The ship has already left the harbor."

Measuring moisture continues to bypass Abilene County. A generous rain fell in the Abilene area the past Friday, and Midland is reported to have received a quick shower on the same day but raindrops did not descend on Stanton. Our prediction of rain on August 16, which appeared in the column a month ago went by the red beard too. I should have known better than to depend on the sources I used at that time to predict moisture on the 16th. However, I have found the information contained in the Chattanooga Medicine Company's Almanac more accurate in the past than the weather reports from my favorite weather forecaster over in Midland, who, undoubtedly does his very best to pass along the data he picks up somewhere to pass to his viewers. Hey, could it be possible my man in Midland has been using a Tennessee almanac in recent months to determine the weather predictions for the area?

C. L. ROGERS, Stanton Chief of Police, has advised the editor that it is a violation of the law for anyone to carry intoxicating beverages onto school premises. He says the department he heads is going to crack down heavily on violators — especially fans who might be tempted to carry along a brown sack when they attend home football games this season. A word of advice to the wise is sufficient. (Continued on page 6)

School Bells To Beckon Students

Chief Rogers Seeks Traffic Cooperation

Police Chief C. L. Rogers has requested the newspaper to seek the cooperation of all car owners by handling their automobile in a cautious manner in the school zones of the city.

Rogers stated that traffic moving in areas around the schools should move in a safe and orderly manner and that violators would be ticketed and brought into municipal court if they failed to obey the driving regulations.

He requested the automobile drivers to be extremely watchful on the eve of the opening of school, and urged that a special watch be kept for the real small children.

Rogers said that bicycle riders going to and from school should have their wheels properly identified with reflectors on both front and rear. He cautioned riders to use the right side of the street in traffic, and obey the other stopping just like moving cars. He also stated that bike riders should use hand signals for proposed turns. He stated that bicycles must not be parked on sidewalks or could sidewalks be used for bicycle riding purposes.

The speed limit through school zones has been fixed at 20 miles per hour. The city speed limit is 30 miles per hour.

Ornan Britton, Retired Farmer Died Aug. 16

Ornan W. (Shorty) Britton, 61, a retired farmer, died Sunday in a Big Spring hospital. He was born April 15, 1909, in Loraine.

Services were held at 3 p.m. Tuesday in the Belvue Church of Christ with burial at 5 p.m. in Loraine Cemetery. Roy Phemister, Clyde, officiated with Wayne Zuck, Belvue Church of Christ minister, assisting.

Survivors include one sister, Mrs. H. P. Morrison, Stanton; five brothers, Edward Britton, Oceanside, Calif., Ernest Britton, Columbus, Ga., Souval Britton, Stanton; Cyrus Britton, San Angelo, and Johnny Britton, Chino, Calif.

Layout In Stanton Awaits Tournament

The Martin County County Club Partnership Golf tournament has been set next Saturday and Sunday. Winners will be determined in lowball over 36 holes, with 18 holes to be played each day. Shotgun starts will be at 9 a.m. and 2 p.m. each day, and the first 18 holes will be used and each team will play 18 holes to qualify teams for flights, as well as counting in the total score. Ten teams will compete in each flight, with the field

HONORED — Roy Seale, left, of Shiner, president of the Vocational Agriculture Teachers Association of Texas, is shown presenting a plaque to Nolan Parker, vocational agriculture teacher, Stanton High School. Parker was elected to serve on the board of directors of the association. The association has 1,200 members with offices located in Austin, Texas.

Austin Engineer Calls SHS Auditorium Safe

The members of the Board of Trustees of the Stanton Independent School District have been assured by a consulting engineer from Austin, Texas, that the auditorium and bandhall of the local complex is structurally safe.

Recently, the breezeway connecting the senior high school building with the auditorium collapsed and some concern was manifest by school authorities and patrons,

concerning the safety of the auditorium and bandhall.

Phil M. Ferguson, a consulting engineer with a string of qualifications and recommendations to his credit, has expressed every confidence in the structural soundness of the auditorium. Without hesitation he said in a part of his written report to the board members who had employed his services to make the building safe. (Continued on page 6)

LARGE CUCUMBER — Kristi Turner is shown above holding a cucumber weighing slightly more than three pounds. Her cousin, Gwyn Nrihl of Skellytown is holding the family dog. The cucumber was grown in the Turner garden adjacent to their Texaco station in this city.

limited to the first 52 teams who pay the \$35 entry fee. Merchandise prizes to be awarded in each flight will be a set of three woods for first place, golf bag for second, two dozen balls for third, and one dozen balls for fourth place. Personal golf carts will be allowed with no charge. Entry deadline is 6 p.m. Friday, August 21, and entries may be placed by calling 756-3362 (area code 915), or after 8 p.m. by dialing 756-3355. No side entertainment is

Buffalo Practice Underway

Fifty eager Stanton Buffalo footballers greeted Coach Bill Young for the opening workout Monday morning at Buffalo Stadium.

Young was impressed with the enthusiasm displayed by the squad. The Monday morning workout was devoted to the equipment issue and wind-sprints. The Buffs donned pads and started contact work with the Monday afternoon workout. Young was pleased with blocking techniques displayed by some of the returning linemen.

Returning lettermen are: Seniors — Larry Adams, Roy Kelly, Robbie Dickinson, Ricky Mims, George Dean, Mike Cook, Steve Fryar, and Mark Hursh. Junior lettermen are: Glen Ray, Jackie Swanson, Frankie Barnhill, Steve Douglas, Mike Adams, and Bubba Standefer.

Two a day workouts will continue through August 21. With the start of school the squad will have daily practice at 3:00 p.m. On August 28 the Buffs will have a scrimmage at Wink, with Roseoe coming to Stanton for a practice session on September 4.

Young's staff is composed of: Don Goodrum, a McMurry graduate, who came with Young from Van Horn; Tommy Gregory, who played his college football at East Central Oklahoma; Jackie Burns, a West Texas State footballer who moved to Stanton from Hart; Richard Granado, a Sul Ross graduate, who joins the Junior High staff, and Jerry Bethel, returning Junior High coach.

Carol Arledge Training For Andrews Job

Carol Arledge, extension assistant, is in Stanton working with Mrs. Mildred Eiland before she begins her assignment as Andrews County Home Demonstration Agent on September 1, 1970.

Mrs. Arledge received her Bachelor of Science Degree in Home Economics Education from Abilene Christian College, and her Master of Science Degree in Home Economics from Texas Tech University. Her experience includes teaching high school home economics for three years in Jayton, Texas, and teaching junior high homemaking one year in West Islip, New York.

The past year she and her husband, Robert, have lived in Andrews where he is a high school biology teacher.

Starting Band To Attend An Orientation Meet

Beginning band students are to attend an orientation meeting in the high school band hall on August 20, at 9:30 a.m.

During this session the individual instruments will be discussed and suitability to the pupil made for the coming year. (Continued on page 6)

City Announces New Garbage Pick-Up Plan

The City of Stanton will enforce the contents of an ordinance previously passed and published in the official Martin County newspaper.

The ordinance calls for strict enforcement of rules concerning the sanitation of the city.

Conditions have caused the authorities to seek the total cooperation of the patrons on the garbage pickup list. The situation has reached the point where better trash containers are necessary to insure the good health of the community.

Burning of trash contributes to air pollution and this practice can no longer be tolerated in Stanton. Foul odors are known to pollute the air because of improper garbage facilities.

The responsibility of furnishing individual garbage containers rests solely with the property owners in Stanton.

Effective August 31, the sanitation department will no longer pick up garbage or remove trash from premises unless the conditions set out in a recent ordinance are met.

Receipts must not hold more than 30 gallons. A five-gallon container with lid for garbage such as table scraps should also be provided. No trimmed shrubbery, leaves, or tree limbs, will be picked up unless they have been reduced in size of 4 feet or shorter.

Doyle Land, public works director for Stanton, stated that the new measures of garbage collection were being taken solely to protect the health of the citizens and to insure against encouraging breeding places for flies, and other insects.

Faculty Spots Said Complete In 3 Systems

School bells will be ringing for Martin County youngsters when Stanton, Grady, and Flower Grove school districts start their 1970-71 school terms on Monday, August 24.

Superintendents Russell McMeans, J. W. Massengale, and L. R. Duan, announced facilities for their respective school have been completed and everything is ready for the new school year to start.

Former Local Citizens Hurt In Accident

Mr. and Mrs. W. P. (Bill) Pinkston were injured in a two-car accident near Stephenville the past week.

The Pinkstons now reside in Comanche, Texas. They formerly lived in Martin County, and have many relatives and friends in the area. He formerly served as a peace officer in Stanton.

The Pinkstons were enroute to visit in their daughter's home in Hurst, Texas, when the accident occurred.

The Pinkstons are recuperating following the accident at the home of Mr. and Mrs. C. M. Whiteley, 735 Buena Vista, Hurst. Mrs. Whiteley is their daughter. The Pinkston home address is Route 1, Box 90C, Comanche.

Relatives in Stanton advised the paper that the couple suffered facial lacerations, bruises, and abrasions, but no internal injuries in the accident. (Continued on page 6)

Canyon Discovery Completed In North Martin County

A Canyon discovery has been completed in extreme north Martin County, 3/4 mile southeast of the opener and lone producer in the Flower Grove (Fusselman) field of south central Dawson, 18 miles south of Lamesa. It is Allen K. Trobaugh, of Midland, No. 1 Loretta.

On 24-hour potential test, it flowed 480 barrels of oil, no water, through a 16-64-inch choke and Canyon perforations at 10,126-10,206 feet, which had been acidized with 2,000 gallons and 50 ball sealers. Gravity of the oil was 45.3 degrees and gas-oil ratio measured 750-1.

Drilled to 11,260 feet, and plugged back to 10,390 feet, it has 5 1/2-inch casing seated at 10,470 feet.

Slated as an offset to the Fusselman discovery, it recovered only salty, sulphur water on a drillstem test in that zone.

It spots 1,980 feet from north and west lines of section 43, block 35, T-4-N, T&P survey, and on some maps appears to be in Dawson County.

The Fusselman opener, Lone Star Producing Co., Dallas No. 1 R. C. Koger, was finished in February, 1968, to flow 353 barrels of 36.7-gravity oil through a 12-64-inch choke and perforations at 11,610-11,613 feet.

Monitor Petroleum Corp. of Midland filed application to

drill at 12,500-foot prospect, 22 miles northwest of Stanton, as No. 1 Jones-Holton.

It spots 4,625 feet from south and 5,550 feet from east lines of league 240, Wheeler CSL survey, and 1/2-mile southeast of a depleted Strawn discovery. Ground elevation is 2,849 feet.

Young Oil Corp., of Fort Worth, accounted for N 1 Lester, a 9,100-foot probe 18 miles north of Stanton and four miles north and slightly east of the Sale Ranch part of the Spraberry Trend Area.

Drillsite is 1,320 feet from south and west lines of section 23, block 36, T-3-N, T&P survey, abtsartc 807, and four miles southeast of a Spraberry-Dean discovery.

Texas American Oil Corp. of Midland, completed No. 3 Faye Holt Flynt as a fourth producer and 1/2-mile southwest extension to the Lacaft (Dean) field of northwest Martin County, 25 miles northwest of Stanton.

On 24-hour potential, it made 266 barrels of 30.3-gravity oil, 22 barrels of water, with gas-oil measuring 580-1. Potential test was based on an actual 12-hour swabbing gauge of 133 barrels of oil and 11 barrels of water, through perforations at 9,188 - 9,351 feet, which had been acidized with 1,500 gallons and 32 ball sealers, and fractured with 40,000 gallons and 120,000 pounds.

Drilled to 9,400 feet, where 4 1/2-inch casing was cemented (Continued on page 6)

Stanton will begin the first school semester with approximately 900 students. The system will have two more teachers than last year, making a total of 51.

In-service training for the teachers will be concluded this week. All teachers have been required to attend these pre-school sessions.

Classes will begin in all schools on Monday, August 24, with the first scholastic holiday on the agenda for the first Monday in September, Labor Day.

Faculty members for Grady, Flower Grove, and Stanton have all been announced through the columns of the official county paper. The requirements for students each grade in each school likewise been announced.

School calendars, cover the events pertaining to student life, have been published within the past two weeks. Several interesting pre-se articles have been published and some informative articles concerning scholastic life appears in this issue of the newspaper. (Continued on page 6)

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH MARTIN-HOWARD-MIDLAND SOIL CONSERVATION DISTRICT

The Annual Field Day on the Texas A&M University Agricultural Research Station at Pecos is scheduled to begin at 9:00 a.m. on Tuesday, August 18. The program is designed to be of interest to everyone interested in agriculture. The station is located about 13 miles southwest of Pecos on FM 869. The Field Day has been set about two to three weeks early this year to allow visitors to see some crops before harvest.

A number of tests are in progress concerning cotton. Cotton variety tests and breeding blocks will be shown. Another test is underway to measure interactions between cotton varieties, irrigation, and fertilizers treatments. Variations of row spacing for cotton with minimum tillage will be shown, as well as precision planting of cotton.

A forage sorghum variety test will be shown. First harvest yield figures will be available from this one. A grain sorghum test includes maturity type, planting date, and row spacing variable. This test is part of the search for satisfactory yields of a summer grain crop, and to find an escape, if possible, from mite damage.

Small grain yields will be available from a planting of spring barley following cotton. The barley has been followed by a planting of two varieties of grain sorghum with three methods of residue treatment and two rates of fertilizer. This is a preliminary investigation of the cotton-spring barley-grain sorghum rotation which can be completed in two years. This is currently termed and intensified crop rotation since three crops are harvested from the same

land in two years.

A salinity investigation block will be seen as well as a test involving feed lot waste disposal. A treatment in this test involved the application of 900 tons of manure to one acre.

Those interested in permanent pasture will be interested in the grass nursery. Currently ten lines of buffel grass hybrids are being tested for cold hardiness and adaptation to West Texas. Also, in this nursery is a planting of the new TAM Wintergreen hardinggrass. An alfalfa variety and irrigation study is also included in the field tour.

A discussion of soils research in the Pecos area will include a tour and demonstration in the new soil lab facility at the station. Entomologists will discuss insect control system which place less reliance on pesticides. It seems there will be something of interest to almost all agricultural producers and everyone is cordially invited.

A firebreak may mean the difference between profit and loss reports the Soil Conservation Service. The rangeland is extremely dry and is a fire hazard. The early rains promoted weed growth that sapped the moisture from the native grasses. The rains thus far have benefited the native grass very little. Some of the native grasses have not come out this year due to the early weeds. A fire break can protect fence lines and keep a range fire isolated in a given area. The fire break is nothing more than a strip of bare land or fire retarding vegetation. A fire break can be made by plowing a strip of

Red Skelton's Pledge

At the mammoth "Honor America Day" celebration in Washington, co-chaired by Billy Graham and Bob Hope, entertainer Red Skelton "wowed" the crowd of more than 350,000 with his famous recitation of the Pledge of Allegiance to the flag. This is what he said:

"I remember this one teacher. To me he was the greatest. He had such wisdom. We were all reciting the Pledge of Allegiance, and he walked over... Mr. Lasswell was his name—and he said:

"I've been listening to you boys and girls recite the Pledge of Allegiance and it seems to me it is becoming monotonous to you. May I recite it to you, and explain the meaning of each word?"

"—me, an individual, a committee of one.
Pledge — dedicate all my worldly goods to give willingly, without self-pity.
Allegiance — my love and my devotion.
To the Flag — our standard, Old Glory, a symbol of freedom. Wherever she waves there is respect because your loyalty has given her dignity that shouts freedom is everybody's job.
Of the United — that means that we have all come together.
States — individual, free communities that have united into 48 great States, united in pride and dignity and a common purpose, and that's love for country.
And justice — the principle of dealing fairly with others, of equality under law.
For all — which means it's as much your country as it is mine."

"Since I was a small boy," concluded Red Skelton, "two states have been added to our country, two stars have been added to our flag, and two words have been added to the Pledge of Allegiance, 'under God'."

"Wouldn't it be a pity if someone said, 'That's a prayer,' and that would be eliminated from schools, too?"

Seeds From The Sower

By Michael A. Guido, Metter, Georgia

A millionaire was asked "How much money does a man need to be happy?" "Just a little more," he answered. Almost everything promises happiness to a man at a distance. But on coming nearer to it, it falls short of the expectation.

But that is not the case with the Lord. The poet said in Psalm 84:5, "Happy is the man whose strength is in Thee: in whose heart are the ways of them."

There is the happiness because of the holdings. Christianity is more than a profession. It is a possession. A Christian is one who is possessed by Christ and who possesses Christ. To possess Him who is all-powerful is to have all the strength one needs to live the Christian life. No one can live if without Him, and defeat brings despair.

There is the happiness because of the highways. One translation renders the verse, "In whose heart are the highways to Zion." Some hearts have dead-end streets, not highways. The word of the Lord comes to them, but not through them. No one is happy who is a hindrance.

Want happiness? Accept the Christ who loves you into your heart, and let Him make of your heart a highway for His love to pass on to other hearts.

This is a good time for ranchers to check their rangeland and adjust their stocking rate to avoid overgrazing. Some rangeland is severely overgrazed due to overstocking and dry weather. A range that is overgrazed will not make efficient growth the following growing season.

Over-used plants cannot produce a deep root system that is necessary for large top growth. Overgrazed plants are also more susceptible to freeze during the winter months. A plant is considered properly used when it is grazed no closer than 50 per cent of the current season growth.

The damages caused by silt pollution in the United States are in excess of \$350.00 million a year — a tremendous figure even in these days of soaring costs.

Among those attending were: Mr. and Mrs. Ronnie Brown, Midland; Donna and David Mashburn of Stanton, Bonnie and Lana McKenzie of Stanton, the honoree, grandparents, parents, Angie Brown of Midland, and various other nieces and nephews of the honoree.

Rex Armstrong, son of Mr. and Mrs. Herb Armstrong, was honored on his first birthday recently in the home of his parents. Twenty guests were present, including his grandparents, Mr. and Mrs. Leroy McNew, of Midland, and Mr. and Mrs. C. E. McKenzie, Stanton.

The guests were given party favors, and were served birthday cake, punch, and ice cream. Colors of orange and green were carried out in the decorations.

Among those attending were: Mr. and Mrs. Ronnie Brown, Midland; Donna and David Mashburn of Stanton, Bonnie and Lana McKenzie of Stanton, the honoree, grandparents, parents, Angie Brown of Midland, and various other nieces and nephews of the honoree.

ANNIVERSARY CELEBRATION

To achieve forty years in any business community is a record to be proud of and happy about. We are fully aware of the fact that our long tenure in the business circle of Martin County would not have been possible but for the fine support and generous patronage given our store through 40 years of good, average, and sometimes bad times. Our record for good merchandise, fair dealing, and competitive prices is well known. We are so grateful for past patronage and for the customer friendships we have made through the years that we are passing along some splendid anniversary premiums for our patrons during our birthday sale. Thank you all a thousand times.

Robert J. Fewin Joins Texas Forest Service

Robert J. Fewin of Bryan, Texas, will join the Texas Forest Service September 1, as a silviculturist in the newly organized Forest Environment Department, according to Director Paul R. Kramer.

Fewin is a native of West Texas, and is well qualified to head up an expansion of our services to private landowners outside the timber-growing region of East Texas. He will work with individuals and organizations who are interested in improving the immediate environment around homesteads and agricultural property by planting trees for windbreaks, Kramer said. After an initial period of training, Fewin will be headquartered in the Texas Panhandle area.

Fewin recently received the master of science degree in forest soils from Texas A&M University. His undergraduate training in range management was obtained at TAMU in 1968.

Mr. and Mrs. Smitty Smith and daughter visited in the home of her parents, Mr. and Mrs. Glenn Gates, over the week-end. Mrs. Smith and daughter spent last week with her parents.

LEGAL NOTICE

NOTICE AFFORDING OPPORTUNITY FOR PUBLIC HEARING CORRIDOR (LOCATION) AND DESIGN (COMBINED HEARING)

The Texas Highway Department is planning the construction of Farm to Market Road 1212 from the north end of existing FM 1212 north 8 miles to FM 87 (SH 176). The proposed project is located in Martin County.

The proposed project provides for the improvements of an existing two-lane County road on approximately 100 feet of right of way to provide for current design requirements established by the Texas Highway Department. The location of the project follows the existing route of a paved County road.

Maps and other drawings showing the proposed location and geometric design and any other information about the proposed project are on file and available for inspection and copying at the Resident Engineer's Office at 2701 Elizabeth, Midland, Texas. Also, the drawings showing the proposed geometric design have been placed on file with Martin County.

Information about the State's Relocation Assistance program, and benefits and services for displacees and the relocation assistance office as well as information about the tentative schedules for acquisition of right of way and construction can be obtained at the District Office, P. O. Box 474, on East U. S. Highway 80, Odessa, Texas 79760.

Any interested citizen may request that a public hearing be held covering the social, economic and environmental effects of the proposed location and design for this highway project by delivering a written request to the Resident Engineer's office on or before September 10, 1970.

In the event such a request is received, a public hearing will be scheduled and adequate notice will be publicized about the date and location of the hearing.

South Plains Girl Wins Rural Electric Title

Beki Burrous

Beki Burrous of Ralls, is the new Miss Texas Rural Electrification. She was selected last week from among six finalists in the contest staged annually in connection with the annual meeting of Texas Electric Cooperatives. Miss Burrous succeeds another South Plains miss, Sheila Poulson of Lorenzo, who crowned Miss Burrous to climax the contest in the Astroworld Hotel in Houston Thursday evening (August 13).

Miss Burrous is the daughter

of Mr. and Mrs. Tom Oats. She's 16 years old, the youngest of the six finalists. She's 5'-6" tall, weighs 120 pounds, has brown hair and hazel eyes. She will be a junior in Ralls High School this fall, where she's a member of the Student Council, Future Homemakers of America, and Future Teachers of America. She's a member of the Methodist Church. Her hobbies include art, cooking, swimming, and water skiing. Following graduation from high school, she plans to enter Texas Tech University, Lubbock, to study art.

Miss Burrous was sponsored

in the statewide contest by South Plains Electric Cooperative at Lubbock, which named her Miss SPEC earlier this year.

Runners-up in the contest were Joy Schnelle, a junior at Southwest Texas State University, San Marcos, first; and La Donna Gaye Green of Lorraine, a sophomore at Hardin-Simmons University, Abilene, second. Miss Schnelle represented Central Electric Cooperative, Fredericksburg; Miss Green, Lone Wolf Electric Cooperative, Colorado City.
