Mr. Neal Estes Editor

# Wallace Kelly Wins Chamber and elementary schools, so will they ring soon for the colleges and universities. Mas been selected to appear in the 1970 edition of Out-standing Young Women of

The first bale of cotton grown in Martin County this year was produced by John Wallace Kelly, outstanding farmer and stockman, and ginned Monday morning about 11 a.m.

Kelly thus became eligible to claim the winner's Chamber of Commerce sponsored premium purse given to the producer of the first bale of cotton each year.

6-THE STANTON REPORTER, THURSDAY, AUG. 27, 1970 Hunt - - -

The personal letter received by the editor from U. S. REP. GEORGE MAHON this week was informative and his remarks on pending form legislation recently inserted in the Congressional Record were equally gratifying. The cotton growers in Martin County will find the contents of his remarks elsewhere in this issue of the paper.

-LP.

Pormer President LYNDON JOHNSON sounded like a politician at his best when he spoke at a dinner for Lt. Gov. BEN BARNES the past week. LBJ predicted that BARNES would lead the nation someday. His prediction for a fellow Texan's future in politics makes one wonder why LYNDON didn't try for a second term in his own right. Perhaps his low rating on the political popularity poll list caused him to reluctantly refuse to run for re-election two years ago. Political careers are sometimes altered by personel events happening in life. Many astute students of political science feel that the Jote ADLAI STEVENSON's presidential chances were badly damaged when his wife instituted divorce action a few months before he was nominated by the Democratic Party for the first time. MRS. BEN BARNES won a divorce from BEN a few months back. Voter reaction remains to be recorded for BARNES in his role as a single man when his ballot total will be posted in the November election as a candidate for the place he now holds in state government.

City authorities have caused a notice to be published concerning the riding of motor bikes in the city limits. Scooter owners are not supposed to allow a passenger on the vehicle with them and operator's licenses are required. Complaints have already started pouring in at city hall concerning the bike rides. Authorities are said to be ready to start writing traffic tickets unless he bike owners start following rules of safety and caution.

Several new subscribers have signed up for the county paper. One of the new faculty members at SHS ordered a sub, then paid for two out-of-town subscriptions to relatives. News about the county schools occupies a position of priority in this publication. It is also a good time to invite the cooperation of all club reporters in seeing that their stories are turned in to the paper for publication.

The deadline for supplying 30-gallon garbage containers for the city pickup crew is September 1. For continued service property owners are now required to put their dry garbage in the 30-gallon cans while using a five-gallon container with lid for wet garbage.
