WHERE THE ACTION IS
If you want to go where the action is these days—let me suggest the baseball parks. Stanton not only has action on the Jaycee League but also in the area of the little league. Whether you enjoy being a spectator or a participant, there will be room for you in some capacity. Just ask one of the team coaches if he needs a new substitute, etc. For those preferring to spend their leisure hours around the golf course, we can suggest the Country Club tournament coming up soon.

The Neighborhood Center at the High School is offering a place to train in weight lifting, track, etc., and is open to anyone of the community wishing to participate.

FAMILIAR FACE MISSING

There is a familiar face missing around The Reporter these days. Nina Hall left The Reporter for a better job in Midland, but had to stay with a friend in the hospital instead. She was a good employee of The Reporter for several months and we will all miss her.

NEW SUMMER ASSISTANT

Mr. Tommy Pinkerton who is home from college for the summer is helping at The Reporter now. He is a music major at Hardin-Simmons and a former employee of The Reporter. His father is the Vocational teacher at the High School.

GIRL FRIDAY

The Reporter has a new "Girl Friday" in the person of Kay Thigpen. She has lived around Stanton most of her life and was active in varsity and school activities at Stanton High a few years ago. She was an honor student and went to H.C.J.C. for a while on scholarship.

Reunion Plans Are Announced

Plans are now being made for the Brown School and Community reunion scheduled 1-5 p.m., June 23 at the First United Methodist Church Fellowship Hall in Big Spring.

All ex-students and teachers of the school and residents of the community near Ackerly are invited to attend. Travis Davis will emcee the program and Elmer Miller, longtime superintendent of the school, will speak.

Organizing the reunion are Mrs. Joe Froman, Mrs. Dalton Wright, Mrs. Leonard West and Mrs. Donald Grigg.

Jones Graduates

Jamie Albert Jones from Tarzan received his degree in History in commencement exercises at Texas Tech University this spring.

The university presented degrees to approximately 1,900 students. The figure includes 230 who received master's and doctoral degrees and 75 who received law degrees.

The university includes the colleges of Agricultural Sciences, Arts and Sciences, Business Administration, Education, Engineering and Home Economics and the Law School and the Graduate School.

Airman Sanchez Completes Course

DENVER — Airman Enrique I. Sanchez, son of Mr. and Mrs. Inez Sanchez of Stanton, Tex., has graduated at Lowry AFB, Colo., from the U.S. Air Force supply inventory specialist course conducted by the Air Training Command.

The airman, trained to inventory supplies by use of electronic data processing machines, is being assigned to Davis-Monthan AFB, Ariz., (See **SANCHEZ**, Page 6)

Denise Maria De Almeida Bethonico

Exchange Student Returns Home In July

Denise Maria De Almeida Bethonico, daughter of Diogo and Tucs Bethonico, of the city of Belo Horizonte, state of Mimos Gerais, Brazil, is a guest in the home of Mr. and Mrs. Jack Cook and family. Miss Bethonico is an Exchange Student from Brazil and is sponsored by the "Youth for Understanding" organization. She is a member of the Stanton High School Graduating Class, having enrolled in the Stanton High School in January, 1973.

Denise is one of eleven children. She has six sisters, four brothers, five nephews and one niece. She is a very attractive, typical 17 year old teen-ager, 5 ft. 4 in. tall, dark hair and eyes, has a friendly disposition and loved by everyone who knows her. Her ambition is to some day become a doctor of medicine. She likes tennis, volleyball, football, golf, horse-back riding and swimming.

The most popular language spoken at Denise's home is Portuguese. She has learned to speak English well since her arrival in the United States.

Her father has many different interests in Brazil. He is owner of the SOSEBELL Co. and also an Ore Mining Company, the SOCOIMEX Co. He also serves as a Highway Engineer. The Family Town Home is located in Belo Horizonte as are the companies they own. They also own a farm by the name of "TREVVO" on which they grow "Bethonico Bananas" and cattle. There is a Farm Home located on this Farm which is approximately a 45 minute drive from Belo Horizonte. They also own a Beach-house on the Coast located in the State of Espirido Santo.

As an exchange student, Denise has gained vast know-

ledge of the customs of this country as well as the English language. She has participated in various school activities, which included being a member of the Precision Section of the Stanton High School Band when they marched in the "Fiesta Flambeau" Parade in San Antonio, Texas recently. She was also a member of a sponsored group to visit McMurry College in Abilene, Texas. She was a guest speaker at the local Lion's Club meeting recently. She also had the opportunity of attending her first rodeo, the San Angelo Rodeo, as guests of Mr. and Mrs. R. S. Lewis of Stanton. In March she visited Texas Tech University, Lubbock, Texas, as guest of Mr. and Mrs. Bill Wilson, Head Resident of Wells Hall; also as a guest of Mr. and Mrs. Johnny Perkins and son of Lubbock. Before returning to her home in Brazil in July, she plans to make a trip to Disneyland in California; to visit Mrs. Jack Cook's relatives in California; Mrs. Cook's mother and other relatives in Salt Lake City, Utah.

Denise has expressed her gratitude for the warm welcome afforded her by the people of the community. She has especially enjoyed being a guest in the home of her sponsored parents, Mr. and Mrs. Jack Cook and their daughter, Judy, and son, Lee. She regrets leaving these good friends, as well as the friends she made while working at the Cook's Exxon Station and her many friends among the students and teachers of Stanton High School. She feels that her visit to this country has been a most rewarding and unforgettable experience.

A-1 LIONS. Don Tollison pins the awards on recipients: Jimmy Conner, Paige Eiland, and Cecil Bridges.

UTPB Receives 1,000 Application

Johnny Wayne Sullivan of Pasadena, Texas, holds the distinction of being the 1,000th student to apply for admission to the new, upper-level University of Texas of the Permian Basin opening this September.

Sullivan's application was received by the Office of Admission at UT-Permian

Thursday, June 14, bringing the total number of graduate and undergraduate application to 1,000.

According to A. W. "Woody" Keith, director of admissions and registrar at UT-Permian, over half of the students who have applied, 557, have been accepted to date.

H. R. Wilhite Dies At Odessa

ODESSA — H. R. "Bob" Wilhite of Odessa, 50, was pronounced dead on arrival at an Odessa hospital Monday morning. He was the son-in-law of Mrs. Lottie Avery.

Services were held at 11 a.m., Wednesday in the Hubbard-Kelly Funeral Home, with interment in Sunset Memorial Gardens.

He was born May 13, 1923, at Noble, Ill., and married Yvonne Avery in 1952.

Survivors include the widow; a son, Robert Dennis of the home; two daughters, Bobby Gayle Wilhite and Beverly Francis Wilhite, both of the home; a brother, Richard Wilhite of Las Vegas, Nev.; and five sisters, Mrs. Georgia Blue of Mackinaw, Ill.; Mrs. Cathy Maszk of Milwaukee, Wis.; Mrs. Elaine Harper of Stonewall, Okla.; Mrs. Betty Throder of Decatur, Ill.; and Audra Wilhite of Stockton, Calif.

Social Security

A representative of the Big Spring Social Security Office will visit in Stanton on July 23, August 27 and Sept. 24 in the County Judge's Office in the County Courthouse from 2 p.m. to 3 p.m. to help you apply for benefits, get a Social Security number, or answer your questions.

Phone, write, or visit your Social Security Office, Room 233, Federal Building, 501 Main Street, Big Spring, Texas 79720.

Phone (915) 267-5226. Fast service can be given by telephone. Applications or any other business can be handled by telephone.

Court... Report

The June Grand Jury returned the following indictments:

Danny G. McGee was indicted of theft of over \$50, occurrence on May 25.

Tommy Coates on the eighth of April occurrence was indicted of felony burglary.

Huey P. Scroggins took two tubing elevators and charged with theft of over \$50, a felony. Case to be heard on seventh of July.

Joseph Calvin Wagley was indicted for driving while intoxicated on April 21st, with a subsequent felony offense.

Johnny Garza was indicted for burglary-felony on the eighth of April, 1973, crime.

Two indictments were returned against Rogelio Casillo for homicide by vehicle. These were to be transferred to the County Court. A misdemeanor charge was listed in the death of Sue Allen Seism and Elidio Fernandez.

Larry Jones and Robert Diaz have their cases pending at a later date before the grand jury.

Services Held For Fred E. Holder Sunday Afternoon

Services were held Sunday afternoon for Fred Everett Holder, 47, of Midland who died at 9 p.m. Friday in the Big Spring Veterans Administration hospital after a lengthy illness.

The funeral was at 3 p.m. in First Baptist Church in Stanton with the Rev. Kenneth James, pastor of Crestview Baptist Church of Midland, officiating. Burial was in Evergreen Cemetery of Stanton under direction of Gilbreath Funeral Home.

Mr. Holder was born Nov. 26, 1925 in Cross Plains. He married Eulene Anderson in Big Spring, Oct. 18, 1946. They moved to Stanton in 1959 and to Midland four years ago.

He was owner and operator of a service station in Midland, a World War II veteran and a member of Crestview Baptist Church.

Surviving are his wife, Midland; a son, John David Holder, of the home; two daughters, Linda and Laura Holder, of the home; three sisters, Mrs. Mike Grisham, Irving, Mrs. N. T. McClane, North Little Rock, Ark., and Mrs. Mina Burns, Cisco; and two brothers, L. P. Holder and Carlton Holder, both of Cisco.

Richard Martel Receives U.S. Air Force Medal

BIG SPRING, Tex. — Technical Sergeant Richard N. Martel, son of Mr. and Mrs. William R. Martel of Sacramento, Maine, has received the U.S. Air Force Commendation Medal at Webb AFB, Tex.

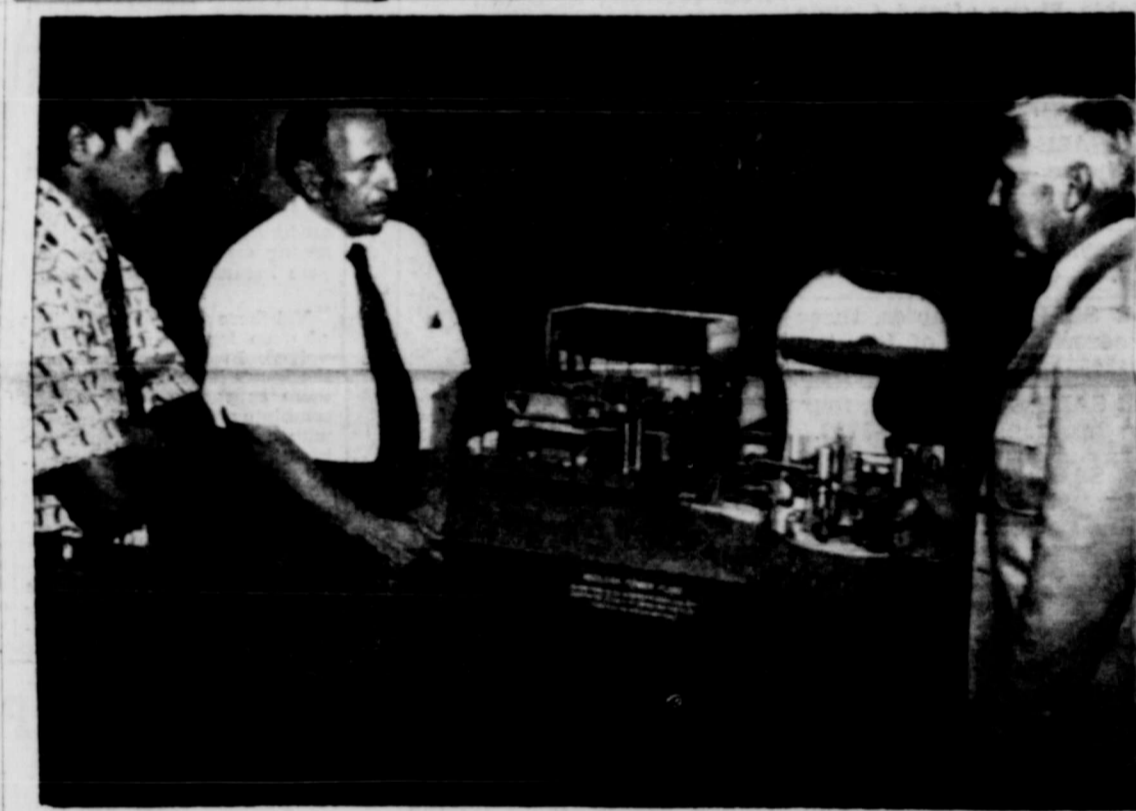

Sergeant Martel, an air traffic control technician, was cited for meritorious service while assigned at Galena Airport, Alaska.

The sergeant now serves at Webb with a unit of the Air Force Communications Service. He has completed six months duty in Vietnam.

He is a 1964 graduate of Thornton Academy. His wife, Mary, is the daughter of Mr. and Mrs. Troy C. Bradshaw of Rt. 1, Stanton, Tex.

Grass Fire North Of Stanton

There was a free fire north of Stanton about 6 miles this past Sunday afternoon. The fire was on property owned by Grisam and McAlpine and L. O. Free. About 200 acres of this land leased by Mr. Steve Church was burned and the fire was also swept to some adjoining land. There were many people

AT NUCLEAR SYMPOSIUM. Student Jim Anastasio and John Anastasio, center, science teacher at Stanton High School, talk with J. L. Schell, representative from Texas Electric, during the 13th Texas Nuclear Science Symposium in Austin, June 4-7. The pair are guest of Texas Electric Service Company at the meeting, co-sponsored by the University and the Texas Atomic Energy Research Foundation. TAERF is composed of 10 electric power companies operating in Texas.

Epilepsy Chapter

All persons interested in the formation of an epilepsy chapter for the Big Spring-Midland-Odessa area are urged to attend a meeting on Tuesday, June 26, 1973, at 8:00 p.m. at the Permian Bank and Trust Building (downstairs), 2710 North Grandview, Odessa, Tex.

A film entitled "Modern Concepts of Epilepsy," which deals with all aspects of Epilepsy will be shown. Mr. Bill Smith, assistant executive director of the Permian Basin Regional Planning Commission, will be the guest speaker. An open discussion period will follow on the "needs of the epileptic and how a concerned public can help."

For further information, please call Mrs. Floyd Jarnagin at 683-4425.

STOP AT THOSE SIGNS

Police Chief Rodgers says that the people of Stanton need to start observing the stop and yield signs. There has been a recent rash of accidents related to failure to stop or yield.

One of the most important signs that you need to watch are the ones next to the railroad tracks. Since we have had several accidents related to the railroad already it would be very wise to observe these.

Other things he stressed were not making U turns in

the middle of the street, parking at the wrong angle at the post office and double parking in middle of street, is also listed as a violation.

Peddlers are not allowed to solicit in the city limits without a permit from the city secretary. Ask salesmen to show this permit if one calls at your door, or notify the city if they don't have one.

Persons leaving the baseball fields should drive slow to avoid hitting people walking and those that chase balls back to the stands.

NEW CITY MANAGER. Stanton gets a new city manager in the person of Mr. Jimmy Mathes. The Reporter will give you additional information whenever it is available.

Basin Oil News

10,978-10,886 feet, which has been acidized with 5,000 gallons and fractured with 100,000 gallons and 120,000 pounds. It has 7 5/8-inch casing hung from 9,045-11,305 feet, and 5 1/2-inch liner hung from 11,091-11,600 feet.

The Atoka opener, Mobil No. 6 Judkins, finished this week for 115 barrels of 45.5-gravity oil and 23 barrels of water daily, through a 14-64-inch choke and from open hole at 10,984-10,898 feet.

G. E. Kadane & Sons, Wichita Falls, will re-enter and deepen to 10,000 feet at No. 1 Morgan Ranch, dual Leonard and Wolfcamp pay opener in the Morgan Ranch field of Howard County, for recompletion attempt as a second Fusselman producer and 1/2-mile northwest extension to that pay in the field.

Originally drilled by the same operator, it was completed May 9, 1971 as a commingled strike to pump 96.4 barrels of oil per day, through perforations at 6,670-6,735 feet and 7,204-7,300 feet.

It spots 1,980 feet from north and east lines of section 27, block 32, T-1-S, T&P survey, five miles southeast of Big Spring.

The Fusselman opener, Kadane No. 1-B Morgan Ranch, finished Oct. 28, 1971 for 40 barrels of 49-gravity oil and 20 barrels of water daily, through perforations at 9,734-9,742 feet.

John L. Cox, operating out of Midland, has staked three locations in the Spraberry Trend Area of Midland County.

The No. 1 Berman, 3/4 mile southwest extension, is 1,320 feet from north and east lines of section 3, block 38, T-3-S, T&P survey 10 miles southwest of Midland.

Staked 1/2 mile west of the nearest production in that field, the No. 1-F Crespi spots 1,320 feet from north and east lines of section 40, H.M. Horton Grantee survey 4623, eight miles southeast of Midland.

The No. 2-F Crespi, located eight miles southeast of Midland, spots 1,320 feet from south and east lines of section 40, H.M. Horton Grantee survey 4623.

The No. 6 Scharbauer has been completed by UV Industries, Inc., Salt Lake City, Utah, as a 1/2-mile south extension to the Lacaff (Dean) field of Martin County.

It finished flowing 175 barrels of 38.6-gravity oil, plus 25 barrels of water, daily. Gas-oil ratio measured 750-1.

Production was through a 16-64-inch choke and perforations at 8,988-9,670 feet, which had been fractured with 140,000 gallons and 280,000 pounds.

Drilled to 9,700 feet, where 5 1/2-inch casing was seated, it was then plugged back to 9,732 feet.

Located eight miles west of Tarzan, production site is 1,350 feet from south and 6,886 feet from east lines of labor 3, league 323, LaSalle CSL survey.

A Short Report

Senate Bill 817 would require butane dealers to increase storage to 18 thousand gallons. This provision was amended out of the bill in the House.

Governor Briscoe's recommendation for school financing has passed the Senate and the wild liberal bill that the House passed costing 1.8 billion dollars will not see the light of day.

There will be no State Telephone Commission this Session.

Under a Bill signed into law right turn on red will be permitted if the cities agree and adopt a uniform plan.

Druggist will probably have to post for public view the prices and names of 100 major drugs that they sell as a pharmacist.

REPORTS CONTINUE OF OTHER MIA SERVICEMEN

At a press conference recently, POW/MIA families and members of VIVA (Voices In Vital America) disclosed further information on men still listed by our government as prisoners of war or missing-in-action in Southeast Asia. Of the over 1,300 men missing there is definite proof that some of them were captured, although the Communists refuse to comment on their capture.

Dim View Of Misuse Of Fed. Food Stamps

The National Association of Manufacturers takes a dim view of misuse of federal food stamps, as witness one of their editorials:

"When the food stamp program was enacted by Congress in 1964 its purpose was to raise the level of nutrition among low-income households. Now the soaring use of welfare assistance by strikers, particularly food stamps, constitutes a major threat to effective collective bargaining. It can contribute to longer strikes, higher settlements, and a continuation of inflation.

Industry leaders estimate the cost of giving welfare assistance to strikers will escalate to \$329 million annually. It is time for Congress to re-define the eligibility of receivers of food stamps — and to stop the abusive distortion of the welfare assistance program.

Reserve stamps for the truly needy, not for U.S. Treasury strike assistance."

GOOD CAREERS
Colleges are finding that volunteer assignments in Veterans Administration hospitals offer good career exploratory opportunities for students.

From E. L. Short

The REPORTER Sells BUSINESS FORMS

...drived of their privilege to drive, would also be denied the right to make a living, because their livelihood depends on automotive transportation.

California, which leads the nation in car registration has long had a law that provides that if a driver is held responsible for an accident, and has neither insurance or other means to satisfy the claim, the license to drive is revoked.

But this law has not worked out, as there are, according to all reports, a large number of the less affluent drivers of California who have no insurance, have claims against them, yet are able through a series of protracted hearings, to keep their driving license.

Thus, there seems to be no simple answer to the problem. Recently the California Highway Patrol announced that due to a stepped up drive during 1972 it arrested almost 96,000 people in California for drunk driving. In order to do this, the officers were ordered to overlook many highway violations. It is quite terrifying to think that in one state in a year 96,000 projectiles, weighing from one to three tons were apprehended under the control of intoxicated people. One can only wonder how many more were not apprehended.

This, of course, would give the insurance companies a captive market and without providing for the National Federation of Independent Business

...Restrictive government regulatory policies affecting the natural gas industry have been substantially to blame for creating the natural gas shortage. But this does not mean the country is running out of gas, as many presume. Indeed, resources of natural gas include a potential supply nearly five times as great as present proved reserves. Moreover, conventional supply will be supplemented by substitute gas made from coal liquid hydrocarbon feedstocks, pipeline imports from Canada and liquefied natural gas from overseas.

It is urgent that policies be adopted to encourage development of these vast natural gas potentials. But, in the meantime, the gas industry is not standing still. A resume of industry undertakings to expand gas supplies reveals many important projects by individual companies. In southwestern Oklahoma, one company has started drilling what is expected to be the second deepest well on record — 29,000 feet — at an estimated cost of \$5 million. A consortium of two dozen U.S. and Canadian companies is planning a \$5 billion, 2,500-mile

pipeline to move gas from Alaska and northern Canada. The line will move as much gas as is used now by the whole state of Illinois. Gas companies and environmental groups have reached agreement on construction of a liquefied natural gas import terminal along the Maryland shore in Chesapeake Bay. In addition, dozens of synthetic gas projects are under construction or in final planning stages. By 1975, synthetic gas plants could be adding over a trillion cubic feet per year — 5 percent of consumption — to U.S. gas supplies.

Whether the current growing energy shortage turns into a genuine energy crisis depends largely upon the frame of mind of the American public. The natural gas industry and others in the energy field are planning for the future in the belief that the public will want energy needs met and will support policies and measures that will encourage the traditional initiative and enterprise of American industries in the energy field.

Country Club To Sponsor Golf Partnership

The annual Stanton Country Club Partnership Golf Tournament will be held Saturday and Sunday.

The field will be limited to the first 54 teams entering

with registration fee set at \$35 per team.

Irons for first, woods for second and golf bags for third will be given as prizes for each flight.

Teams may qualify anytime Saturday with shotgun starts slated at 9 a.m. and 2 p.m. Sunday.

Prospective entries may contact 756-2556 during the daytime and 756-2207 at night.

A barbecue is set Saturday night.

Ronnie Gilbreath and the members of the Country Club cordially invite everyone to come out and watch or participate in the tournament.

If the tournament is anything like the last one held here there will be plenty of action and a lot of interesting people to meet.

Taking Sides

By REV. BILL IRWIN
Pastor of Courtney Baptist Church

"Then Moses stood in the gate of the camp, and said, Who is on the Lord's side? Let him come unto me. And all the sons of Levi gathered themselves together unto him." Exodus 32:26

A ringing question asked by Moses many centuries ago suggests the subject of taking sides. Although this question was asked long ago, it thrills us this very hour. Recall how Moses asked this question. For forty days, he had been in the quiet of the mountains as he communed with God and sought His guidance for the people. Meantime, the people for whom Moses was praying and to whose highest welfare he was devoting his life had drifted back into idolatry. They had made a calf of gold which they were preparing to worship. Great was Moses' grief because of his people's wretched drifting. Emphatically did he insist that they take sides and declare publicly on which side they stood.

We see in this experience the power of one true man with fixed principles. Moses was greater on that fateful day than all the wavering multitudes combined. By his courage and fidelity, he turned the battle back from the gate. Oh, what need there is today for men and women of fixed principles and for steadfast, determined, dependable people! Such men and women always turn the tide. Moses stood the test as did Daniel, Joseph, and the three Hebrews who were cast into the fiery furnace. Faithful and courageous men through the ages have made the difference; God's men and women will continue to do so.

If we be such men and women, we must pay the price as did Moses. We must give the will of our Divine Lord first place in our lives. We must literally seek first the Kingdom of God and His righteousness. We must open-

ly take sides with Christ and follow with prompt and unflinching obedience wherever He leads; then all shall be well with us both here and hereafter.

"Say not ye, there are yet four months, and then cometh harvest? Behold, I say unto you, lift up your eyes, and look on the fields; for they are white already to harvest." John 4:35

Kindergarten Enrollment

The Stanton Independent School District Board of Trustees has elected to offer a full time Kindergarten to all children who will be five years old on or before September 1, 1973.

It is urgent that we have the names of all children who will attend the Kindergarten class so that we may make adequate provisions to operate this program.

The parents of all eligible children are asked to contact the principals office of the Stanton Elementary School or the office of the Superintendent at their earliest convenience and register their children.

All eligible children are urged to attend kindergarten as it is believed that the program is essentially beneficial in preparing the child to be successful in his future academic endeavors.

THE BIGGEST JUMP

What necessities are taking the biggest share of the family budget? Food? Housing? Clothing?

All three have gone up over the last five years, according to government figures. The cost of food has gone up 26 per cent; housing up 31 per cent and clothing up 25 per cent.

But the biggest jump of all has been the cost of government — up 60 per cent.

The Chamber of Commerce of the United States believes this is an excellent reason for bringing government spending under control.

Herman Landers Xi Theta Nu News

Mr. and Mrs. Herman Landers Jr., Shandal and Kresi have returned from the Houston, Galveston area.

Mr. Landers received a good report from his check-up at the Chronic Home Dialysis Kidney Center of the University of Texas Medical Branch.

While there they visited in the home of cousins, Mr. and Mrs. Willard Joachimi, Mr. and Mrs. Paul Fauley of Conroe. They also visited Astroworld and got in some fishing.

On June 10 they attended the Kellerman Reunion at McGregor and were joined there by Mr. and Mrs. Herman Lander Sr., Terry and Sonya Deatherage of Tarzan.

Xi Theta Nu Chapter of Beta Sigma Phi held their annual summer get-together on Thursday, June 14 at the Martin County Country Club.

An ice cream and cake social was held for the members, husbands, and families with the children enjoying swimming.

Those present included: Bob and Jo Jon Cox and family, Kay Simpson and family, Peggie Sorley and Derek, Judy Thompson and Gary Don, Butch, and Nona Cain and family, Ronnie and Linda Christian and family, Jack and Charlotte Elrod and family, Ken and Ruth Holcombe and family, and Patsy Jones and family.

8 ways to save money on air conditioning.

1 Set thermostat no lower than necessary for comfort — the lower the setting the more electricity the unit uses.

3 Provide adequate attic ventilation — helps reduce heat buildup.

4 Install proper duct, ceiling and wall insulation and weatherstrip windows and doors — keep hot air out, cool air in. (Helps reduce winter heating costs too!)

5 Keep the outdoor unit free of grass or other obstruction.

7 Shade windows from direct sunlight with awnings, blinds or draperies — it will reduce the load on the unit.

8 Have the unit checked by a qualified air conditioning serviceman. Do this in the spring, prior to your need for cooling.

2 Replace disposable or clean permanent type filters as required — clogged filters make the unit work harder and use more electricity.

Get our free booklet, "Tips to help you use electricity more efficiently throughout your home." Copies are available in our office, or you can request one on the comment portion of your electric service bill.

Martin County Farm-Ranch Report

Does The Growing Number Of Cattle Feedlots Add To Pollution?

Cattle Feedlots Discussed

Are cattle feedlots a major contributor to America's growing pollution problem? The answer is an emphatic "NO!" in the opinions of Dr. Myron Paine and Dr. John Sweeten, who both have a good understanding of the situation.

Paine is located at Oklahoma State University and is a regional Extension Service feedlot waste management specialist serving a six-state area of the Southern Great Plains. Sweeten is an agricultural engineer in animal waste management for the Texas Agricultural Extension Service, Texas A&M University.

Plans then will be made to see to it that agriculture producers do not run out of fuel for agricultural purposes.

SHEEP feeding is on the increase in Texas. Marketings during May were 45,000 head, which was 5,500 head above the intended marketings earlier indicated.

Current intentions to market are: June 46,000, July 54,000 and August 11,000. July and August intentions are incomplete, however.

Drylot sheep feeders with a lot capacity of 2,000 head or more had 111,000 sheep and lambs on feed for slaughter as of June 1, the Texas Crop and Livestock Reporting Service notes.

This is 28 per cent above the number on feed a month earlier and eight per cent above the number on feed June 1 of last year. Placements during May totaled 69,000 head with a total of 10 feeders reporting 1,000 or more head on feed June 1.

COMMERCIAL slaughtering plants in Texas produced 155,000,000 pounds of red meat during April. This is 17 per cent below the previous month and 12 per cent below the 176,300,000 pounds produced in April of 1972.

Nationwide, red meat production is down 12 per cent from a year ago.

Reasons for the decrease include the late winter and early spring freezes and narrowing margins of profit.

Red meat production in Texas during the first four months of this year is 707,400,000 pounds.

Another reason the pollution potential of feedlots has not been reached and unlikely ever will is that only a small percentage — research shows only about two percent — of the solids reach a stream, explain Paine and Sweeten.

"If that total of 25.5-million tons produced annually went directly into a sewage system — as do human wastes — the effect would be devastating. But actually, one human contributes 10 times as much toward water pollution as one feedlot animal."

The specialists feel conflicting and misleading statements have posed an out-of-focus view of feedlots in the overall ecology picture.

"If all the animal wastes from one animal fell directly into a stream that one animal would equal 16 persons in pollution contribution. But the actual fact is that manure falls on land and it's 85 percent water. This evaporates and the only way the manure gets into a public water stream is in case of a rainfall in excess of one inch. Then, we might get runoff into the stream."

Most of the Southern Great Plains states now have laws requiring feedlots to have a system of runoff retention structures. About 80 percent of the cattle fed in Oklahoma are in lots that are in compliance with this law, and some 95 percent of Texas feedlots with a capacity of 1,000 head or more are in compliance or moving toward compliance.

On the federal level, guidelines are being established by the Environmental Protection Agency relating to feedlot pollution protection. A new federal water quality law will prohibit the discharge of pollutants into water courses by 1985.

Mustang News

How can livestock producers keep income from livestock as high as possible each year and at the same time increase the amount and quality of forage being produced year after year? To answer this question it is necessary to carefully determine how many animals can be properly fed on the forage produced without over using the important grasses.

There are several ways to determine if there is a balance between livestock and forage. The best way is to watch what is happening to the important forage plants or key plants.

The livestock operator should look for these "indicators" on the key plants and see if the plants are in balance with the livestock.

1. Do the plants appear vigorous and healthy?
2. Are the plants making growth commensurate with the moisture received?
3. Are many seedstalks being produced?
4. Are there seedlings and young plants of the important forage plants?
5. Are the key plants moving into the bare areas?
6. Is the litter building up to protect the soil from erosion and help hold moisture?

Overgrazing rangeland can go only one way — down. A deferred isolation system can help improve the rangeland by allowing a systematic period of deferment or rest for each pasture.

Several farmers are drilling the turnrows and boarders around their fields to reduce wind erosion. This is a very good practice and is gaining wide acceptance in this area.

Farmcast

A Weekly Report Of Agri-Business News

Compiled From Sources Of The Texas Department of Agriculture
John C. White, Commissioner

A Close Look . . . Energy Crisis . . . Sheep and Lamb Feeding On Increase . . . Red Meat Production Declines.

Take a close look at all those glowing reports about increasing farm prices and you might be surprised.

The latest average price report for Texas farmers, for example, shows that only three commodities are above parity. Earlier this year, a half dozen commodities were parity. But even that is negligible when you consider the fact that more than 200 agricultural commodities are produced in Texas.

Those three commodities which are above parity (as you might have guessed) as of May 15 are beef cattle, calves, and sheep. Beef average price was \$44.80 compared to parity of \$42.30 per hundredweight. Calves averaged \$58.70 compared to the parity of \$51.20. Sheep averaged \$14.40 per hundredweight compared to the parity of \$11.90.

Everything else is below parity. Eggs averaged 56.4 cents per dozen while parity is 60.5 cents. Turkeys, even though they are up two cents per pound from last month are still 3.3 cents per pound under parity.

Cotton still shows the biggest disparity. Average price as of May 15 was 27 cents per pound while effective parity is 62.46 cents per pound.

Wheat price average declined two cents per bushel from a month ago to average \$2.18; grain sorghum averaged \$2.85 which is nine cents above the previous month.

FUEL supplies for agriculture throughout the state appear to be getting tighter. Reports of shortages are no longer confined to most of the wheat areas. Some counties in Central and East Texas are reporting no fuel available.

If you run out of fuel for agricultural purposes, you are requested to let your county Agricultural Stabilization and Conservation Service office know, or you can contact the

Texas Department of Agriculture

Plans then will be made to see to it that agriculture producers do not run out of fuel for agricultural purposes.

SHEEP feeding is on the increase in Texas. Marketings during May were 45,000 head, which was 5,500 head above the intended marketings earlier indicated.

Current intentions to market are: June 46,000, July 54,000 and August 11,000. July and August intentions are incomplete, however.

Drylot sheep feeders with a lot capacity of 2,000 head or more had 111,000 sheep and lambs on feed for slaughter as of June 1, the Texas Crop and Livestock Reporting Service notes.

This is 28 per cent above the number on feed a month earlier and eight per cent above the number on feed June 1 of last year. Placements during May totaled 69,000 head with a total of 10 feeders reporting 1,000 or more head on feed June 1.

COMMERCIAL slaughtering plants in Texas produced 155,000,000 pounds of red meat during April. This is 17 per cent below the previous month and 12 per cent below the 176,300,000 pounds produced in April of 1972.

Nationwide, red meat production is down 12 per cent from a year ago.

Reasons for the decrease include the late winter and early spring freezes and narrowing margins of profit.

Red meat production in Texas during the first four months of this year is 707,400,000 pounds.

Another reason the pollution potential of feedlots has not been reached and unlikely ever will is that only a small percentage — research shows only about two percent — of the solids reach a stream, explain Paine and Sweeten.

"If that total of 25.5-million tons produced annually went directly into a sewage system — as do human wastes — the effect would be devastating. But actually, one human contributes 10 times as much toward water pollution as one feedlot animal."

The specialists feel conflicting and misleading statements have posed an out-of-focus view of feedlots in the overall ecology picture.

"If all the animal wastes from one animal fell directly into a stream that one animal would equal 16 persons in pollution contribution. But the actual fact is that manure falls on land and it's 85 percent water. This evaporates and the only way the manure gets into a public water stream is in case of a rainfall in excess of one inch. The 60-Day Price Freeze

WACO — The President's 60-day freeze on retail food prices is a "stop-gap measure that carries with it real dangers for consumers as well as farmers," J. T. Woodson, president of the Texas Farm Bureau, said today.

"There is a real possibility that we may soon see shortages of milk, eggs, and meat if prices are too low for farmers to make a profit," the head of the state's largest farm organization said.

"Although farmers appreciate the President's exemption of prices of raw agricultural products, the freezing of prices at the retail level does affect prices all the way back to the farm," Woodson said.

Commenting on the cost-price squeeze, Woodson said that some producers have absorbed all the increased production costs they can handle.

"Farmers will not produce for very long when their prices are at or below the cost of production," he said. "When producers feel the pinch badly enough, it won't be long before the consumers will, too, in the form of empty grocery shelves and meat counters."

The farm leader said the only way that consumers can be assured of a bountiful supply of food at reasonable prices is to have adequate production and that this can only come from price incentives in the marketplace.

Woodson said that food prices are not out of line.

"The American consumer spends only about 16 percent of his take home pay on food," he said. "This is lower than any other nation on earth and lowest of any time in our history."

The Farm Bureau leader said that the "real culprit behind inflation is still wasteful and deficit spending by government."

"Until we cut out spending beyond our means, we will continue to have our pocketbook robbed by inflation," he said.

Alcohol is still the nation's number one drug problem, according to Veterans Administration doctors.

Highlights From State Capitol

AUSTIN, TEX. — Texas state government may see far-reaching new changes in budgeting techniques, hopefully to save money and curb a tax increase.

Gov. Dolph Briscoe expressed enthusiasm for the Georgia "zero base" budget method last inaugurated by Gov. Jimmy Carter two years ago.

Lt. Gov. Bill Hobby and a delegation of Texas budget experts, including Sen. A. M. Aikin of Paris, visited Georgia last week for a briefing by Carter's aides.

When the officials returned, Briscoe said he expects to "be proceeding with implementing (changes) very shortly."

Hobby is chairman of the Legislative Budget Board, which ramrods the Texas budget process. Briscoe said he will instruct his own budget office to take the Georgia system as a model in preparing the executive department's spending recommendations.

Under the "zero base" system, all agencies are instructed to start "from scratch" in drawing up their appropriations requests rather than taking present levels of spending as their beginning point.

Governor Carter asked all Georgia agencies to detail how they would operate under existing revenues, a 15 per cent cut and a slight increase. He also insisted that they list their own priorities of programs as a guide to the legislature in directing economies.

Briscoe has emphasized repeatedly that he proposes to follow that procedure in weighing the value of existing educational programs, as he maps his recommendations for revision of the public school finance system.

Board Chairman Joe Christie said development of HMOs as an alternative to traditional health care should be examined thoroughly to see if runaway medical bills can be checked.

HMOs offer a comprehensive range of medical services and facilities to a single organization at a fixed contract fee paid in advance by subscribers. Christie termed the system "insurance to stay healthy." He said national figures indicate a saving to a family with three children of about \$115 a year.

INSURANCE RATES REDUCED — More than half Texas' fire, extended coverage and homeowners insurance companies are now selling at reduced rates, according to Insurance Board Chairman Christie.

Wheat Market Projects Okayed

The U. S. Department of Agriculture (USDA) has approved four wheat market promotion projects developed and recommended by the National Wheat Institute.

The four wheat promotion projects are: (1) development of an educational film on wheat marketing; (2) participation in an industry-sponsored national program to improve the image of agriculture and wheat producers; (3) stimulation of consumer interest in wheat and wheat products through the National Sandwich Month and Contest; and (4) expansion of the National Day of Bread Program.

Authorized by the Wheat Research and Promotion Act of 1970 (84 Stat. 885), the projects are financed from funds remaining from the 1968 sales of export marketing certificates for wheat not claimed by producers. The four projects are estimated to cost \$101,375.

The Wheat Research, Promotion Program is administered by the National Wheat Institute. The Institute has a seven-man board of directors, each director himself a wheat producer, and is comprised of seven farm organizations.

"Call Station-to-Station and Save."

"Telephones are my business. And when it comes to calling Long Distance, I know station-to-station is the most economical way. Look at this typical example and see for yourself."

Station-to-Station	Person-to-Person	Savings
\$1.35	\$3.10	\$1.75

By calling station-to-station, this is what you save on a three-minute call to Miami made between 8 a.m. and 5 p.m., Monday through Friday. All non-coin station calls, charged to the phone from which they are made, go through at the same low rate charged for One-Plus calls in cities having direct dialing capability.

Southwestern Bell

VIEWPOINT

A 'NO FAULT' SUCCESS STORY THAT PROTECTS PEOPLE

For many years motorists have complained about auto insurance in the same manner as those people Mark Twain described when he said: "Everybody talks about the weather but nobody does anything about it."

Lately a lot of that talk about insurance has been translated into doing something about it. As a result, states all over the country have been adopting or considering so-called No-Fault Automobile Insurance Laws. All are intended to correct the flaws of the auto insurance system: high premiums, delays in settlements, and abundance of law suits.

Unfortunately few of the No-Fault laws have accomplished these purposes. Some have actually raised premiums and reduced insurance protection. Others have discriminated against the poor, the aged and the unemployed. Too many have deprived innocent accident victims of the right to sue for just compensation for injuries suffered. In one state - Illinois - such a discriminatory law has been thrown out as unconstitutional.

So it is a pleasure to learn of the success of Delaware's No-Fault insurance law which has just celebrated its first anniversary.

Delaware's Insurance Commissioner Robert A. Short proudly observed the occasion by reporting:

"More people are being paid more promptly and more equitably than ever before. . .

For over a year now, there is not a single known incident where the Delaware accident victims were not paid promptly on presentation of their bills. . . Litigation over medicals, wages and loss of services has also disappeared. . .

This success is achieved with no increase in rate level. . . Bodily injury premium rates were reduced as much as 25% by bureau companies, and the average rate level reduction was 8.5% state-wide."

in bodily injury for all companies writing in Delaware was 8.5% state-wide."

This is indeed encouraging news, and has been accomplished without sacrificing an individual's right to have his day in court if he prefers. It clearly demonstrates that people only want fair treatment. When they are promptly and honestly reimbursed for losses from accident injuries, they do not make unreasonable claims or file "nuisance" law suits.

Delaware is to be congratulated and imitated.

Commissioner Short may well be right in his conclusion:

"Delaware's No-Fault Auto Insurance is working and can well serve as a national model."

... Sanchez

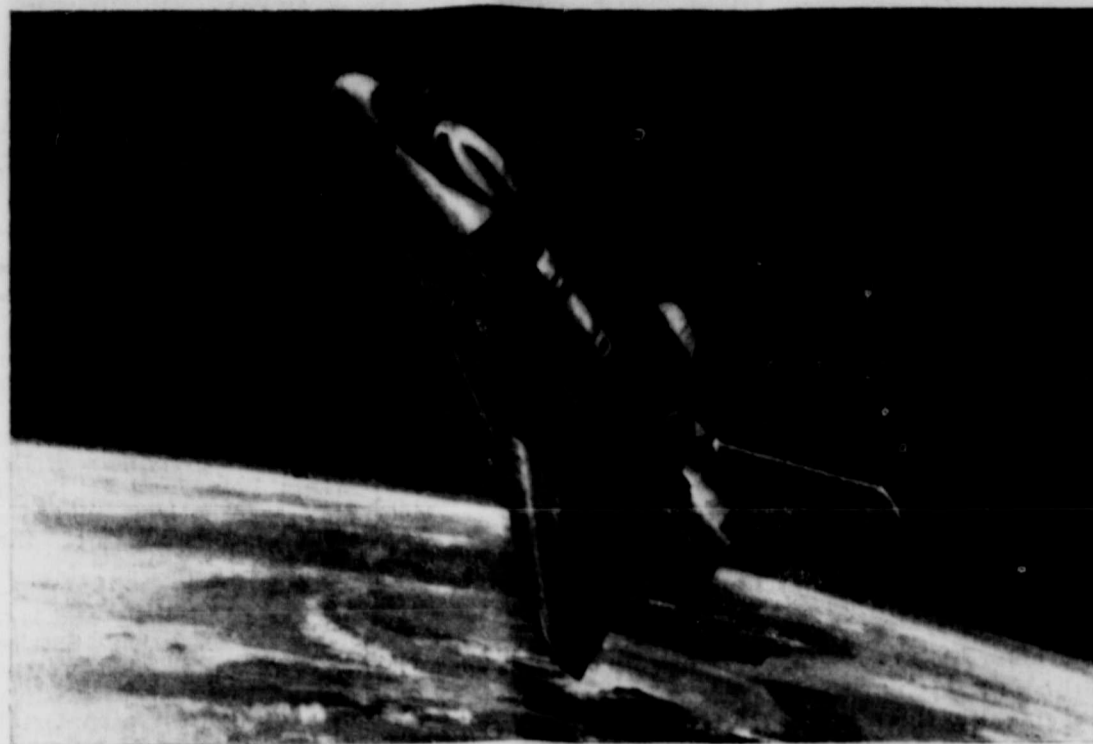

Continued from Page 1 for duty with a unit of the Strategic Air Command, America's nuclear deterrent force of long range bombers and intercontinental ballistic missiles.

Airman Sanchez is a 1967 graduate of Midland (Tex.) High School. He received his B.S. degree in 1972 from San Angelo (Tex.) State University.

His wife is the former Guadalupe R. Flores.

Loan Approved

AUSTIN — U. S. Senator John Tower today announced that the U. S. Rural Electrification Administration has approved a \$609,000 loan to the Lyntegar Electric Cooperative, Inc. The loan will finance 107 miles of distribution line to serve 574 consumers as well as various system improvements. The Cooperative plans to obtain supplemental financing from the National Rural Utilities Cooperative Finance Corporation. Lyntegar Electric Cooperative serves the counties of Lynn, Andrews, Dawson, Gaines, Hookley, Lubbock, Martin, Terry, Yoakum, Borden and Garza.

ON STATION — Payload bay doors of space shuttle orbiter open in space for releasing scientific satellite in Earth orbit in concept by Rockwell International's Space Division. Versatile space "truck," orbiter will be able to transport up to 65,000 pounds of varied cargo to orbit in huge 15 feet diameter, 60 feet long payload bay. Rockwell International's Space Division is developing shuttle's payload-carrying orbiter and integrating system under contract to National Aeronautics and Space Administration.

4-H'ers Emphasize Health "H" with Information and Service

SPECIAL — Drug abuse, the problems of air and water pollution, helping the retarded, caring about the elderly, organizing blood drives and distributing health information. . . These are some of the things that 4-H'ers across the country have done this year, by participating in the 4-H Health program sponsored by Eli Lilly and Company.

Not only do 4-H'ers look for ways to maintain and improve their own health, but they try to go out into their communities and inform and help to improve the health of their friends, their families and their neighbors.

Work for Clean Air, Water
Air and water pollution was the pressing health concern of an Urbana, Ill. club. The club's entire activities centered around a program called "Environment Control". Speakers, discussions, personal actions and skits were employed to get the anti-pollution message out.

They Accept Opportunities
4-H members have almost unlimited opportunities for service in health projects. In fact, according to the Cooperative Extension Service, many clubs have used novel techniques to put across the message of better health.

In Fayette County, Ohio, one 4-H club sponsored a blood donors drive. With the aid of a "Bloodmobile" the club contacted over 200 new blood donors and raised over 125 pints of blood.

A leader in North Carolina said of the results of her club's health programs, "Our youth are learning to be leaders in our community, county and state by planning and carrying out these activities."

Those taking part in the 4-H Health program receive other benefits as well. Eli Lilly provides incentives and recognition for clubs as well as members who participate. Four young people from each county are eligible for medals of honor, while outstanding clubs are rewarded with certificates of merit.

Earn Scholarships
The top health winner in each state receives an all-expense trip to the 51st National 4-H Congress in Chicago, Nov. 26-30. During the Congress, Eli Lilly will present seven educational scholarships of \$700 each, to national 4-H Health program winners.

For further information about organizing 4-H health programs in the local area, contact the county extension office or state 4-H leader.

AVOID THESE COMMON HOME SELLING BLUNDERS

Curiously, many people who sell their homes today fail to get as good a deal as they should because they start by asking for too much, then end up settling for too little!

In between, they make a host of other blunders. They talk mostly to the wife, since she is often the shopper most willing to talk, but fail to realize that the husband is usually the one who decides.

They explain how easy it would be to fix defects in the house, and never realize that in so doing they are calling attention to defects that might otherwise go unnoticed.

They may bear the expense of repainting or repapering in the hope of getting a better price, and then fail to cut the grass and fix a cracked window that detracts almost as much as the paint or paper seem to add.

They spend hard-earned dollars on advertising to attract potential buyers, then forget to put the pets outside, or in a neighbor's house, so that the pet-shy prospect isn't tempted to get out of the house as soon as possible.

One of the strangest things, veteran real estate brokers say, is to see a homeowner earnestly trying to talk a prospect into buying—but actually talking him out of it. If he feels bad at having to sell his house, the homeowner may lord it over the prospective buyer and even ridicule him.

Some women warn, "Be careful not to track the carpet"—making the prospect feel more and more guilty with each step.

To avoid these and scores of other errors, there is a great deal of advantage in turning to professional real estate brokers. Few people are fully aware of how much help they can render, or how modern their business has become.

Some brokers, for instance, now have an ERA "Moving Machine." If you want to buy a house in or near another

city, tell the broker what you have in mind and he turns on a photocopy machine that is hooked up by telephone lines to another machine in the ERA home office. Six minutes later, your broker's machine turns out six photos, with descriptions of houses available in the area you are moving to.

Similarly, if someone in another city wants to buy a house in your area, your broker's machine sends a picture of your house to the prospective buyer. The brokers who are members of the photocopy network have an association called Electronic Realty Associates, which may be contacted by writing Dept. S, 8600 W. 63rd Street, Shawnee Mission, Kansas 66201.

Whether or not your broker has the ERA photo-by-wire system, you can avoid making some of the common mistakes by heeding these do's and don'ts.

DO put your house in order. If the grass always looks greener on the other side of the fence, some extra lawn fertilizer may mean more green for you.

DON'T be too quick to talk about coming down in price. Your real estate salesperson can tell you when this

may be necessary—if it's necessary at all.

DO try to leave your house completely furnished until it is sold. It looks better with draperies and furniture all in place.

DON'T talk about what you paid for the house. Prices have gone up since then, and some buyers may actually resent you making a profit.

DO dress well when prospective buyers are scheduled to visit. A house seems to bring more money when residents look affluent.

DON'T express annoyance if a prospect criticizes features of the house. He may know more about buying a house than you know about selling one, and someone may have suggested that criticism brings a lower price.

DO be ready with a definite answer as to the date by which you will definitely be ready to move.

DON'T be overly optimistic if a woman looks at your house and says she's very interested. Many a shopper will visit several homes in a day and say the same thing in each.

DO, whenever possible, let your real estate agent show the house. Just by looking at the prospect she can often tell which points are going over well, and which she might as well not mention.

DON'T get the children in on the negotiation. Just one reference to the "terrible" school (which your child may love) or the "horrible" child down the block (who may be one of your child's best friends most days) may remind you that there is room for improvement in the way you present your home.

Keep these tips in mind and your sales program will have a firm foundation.

British Gun Laws Unsuccessful

WASHINGTON, D.C. — Colin Greenwood isn't sure whether rigid gun laws would work in the United States — but he doesn't recommend them as having clicked in Britain.

Far from it. The 41-year-old Yorkshireman, police inspector and lecturer has a pretty firm case that such laws have been a definite failure in Britain. This may shock some American proponents of stiff gun control laws who keep citing their supposed success in the "Mother Country."

"We all thought it was effective — including me. We thought we had a system of controls and not much armed crime for a long time. Now suddenly, relatively speaking. He is certain, that Great Britain and the United States are not at all alike sociologically and that what works or fails in one is not necessarily applicable elsewhere.

"Superficially, France has got very strong gun controls and a very high rate of armed crime. Switzerland has got . . . total availability of guns and virtually no armed crime. Those two countries border on each other.

"Similarly . . . New York gun controls do not work because the guns come in from the surrounding area, right? Why hasn't Canada got New York's problem? Because you

can get a gun into Canada as easily as you can get a gun into New York (despite Canada's nationwide and fairly strict gun control laws, especially handgun controls)?"

"It's not proper to isolate gun crime. It's ruddy dishonest. Guns are just a symptom. . . . What counts is the level of crime with weapons (of all kinds). This is the sort of information it's almost impossible to get." Greenwood wonders.

The APPLE ALMANAC

APPLE FACTS —
• EACH YEAR AMERICANS CELEBRATE "APPLE SAUCE MONTH" IN APRIL.
• APPLES HAVE EXISTED FOR OVER 2000 YEARS.

THE FIRST APPLE TREES WERE PROBABLY BROUGHT TO AMERICA IN 1628 BY JOHN ENDEGOTT, AN EARLY GOVERNOR OF THE MASS. BAY COLONY.

DURING HIS LIFETIME (1774-1847) THE LEGENDARY "JOHNNY APPLESEED" DISTRIBUTED APPLE SEEDS AND SPROUTS THROUGHOUT OHIO.

TODAY THERE ARE MORE THAN 2500 APPLE VARIETIES GROWN IN THE UNITED STATES.

APPLE SAUCE IS THE MOST WIDELY USED OF ALL APPLE PRODUCTS ACCORDING TO THE PROCESSED APPLES INSTITUTE. EACH YEAR 25 MILLION BUSHELS OF APPLES ARE PROCESSED IN 400 MILLION CONTAINERS IN MAKING APPLE SAUCE.

APPLE IDEAS FOR APPLE SAUCE MONTH —
SPRINKLE APPLE SAUCE AND CHOPPED WALNUTS OVER FRENCH TOAST OR PANCAKES.

BAKED BEANS GLOUCESTER STYLE — TO A 1 LB. CAN OF BAKED BEANS, ADD 1/4 CUP APPLE SAUCE, 2 TBSP. MOLASSES AND 2 TBSP. BROWN SUGAR.

USE APPLE SAUCE IN PLACE OF THE LIQUID CALLED FOR IN THE RECIPE WHEN:
• USING A CAKE MIX • MAKING LEMON PLUMMING MIX
• MAKING FLAVORED GELATIN • MAKING MEAT LOAF
• PREPARING A PACKAGED STUFFING MIX
