

THE JAYTON CHRONICLE

JAYTON, KENT COUNTY, TEXAS, FRIDAY, JUNE 21, 1935

NUMBER 25

UP WITH RELIEF ACTIVITIES IN TEXAS

Texas counties representing 100 per cent of the state made up the relief work which basted a relief more than five per cent of the population during April. Tak-
tate as a whole, 14.8 per cent of its people received some relief aid and the total relief consisted of 225,529 persons in ten counties with the best being Hartley, Winkler, Upson, Crockett, Kennedy, Klea, Fayette, Smith.
In the first time in many months, reported as many as 40 per cent of residents on relief, the reported 38 per cent. Only six reported more than 30 per cent of their people receiving aid a month. These were Wheeler, Yoakum, Presidio, Camp and Crockett counties.
In metropolitan areas, Bexar and Tarrant counties carried the lead, falling in the classification of counties having between 10 and 20 per cent of their residents on relief.
Dallas, Galveston and Tarrant lead the group having from 20 to 30 per cent of their residents on relief. El Paso, Mc Lennan, and Wichita in the group from 14.9 to 22 per cent, person established claim to second among the larger counties being listed within the 10 to 15 per cent group.
The case load continued to be lower than at any time since July 1934.

The Penalty Of Leadership

In every field of human endeavor, he that is first must perpetually live in the white light of publicity. Whether the leadership be vested in a man or in a manufactured product, emulation and envy are ever at work. In art, in literature, in music, in industry, the reward and the punishment are always the same. The reward is widespread recognition; the punishment, fierce denial and detraction. When a man's work becomes a standard for the whole world, it also becomes a target for the shafts of the envious few. If his work be merely mediocre, he will be left severely alone, if he achieves a master piece, it will set a million tongues wagging. Jealousy does not protrude its forked tongue at the artist who produces a commonplace painting. Whatsoever you write, or paint, or play, or sing, or build, no one will strive to surpass or to slander you, unless your work be stamped with the seal of genius. Long, long after a great work or a good work has been done, those who are disappointed or envious continue to cry out that it cannot be done. Spiteful little voices in the domain of art were raised against our own Whistler as a mountebank, long after the big world had acclaimed him its greatest artistic genius. Multitudes flocked to Bayreuth to worship at the musical shrine of Wagner, while the little group of those whom he had de-throned and displaced argued angrily that he was no musician at all. The little world continued to protest that Fulton could never build a steamboat, while the big world flocked to the river banks to see his boat steam by. The leader is assailed because he is a leader, and the effort to equal him is merely added proof of that leadership. Failing to equal or to excel, the follower seeks to depreciate and to destroy—but only confirms once more the superiority of that which he strives to supplant. There is nothing new in this. It is as old as the world and as old as the human passions—envy, fear, greed, ambition, and the desire to surpass. And it all avails nothing. If the leader truly leads, he remains—the leader. Master-poet, master-painter, master-workman, each in his turn is assailed, and each holds his laurels through the ages. That which is good or great makes itself known, no matter how loud the clamor of denial. That which deserves to live—lives.

THIRTY MINUTE PAGENT

A thirty minute pagent, The Challenge of the Cross, will be given at the close of the B. Y. P. U. services, Sunday night at the Baptist Church, June 23.

Evangel — Dorris Holley.

1st. Disciple — Audry Robinson.

2nd. Disciple — Bess Porter.

3rd. Disciple — Francis Earnest.

4th. Disciple — Mollie Ward.

5th. Disciple — Jerry Calicoate.

6th. Disciple — Bess Robinson.

Concealed choir with music interspersed. Mrs. Fowler at the piano.

BAPTIST SUMMER REVIVAL

The summer revival for the Jayton Baptist Church is scheduled to begin Sunday August 25, and is to continue for two weeks. Rev. Perry F. Evans one of the State Evangelists is to do the preaching. He is an earnest, able preacher of the Gospel, and we are looking forward to a great meeting under his leadership, and we urge everyone in Jayton and surrounding communities to join us in this effort to lift the spiritual life of our community to a higher plane. Fred McPherson, Pastor.

Commissioner Cal Cade had business in Jayton the first part of this week.

Rex Alexander is now at home after attending school at Lubbock for the past term.

Bob Gochall was attending to business matters in Jayton Monday of this week.

Tom Fowler had business in Clairemont Monday of this week.

Wesley Osman of Clairemont was in Jayton on Monday morning having brought a couple of patients over to see the doctor.

Testing For T. B. In Kent County

Monday of this week, Dr. Brady started the government testing of the cattle in this county as a required health measure.

Ten per cent of all range cattle and all bulls and dairy cattle are to be tested.

There are five crews working in Kent county. Three of said crews working out of Jayton and one out of both Rotan and Spur.

It will take approximately three weeks provided the weather is suitable for working conditions, to complete the work here in Kent county.

Although it will work a hardship on quite a few of the big ranchers in the way of rounding them up twice or else keep the ten per cent in a separate pasture, it is well worth the trouble to have them tested.

Texas Farms Force Ahead on Adjust- ment Program

Farmers of Texas are carrying on adjustment programs regardless of all wild rumors that the recent Supreme Court decision endangers AAA and more than 70,000 new contract signers have shown up this year in the various commodities, according to George E. Adams, assistant state agent of the Texas Extension Service.

Adams reported that he traveled through 26 counties last week including the lower Rio Grande Valley and in all of them the farmers are going ahead with the programs.

Confirming them in their confidence, Secretary Wallace issued the following statement a few days ago. "In cooperation with the leaders of Congress, amendments to the AAA are being perfected which are intended to bring the Act's provisions as to marketing and licenses into line with the Schechter case decision and also to safeguard the farmer's voluntary adjustment program on basic commodities.

"These voluntary adjustment programs were not in the path of the Schechter case decision, and in no event could there be any question of the Government's ability to fulfill its contracts with the farmers.

"Nevertheless, we have taken advantage of the decision to seek perfection in the law which will make certain the Government's authority to continue processing tax rates in accordance with the amended provisions of the Act."

Barrie Cumbie, Sheriff of Kent county and a former resident of Polar was in Jayton, Wednesday afternoon and gave us some of the particulars of the storm that hit in the Polar community Monday afternoon of this week, in which Mr. W. T. Vick lost his life by drowning and the entire community suffered great damage. The storm swept a territory about three miles wide. Destroying out houses, growing crops, and uprooting shade and ornamental trees.

Mr. Vick who lost his life, was a highly respected citizen age 51, and had lived in the Polar community for the past 16 years. He left a wife and two daughters, one married and one single, to mourn his tragic death.

Monday afternoon the Polar community was hit by a terrific rain, hail and wind storm. Crops were completely hauled out for the second time this year. One man was drowned when he attempted to cross a creek on horse back going from his farm lands to his home. His body was found after several hours search. One foot had been caught between two large rocks, in the creek bed and it is supposed the current sucked him under the mad rushing waters and death was the result. There was a light fall of rain in Jayton, much wind but no hail.

Mrs. W. J. Garrett sends the old Home paper to her son Wilson, in Austin, Texas.

Mrs. Tom Keenan, and son Mike of Littlefield, Texas are here on a visit with Mrs. Keenan's brother, L. F. Wade.

Roy Wade of Littlefield, Texas, visited in the home of his uncle, L. F. Wade, last Sunday.

New crop bundle oats were being offered for sale on the streets of Jayton this week.

Notice to Farmers

From County Agent's Office Jayton, Texas.

To All Kent County Cotton Producers:

It will not be long now until the supervisors will be appointed for the purpose of measuring the 1935 cotton acreage. To those who have contracts and rented acres, it will be necessary for the producers to measure off the rented acres and put stakes at each corner of rented acres.

It will be better for you to measure off two or three more acres than your contract calls for so as to have plenty.

The supervisors will measure all cotton land and all rented acres, but they will not be able to tell you in the field how many acres they have measured as they will only make field notes, and the balance will be done at the office.

All cotton land will be measured. Cotton land under Bankhead applications, will also be measured by the supervisors.

Selection of Texas Boys For Enrollment

Selection of Texas boys for enrollment in CCC camps will be confined hereafter strictly to young men whose families are on the relief rolls. It has been announced by Neal E. Guy, enrollment supervisor for the state.

Guy said federal officials had rescinded all instructions which formerly provided for enrollment of worthy unemployed boys and so-called "border-line" cases.

"Henceforth we may admit to the CCC camps only applicants who can make a proper allotment to dependents. It has been ordered that selections for enrollment beginning June 15 must in every case represent families on the public relief rolls.

This means that in the approaching enrollment period, the 12,000 young Texans taken into the camps should be from the relief rolls."

Counties unable to supply their quotas from the relief roll will not be permitted to select non-relief applicants but will notify the state enrollment officer, who will fill the quota from a county which has more eligible candidates than its quota will allow it to choose.

First phase of the enrollment beginning about June 17 will effect only a very few counties, since only 929 boys will be accepted at that time. The second period, July 1 to August 31, will be governed by completion of new camps now under construction.

INTERMEDIATE B. Y. P. U. PROGRAM

June 23, 7:45

I. The power of decision — Peggy Lou Fowler.

II. Something worth remembering — Silvy Lewis.

III. Important individual decision

1. What about Christ — Buddy Self.

2. Choosing our pleasure — T. C. Casey.

3. Choosing our moral standard — J. C. Lewis.

4. Choosing a college — Dell Lansdown.

5. Choosing a life work — Dot Jones.

Charles Robinson and wife are the happy parents of a baby girl which the stork delivered to their home Friday morning. The little lady weighed 6 1-2 pounds and will be the center of interest in their home for many days. The Chronicle extends congratulations to the delighted young parents, the grand parents and the great grand parents.

Mrs. T. C. Moore and Maelu Johnson were here this week visiting Mr. and Mrs. Thos P. Johnson.

Bill Porter and wife spent the first of the week in N. M. visiting Mrs. Porters parents and Mrs. Sidney Cox.

Miss Vida Cox is spending the first part of the summer visiting in Rotan, New Mexico, Trinidad and Denver, Colorado, and will probably attend the University the last half of the summer.

Marvin Fuller is driving a new V-8 bought from the Black Motor Co.

58,000 Applications

Already 58,000 applications for tax exemption under the Bankhead Act are in; Young county's quota of certificates are issued and Fort Bend's are on the way, proving that some Texas cotton farmers are going to be ready for the 1935 ginning season. The Cotton Allotment Board is equipped to take care of applications as readily as they arrive, the only danger being a last minute jam if any considerable number of farmers are not on the job signing their applications during the next ten days.

A few slow farmers can hold up an entire county by not signing immediately.

Cotton production at home and abroad having the center of the stage from now until cold weather, the following statement from C. A. Cobb, director of AAA's Cotton Division will be of some interest:

"Half of the cotton produced in the world last season was produced in the United States, despite the fact that acreage was reduced and average yields were below normal in this country."

"India was second in production, China third, Russia fourth, Egypt fifth, and Brazil sixth. Russia exports practically no cotton and China does not produce enough for domestic consumption. India produced less than one-third as much cotton last season as the United States, and Brazil produced less than one-tenth as much cotton as was produced in the United States."

"The trend of cotton production in India has been upward for the past 35 years," says Cobb. "India may continue to increase cotton production some, but India has a big population to feed. India is using 85 to 95 per cent of her farm land for crops and millions of people in the poorer areas are not getting enough food."

"Cotton production has also been increasing in Egypt but because the amount of land is limited, Egypt's problem is similar to the problem in India. Russia's cotton acreage increased rapidly up to 1930 but since then has shown little change. Cotton production in Brazil has been increasing for many years and the Brazilian Government has encouraged farmers to grow cotton by putting legal restrictions on the planting of coffee."

Kill The Rats

Wars have been lost by generals and won by epidemics of rat-borne diseases, according to Dr. Hans Zinzer in his recent book—Rats, Lice, and History. Texas has more of the diseases that Dr. Zinzer has written about, typhus fever, than any other state, according to Dr. John W. Brown, State Health Officer.

There are two types of typhus fever—the epidemic or Old World type, and the endemic or the New World type, known as Brill's Disease. In the former the death rate is very high and in the latter, commonly found in Texas, it is very low.

The most cases appear during the hot months. The rat and mouse are the reservoirs of this disease and it is spread to man by fleas, lice, or ticks that have fed on an infected rat. The cycle being rat-flea-man.

The symptoms of typhus fever are very similar to those of typhoid fever, except the course of typhus is generally two weeks. The onset of the disease is usually sudden with chills, fever, headache, and general body pains. Nausea may be present. The fever rises quickly to a maximum of 105 degrees. There is also a reddish mottling of the skin and a hacking cough is generally present.

Typhus fever could be prevented by the eradication of rats and mice. This would not only result in the prevention of much suffering but would be of great economic value as it is estimated that the damage by rodents amounts to about twelve million dollars annually in Texas.

Commissioners Court was in session Monday of this week.

Ten cents in cash will be paid to the first five persons who bring a copy of the Chronicle dated May 31 to the Editor.

V. D. Adock and family were visiting in Jayton Monday of this week.

Mr. and Mrs. Bill Cathey were over from Clairemont on a visiting trip last Sunday.

Jayton Wins Over Spur in Softball

JAYTON HAS TWO MORE GAMES OF SOFT BALL WITH SPUR GET BACON IN LAST GAME

Monday afternoon the Spur Independents came down and with what seemed their regular air of confidence took another game from the Jayton Independents by a final score of 14 to 11.

However the game Monday was a little too close to suit the Spur team so immediately after the game they rematched for Wednesday afternoon. So the Jayton team decided that it was high time that they brought home the bacon from the undefeated team of Spur's. Motoring up to Spur Wednesday and in one of the tightest games the writer has ever witnessed the Jayton team finally got the edge on the Spur players and in a 11 inning game won by a score of 16 to 15 in favor of the Jaytonites.

However we must give credit where credit is due, because if it had not been for the favors extended to us by the manager of the Spur team it would have been a little harder to get our hands on the "Bacon."

Too, we appreciate the work of our yell leaders, Webber Williams and Barney Johnson, they really did some real pep squad work for the Jayton team.

One home run was made during the game by Dr. Bob Alexander being the lucky man. But, we do think that it was merely an accident.

Leagues of The Stamford District To Meet in Jayton

METHODIST YOUNG PEOPLE OF STAMFORD DISTRICT TO MEET IN JAYTON

Next Thursday and Friday, June 2 and 28, the Methodist young people of the Stamford district will meet here in Jayton.

The purpose of the meeting is to acquaint the young people with the work of the church and to create a spirit of fellowship between the churches of the Stamford District.

200 delegates are expected to be present from the various churches of the Stamford district. A great program and a great time is being planned for all those who care to attend.

The young people of the Methodist Church of Jayton will appreciate the cooperation of the other churches of the town in regards as to taking care of the out of town visitors.

Cox-Blankinship

Miss Opal Cox, oldest daughter of Mr. Frank Cox, was married on June 1, to Mr. David Blankinship of Los Angeles, California. Mr. Blankinship, a civil and geodetic engineer, is in the government service and travels about all over the United States. Mr. and Mrs. Blankinship leave California soon for Washington state, to go in August to Montana and in the fall to Indiana, New York and later to Florida, probably for the winter.

NOTICE

The Western Produce has changed from Butch Jones to Phillips 66. We pay the highest market price for all lines of country produce. — W. D. Dake.

Mrs Sam McCombs and boys and Mrs. Glen Hancock and son were here this week from Big Spring visiting relatives and friends.

R. B. Bryant of Stamford, Texas was here this week, looking over crop conditions and visiting the Bryant-Link Stores.

Mr. and Mrs. D. Kennady of Lubbock visited in Jayton, Sunday.

J. W. Bandy was in from his ranch Wednesday. He reports everything fine out his way.

Kent county has been taken out of the primary drought district of Texas. That means no more drought loans are available for feed from the government.

Kent county's wheat and oat crop is being harvested this week.

APPLY FOR ADVERTISING RATES

This seems to be a day of soft ballers.

Count your many blessings and forget your grouch.

Most of our troubles are self made or imaginary—why worry.

It is easy to see the other persons sins and oh so hard to see our own Wonder why.

What would bite the hand that fed him? Please don't attempt to lay this sin off on the dog.

Evidently when the Lord was organizing Earth and Company the Devil managed to get in on the ground floor.

When we calmly consider the ingratitude of the human family towards its benefactors we are led to wonder why the lord ever permitted us to evolve beyond the monkey stage.

The man that thinks he has a kick coming jumps at the chance to register his complaint. The man that would toss you a bouquet generally waits until you are dead.

WAS IT HOOVER? — WELL NO

Who made it possible for you to eat when you were hungry? Who supplied you with clothing when you were near naked? Who furnished you a doctor and medicine when you were sick? Who bought your starving stock when the drouth laid waste to your feed, crops, and pastures? Who paid you for the cotton you did not produce? Who paid the school teachers when local taxes could not be collected? Who saved your farms and homes for you when the money lenders could not and would not renew your paper? Who stepped the bank failures and made the banking not only safe for the banker but also for the depositors? Who directed the wiping out of the bank bandits, the high-jackers, the kidnapers, the racketeers and mobsters? WHO? Not Hoover—Make your own answer. Then pipe down; if you can't, then please be as good as Judas who betrayed Christ—Go out and hang yourself.

A PAY ROLL THAT HELPS

Did you know that the pay roll that is maintained in Kent County by the Government, in connection with agriculture program amounts to near \$10,000 per year? Did not know it did you? Well the salary of the County Agent, Assistant Agent, Office help, Committeemen and Supervisors for one year totals \$9,180 and practically all of this is paid by the Federal Government. The only exception is a part of the agents salary that is paid by the county.

The work done in this office, effects every home in the county, either directly or indirectly. Their records of every farm in the county. Acres allotted to cotton, number of bales allotted to each farmer, number grown, number over allotment, and number under allotment, and thousands of other statistics in connection with the farm activities of the county.

Seventy five per cent or more of the pay roll is spent in the county and what is not spent in the county is spent in the state so we might say it's all outside money coming in and it is well worth considering. The direct expense of the office to the tax payers of the county is very small. Office room the cost of which is very little, a few typewriters, and some other office supplies, the total cost of which is small indeed as compared with the benefits derived from the work.

THE AMERICAN WORKER

A fair deal for labor has always been a cardinal principle in this country.

Temporary economic upheavals should not blind us to the fact that the wages, working conditions and living standards of American workmen, skilled and unskilled, are by far the best in the world.

The labor leader who attempts to stir up dissension in time of crisis, and make impossible demands upon industry, is the honest workers worst enemy.

A good example of that is provided by a large metal mining company which, like all such concerns, is find-

ing the sledding hard these days. About ten per cent of the company's workers belong to a union whose leaders attempted to call a strike which might have deprived the other ninety-per cent of their jobs. The union demanded that the company grant a six-hour day, a thirty-hour week, they closed shop, a minimum wage of \$1.00 per hour for underground workers, and similar things which, in view of conditions, would have bankrupted the company.

Fortunately the strike call failed to carry by a single vote. Had but one man thrown his influence the other way, hundreds of men would now be out of work, because a handful of arrogant labor leaders wanted to show their authority.

American industry is doing its best to provide new jobs, pay fair wages and provide the best possible working conditions. The great bulk of workers know how to appreciate that and they will do well to beware of the agitator who, like the crooked politician or employer, seeks only his own profit.

YOU CAN'T WIN

The reckless driver, like the habitual criminal, can't win.

Every newspaper carries the evidence of that, in accounts of those who have been sacrificed to speed, to incompetence, and to carelessness at the wheel.

The tragic end to the great career of T. E. Shaw, the famed "Lawrence of Arabia," was headlined in the papers of the world a few weeks ago. Not yet forty, Shaw had done war service whose value to the English cause was so great as to make it almost unappraisable. He had distinguished himself as a translator of Greek classics. He was one of the most brilliant of living archaeologists. He was a military and mechanical genius of the rank. It was certain that his period of greatest achievement still lay in the years ahead.

Shaw's "hobby" was to drive automobiles and motorcycles at incredibly speeds on country roads. According to news accounts, his cycle was going at around eighty miles an hour when he was forced to deliberately crash to avoid striking a boy on a bicycle. A few days later he died, without regaining consciousness. His doctor said that it was best he did not live, because of the terrible injuries his brain has sustained in the accident. Congenital recklessness had robbed the world of one of its gifted minds.

Every year in this country alone, some 35,000 people die—victims to improperly-driven motor vehicles. Among them are the famous the obscure, the brilliant and the mediocre. Each life lost means that the nation's resources have been sapped—each death means misery and unhappiness to others. Reckless driving is an unbeatable game, at which the player always loses—and which likewise penalizes and robs the innocent.

THE NEED OF YOUNG PEOPLE TO LEARN TO WORK

(By R. E.)

It is needless to say that the younger generation needs to be taught to work. The general tendency is to run around and have a good time. A person must have a certain amount of recreation, but it must not all be play.

There have been several bills introduced into several legislatures trying to solve the problem of child labor. Some of them try to go from one extreme to the other. One bill prohibited young people under the age of eighteen to engage in competitive business. A person would be denied the valuable experience that would be so helpful to him until he was over the age of eighteen.

The prohibition of child labor is all right, but why go to such an extreme? The greatest teacher there is is experience. Would you want to deny the young people the opportunity of being taught by the greatest? It is better to substitute work for idleness; for it is said that idleness is the devils workshop. One of the greatest and most important advantages that a person can have is an active and acute mind. Idleness does not increase the keenness of perception.

Some people will say that the young people are usually in school until they are eighteen years of age. That is right, but they either work at getting an education or drift through. Education and work run parallel. They are not on opposite sides of the fence, but they are co-ordinate forces.

If the young people are taught to work, they will be better fitted to contend with the problems of later life. We know the need; why not satisfy it? In teaching the young people to do more work, the older generation will bring forth a sturdy, willing, and capable race to take their place when the times comes.

GOVERNMENT BANK UNSUITED TO U.S.

Would Serve Politics Rather Than Business Needs, Says R. S. Hecht, Citing Previous Experiences.

QUOTES PRESIDENT JACKSON

Extent and Diversity of This Country Presents Different Situation From Europe and Makes Regional Banking Necessary.

WASHINGTON, D. C.—A refutation of arguments in favor of a government-owned central bank system for the United States is presented in a statement by R. S. Hecht, President of the American Bankers Association, based on exhaustive studies of European central banks. He also points out the disastrous consequences of previous central bank experiments in the United States.

"Our present regional Federal Reserve System under private ownership is infinitely better for this country than would be a government-owned and controlled central bank," Mr. Hecht says. "If history teaches us anything, it is that it is almost certain that a central bank so owned would be run to meet the varying exigencies of the government in power rather than to serve the commercial needs of the country."

Central banking has been tried twice in the United States, but was finally abolished because the credit control which the central banks exercised became objectionable and unpopular, he goes on to say.

What Andrew Jackson Said

"The continued existence of the Second Bank finally became a bitter political issue and President Jackson succeeded in abolishing it," Mr. Hecht says. "Permit me to quote from his farewell address: 'The immense capital and peculiar privileges bestowed upon it enabled it to exercise despotic sway over the other banks in every part of the country. From its superior strength it could seriously injure, if not destroy, the business of any of them which might incur its resentment. . . . If you had not conquered, the government would have passed from the hands of the many to the hands of the few; and this organized money power, from its secret connive, would have dictated the choice of your highest officers. . . . The forms of your government might, for a time, have remained, but its living spirit would have departed from it.'"

When the Wilson Administration considered banking reform it carefully kept away from vesting central banking powers in a single institution and instead introduced the regional idea by creating twelve reserve banks located in different economic and geographical sections of the country. Mr. Hecht says, a plan that has worked exceedingly well because the separate banks are under the guidance of men chosen on account of their intimate acquaintance with the problems and needs of their respective territories. He continues:

"The great size and diversity of America tends to make a central bank undesirable. The central banks of Europe such as the Banks of England, France and Germany, cover areas not as large as some of our states. A central bank in the United States on the other hand would be called upon to administer the financial policies of an area larger than all of Europe, in which there are quite a number of central banks.

Subservient to Popular Demands

"Moreover, history has proven that any banking system entirely owned and dominated by the government usually demonstrates much greater ability in aiding expansion of credit than in putting on the brakes at the right time to prevent undue inflation by restraining and contracting credit. This is easy to understand because in times of depression everyone is urging the government to make money and credit easy; and to encourage expansion.

"On the other hand, it always has been and always will be a difficult task for any government to call a halt in time of apparent prosperity because in the very nature of things the government would be very sensitive to public criticism and would hesitate to take any action which would tend to curtail business activity. It is such undue susceptibility to popular demands which makes government banking inherently weak.

"Our studies show that of all the central banks at present existing there are only four whose stock is owned by the government. The newest central bank is that of Canada, which opened its doors only a few months ago after a most exhaustive study had been made of the experience of all nations with the result that the stock of the Bank of Canada is privately owned."

The American Bankers Association. Mr. Hecht says, is convinced that a central bank would not be in the interest of the public or the banks. This position, he added, is "well understood by the President and the leaders in his administration for we have been absolutely frank with them in all of our discussions and have missed no opportunity for emphasizing that in our opinion no banking system will, in the long run, be sound if it is dominated entirely by the ever-changing political administrations. We should do all we can to keep our banking mechanism as far removed from partisan politics as possible."

THE SAME COUNTRY

By ROBERT V. FLEMING Vice President, American Bankers Association

There is a growing appreciation, both on the part of the people and the Government, of the earnest and sincere efforts being made by bankers to aid in recovery. It is desirable that we miss no opportunity to foster public understanding of the bankers' problems. We are living in an age of complex and upset economic conditions. Our affairs are closely inter-related not only within our own borders but extend to other countries throughout the world.

R. V. FLEMING

own borders but extend to other countries throughout the world.

The Greatest Difficulty

I think the greatest difficulty we have to overcome in America today is due to our impatience with the progress we are making towards recovery. We must realize that while the Government can help by directing some measures for relief and recovery, we must help ourselves by doing our share to give impetus to the Government's efforts. We have the same country and basically the same businesses, factories and people we had prior to the depression, and business initiative must step forward if real recovery is to be achieved.

The theory we often hear expressed that banks create business activity is wrong. Banking can only make a supplementary contribution to business activity. Bankers have the facilities and the desire to extend credit, but business must initiate activity by seeking the credit which is readily available to all worthy borrowers.

Let it be said for business, however, that business men are as eager as bankers to contribute towards recovery. I think some of the trouble lies in the fact that too many legislative measures have been proposed for reform which leave an uncertainty in the minds of business leaders as to their eventual outcome and effect. Consequently, they hesitate to expand until the probable effects of such legislation are known.

The modern husband knows more than his wife thinks, but he does not know quite as much as he thinks he does.

Specials

Landers & Gardner

- SPUDS, (New crop, 10 lbs. The Best)
- COFFEE (Pure 4 lbs.)
- TOMATOES (No. 1 cans per can)
- PORK & BEANS (Can)

Everything From The Cradle To The Grave

HOW I HAVE IMPROVED MY BEDROOM

...at home that I could make into a very neat table bedroom. For a years we girls had plan-

ned to fix this room but somehow we just never did it. My older sister had papered it two years ago with the intention of completing the room but she married soon after she began working on it so that ended our doing anymore to it. This year

when our 4-H Club was organized I thought when our county home demonstration agent asked who would like to be the bedroom improvement demonstrator for the club I thought here would be my chance to get the room fixed, but some of the other girls suggested that I be bedroom demonstrator for the club before I ventured to say that I would. After they did this I felt like I had to do the best I could for the club as well as myself. The next step was getting my parents approval. That was not hard at all for they were anxious for the room to be fixed so that my younger sister and I would have a more convenient room.

This is what I started out with in the room: a bed and a rickety-rackety dressing table and an old chiffonier that was about to fall apart. Now I have made the room comfortable and attractive by adding and rearranging seven pieces of furniture, a clothes closet, bedspread and one sheet which is three yards in length. Getting all of this done was no easy task but I can say that it was a most interesting and exciting one.

Upon checking over my bed I found that I needed a spring cover, mattress cover, mattress pad and a spread. I made the pad for the mattress from an old quilt. No cost for that. The mattress cover was made of unbleached muslin which amounted to a small cost. I am using a quilt over the top of the spring tied down to keep from slipping. One of

these days I am going to make a spring cover which will cover the entire springs so I won't be bothered with so much dust. As soon as I had the bed a nearly standard as I could manage I went to work on a clothes closet. All we had in the beginning was a corner in which a closet could be built. In this corner there now is a clothes closet which extends to the ceiling and is five feet long and two and one-half feet wide. I have five shelves for storing flat articles and a shelf across the top of closet to store quilts, a hanging rod, two hat stands and a shoe rack. We used veneer board in making it and have papered it on the in side and outside. The paper on the outside being the same as that used on the room. Ask the family what we like best about our room and everyone of us will say "The clothes closet of course." Our next favorite is a bed spread which is peaced in the nine patch design with a green print solid green and unbleached muslin. It is interlined with an inexpensive cotton outing and lined with muslin. Then quilted. We are proud of it. It did take time but we don't begrudge the time we spend. I wish you could see it for I know you would like it, too.

The dressing table was made of apple boxes, a dried fruit box and a cotton plaid in green. The top is of veneer board stained in walnut. I have papered it inside and out and divided the drawer into compartment for my cosmetic. The stool is made from a mail keg.

I made the study table, book shelves and bedside table from veneer board and various scrap lumber which could be found around the place. I don't think there is a piece of scrap lumber to be found within 1-2 mile of our place after doing this bedroom work. The floors were stained with this mixture, car oil, vinegar, kerosene and paraffin. We like this very much.

After we had done all we could to make the room as comfortable and convenient as possible we all stood off and gave it the once over and said that the eleven dollars and sixty-five cents could not have been spent by our family to a better advantage and the time we spent in doing it was a pleasure to us.

My mother and dad were interested in this as I was and would never let me give up. Mother was only to glad to help me and never complained about the work but looked forward to the time we would have a pretty bed in the room. Of course dad did not help in the way of doing much of the work for he was so busy farming but he furnished the funds to do it with and never discouraged me by saying I was spending too much or that he thought it was a waste of money or that the money could be used for something else. Father did

enjoy teasing the home demonstration agent by asking her when she was going to encourage the family in doing something for him and asking her, when she made visits, "What else are you going to start around this place?"

I could not say that my room is finished for there will be things that I shall want to add, I know, or improve still more some of the things I have done but for the present it is completed and I can look back and think what a lucky girl I was to be enrolled as bedroom demonstrator for my club. My family feels as if 4-H club work has been just the thing I needed most, and they say they needed it, too. My parents deserve much credit in my ever being able to do what I have done. We have to have cooperation to ever do much and I have had it, from home, club and agent.

Signed Maxine Goodall

THE HARMONY H. D. CLUB NEWS

The club learned to finish seams of different materials given by H. D agent.

The seams of sheer materials should be pinked and not pressed flat, but both edges to one side. Materials that are easily to fray should be overcast. Larger seams should be taken in wool material. Press out flat turn the edges under and sew. This makes a nice finish for a coat. There were six present with one new member, Mrs Mark Cave.

Mrs. Ivey F. Murdoch

THEY MAY LOOK ALIKE ON THE OUTSIDE BUT THE INSIDE THEY ARE DIFFERENT

on the inside created by friction in cause of blowouts. Firestone different on the inside—they are the patented extra process of treading that soaks every cord and every strand with pure liquid evening internal friction and their make of tire is Gum-Dipped. performance records again the undisputed evidence that Firestone tires are not only blowout-proof, greatest protection against there are three questions and it will solve the problem of a buy:

1—"Will the tread give me the traction and protection against

Recent tests by a leading University at Firestone High Speed Non-Skid a car 15% quicker than any other treading makes. For eight consecutive Firestone Tires have been on the car in the dangerous Pike's Peak here a skid means death. This is the evidence that Firestone gives the greatest protection against

2—"Are they blowout-proof?" Firestone Gum-Dipped Tires have amazing records for being blowout-

proof of any tires ever built. In the gruelling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Not one of the 33 drivers had any tire trouble of any kind.

Ab Jenkins drove his 5,600 pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles at 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind. These are most amazing proofs of blowout protection ever known.

QUESTION 3—"Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

ANSWER—Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile due to the tough, wear-resisting tread built with higher shoulders and a wider, flatter contour. This rugged tread is held securely to the Gum-Dipped cord body by Firestone's patented construction of two extra layers of cords under the tread, a special construction feature not used in any other tire. Unequaled mileage records by thousands of car owners add undisputed evidence of longer wear and greater economy of Firestone High Speed Tires.

MAKING IT HARDER FOR BANK ROBBERS

Mechanical Devices That Impede the Work of Bandits Described by Bankers Association Official.

The impediments which the hard working bank robber now meets in plying his trade among small as well as large banks are described by James E. Baum, Deputy Manager American Bankers Association in charge of its Protective Department, in an article in "Banking" published by his organization.

"Protective equipment will minimize if not prevent loss," Mr. Baum says, "such as the silent automatic type of alarm, approved tear gas systems, several styles of bandit resisting enclosures and timelocks, or safes equipped with timelocks, which can be set for intervals of a few minutes.

"The silent automatic alarms operate in the beginning of a holdup and through actions carried out by the bank employees in obedience to the bandits' own commands. They are adaptable to the smaller banks which continue to be easiest targets for bank robbery.

Tear Gas Systems

"Tear gas systems have their advantages as self-contained protective units where outside aid is inconvenient or too remote from the bank to be effective. One objection to the use of tear gas in preventing holdup is the need of pressing a lever or button to discharge it. Although this necessary action seems too much to expect of the victims in a crisis where their lives are in jeopardy, the fact remains that tear gas systems have defeated bank robbery. Its deterrent value is also important.

"Different styles of bandit resisting enclosures are available. The lock manufacturers also produce timelocks which can be set to open at intervals of five minutes or longer. These locks are especially adapted for attachment to small safes or chests for safeguarding surplus funds while the bank is open for business."

Inspector at CCC camp, "Did you shave this morning?"

Merle Rose, "Yes sir."

Inspector, "It does not look like it."

Merle, "Well, sir, I could not find my axe this morning, so I had to use the razor that the camp gave me."

H. D. Club News

BRINE FOR QUALITY PICKLES

"The brine cured cucumbers better prepares the tissues to absorb flavored vinegar, or syrup so I am curing my cucumbers for making pickles," says Mrs. Bessie Shipp of the Harmony H. D. Club.

Mrs. Shipp is using this method for brining. A brine is made by dissolving one pound of salt in nine parts of water. Pack cucumbers in sterilized stone jars and cover with brine. Use plate or hardwood board on top to weight down the cucumbers down. The brine should during the curing process be strong enough to

float fresh eggs. When extra salt is added put on cover so salt will dissolve and not sink to the bottom. When extra salt is added, it should be added in this proportion, to every ten pounds of cucumbers add one-half cup of salt. It takes the cucumbers from four to six weeks to cure. Test by cutting a cross section of the cucumber. If any part is white or opaque it is under cured.

CLOCK MAKES CONVENIENT RECIPE FILE

"This was once upon a time an old clock," Mrs. George Johnson, cooperator of the Clipper H. D. club told the club women as she showed them

a convenient recipe file which she had made.

"The clock furnished all necessary material even unto the hinges and nails. I used the door for a picture frame," she further stated.

"I suggest that you classify your recipes under these headings; beverages, breads, cakes, candies, cookies, desserts, eggs, fish, frosting and fillings, garnishes, meats, salads, sauces, and vegetables. I find this classification a most convenient one.

Journalist, "How do you catch rabbits out in West Texas?"

Harold Kenedy, "We get behind a rock and make a noise like a lettuce leaf."

DELINQUENT TAX NOTICE

Notice is here-by given that after June 30, all taxes due and not paid will be subject to all penalties, costs and interests. This runs back as far as you owe back taxes and if you will pay this month and before the 1st day of July you will be saving yourself much money. All tax payment extensions are off and forced collection will become the law again. We earnestly urge the people who are behind with their taxes to make every effort within their power to meet their obligations to the state and county before the end of June.
