Funeral Held Wednesday Mrs. J.H. Montgomery

Week Jayton

Mrs. J.H. Montgomery, Sr., 79, died at her home in Jayton, Monday, July 21. She had been in ill health for some time.

Her funeral services were held at the Jayton Methodist Church, Wednesday, the 23rd at 10 a. m. The pastor, the Rev. Tommy Ewing officiated in the service. Born Ida Pearl Young, she came to Kent County from Callahab County. She married J.H. Montgomery in 1922. He preceded her in death in 1943.

She is survived by two sons, John H. and Jim B. Montgomery both of Jayton. Seven sisters, Mrs. John Gilbert, Cisco; Mrs. Clyde King, Midland; Mrs. Ben Harper, Highland, Calif.; Mrs. Earl Rutherford, Putnam; Mrs. R.W. McElmore, Galena Park; Mrs. Jake Barnes, Chatooga, Okla.; and Mrs. H.V. Vittiev, Rottan; and one brother, Raymond Clark of Abilene.

Pallbearers were Rex Alexander, Ernest Thomas, R.E. Avant, W.C. Dibrell, Holbert Lewis, Dallas Kenady Nolan Grice and Morris Collett.

Interment was in Jayton Cemetery by Weathersbee of Rottan.

The Girard H.D. Club Has Meeting

The Girard Home Demonstration Club met July 16th in the Home-making Cottage. Opal Swearingen brought the meeting to order. Neta Stephens read the minutes and gave roll call. Program was Plan Fair Exhibits by members. 8 members were present with two visitors.

Hostess was Jewel Hooper. The club will have a cake party in the Park July 31st at 5 p.m. August is vacation month so there will be no club meeting until Sept. 3rd.

A Very Good College Plan

"Your future may be drastically changed if you pay attention to the following announcement. The Connally-Carrillo Act provides that a graduate of a Texas accredited high school can attend a Texas state supported college with tuition and fees paid by the state, if the student was in the top fourth of his class and the total family income does not exceed \$4800. If you plan to attend any state college and think that you are eligible for this program, then write or call the Scholarship Advisor, Cooke County Junior College, Gainesville, Texas 76240."

Mrs. R. J. Stanley entered the Rotan Hospital and had surgery Wednesday morning. At the time of this writing we do not know her condition.

Mr. and Mrs. S.T. Plitts from Nacogdoches were here visiting with Mr. and Mrs. John Montgomery last week.

Euel Harrison attended the funeral of Pete Lane Thursday. Companies in the past in one way or another. If this group manages to come up with a better deal for the insurance buyer, this, within itself, could be a great political plumb for the Governor.

Mark A. Geeslin Gets High Honors From National Agents Association

College Station---Mark A. Geeslin, Kent County agricultural agent, has been named to receive the highest award given by the National Association of County Agricultural Agents, their Distinguished Service Award for 1969.

The 18-year member of the Texas Agricultural Extension Service is one of seven Texans who will receive the recognition. The award is made annually to the nation's agents who have, over a period of 10 years or more, made outstanding contributions to agriculture and improved rural living.

The Texas Association nominated Geeslin, and confirmation by the national organization was announced by Texas Awards Committee Chairman Paul D. Herschler, Hopkins County Agent.

Geeslin was cited "For outstanding leadership in developing through the County Program Building Committee programs which have resulted in greatly expanded 4-H and adult participation and additional income for farm and ranch families. 4-H Clubs in Kent County have increased from 2 to 11 with a corresponding increase in membership."

The Kent County agent has been instrumental in organizing a county livestock program which brings in an additional income of more than \$15,000 to county 4-H members. Five facilities have been constructed to handle the annual show.

The honoree has supervised the work of six state winning 4-H Club members while one has been named a national winner in the soil and water conservation program. Geeslin's work in brush control and range improvement, based on demonstrations and research plots, raised the income of many stockmen.

Through the award winner's efforts, soil testing and fertilization on dryland farms are now an accepted practice. He

has also assisted in important insect control work and fall control of boll weevil. Diapause studies in Kent County were among the first made in Texas.

Geeslin attended Tarleton State College in Stephenville and was graduated from Texas A&M University in 1949. He has also done graduate work at A&M, University of Arkansas and Colorado State University.

He is active in civic affairs in the community and is vice president of the Lions Club. He is listed in "Who's Who in Methodist Church" and is an active Mason. His work in Rural Boy Scouting has received national recognition, including the Silver Beaver from the Boy Scouts of America.

The awardee will be recognized during the Texas Association's annual meeting in Houston Aug. 3-5, and presentation of the awards will come during the national meeting scheduled for Sept. 21-25 in Atlantic City, N. J.

Your last chance to buy a "1969 Girard School Annual" See Mrs. Maurine Dyer in Girard for the purchase of these books at only \$5. There will not be any ever again when these are gone.

Harold and Marsha Seyvertsen, Fremont, Calif., granddaughter of Mr. and Mrs. R. A.

Kent County Dress Revue To Be Held Monday 28th

Jayton Gets Many Blocks of Paving

There are now many blocks of new paved streets in the town of Jayton, both in precinct No. one and in precinct No. Four. This is through the courtesy of County Commissioners Gordon Hamilton and W. C. Dibrell.

You don't have to wait until it rains to know that this new paving is going to mean a lot to the people of Jayton, and others who travel on these streets.

Thanks to Hamilton, Dibrell, and the other members of the Commissioners Court.

The Kent County Dress Revue will be Monday, July 28 at 8:30 p. m. in the District Courtroom. The Dress Revue is the culmination of 4-H Clothing workshops. Girls participating in clothing workshops are Lisa Ballard, Patty Edwards, Rena Bural, Kathy Ballard, Cheryl Pickens, Lesa Pickens, Jan Kimmel, and Sharon Edwards from Girard; Deborah Stewart, Teresa Stewart, Vena Lee Cravey, and Lisa Cravey from Red Mud; and Danella Sartain, Elaine Gallagher, Sally Garcia, Rhonda Williams, Paula Mayer, Minette Geeslin, Billie McMeans, and Penny Sartain from Jayton. Adult leaders helping conduct the workshops are Mrs. Hugh Turner, Mrs. Durward Pickens, Mrs. Jarry Parker, Mrs. Bob Gallagher and Mrs. Bill Sartain.

Cancer The Silent Killer

Cancer often is spoken of as a "silent disease" because of the way it develops in many cases without producing any noticeable symptoms. And this silence can be deadly.

Pain, which is most often thought of as accompanying diseases, generally isn't present with cancer until it is far advanced and has passed the "silent" stage, reports the Texas State Department of Health.

Usually cancer can be treated satisfactorily if detected in the early stages. The difficulty in cancer control lies in early detection of the disease. This is the reason regular—at least yearly—physical examinations are so important.

Only a physician can tell if cancer is present. Any suspicious symptoms should be examined by the family physician. But often, by the time symptoms of cancer show up, it is too late for cure. Treatment of advanced cancer is difficult.

Mooreland, Sr. have been visiting here with their relatives the last week.

To Graduate At Oklahoma Christian College

Dana Carroll Johnson, son of Mr. and Mrs. C.W. Johnson, Jayton, is scheduled to graduate from Oklahoma Christian College on August 8.

Johnson, a physical education major, will be among 45 students getting bachelor's degrees at the close of the spring semester.

OCC, a four-year liberal arts college in Oklahoma City, will have Dr. John Stevens, President-elect of Abilene Christian College, as its commencement speaker. The 3:30 p.m. ceremony will be held in Hardeman Auditorium.

Johnson is a graduate of Muskogee High School, Muskogee, Oklahoma.

The showers of rain received in Jayton might not have been much in measurement, but it seemed to have given some relief in the heat wave we have been having. Hopes are still high that there will be a good measurement of rain soon.

Rotation Deferred Grazing A Recommended Practice

The use of Rotation Deferred Grazing Systems to improve our native range is one of the most effective tools that we have. These systems are certainly not a cure-all to diseased range production, but may be and sometimes must be coupled with other range practices such as Proper Grazing Use or Brush Control in order to complete a good range management program. Rotation Deferred Grazing is a vehicle to help us get where we are going in regards to range improvement. It is sometimes referred to as the Cadillac of range management practices.

The following are some results of research compiled by Dr. Leo Merrill - Texas Agricultural Experiment Station, Sonora, Texas---

Research results from the Ranch Experiment Station from 1949 to the present have shown that rates of grazing, livestock combinations, and deferred rotation were important in improving vegetative composition and increasing economic returns.

After 11 years of Rotation Deferred Grazing use where each of 4 pastures rested 4 months and then was grazed 12 months, stocking rates were

increased by 33%. These pastures carried the increased grazing load and, at the same time, made larger range improvements than any other grazing treatment for the last 9 years of the study. Returns per acre for Rotation Deferred Grazing over the last 7 years were \$6.47 gross and \$1.68 net, compared with \$6.00 gross and \$0.66 net for heavy, continuous grazing.

Generally speaking, due to the increase in temperature and decrease in rainfall, grass production drops sharply after the first of July. In fact, about 70% of grass production is made

ABOVE PHOTO shows native rangeland destroyed by excessive grazing on the left and healthy, vigorous rangeland on the right which receives proper grazing management.

by this time each year. For instance, blue grama will produce approximately 7 leaves to 1 fruiting stalk in the spring but in the fall it is closer to 4 leaves to 1 fruiting stalk. In other words, our last summer rains produce almost 50% less vegetative growth, which is utilized by livestock, than our earlier spring moisture.

July and August is an excellent time to take a close look at our grass crop to determine the need for adjustment in livestock numbers. If use of available forage is beginning to approach or is near 50% right now is the best time to

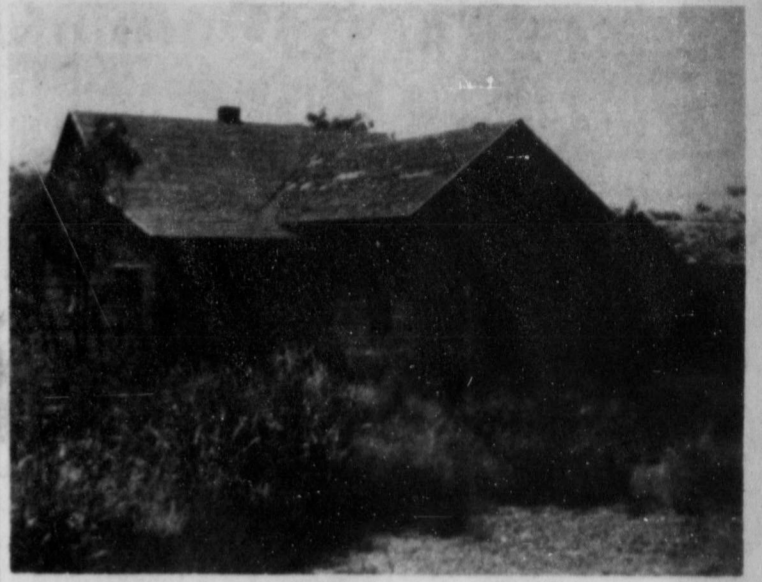

make livestock number adjustments, and not after plants are grazed excessively, livestock are in poor flesh, and cattle prices have lowered.

Plants are like individuals we are associated with—we need to know and recognize them when we see them. As technical people we provide assistance in the needs of plants. As a livestock producer you need to know this also, as the livelihood of your range-lands and more importantly the livelihood of you and your family depends more and more each day on your technical ability to produce more product, more economically so as to compete in the modern economy.

Family of Loyce Burkett Has Reunion

Mrs. Lois Burkett had a reunion of her immediate family in Jayton Saturday and Sunday. All three of her sons and families got together at the cafe. She said this was the first time all of them had been together in quite some time.

Do You Recognize It--

Here is the Jayton Chronicle Mystery scene for this week. This old house was built about the turn of the century, and is not far from a busy highway serving Kent County. Do you know where it is? The first to call 3593 with the correct answer after 9:00 a. m. Friday gets a year free reading to the paper.

Funeral For Pete Lane Held Tuesday

Funeral for W. T. (Pete) Lane 53, of 434 Green, an employee of the Texas Highway department, was held Tuesday at 2 p. m. at North Memorial Chapel, with the Rev. J.L. Mayhew, pastor of the First Methodist Church, officiating. Graveside rites were at 4:20 P.M. Thursday in Rule Cemetery.

Pallbearers were Ray Green, Ross Clark, Tobert Elkins, John Coppinger, Riley Walker, and Duward Zimmerman. Mr. Lane died enroute to Hendrick Memorial Hospital about 7 a.m. Tuesday after suffering an apparent heart attack at his home.

He had been in ill-health for about three years and is returned to work after recovering from another heart attack.

Born July 25, 1915, in Jayton he married Mrs. Ruth Mason, Nov. 8, 1941. The couple came to Abilene in 1954, when he started working for the highway department.

He was a veteran of World War II, a 32nd degree Mason

Hello World--

Mr. and Mrs. Raymond Hughes are the proud parents of a daughter born at 2:28 A.M. Sunday, July 20, 1969. They have named her Joni Fawn, who weighs 6 lbs. 3 oz. and is 19 1/4 inches long. The mother and baby are reported doing fine in an Anson hospital. Mr. Hughes is the new coach for Jayton High School.

Services for John Franklin Johnson, 82, retired farmer, were held at 2 p. m. Monday in Donley. He was the grandfather of Bro. Tommy Ewing.

and a member of the Methodist Church.

Survivors include his wife; a daughter, Mrs. Margaret M. Glover of Rocky Mount, N.C. three sisters Mrs. Henry Bilberry of Colorado City, Mrs. T.L. Jones of Bryan and Mrs. Melvin Helzik of California, one granddaughter and one great granddaughter; several nieces and nephews.

He was a graduate of the Jayton High School

Some of his class mates were Jack Holley, Med Wade, Beal Murdoch and Rex Alexander.

4-H's ALERT to

55,300 DEATHS BY MOTOR-VEHICLE ACCIDENTS		7,500 DEATHS BY BURNS
7,400 DEATHS BY DROWNING	2,000 DEATHS BY FIREARMS	2,400 DEATHS BY POISONING

ACCIDENT PREVENTION

The National 4-H Safety program is sponsored by General Motors.

"Safety starts with you!" That is the assumption of 4-H youths throughout the state. Regardless of where they live, who they are or what they do, they soon learn that safety pays big dividends.

These young citizens participate in the national 4-H Safety program sponsored for 25 years by General Motors. Scores of adults work with the 4-H's as volunteer leaders under the supervision of the Cooperative Extension Service. For boys and girls to become safety conscious early in life is the aim of the 4-H Safety program, says a 4-H spokesman.

The program is beamed to youngsters in the 9 to 19 age bracket. A checklist of hazards encountered in everyday activities becomes the focal point of many projects.

Right now during vacation time 4-H's, and their families as well, strive to stay safe while they enjoy swimming, boating, hiking, camping, hunting, fishing, bike or horse-back riding.

Teenage drivers are urged to take extra precautions around town and on the highways because of the many visitors who are unfamiliar with the area. Older teens serve as extra eyes and ears for the elderly and the very young at parks, beaches, street crossings and the like.

In recognition of noteworthy safety projects, General Motors annually provides county, state and national 4-H awards. In the order named they are: safety medals, expense-paid trips (one per state) to the National 4-H Congress in Chicago; eight \$1,000 scholarships.

Legal Notice - -

Being certified by the Commissioner of Agriculture of the State of Texas for this purpose, the Southwestern Peanut Growers' Association of Gorman, Texas, proposes a referendum election on September 24, 1969, under provisions of House Bill 764, 61st Legislature on the proposition of whether or not peanut producers in the State of Texas shall assess themselves a maximum amount of \$1.00 per net ton (farmers stock basis) to be collected at the point of first processing or sale and to elect members for a 9-man commodity producers board to administer proceeds of such assessment to be used for research, disease and insect control, education, and promotion designed to encourage the production, marketing and use of peanuts.

The referendum and election will be held by mail ballot

NO MATTER HOW IT FALLS IT SPELLS **DISASTER** TO GROWING CROPS... but you can prevent financial DISASTER from HAIR by insuring your crops before the storm. See or call your Farm Bureau Insurance Agent for this valuable protection at your County Farm Bureau Office.

Phone 989-2644

which will be provided to all eligible voters not later than 15 days prior to the election. Ballots must be mailed to the polling place at Gorman, Texas, before midnight on the date of the election.

Any person within this state engaged in the business of producing, or causing to be produced peanuts for commercial purposes is eligible to vote, including owners of farms and the tenants and sharecroppers, if such person would be required to pay the assessment proposed.

Any person qualified to vote at the referendum may place his name in nomination for membership on the proposed commodity producers board by application to the above organization signed by himself and at least 10 other persons eligible to vote in the referendum. Such applications must be filed at least 30 days prior to the election date.

Any person qualified to vote who does not receive a ballot prior to September 9, 1969, may obtain one at his local County Agent's office.

HARMONY COMES TO THE SCHOOLS

In a year of unprecedented discord in the schools one unique idea is bringing harmony to the classrooms.

To thousands of spellbound youngsters—many of whom have never before heard or seen 'live' music performed—a famed jazz pianist-composer and his quintet are presenting jazz lecture-concerts as special educational programs in public school auditoriums.

"The purpose is to make children aware of this important aspect of American culture," explains the star and lecturer, Billy Taylor. "Jazz is a truly American music form," he tells the youngsters, "and you who are growing up in this country should know about it."

Students line up for autographs after lecture-concert.

Called "And All That Jazz!" with such classics as "Take The A Train" and "One O'clock Jump," as they tap their hands and feet to the different rhythms.

The musicians demonstrate the many forms of jazz.

The concerts are presented to often as many as 1200 students at a time. With Taylor as their guide, verbally and at the piano, the youngsters find out how this music form was first brought to this country by the black man, developing from work songs and spirituals.

They hear ragtime, gospel style, bossa nova, and bebop. They listen to a familiar rock number, "Sunny," played in jazz treatment. They hear the Billy Taylor Quintet swing out

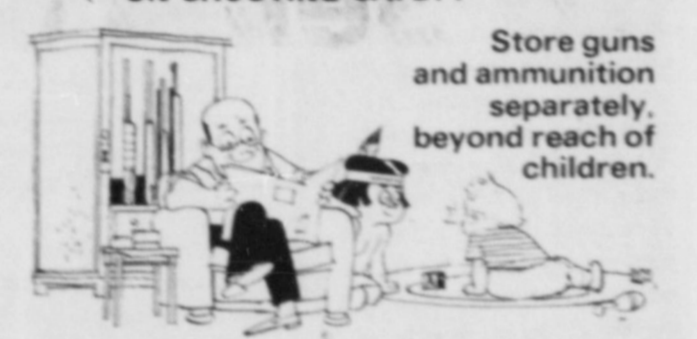

education break into spontaneous applause right along with the delighted youngsters.

"This is the kind of thing we desperately need in school assemblies," said one educator. "It's more difficult than ever before to get the attention of today's young people, to teach them how to learn by listening. Billy Taylor is doing that as well as educating—and entertaining—them."

The makers of Cold Power, the leading cold water detergent, who have sponsored the free concerts throughout this school year as a public service, have been deluged with letters from grateful school principals, teachers and parents. The concept was proposed to the Cold Power executives by Jazzmobile, an organization designed for sharing the creative contributions of great jazz artists with communities that might otherwise be unable to hear these talented musicians in person.

One 11-year-old's reaction to his first live concert sums up, the general response of the youngsters: "Cool man, cool!"

THE FAMILY LAWYER

Share-the-Cost Passengers

"As long as you are doing the driving, let me pay for the gasoline."

Suppose that you, as the driver, accept this kind of an offer from your passenger. Could such an arrangement knock out your liability insurance in case of an accident? After all, liability policies often do say that the driver must not use his car to carry "passengers for hire."

Nevertheless, in a number of cases, courts have held that the in-

urance coverage is still in effect. They reason that a casual payment by a passenger, just to be sociable, does not really mean he is "hiring" the car.

But suppose the arrangement is somewhat more formal. Take this situation:

A young man heading for a Florida vacation took along three passengers—all of them strangers. Before they started on the journey, he collected from each passenger a flat fee as payment for transportation.

Here, after an accident on the highway, the driver was informed by his insurance company that his liability policy did not protect him.

And, after litigation, the court agreed with the insurance company. The judge said that even though the driver was not a regular "carrier," he had indeed been carrying "passengers for hire" on this occasion.

In the final analysis, your insurance coverage will depend on the exact language of your own particular policy. Many modern policies do have a specific provision allowing you to carry—on a share-the-cost basis—such passengers as friends, neighbors, fellow workers, or school children.

It is a wise precaution, before collecting any but the most informal contributions from passengers, to check your insurance policy first. Otherwise, you may be caught without an insurance umbrella when you need it most.

NEW HAIRSTYLES ARE HEADED FOR POPULARITY

Lush hair, flaring and showing off a pretty face is forecast for the months ahead.

Curls will be more relaxed, and, in some cases, brushed out into free-flowing waves. Styles will stay that way, not by excessive teasing or spray, but with hair's own body. It will be the look of Hollywood glamour at its height.

These predictions come from Hugh Harrison, one of the country's top hairstylists, whose creations are seen on magazine pages and on the women who set the pace of fashion.

Mr. Harrison said that the styles of the months ahead will be adaptations of hairstyles seen on the late, late shows. He said:

"We're taking the feeling of those days and weaving into the tempo of today. Instead of waves at the crown like we had in the 1940's, the silhouette will be smoother and wider, perhaps in an updated version of the flip."

For city pants, Mr. Harrison said that hair would continue to be brushed off the face and probably secured with a scarf or bow. He added that for evening, anything goes: long, short, up, down, straight, curly, and more often than not, augmented by a hairpiece.

To have the look Mr. Harrison is talking about, hair must be healthy, shiny, vital. And have terrific body. To actually build body into the hair, stores now have a lotion that is simply combed through the hair after it is shampooed and towel-dried.

A boon to baby fine hair, but effective on all types, the

Nothing looks cooler on a summer evening or flatters a tan more than stark white. To create this asymmetrical hairstyle, the hair is brushed from left to right and secured just above the ear. The hair is arranged in casual ringlets, and a cluster of miniature white daisies echoes the airy feeling of the lace blouse.

Perfect for a summer evening, this cool-looking hairstyle relies on the natural beauty of the hair for much of its charm. The hair is brushed away from the face; secured high on the head and arranged in two tiers of curls. Flowers and feather fronds provide an airy touch.

lotion smoothes the way to the sheen and bounce of hair in good condition. The amber-colored liquid has protein qualities that condition while the hair is setting, build up the individual hair shafts to make their volume soar, and help the hair resist curl-killing humidity. But if hair has a tendency to frizz in damp weather, the lotion, called Great Body by Clairol, keeps it softly waved.

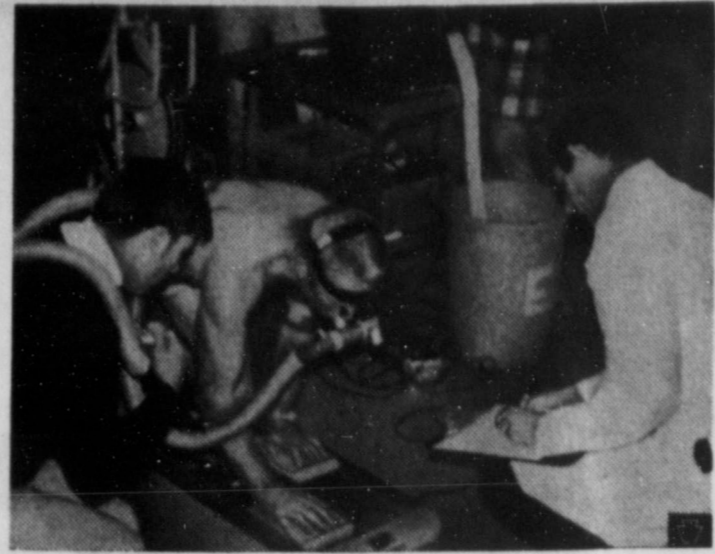

Mr. Harrison, whose artistry is seen in all the leading fashion magazines, including Harper's Bazaar, Vogue, Seventeen and Mademoiselle, has worked his way across Europe and Asia,

styling hair for fashion shows and fashion-conscious women.

During a recent trip to Moscow, he styled the heads of flower-in American models as well as homegrown beauties for a fashion show of American clothes. During the same trip, he became the first American to work in a state-owned beauty salon in Moscow, where he demonstrated hair cutting and styling techniques to Russian hairdressers.

What does he say about styling a head of hair he's never seen before? "Body, body, body—that's the lifeline to a good hair style."

College Study Finds Ideal Exercise

A new machine, the Exer-Cor Exerciser, used regularly in the home or office, can produce the kind of cardiovascular conditioning the body needs to combat heart disease — the nation's number one killer, according to a test conducted at San Diego State College.

The machine also takes away the danger of too much exercise, too rapidly performed, which can cause damage, too.

Aerobic exercise (literally, "with oxygen") when regularly performed, provides the rhythmic contracting and relaxing of blood vessels within the muscles that helps pump the blood back to the heart again. This does much to overrule the dangers of too much food, too much tension, and too little exercise — causes of atherosclerosis, and eventual heart attacks.

The San Diego State College tests were part of a ten-year physical fitness research program conducted by Dr. Fred W. Kasch, and John Boyer, M.D. and were performed by Dr. Anthony A. Succ. They showed that regular use of Exer Cor can produce aerobic results comparable to strenuous

outdoor exercise, but with a self-limiting safety factor that allows one to work at a maximum of 60 to 70 per cent of one's total work capacity.

The Exer Cor Exerciser, developed initially for the benefit of handicapped children who needed creeping therapy, is a compact, light-weight platform into which are built hand and knee carriages so connected that cross lateral creeping can be performed in perfect rhythm without moving around the room.

"This may well solve the problem of the exercise-starved businessman or housewife who hasn't the time for changing clothes, leaving the office, shop, or home to participate in athletic events or athletic programs," say Frank Flick, Flick-Reedy Corporation, Bensenville, Illinois, inventor of Exer Cor. "And, it may save their lives as well."

Who keeps the roof on ...
(when everyone is raising it?)

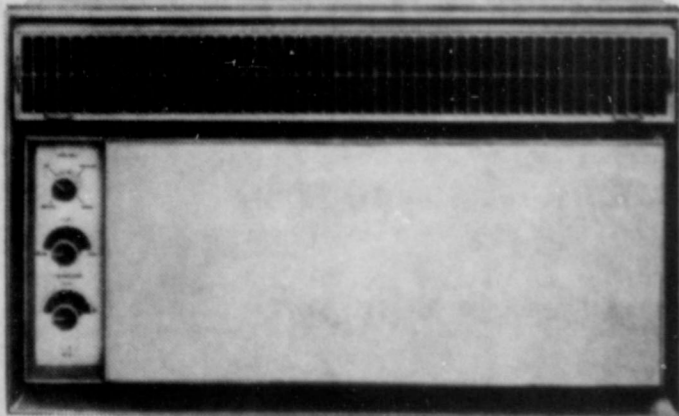

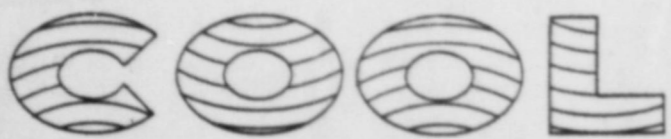

THE CHURCH FOR ALL ... ALL FOR THE CHURCH
The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

With all the theological ferment these days there is more unrest in our churches than we have known in many years. Issues divide the congregations and sometimes the whole debate seems endless. It would be easier to stay home in bed on Sunday mornings. But through it all, the houses of God stand, because regular churchgoers know that men are inconstant, that they are subject to numerous temptations and influences. They also know that God is omnipotent, is omniscient. His care is constant. His creative spirit continually sustains the earth, and His love is always sensitive to the plight of man. It is not easy to be a Christian; it never was. Houses of God stand because there are those who are willing to be channels of God's care—who assume responsibility for church schools, missions, social justice, and—oh yes—that roof.

VOTE

WATER

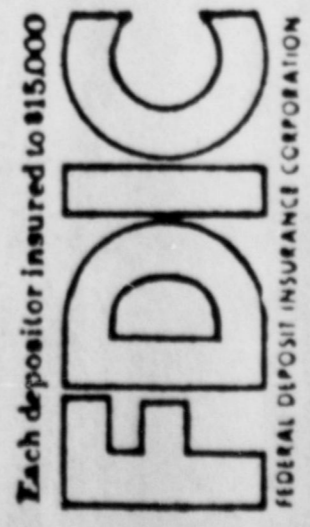

FOR TEXAS

AMENDMENT 2

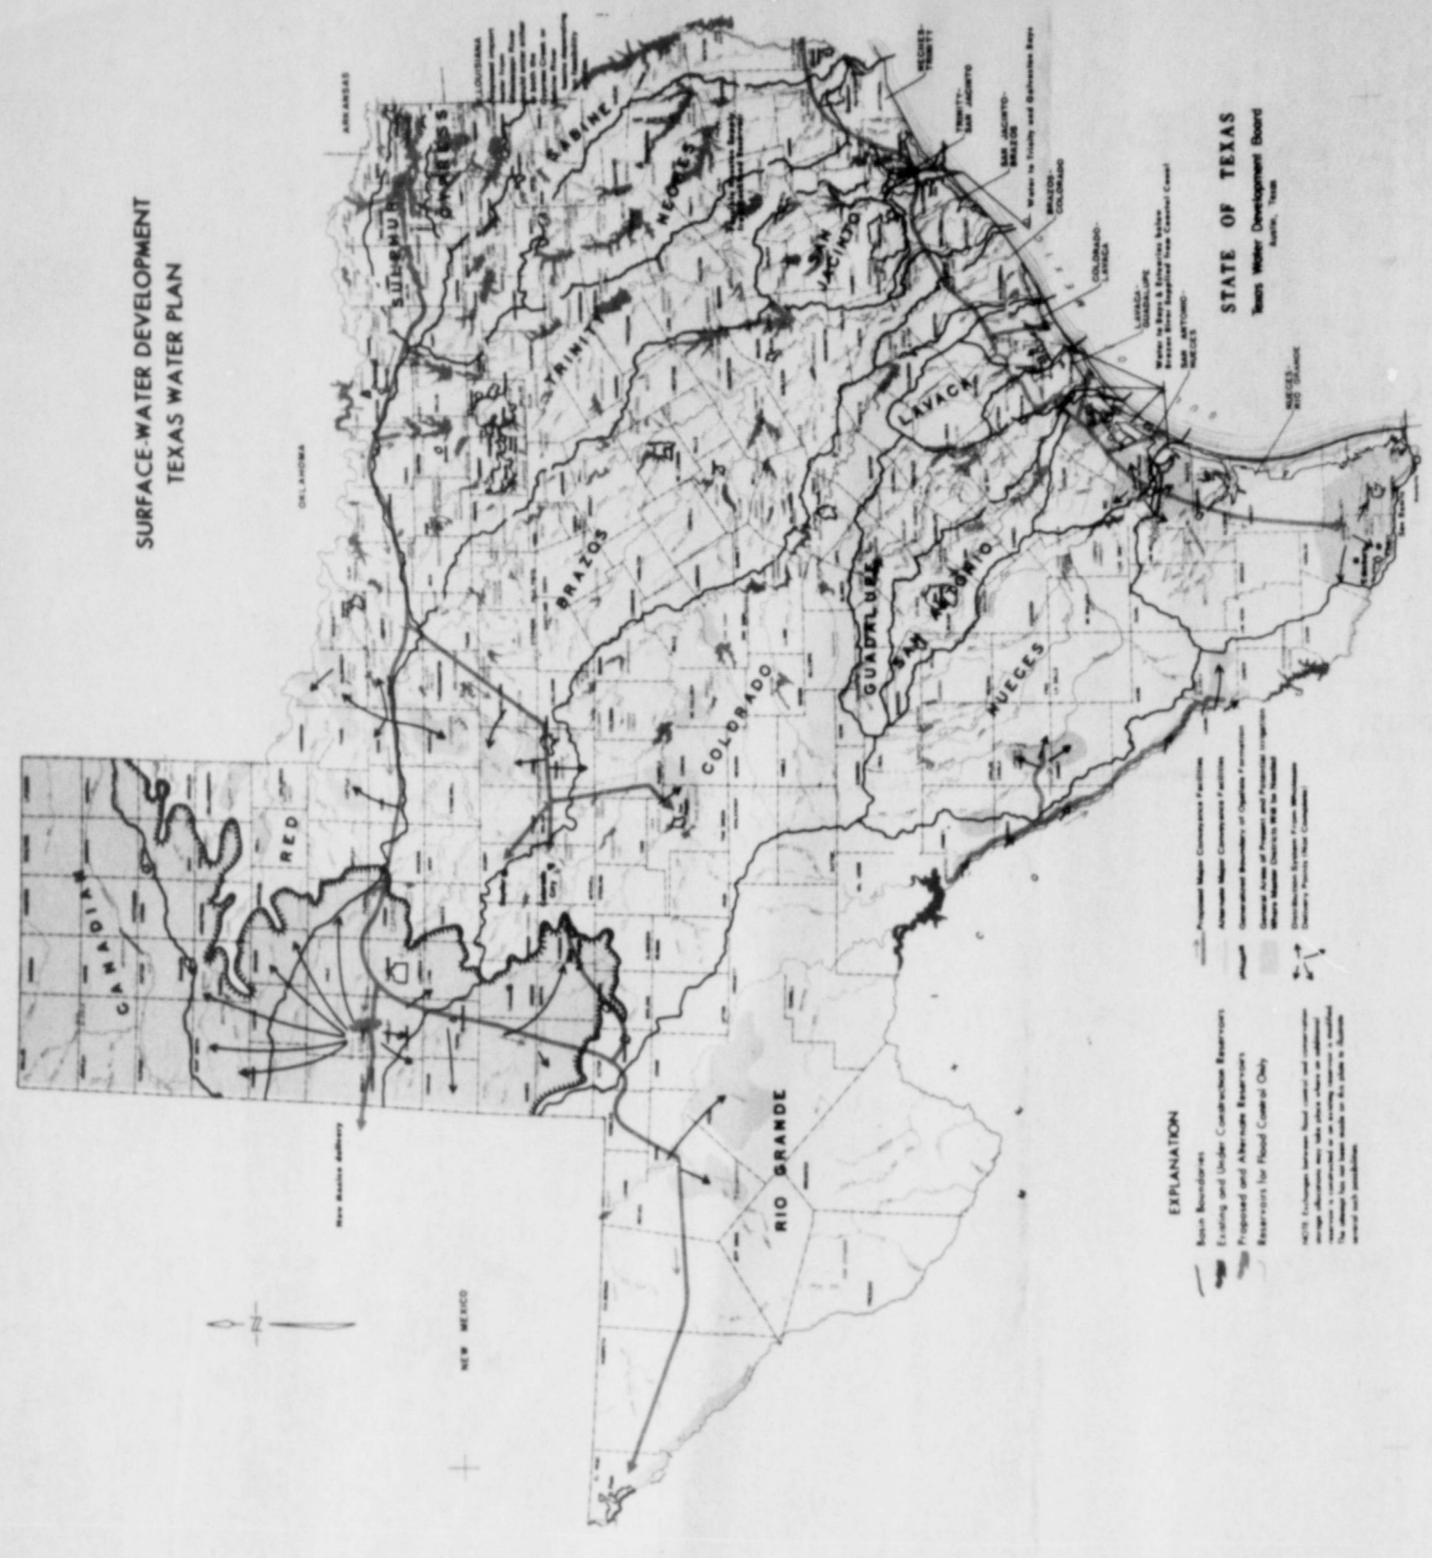

This Message Sponsored by:

Kent County State Bank

JAYTON, TEXAS

Texas Water News

Texas voters will ballot Aug. 5 on a constitutional amendment that would provide the State of Texas the capability to authorize the issuing of \$3.5 billion in water development fund bonds for Texas' share of the \$9 billion Texas Water Plan. Their decision on this first Tuesday in August will chart the course Texas will follow into the next century—a course leading to unprecedented economic growth and prosperity for the entire state, or a path leading to decline and stagnation caused by the lack of adequate water for the state's villages, towns and cities, its industries, and for its irrigated agriculture.

The Amendment—Number 2 on the ballot—authorizes an

increase in the Water Development Fund of \$3.5 billion; removal of the 4 per cent interest rate limitation on the Fund's bonds and authorizes the rate to be set by legislative enactment; expands use of the Fund for the development of water resources for the State, both within and without the limits of the state; removes the Dec. 31, 1982 cutoff date for use of the bond funds to assist political subdivisions of the state to develop their water resources; empowers the Water Development Board to contract with federal agencies, other states, foreign countries—such as Canada—and others for the development of water resources and the bonds would not be used for gifts or grants. They would

be repaid—with interest—by the users of water. The Texas Water Plan is based on the concept that all reimbursable costs of water developments would be repaid by those who use the water.

Planners from the Texas Water Development Board estimate that Texas, after a full development of its water resources, will have a shortage of 12 to 13 million acre feet annually by 2020. An acre foot is 325,381 gallons.

To overcome this anticipated shortage, the Texas Water Plan proposes the importation of some 13 million acre feet of surplus water each year from the lower Mississippi River to meet an estimated requirement of 32 million acre feet for growing

cities, industries, and agriculture. The Texas Water Plan proposes the construction of 67 dams and reservoirs—with 33.6 million acre feet of conservation storage and 16.1 acre feet of flood control—at an estimated cost (in 1967 dollars) of \$2.4 billion. Remaining costs would amount to some \$6.5 billion.

The Texas Water Plan sketches a massive network of transstate transmission canals spanning north Texas and the Gulf Coast, connecting pipelines, pumping stations, and power plants—possibly nuclear powered.

The 500-mile concrete-lined northern canal would begin in the upper Sulphur River basin

of east Texas and extend westward past Lubbock in the High Plains, turn south and west to the Trans Pecos where a pipeline would connect with the canal for movement of municipal and industrial water to El Paso. The Trans-Texas division would carry about 1 million acre feet of water a year for northern and western Texas.

In addition to serving the Northeast Texas basins, the cities of Dallas, Fort Worth, Lubbock, San Angelo, Abilene, Odessa, Midland, and other communities, the division, with its offshoot pipelines, would provide irrigation water for north central Texas, the High Plains, and the Trans Pecos.

“THANK YOU!”

The publishers wish to take this means of saying “thank you” to the Texas Parks and Wildlife Department, the Texas Highway Department, the Texas Tourist Development Agency, the Santa Fe Railroad, Central Power and Light Co., Aluminum Company of America, and the Texas Water Development Board for photographs used in this edition. Their cooperation is greatly appreciated.

Continued from p-1

... Texas' Future

The 48-mile Coastal Canal and the Coastal Division carry about 4.8 million acre feet annually, plus the amount supplied to metropolitan Houston and San Antonio by Rio Grande waters from Amistad Dam at Del Rio, from the Colorado River from the Colorado River Authority, and from the Colorado River from the Colorado River Authority. The Colorado River Authority also provides 2.5 million acre feet of additional fresh water

each year to the valuable bay and estuary system and to wildlife refuges, thus maintaining and enhancing their sports, recreational and aesthetic value. Tinting of the developments to Texas and to the nation factor, say Water Development Board planners. “Our best estimates indicate that by or before 1990 some of our metropolitan areas—Corpus

Christi, San Antonio, El Paso—will need supplemental water to meet their growth requirements,” said Howard B. Boswell, executive director of the Board.

By 1985 ground water supplying irrigation on the south plains will have been depleted to the point that agriculture will be increasingly dependent on dry-land farming.

“If this occurs, the entire

state will suffer economic losses in investment, banking, insurance, transportation, and other sectors for agricultural equipment and supplies, and the loss of population,” he added.

The Aug. 5 election reminds us that the drought of the 1980's will be the drought of the 1990's. Water rationing was the rule in most Texas towns and cities. Lakes dried up. And farmers saw their land crack

from the dry heat and crops die. Pastures dried and died, and ranchers sold their herds.

Texas' water planners hope to avert the plight of Texas. They should think again, by and large, and wise use and conservation of the state's water resources. Supporters of water management Amendment No. 2 are hoping Texas recall the dry, dusty days of 1980-81 on Aug. 5.

The availability of an adequate supply of water has always made the difference between prosperity and want—between plenty and famine. For these reasons, water has played a major role in the Texas story—has been the essential element in placing a State known for wide open spaces in the position of sustaining the Nation's third largest population by 1985; a high rate of growth in business, industry and finance; and the Nation's third largest agricultural industry.

Our State's growth projections in these areas nearly defy imagination, and yet experts tell us that these projections and future prosperity cannot be realized unless giant steps are taken now to assure Texas' future water resources.

The Texas Water Plan was developed to make maximum use of the available water in our State and to provide for additional out-of-state water as needed. This work has taken place during all of our administrations as Governor of Texas. The plan comes to its first real public test on August 5 when you, the voters of Texas, are being asked to approve Constitutional Amendment No. 2, which will authorize the Texas Water Development Board to sell up to \$1.5 billion in additional bonds over a forty year period, in amounts as needed, and as authorized by a two-thirds vote of the State Legislature—money that will eventually be repaid by water users.

We urge you to vote for Constitutional Amendment No. 2 on August 5. It may be the most important vote this generation of Texans will cast.

Sincerely,

Preston Smith

Water Development Not New in Texas, Neither Is Financial Plan

Planning the wise use of water is not new in Texas. Neither is financing the development of the state's water resources although providing funds for water development projects is not as old as the development and wise use of the state's water resources.

Spurred in 1980, began the use of water resources of the land now called Texas when they began the first irrigation of crops near what is now El Paso.

The Texas Water Development Fund and its purposes have had the overwhelming support of Texans. In 1982, the Constitution was again amended and the Water Development Board, in the name of the State of Texas, was authorized to acquire conservation storage space in reservoirs to be constructed on Texas streams.

Four years later—in 1986—Texans again approved an amendment to the Constitution, this time increasing the \$200 million Water Development Fund to \$400 million and expanding use of the Fund by the Board to construct any system of works necessary for the filtration, treatment, and transportation of water from storage points to wholesale purchase

Questions and Answers

Q. What is the Texas Water Plan?
A. It is a flexible guide to the development, management and use of Texas' water resources and an imported supply to meet the State's water requirements to the year 2020.

Q. Who will benefit from the Plan?
A. The people of Texas.
Q. Will the Plan provide adequate water for Texas?
A. Yes. Estimates indicate that Texas will need 32 million acre feet of water annually by 2020 for cities and towns, for industry, for agriculture, and for all other beneficial uses.

Q. What is the cost of the Plan?
A. About \$9 billion (in 1987 dollars)
Q. What is Texas' share of the costs?
A. \$3.5 billion

Q. Who will pay the costs?
A. Those who use the water
Q. Where will Texas get the money to finance its share of the Plan?
A. From the sale of Water Development Fund bonds
Q. Will this be tax money?
A. No. Although the investment in the construction of the Texas Water Plan will require support from the general revenue fund of the State for meeting bond obligations during the interim period between development of water supplies and development of local water user capacities.

Amendment No. 2

Someone has said—facetiously, yet seriously—"there are 11 million reasons to vote for Constitutional Amendment No. 2 on Aug. 5—the People of Texas."

The Amendment, approved overwhelmingly by the 61st Legislature, broadens the powers of the Texas Water Development Board and the purposes of the Water Development Fund; eliminates the interest limitations (4 per cent) on Texas Water Development Bonds; raises the authorized amount of Texas Water Development Bonds by \$3.5 billion; extends the maturity schedule on Texas Water Development Bonds from 40 to 50 years; eliminates the Dec. 31, 1982 cutoff date for financial assistance by the Board to political subdivisions for the development and improvement of their water supply systems; and empowers the Board to contract with the federal agencies, other states, foreign governments—such as Canada—and others for the development of water resources and facilities.

Voters of Texas will have their say on the proposed amendment to the Constitution on Aug. 5.
Basically, the proposed Amendment would provide the State of Texas with the capability to finance its share of the cost of the Texas Water Plan, estimated to be (in 1987 dollars) \$9 billion. The balance of the costs initially financed by the federal government.
An important aspect of the Texas Water Plan, however, is that the entire project's cost will ultimately be paid by water users. So the real question is not "Who will pay?" but, rather, "Who will advance the money?"

In this respect the State is performing the function of a banker supplying funds for interim financing. All costs to the State, both principal and interest, will be recovered—although the recovery will be spread over a long period of time.

Before any of the \$3.5 billion in bonds could be issued—they will be issued over a period of 40 to 50 years—two-thirds of the Legislature must give approval. The bond funds will not be used for gifts or grants. Funds provided for the development of water resources must—and will—be repaid by the State with interest.

Of the State's estimated \$3.5 billion share of financing, \$2.3 billion is earmarked for development of municipal and industrial water supplies; \$85 million is earmarked for the cost of storage acquisition in reservoirs not a part of the Texas Water System; \$600 million is set aside for future loan programs of the Texas Water Development Board; and \$500 million for contingencies.
Approval of the Amendment on Aug. 5 will give the State the flexibility needed in the full development of the State's water resources for the benefit of the people of Texas.

Look At It With 2020 Vision
By BILL McCLANAHAN
Dallas News Staff Cartoonist

Water Plans Will Meet State's Needs

Three divisions—the Trans-Texas, Coastal, and Eastern—form a dramatic part of the Texas Water Plan.

The Trans-Texas Division will supply municipal, industrial and agricultural requirements in the Northeast Texas basins, the Dallas-Fort Worth area, the North Central sector, the South Plains, Trans Pecos, El Paso, and eastern New Mexico.

A total of 10.3 million acre feet a year will move through the huge system from an Interstate System and from Northeast Texas across the top of Texas holding reservoirs on the Cap-rock near Lubbock for distribution to the Plains, Trans Pecos, El Paso and Eastern New Mexico. New Mexico will receive 1.5 million acre feet of out-of-state water while 7.5 million acre feet will be allocated to agriculture along the route served by the Canal. Municipal and industrial users will receive 950,000 acre feet of water to satisfy their requirements.

The Coastal Division will supply some 4.5 million acre feet annual water for municipal and industrial uses, for irrigation, the bays and estuaries and for wildlife refuges from the Sabine River to the Lower Rio Grande Valley.
Estimated water requirements west and south of the Brazos River, plus inflows into Houston Bay but excluding Galveston Bay and San Antonio Bay, are 1.8 million acre feet for irrigation, 2.5 million additional acre feet for bays and estuaries, 433,000 acre feet for municipal and industrial supplies, and 60,000 acre feet for fish and wildlife.
Water supplies for Houston can be met by several alternatives, including combinations of supply from the Brazos, Trinity, San Jacinto, and Neches river basins, ground water, and water from the Coastal Canal.

Cuero, Chlobo, and Goliad reservoirs, with Cannon reservoir and a pipeline system, part of the Coastal Division, can through systems operation, supply San Antonio with 220,000 acre feet of water annually to supplement available ground water from the Edwards Aquifer.
The Winter Garden area, southwest of San Antonio, can be served by conveyance of releases out of Amistad Reservoir on the Rio Grande. Water supplied from Amistad to irrigators in these areas will be released in the Lower Valley by deliveries through the Coastal Canal.

The Eastern Division of the System includes facilities which will be required to move water imported from out-of-state sources to the Trans-Texas and Coastal divisions.
Subject to the results of feasibility studies, the Board proposes that design and construction begin in the following sequence:
(1) Storage facilities in South-

Water Plans Will Meet State's Needs (Continued)
of intensive study and an expenditure of about \$10 million. Estimated state share of overall project costs (in terms of 1987 dollars) is \$3.5 billion. Federal and local funds would pay for the rest.
The Plan provides for the construction of 67 dams and reservoirs and alternates, huge transmission canals and pipelines, pumping stations, and power facilities for the movement of vast quantities of water annually to water-deficient areas—about half of Texas—meet the needs of towns and cities, industries, and agriculture. Other beneficial water requirements will also be met by the Plan.

AN EDITORIAL:
Texas Water Plan a 'Must'
—ARLINGTON CITIZEN
WHAT IS THE TEXAS WATER PLAN?
The objective of the Texas Water Plan is to provide adequate water to maintain growth and prosperity of Texas into the next century when it is estimated that we will have a population of 30.5 million people. The Plan provides for the full development of our water resources and the importation of surplus water from the lower Mississippi River for distribution to areas with declining water resources.
WHO IS TO PAY FOR THE PLAN?
The cost of the \$9 billion Texas Water Plan - Texas' share is estimated at \$3.5 billion - will be shared by local, state and federal governments, with those who ultimately use the water paying much of the costs of the Plan.
WHY DOES TEXAS NEED A WATER RESOURCE PLAN?
By the end of this century - in just 31 years - Texas will not have enough water to supply its growing cities, its expanding industry, and its irrigated agriculture. To assure an adequate water supply, the state has prepared a plan for the full development, management and use of its water resources - and an imported water supply - to serve Texas to the year 2020 and to assure all Texans water to meet their needs.
WILL THE PLAN PROVIDE ADEQUATE WATER FOR TEXAS?
Yes. With our current major full development of our water resources (67 dams and reservoirs) and an imported supply of water, Texas can meet its water demands to the year 2020. THE PLAN?
The people of Texas will benefit from the Texas Water Plan. The Plan provides for meeting all essential and beneficial water requirements throughout the state. The Plan will provide water for domestic and municipal uses, for industry, for agriculture, for recreation, for our bays and estuaries, and for other beneficial purposes. The Texas Water Plan will provide Water for Texas!

GOV. PRESTON SMITH

GOV. JOHN B. CONNALLY

GOV. PRICE DANIEL

GOV. ALLAN SHIVERS

Governor, 3 Former Governors Head Blue-Ribbon Panel for Amendment 2

The men who talk Texas, live Texas and epitomize the sterling qualities of Texas leadership are manning the ramparts on behalf of Constitutional Amendment No. 2.

Speaking of his predecessors, Governor Smith said, "I know of none in Texas who have individually or collectively contributed more to the development and conservation of the state's vital water resources than these former governors. Each during his tenure provided the leadership and gave the time and energy to the development of our water resources. Texas has benefited from their devotion, and future generations of Texas will be the beneficiaries of their vision and leadership."

Developed to make maximum use of the available water in our State and to provide for additional out-of-state water as needed. This work has taken place during all of our administrations as Governor of Texas. The plan comes to its first real public test on August 5 when you, the voters of Texas, are being asked to approve Constitutional Amendment No. 2, which will authorize the Texas Water Development Board to sell up to \$3 billion in additional bonds over a forty year period, in amounts as needed, and as authorized by a two-third vote of the State Legislature—money that will eventually be repaid by water users.

"We urge you to vote for Constitutional Amendment No. 2 on August 5. It may be the most important vote this generation of Texans will cast."

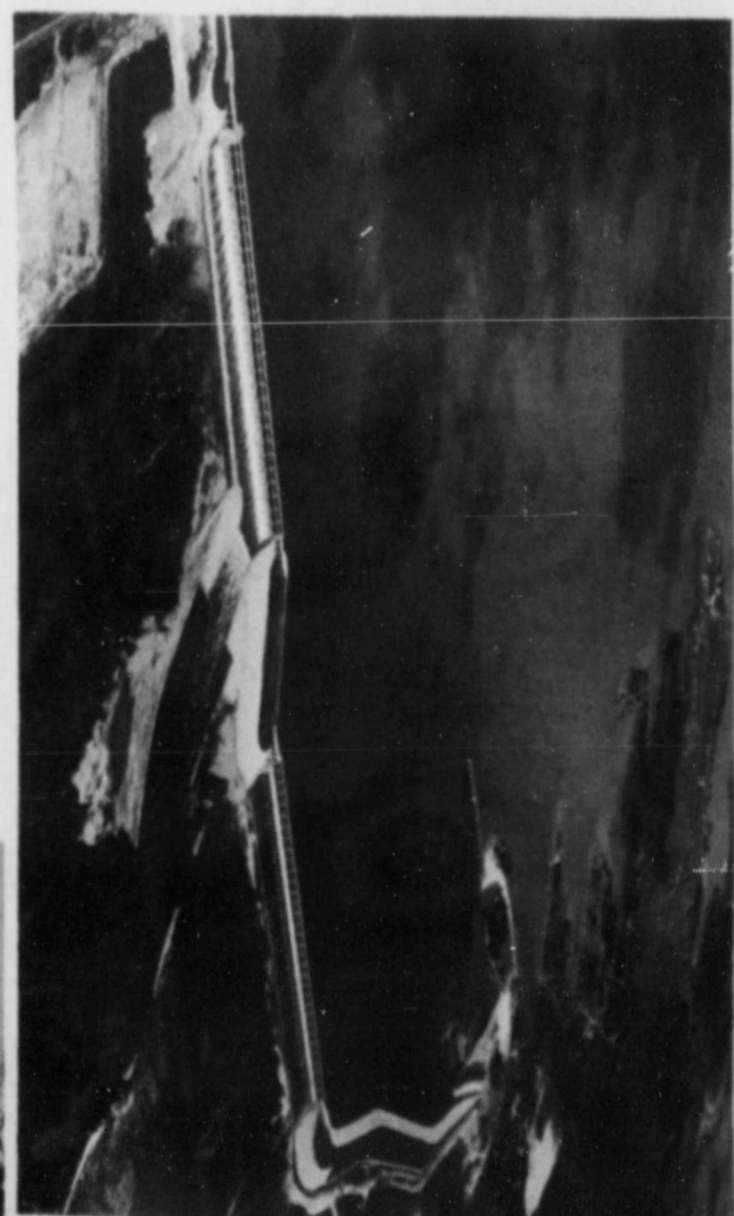

When the Coastal Canal is completed east to the Sabine River, Mississippi River water can be brought directly into the Coastal Division to supplement eastern basin water providing 200 project requirements in the area supplied by the Coastal Division.

Projects proposed by the Plan include dams and reservoirs to meet local water requirements throughout the state and to provide flood control and other benefits to the area and to the state. Navigation, hurricane protection projects, upstream watershed-protection pro-

gram, drainage of wetlands, natural salinity alleviation projects, and predevelopment control projects are included in the Plan.

No water resource development program on this scale or of this complexity has ever been attempted anywhere. Commenced by Governor B. B. Bess, executive director of the Texas Water Development Board.

Texas Can Rightfully Claim to be 'Land O' Lakes'

Water Plan now off the drawing boards and the state policy for the future development of the state's water resources, Texas—particularly East and South-east Texas—could well become the nation's water wonderland. The variety of recreation available in Texas is unsurpassed among the 50 states. Whether vacationists and recreationists want only a few hours of fun, a vacation of several weeks, or permanent retirement, they have an almost endless choice in Texas.
