THIS WEEK IN JAYTON

Newton to Be Honored As Coach 1964 State Championship Team

Feb. 23rd and 24th Ralph Newton will be honored as the coach of the Class B state championship girls basketball team for the year of 1964-65, which was Trent. All other champions in all classes for that year will be honored. Newton, who is presently high school principal in Jayton, coached the team as it compiled a season record of 36 wins and 5 losses. Of the five losses three of them were at the hands of Class A champion Baird.

Scores of these three games were 60-59, in the final game of the Dyess Air Force tournament, 59-57 in a game at Trent and 82-81 in a game at Baird. Trent gained revenge in the final game of the Hardin Simmons tournament by a score of 84-67. The other two losses were at the hands of Hawley 64-61 and Wylie 54-48. Both of these losses were avenged on 2 occasions. Noteworthy victories aside from those at the state

tournament were over the Roosevelt girls 76-52 and Spearman by a score of 77-62. In the state tourney the Trent girls had a 46-40 victory over Happy to advance to the final game, and then scored a resounding 76-27 win over Burkeville. Following this very successful season, Newton was selected, along with "Baker" Dugan of Friona to coach the North All-Stars in the 1964 game. This 1964 team was successful in defending the

championship in 1963 compiling a season record of 40 wins and one loss. At this year's tournament a special section is to be reserved in Austin's Gregory gym for the players, coach and their immediate families. The Gregory gym is in Austin. Each team member and the team coach will be introduced at center court at halftime of the 1973 championship game.

As It Looks From Here

By Rep. Omar Burleson Member of Congress, Texas

WASHINGTON, D. C. -- Dr. Henry Kissinger has given members of congress assurances that no commitment has been made to assist in rebuilding damages inflicted on North Vietnam. He is, however, going to Hanoi in the next few days and there is no doubt this will be the principal subject of discussion. In the months ahead this will become a major issue in the congress.

Although this policy may not directly contradict President Nixon's general statement in his second inauguration, he brought into focus the question of cutting America's massive overseas burden in a changing world. As a matter of fact, in the president's first inauguration he indicated his determination to ease our military expenses by ending our role as the "global policeman."

There is a beginning, aside from ending our presence in South Vietnam, of cutting back on the costly commitments in a number of places. At the present time we are parties to agreements which commit us to help defend 45 countries all over the world.

In what is known as the "Rio Treaty" we are pledged to help defend any one of 20 nations which ask for help. These are countries from Mexico to the tip of South America.

Under the southeast Asia treaty organizations (SEATO) the commitment is to eight nations which ask for help. They are Pakistan, the Philippines, Australia, New Zealand, Thailand, Laos, Cambodia, and South Vietnam. As members of the North Atlantic Treaty Organizations (NATO) we are militarily bound to come to the aid of Belgium, Britain, Denmark, France, Ireland, Italy, Luxembourg, The Netherlands, Norway, Portugal, Greece, Turkey, West Germany, and Canada, being a member is included.

A separate treaty arrangement, known as Anzus, pledges us in a special arrangement to come to the defense of Australia and New Zealand if requested. We also have separate treaties of mutual defense with the Philippines, Japan, South Korea, and Taiwan.

All of these commitments came about because of our foreign policy of containing Communism. Taken into account now is what is considered to be the success of the early phases of agreements with the Soviet Union on reduction of strategic arms. This is taken as one big factor in being able to reduce military expenditures. Another prominent factor is the rift in the communist world between Russia and Red China. It is thought that if hostilities in South east Asia extricate us from that area there will be good chance of reducing American forces overseas far below the 600,000 men now in uniform. As it is now, these operations represent an outflow averaging about three billion dollars a year, aside from Vietnam.

Our government has major military bases in the Azores, Canada, Belgium, Germany, Greece, Greenland, Iceland, Italy, Japan, the Philippines, South Korea, Spain, Turkey, England, Bermuda, Guantanamo in Cuba, and hundreds of similar installations overseas.

Even with our mission ended in Southeast Asia, it is difficult to see how our military cost can be greatly reduced in the current year. The cost of military personnel, increased to encourage a voluntary service without draft, will be higher, even with a greatly reduced number in uniform. The need for refurbishing our material dissipated in Vietnam should be an absolute requirement. There is no assurance that threats around the world will not continue and to let our defenses down could be suicidal. At the same time, we can not take care of the whole world, and this is generally the new policy. Neither can we condone the idea that we can live apart from the rest of the world.

But it is time for us to retrench and to shift a major part of the burden to those for whom we have made it possible to defend themselves. It is a good question as to why we should feel obligated to spend massive sums of money to restore the communist aggressor nation of North Vietnam.

The habit of loafing isn't hard to acquire; in fact, many people seem to be born with it.

Not Long Enough Poet--Are you the man who cut my hair last time? Barber--I don't think so, sir, I've only been here six months.

The Rodeo Club Has Meeting

The Kent County Rodeo Explorers Post 397 had its second meeting of the year; Doug Palmer, an assistant director from Ralls met with the group. The group has decided to give a western dance for their first activity.

The next meeting will be held February 12th, 7:00 P.M. at the County Agents office in the Courthouse. Members present were: Bob Long, Cheryl Pickens, Jack Ussery, Rena Bural, Danny Smith, Kathleen

Bob Long, Cheryl Pickens, Jack Ussery, Rena Bural, Danny Smith, Kathleen Panter, George Chisum, Lisa Cravey, David Senn, Chuck Kimmel, Roger Grice, Donna Land, Dwayne Hager, Jan Kimmel and Kathy Ballard. Adult advisor there was Billy Stanaland.

Mr. and Mrs. Howard Freemyer and family have as their guest this week, Mrs. Freemyer's mother Mrs. Clara Branaugh of Wellington, Kansas.

The next meeting will be held February 12th, 7:00 p.m. at the County Agents office in the Courthouse. Members present were:

Mr. and Mrs. Earnest Watkins of Lubbock visited the Jack Williams family this last week end.

West Texas Vegetable Conference Set

LUBBOCK--Vegetable genetics, potato breeding and herbicide residue effects on vegetables are among the popular topics to be presented at the annual West Texas Vegetable Conference here February 10.

The one-day meeting, kicking off at 8:30 a.m. at the South Plains Electric Cooperative, will feature some of the top vegetable experts in the nation, according to Dr. Roland Roberts, area vegetable specialist with the Texas Agricultural Extension Service in Lubbock.

The conference is expected to draw a record crowd of West Texas vegetable growers, seedsmen, chemical suppliers, machinery suppliers and representatives of several agricultural related organizations and institutions, including Texas Agricultural Extension Service, Texas Tech University, and the Texas Agricultural Experiment Station.

"We will have two top potato experts," Roberts points out. "Dr. Oscar Lorenz is a vegetable

scientist at the University of California (Davis), specializing in vegetable nutritional requirements. He has studied soil fertility requirements of potatoes, and will address his remarks to that subject.

Dr. Robert Johansen, a vegetable geneticist and breeder at North Dakota State University in Fargo, developed the Norgold russet potato which is widely used on the Plains and the leading russet type potato in the western United States.

Other speaker, Roberts says, will describe research progress and results of experiments and demonstrations in vegetables in West Texas.

Efficient production of high quality vegetables will be the target of presentations, with special emphasis given to the breeding and growing of potatoes, says Roberts. The West Texas Vegetable Council is sponsor of the event.

A beef barbecue luncheon will be catered for the occasion.

ing team at Tech? One of the crafty outside shooting guards on this team was a fast young man named Gerald Myers.

Wonder why he likes to play a slow, defensive low scoring game now? with that kind of a college back ground?

Minette Geeslin And Parker Kidd Get Gold Star Awards

The annual Kent County 4-H Club Awards program was held Saturday night, Feb. 3, in the Kent County community center. The awards were presented for 4-H club members accomplishments during the year 1972.

Parker Kidd and Minette Geeslin were recognized as Gold Star boy and Gold Star girl. The Gold star award is given to the outstanding 4-H club member for the year.

Minette has been in 4-H work for seven years. She participated in seven annual food shows, six dress reviews, and seven stock shows. Minette was county winner in the 1972 revue and was judged in the district dress revue.

Her lambs have been the class winners in three annual stock shows.

Minette competed in the State contests for 2 years. She is serving as chairman of the Kent County 4-H Club council. Minette is a Jayton

high school student.

Parker has been in 4-H club work for eight years. He has shown 16 steers in county shows, including the grand and reserve champions.

Last year he exhibited two swine in the show. He has been on district and state judging teams in the livestock judging and in the soil judging contests. He is a senior in Jayton high school.

The opening ceremonial was given by Clairemont 4-H club president Valerie Parker. Tommy Johnson gave the invocation.

The program presented showed colored slides of Kent County 4-H Club work during the year.

Girard 4-H club president Cheryl Pickens, Lisa Cravey, David Senn, and Chuck Kimmel presented the closing ceremonial.

The benediction was prayed by Marion Perkins, the council delegate of the Clover boys 4-H club.

Championship Tractor Pull Planned In Fort Worth

FORT WORTH -- Farm and ranch operators from throughout the Southwest area will converge on Fort Worth March 9 through 11 for the Second annual Southwest Farm Show and Championship Tractor Pull.

The mammoth three day supply and equipment show will feature more than \$5 million worth of tractors, tools, bailers, combines, trailers, loaders and other items used in farming and ranching operations.

Exhibits will cover more than 100,000 square feet and they will be open for inspection from 10:30 a. m. to 5:00 p. m. each day.

Adding to the excitement and fun will be three days of tractor pulls to be held in the convention center each evening.

Featured again this year will be the hot rod classes roaring down the track using airplane, tank and truck engines.

Young homemakers of Texas and Young Farmers Association wives will again vie for more than \$1,000.00 in awards in the second Texas Natural fibres fashion review. The finalist will be chosen Saturday, March 10 and the winners will be presented at the Saturday night, March 10 tractor pull.

Future Farmers of America will be featured also Saturday night in the second annual Texas tractor pull and will feature the young mechanics trying to unbug and start a tractor in the arena.

Well, Feb. 2nd came, and early in the morning the old groundhog saw his shadow. This is supposed to mean, by all the old traditions, that we are in for six weeks of bad weather.

You know, I have been observing this old piece of superstition for quite a number of years, and I don't remember there ever being a year that the little earth dwelling creature could not have seen his shadow. Isn't it strange that every year on the second of February, we have sunshine?

I wonder how many West Texans have ever seen a groundhog? Well, I have, but I didn't see him in West Texas. I saw him in Central Tennessee.

In the summer of 1967 I was visiting at Smithville, Tenn, about 75 miles south east of Nashville. A group of us were going out to the lake a few miles out in the country. On the way, we went down a country road, between two tobacco fields. Several times a fearless, or perhaps curious groundhog would raise up on his hind legs from the bar ditch, or under the fence, and take a good look at us.

They look much like the West Texas Prairie dog, only about twice as large, and perhaps a bit more fur, or hair on him. In fact, he seemed to be almost fuzzy.

In that area, they think about as much of them, as the farmers and ranchers used to think of the prairie dog, before his almost extinction.

Law makers, who are themselves law-abiding citizens, presume that if a law were passed taking guns away from the people it would be obeyed -- and it would be so far as law abiding citizens are concerned. But neither party in this case really understands the mental processes of the criminal, and here is the great weakness of gun control.

A shocking illustration of how wide of the mark gun control laws are when it comes to curbing the criminal is described in "The Rifleman." The story tells of a 31 year old man who is a professional killer. He came from a family background of law breakers. Until he was jailed, he and a partner were highly successful in their profession. During a killing spree, they murdered six people in Salt Lake City with a knife and a pistol. The two murderers were saved from the official Utah firing squad by the generous mercy of the Supreme Court of the United States.

Discussing murder was like a baseball game with these two. One of them remarked "You're born to die. There's no way you can escape it. All I did was help it." On the subject of gun controls, he said "Now you take the guns away from the citizens, it'll make it a little harder for us to get them, but it'll make it a great lot harder on the citizens because they want to go about it legally. We'll just go steal it..."

This is the mind of a murderer at work. It remained untouched by laws restricting the freedom of the law-abiding citizens to bear arms.

Alot of basketball fans, these days, are getting bored with the games they have offered to them. I speak of the current stress being put on the defense.

Defensive basketball is really liked by no one but perhaps the coaches. The fans like the run and gun, hit and miss type of game, where the winner scores a hundred points. And, the most of the players like that kind of a game too.

With the good college teams now days scoring under sixty points in a game, it will soon not be worth watching.

You talk to any good, outside shooting guard, either college or high school, and you will be told it is a very confusing, and perplexing thing for him to have a perfect shot, but not be allowed to shoot. This takes s the pleasure out of the game for most players.

Do you remember back about 13 or 14 years ago, when they had the fast running, high scor-

The Right To Die

The American Hospital Association, the nation's leading hospital association, recently adopted a bill of rights after a three-year study in which four consumer representatives participated.

Some of the major points of the declaration include the right of a patient to die gracefully, if he or she prefers that to temporary life-prolonging expedients, the right to complete medical information concerning one's condition, full explanation of bills, continuity of care, consultation prior to any experimentation, the right to privacy and to pertinent information about other institutions treating one's condition, etc.

The AHA expects its 7,000 member institutions to adopt the new twelve-point bill of rights though this might be optimistic in view of the fact that AHA will not withdraw accreditation from hospitals which do not.

Interest Growing In High Intensity Low Frequency Rotation Deferred Grazing

By Rhett H. Johnson, District Conservationist
Much progress is being made in the art and science of managing native rangelands. For many years ranchers have been using practices such as brush control, range seeding, deferred grazing, proper grazing use, and the two-pasture, three-pasture, three-pasture and four-pasture rotation deferred grazing systems. These practices have all become common place in many ranches every day range management plans. During the past five years, ranchers have been using a new type of rotation deferred grazing system that has allowed almost unbelievable rapid range improvement.
This practice is known as the HIGH INTENSITY - LOW FREQUENCY - ROTATION Deferred Grazing System.
An example of what a rancher can do with this system of grazing management when completed with other range management practices is the H.R. Stacey Ranch, located near Albany, Texas. The Albany country normally will support an animal unit on 20 acres. Mr. Stacey is now supporting an animal unit on 7 acres with grass left over.
How did he accomplish this? First of all he root-plowed or tree-dozed his his rangeland. Then he started a system of grazing using six pastures and one herd of cattle. He put the cattle that the 6-pastures would normally sup-

port into one herd and rotated them from pasture to pasture on approximately 30 days intervals. This allowed the cattle to rapidly harvest the grass grown and kept moving the cattle to fresh pastures on 30 day intervals.
This rotation gives each pasture a 5 month rest, then one month of grazing, then 5 months of rest, and then the second on month of grazing during a 12 month cycle. During a 12 month cycle, each pasture is grazed 2 months and rested 10 months.
On this system, cattle performance has been excellent. Range improvement has exceeded anyone's expectations.
Why is the grass improvement so rapid? First of all, by concentrat-

ing cattle on pastures for short periods of time, the cattle are not selective in what kinds of grasses they eat. They eat all kinds of grasses, therefore giving the good grasses a better chance of competing with the less palatable plants that are usually lightly grazed. They are on pastures for such a short periods of time that the plants do not deplete their stored food supplies in the root zone, but use it to make a quick regrowth. Second, the grass being rested 10 months out of the year in each pasture allows the grass to (1) store a tremendous amount of food in the root zone and crown of the plant for rapid regrowth; (2) Produce a tremendous seed crop; (3) Allow establishment of new seedlings each year; (4) Allow a litter cover to build up on the soil that holds precipitation on the ground to allow penetration, and then protects the soil from reaching very high temperature preventing loss of moisture from vaporation.
Practically any rancher with 5 or more pastures can establish a HILF grazing system on his land. There are numbers land owners in the Duck Creek SWCD who are working into one of these systems.
If you are interested in these HILF systems, contact the SCS personal in Jayton and we will be glad to assist you in starting a system on year rangeland.

HEALTH - HOME - BEAUTY

(Practical Hints For The Modern Woman)
By April Rhodes
For uniform muffins and cup cakes, fill containers no more than two-thirds full.
Make a safety check of your home. Most accidents in the home can be prevented if periodic checks are made of loose wires, small rugs and other home hazards.
If you're troubled by blackheads, whiteheads and pimples, cleanse your skin with soap followed with a mild steaming to open pores.
Fresh mint added to an arrangement of fresh flowers gives a combination of beauty and pleasing fragrance.
If you're thrifty and make the curtains and bedspreads for your children's rooms, add a personal touch by cutting out motifs from the material and paste on the lower half of the shades.
Use variety in your mid-day lunch. Split freshly baked cornbread squares, spread with cranberry sauce and add sliced chicken or ham.
Encourage teen-agers to eat ice cream. They'll get the necessary nutritional needs they would get from milk.

SOME FUN!

"YOU SHOULD GET OUT IN THE OPEN MORE."

Contest Offers Trip To Capitol

Expense paid trips to the national capitol will be given to the winners of an oratorical contest, it was announced this week by Sam Houston, manager of the Dickens County Electric Cooperative.
The contest is open to any boy or girl at least 16 years of age but not yet 18 prior to Sept. 1, 1973, Houston said.
Winners will join winners of winners of similar contests sponsored by other electric cooperatives across the country.
All expenses of the 12-day trip to the national capitol will be paid by the Dickens County Electric.
Each entrant will be required to give a 5 to 8 minute talk on the subject "My Future in Rural Texas" and answer one or more of 33 questions asked by the judges.
The oratorical contest will be judged on the basis of knowledge of subject, 40%, speaking ability 30%, poise 10%, personality 10%, and appearance 10%.
Interested young people may obtain an official en-

IT NEVER FAILS

Pantry Pests Can Cause You Trouble

The realization that something is alive in food products stored in the pantry is a very annoying experience for the housewife but sooner or later small insects which may be termed pantry pests are found in almost every home. These insects infest stored products such as dried fruit, nutmeats, dry pet foods, cornmeal, chocolate, paprika and other spices, and any food made of cereal grain such as bread, macaroni or breakfast cereals. Pantry pests may be recognized as "worms" the immature form, or as beetles or moths, the adult forms.
Pantry pests usually come into the home with a package of food that became infested along the way from the producer to the manufacturer to the housewife. If the infested package is left in the cupboard for a long period, the insects escape and infest other foods. And so, the entire cupboard become infested. Many of these pests are capable of boring into uninfested food packages or because of their small size are able to enter uninfested packages through extremely small cracks in the containers.
The first step in controlling pantry pests is to locate the source of infestation. This is usually a long-neglected container of dried foodstuffs. It is a good practice to inspect infrequently-used material periodically to make sure they are not infested.
Rapid turnover of dried foods is one of the surest ways of preventing trouble from insect infestations. If all insects are confined to one package, simply destroying this package eliminates the problem. If you suspect insects have invaded other packages of food, placing these packages in a freezer at 0 degrees for four days will kill them. Another method of removing the source of infestation is by steriliza-

ONE MINUTE SPORTS QUIZ

1. What Major baseball League will have a designated pinch hitter this year?
2. How many fights has George Foreman won?
3. How many has he lost?
4. Who was recently voted male athlete of 1972 by the A.P.?
5. Who won the East-West All-Star NBA game?

Answers to Sports Quiz

1. The American League.
2. 38.
3. None.
4. Mark Spitz, the swimmer.
5. The East, 104-84.

Washington Bar

February has many special days and entertaining should be a delight to the hostess as there are so many ideas suggested for this month.

Washington Bars

- 1 c cornflakes
- 1/4 c candied cherries finely chopped
- 1 egg white
- 1/4 t salt
- 1/4 c sugar
- 1/4 c nuts chopped
- 2 t shredded coconut
- 1/4 t orange flavoring

Add the salt to the egg white and beat until stiff, but not dry. Continue beating and add sugar gradually. Fold in the cornflakes, mixed with cherries, nuts and coconut. Add the flavoring and stir until all the ingredients are thoroughly blended. Divide mixture into 12 portions and shape into bars with wet fingers. Place on a greased cookie sheet and bake 10 minutes at 375 degrees.

Cherry Lemonade

- 2 c sweetened cherry juice
- 1 c lemon juice
- 1 c sugar

Make a syrup of the sugar by adding 1/2 cup of water and boil 3 minutes. Combine ingredients and pour over cracked ice.

Strawberry Bavarian Cream

Set out a 1 1/2-qt. heart-shaped mold. Place rotary beater and bowl in refrigerator to chill. Set out to thaw 2 12-oz. pkgs. frozen sliced, sweetened strawberries (about 2 1/2 cups) Meanwhile, pour into a small bowl 1/2 cup cold water Sprinkle evenly over the water 1 1/2 tablespoons (1 1/2 env.) unflavored gelatin

Let stand about 5 min. to soften. Dissolve completely by placing over very hot water. When gelatin is dissolved, stir it and blend into a mixture of thawed strawberries and 6 tablespoons sugar

1 1/2 tablespoons lemon juice 1 teaspoon almond extract Stir until well blended. Chill in refrigerator in pan of ice and water until gelatin mixture is slightly thicker than consistency of thick, unbeaten egg white. If mixture is placed over ice and water, stir frequently; if placed in refrigerator, stir occasionally.

Lightly oil mold with salad or cooking oil (not olive oil) and set aside to drain.

Meanwhile, using chilled bowl and beater, beat about one half of cream at a time until medium consistency (piles softly)

1 3/4 cups chilled whipping cream Combine the two portions of whipped cream. Fold into whipped cream, 3 drops at a time, until desired color is reached

10 to 12 drops red food coloring Fold whipped cream into slightly thickened strawberry mixture. Turn into prepared mold. Chill in refrigerator until firm.

Meanwhile, wash rotary beater and bowl and return to refrigerator to chill.

When Strawberry Bavarian Cream is firm, unmold.

Using chilled bowl and beater, beat until cream stands in peaks when beater is slowly lifted upright.

1/4 cup chilled whipping cream Decorate top of Bavarian with whipped cream forced through pastry bag and decorating tube for border and a decorating tube for flower.

Terry Jo Kelley was on the sick list this past week.

Mrs. G.H. Brown was seeing the doctor in Spur, Monday.

LEGAL NOTICE--- NOTICE OF INTENTION TO ENGAGE IN WEATHER MODIFICATION ACTIVITIES:

Notice is hereby given that Atmospherics Incorporated of 5652 East Dayton, Fresno, Calif. 93727, who holds license No. 2 of the State of Texas intends to engage in an operation to change or attempt to change by artificial methods the natural development of atmospheric cloud forms for and on behalf of the Colorado River Municipal Water District located at P. O. Box 869, Big Spring, Texas, 79720 and will conduct the program of weather modification designed to increase precipitation by means of the aerial application of silver iodide and other artificial nuclei as follows:

1. The area over, or in which, equipment may be operated shall include the counties of Lynn, Garza, Kent, Dawson, Borden, Scurry, Fisher, Martin, Nolan, Mitchell, Glasscock, Sterling and Coke.
2. The target area, within which the precipitation is intended to be enhanced can be described as follows: The boundary may be described by a line beginning at a point of origin at Big Spring, Texas, and running along Highway 87 in a northwesterly direction to Lamesa, thence north-northeast on Highway 87 to the north border of Dawson County, thence east along the north border of Dawson, Borden, and Scurry Counties to Highway 84; thence southeast along Highway 84 to Roscoe in Nolan County; thence south-southeast to Maryneal; thence southwest to Silver in Coke County; thence south-southwest to Highway 87 at a point approximately 13 miles northwest of Sterling City; and thence northwesterly along Highway 87 to the point of origin at Big Spring, Texas.
3. The equipment, materials, and methods to be used in conducting the operation within this area of approximately 3500 sq. miles include the 3cm radar system, cloud seeding aircraft, and the application of silver iodide ice nuclei, hygroscopic nuclei or other nuclei considered appropriate to the artificial nucleation of clouds or weather systems.
4. The program will be operational during the periods from April 15, 1973 through October 15, 1973.
5. Any persons who feel they may be affected in some adverse way by this program may file a formal complaint to the Texas Water Development Board, P. O. Box 12386, Austin, Texas, 78711. Signed: Thomas J. Henderson, President, Atmospherics Incorporated. 52-3tc

Beehive

Tier upon tier, window by window, modern apartment and office buildings are like human beehives. The people who live and work in them are often as busy as bees, too. Each day rushes by, each hour is filled, and when morning comes, it starts all over again.

Monotonous? Well, sometimes it is both monotonous and discouraging to live and work in a beehive. It seems as if you're just a drone, as if individuality has flown out the window. But is this true?

Whether you live in a palace or a penthouse, a hut or a one-room efficiency, you are you. Your uniqueness is your God-given gift. Your potential to be different, your capacity for accomplishment, is infinite.

If you've lost sight of that fact, you've been forgetting something — like going to church, maybe?

BARD'S TARTS MADE WITH SWEET YEAST DOUGH

According to "Alice in Wonderland," the poor Knave of Hearts had to stand trial for stealing the Queen's tarts. But can you blame him for stealing tidbits as tempting as strawberry tarts?

A break with tradition, these Queen of Hearts Tarts are fashioned from sweet yeast dough cut into circles which are topped with doughnut-shaped rounds of dough. The hole in the doughnut-shaped layer makes a neat little nest which is filled with strawberries. After baking, the tarts are sprinkled with confectioners' sugar.

Sweet yeast dough for Queen of Hearts Tarts is prepared the no-dissolve Rapid-mix way. Instead of dissolving the yeast in warm water, Rapidmix lets you add it undissolved to the dry ingredients. Not only saves a step, but makes yeast breads that are better than ever.

Queen of Hearts Tarts

3½ to 4 cups unsifted flour
 ½ cup sugar
 1 teaspoon salt
 2 tablespoons cornstarch
 ½ teaspoon grated lemon peel
 1 package Fleischmann's Active Dry Yeast
 1 cup milk
 ¼ cup water
 1 cup (2 sticks) Fleischmann's Margarine
 2 eggs (at room temperature)
 Confectioners' sugar

In a large bowl thoroughly mix 1½ cups flour, sugar, salt, cornstarch, lemon peel and undissolved Fleisch-

"The Queen of Hearts, she made some tarts,
 All on a summer day:
 The Knave of Hearts, he stole those tarts,
 And took them quite away!"

Lewis Carroll

mann's Active Dry Yeast.

Combine milk, water and Fleischmann's Margarine in a saucepan. Heat over low heat until liquids are warm. (Margarine does not need to melt.) Gradually add to dry ingredients and beat 2 minutes at medium speed of electric mixer, scraping bowl occasionally. Add eggs and 1 cup flour, or enough flour to make a thick batter. Beat at high speed 2 minutes, scraping bowl occasionally. Stir in enough additional flour to make a stiff moist batter. Cover bowl tightly with aluminum foil. Refrigerate batter for 2 hours.

Turn batter out onto well-floured board. Roll to a ¼-inch thickness. With a 3-inch cookie cutter, cut about 18 circles and place on ungreased baking sheets. From remaining dough, using a 3-

inch doughnut cutter cut same number of circles and place on top of rounds. Cover; let rise in warm place, free from draft, for 15 minutes. (Dough will not be doubled in bulk.)

Bake in a hot oven (400°F.) for 10 minutes. Spoon cooled Strawberry Filling (below) into center of tarts. Return to oven; bake an additional 7 minutes, or until done. Remove from baking sheets and cool on wire racks. Before serving sprinkle generously with confectioners' sugar. Makes about 1½ dozens tarts.

Strawberry Filling: In a saucepan thoroughly combine 1 package (10-ounce) frozen strawberries, thawed, and 1 tablespoon cornstarch. Heat over medium heat, stirring, until mixture clears and comes to a boil. Cool to room temperature.

An explosion occurred at the Furr Ranch one day last week. A spokesman stated that Mike Sego was welding when the barn ignited. No one was hurt, but the barn was a total loss it is said.

Mrs. Euel Harrison was on the sick list the first of the week.

Mr. and Mrs. Carroll Johnson and Jan attended business in Abilene, Saturday.

Mrs. Roy Fuller visited her brother, Wylie Finch in Rotan, Sunday.

Do mountains have anything to do with rainfall? What role do they play in controlling precipitation in the United States?

Mountains have a definite effect on cloud movement and rainfall. In the United States the really high mountains near the West Coast are a major influence on the weather. In this case they block moist, maritime air, or drain the moisture out of it as it moves east causing the dry regions in the western areas.

The United States is favored with four sources of moist maritime air which brings rain and produces necessary vegetation. From the Pacific, air masses move in from the northwest and southwest. In the Atlantic, air masses enter from northeast and southeast.

Only from the polar regions, via Canada, and from Mexico (in summer) do we get dry air masses over the United States.

NEWS VIEWS

L. Patrick Gray III, acting F.B.I. Director:
 "The object of the criminal justice system should be the protection of society."

Mike Mansfield, Senate Majority Leader:
 "We should try to work within that ceiling outlined by Mr. Nixon."

Le Duc Tho, North Vietnam's chief representative at Paris:
 "It is a moment of joy, a joy that is shared."

Richard Nixon, President:
 "It is time to get big government off your back and out of your pocket."

Melvin Laird, Secretary of Defense:
 "With the signing of the peace agreement, I see no need for further inductions."

Chivalry

Bertie: "I heard your new boy friend is very polite."
 Gertie: "Oh, yes. He has excellent manners. Every time I drop something, he kicks it over to where I can pick it up more easily."

Due For It

Boarder: "Hey, I found a nickel in my hash!"
 Landlady: "Yes, I put it there. You've been complaining about the lack of change in your meals."

Not Fair

Minister: And when I get through with my sermon I'll ask those of the congregation who want to contribute \$5 toward the mortgage on the church to stand up. In the meantime you play appropriate music.

Organist: What do you mean, appropriate music?
 Minister: You play the "Star-Spangled Banner."

Abbreviation

She—I want a shorter skirt than the one you showed me.

Edd Murrell has been on the sick list for the last several days.

The Mod Maidens Hold Meeting

The Mod Maidens 4-H Club met Wednesday, January 31, in the Extension Office for their second in a series of cooking lessons. A lesson was given on the nutritive value of some foods in the milk groups and how to buy, prepare and serve some food in the milk group. Baked Alaska was prepared by the following girls: Janet Johnson, LaDonna Stanaland, Danella Sartain, Grace Chavez, Jane Reed, Kathy Smith, LaRhonda Carriker and Sally Trevino. The adult leaders were Amy Perkins, Brenda Stanaland and Jan Harrison.

Club met Thursday, February 1, in the Extension Office for their first cooking session. Their lesson included two food groups. The nutritive value of foods in the bread & cereal group and the nutritive value of some foods in the milk group were studied. Open Face Cheese Sandwiches were prepared by the following girls: Kim Smith, Lani Arnold, Nita Perkins, Judy Seaton, Beth Owen and Jackie Harrison. Adult leaders were Rosanna Johnson and Bonnie Bispo.

Oscar Kelly of Spur was attending to business in Jayton, Monday.

FRIDAY

7:30 p.m. Sharing Time
 8:15 p.m. Small Groups

SATURDAY

10:00 - 11:00 Coffee Groups
 Youth Coke Party
 12:00 - 1:00 Men's Dutch Lunch - Community Center
 Women's Salad Lunch - Church
 Youth - Hot Pogs
 6:30 p.m. Covered dish dinner at Church
 7:30 p.m. Sharing Time
 8:15 p.m. Small Groups

Clerk--Have you tried the collar department?

Home Definition
 Willie (glancing over stock market page)--Pa, what is "short covering?"
 Father--Your mother's latest party dress, my son.

Hopeful
 Wife--We've got to fire that chauffeur. He's nearly killed me four times.
 Husband--He's a good man. Let's give him another chance.

Dumb
 He (calling from house)--Take a glance at the gas, will you, Mabel?
 Mabel--The indicator says half, but I don't know if it means half full or half empty.

How to make your home more comfortable while you lower your energy costs.

Like to enjoy barefoot comfort in your home all year long?

Like to cut heating costs as much as a third?

Like to cut air conditioning costs as much as half?

The secret is through insulation.

Your home probably has some insulation already. But, thorough insulation includes an adequate amount in the ceiling, in the walls and under the floor. It also includes weather stripping, storm doors and storm windows or double glazed windows.

Once you have good insulation, you can forget about cold floors, cold walls and chilly corners. You'll be more comfortable and enjoy your home more.

The cost will vary, depending on the style of home and amount of insulation already in it. But, one important fact to keep in mind is that insulation is the only comfort improvement you can make in your home which requires no maintenance, yet pays for itself through lower energy bills.

Ask an insulation dealer for advice and a free estimate, or call WTU for more information.

WHAT COSTS LESS NOW THAN IN 1952?

The average cost of a kilowatt hour of electricity used by a residential customer served by WTU cost 29% less than it did twenty years ago. . . (1952 - 1972) and . . . in 1972 the average customer used over three and a half times as much electricity as he did in '52.
