Smith Family Reunion Held At Girard

Descendants of the Mr. and Mrs. T. A. Smith held their annual reunion at the Community Center at Girard, Texas, on the 11th and 12th, 1973, by the Smiths' Court, Texas, and all bids to the County, Texas, have of answered to motor gra he follow scification

man and family, Mr. and Mrs. Danny McWilliams and family, Hobson Smith, Mr. and Mrs. Bill McKinley, Mr. and Mrs. David McKinley, Mr. and Mrs. Jimmy Hare and family, Mr. and Mrs. Bill Battle and family, Mr. and Mrs. Dwain Taylor and family, Mr. and Mrs. Joe Meador and family, Mr. and Mrs. Elmer Smith, Mr. and Mrs. Van Lary and family, Mr. and Mrs. Jackie Ellison and family, Thomas Smith and Tresa.

Kent County 4-H Rally Day Is Held

Kent County 4-H Rally Day was held at the Kent County Community Center on August 14. Bill Wallace gave a slide presentation on his Citizens' Ambassador Trip to Europe. Minette Gealin gave a slide presentation on Texas 4-H Congress that was held in Houston in July. Games were played under the direction of Junior 4-H leaders: Johnny Panter, Rena Bural, Julie Panter, Marion Perkins, Minette Gealin

and Billy Harrison. 4-Hers also attended craft sessions where they made rope halters or painted plaster plaques. Bicycle events were held at the school grounds. Roy Cheyne was winner in the bicycle contest. Beth Owen was high point for 9-10 years olds. Other bicycle winners were Mike Bispo, Billy Fowler, Myra Cheyne, Todd Danham, Jackie Harrison and Frank Harrison.

New Term Of School Opened

Classes began last Thursday at the Jayton schools, and things have pretty well settled down to normal, a spokesman said Tuesday. A total of 262 students were enrolled in grades kindergarten through 6th shows 110 enrolled in 7th through 12th there

werc 152. Broken down the upper bracket looks like this: 7th 32, 8th 23, 9th 25, 10th 23, 11th 23, and 12th 26. A school spokesman said school will dismiss Monday for a teacher in-service meeting. The teachers will be working on the curriculum, it was said.

Mrs. Glenda Bradley is the new homemaking teacher in the Jayton school system. Her hometown is Westbrook. She attended Hardin Simmons, and graduated from Texas Tech in January of 1967, with a Bachelor of Science degree in Home Economics. She was employed as Home Demonstration Agent in Cottle and King counties, and taught three years at Guthrie. She has one son Kent Bradley, age 21 months.

Reception Honoring Judge Ben Charlie Chapman

Mr. and Mrs. George Moore of Carrollton, Mr. and Mrs. Lealeus Buckelew and Mrs. Jack Decker of Broken Arrow, Oklahoma visited Mrs. W. L. Buckelew last week.

The lawyers of the 39th Judicial District are having a reception honoring retiring Judge Ben Charlie Chapman. The reception is to be in the community room of the Haskell National Bank, August 28th from 7 to 9 p. m. The public is invited to this reception to honor Judge Chapman.

Donald W. Heard has joined the faculty and coaching staff at Jayton High School. He lived in Jal, N. M. for 14 years. He will be assistant football coach, junior high coach, and teach P. E. in junior high. He attended New Mexico Junior College and then earned his degree at Texas Tech. He played baseball at Texas Tech in 1970. He and his wife Cathy lived at Sundown three years where she taught in the elementary system.

Heatly Gets Important Committee Assignment

Speaker of the House of Representatives Price Daniel, Jr., announced that he was appointing veteran Representative W. S. Heatly to the Legislative Budget Board. This Board, which makes recommendations to the Legislature for the funding of state government, is composed of four members of the House of Representatives, four members of the Senate, plus the Lt. Governor and Speaker of the House who serve as Chairman and Vice-Chairman. Representative Heatly is a long-time member of the Budget Board, having served first on the important agency in 1956. He has also served as Chairman of the powerful House Appropriations Committee longer than any other

man in history, serving a total of 12 years as Chairman. He is also the only House member appointed by Speaker Daniel who has previously served on the Legislative Budget Board. During the next two years, Representative Heatly will participate in drafting the proposed budget for the entire state government for the following biennium. Heatly said that he looked forward to serving during the next two years because some of the major problems of his decade will have to be solved by the next legislature. Among these will be the need to budget our taxpayers' money in such a way that they get the expected return for their dollars.

Granddaughter Of Jayton Lady Is Married

Miss Kayren Arydeane Oliver became the bride of Steven Gene Huckins when the couple repeated double ring vows at 5 p. m., July 28. Rev. Joe Carson officiated in the home of the bride's parents. Parents of the couple are Mr. and Mrs. Ben D. Oliver of Enid, Oklahoma, and Mr. and Mrs. N. G. Huckins of Skellytown. Given in marriage by her father, the bride wore her mother's wedding gown in a traditional home ceremony. The gown was fashioned of Chantilly lace over satin and was adorned with pearls and sequins. It featured a scooped neckline, dropped waist and straight pointed sleeves. Her face-framer headpiece of lace, pearls and sequins held the floor-length veil of illusion. She carried a bouquet of pink sweetheart roses and white babies' breath. Miss Lottie Oliver

The Jayton School Board Has Busy Night

At the recent meeting of the Jayton school board a number of important items were taken care of, including the following: Accepted the bid of Parker Butane and Propane to supply butane, at the price of 15¢ per gallon. Accepted the bid of Spur Milk and Ice Cream, to supply milk at the price of 9 1/4 cents per half pint. Accepted the bid of Bill Williams Service and Supply at 22¢ per gallon on regular gasoline. Approved the tax rate of \$1.32.

Employed Donald Heard as Coach. Employed Lewis Smith in the school maintenance department. Approved purchase of carpet for the community center living room. Agreed to purchase seating for the gym. Stadium type seats are being installed on the home side of the gym, and on two rows of the visiting side, a school spokesman said. Also voted to pay the current bills, and approve the minutes of the previous meeting of the school board.

Alexander Funeral Is Held Recently

Services for Ira Cecil Alexander, 78, who died at 12:15 a. m. Tuesday of last week, at his home of an apparent heart attack, were at 2:30 p. m. Friday at the Assembly of God Church. The Rev. Robert Ryan, pastor, officiated, assisted by the Rev. Vernon Hager of Lubbock. Burial was in Spur Cemetery by Campbell Funeral Home. Alexander was born March 12, 1895, in Hood County and had been a resident of Dickens County since 1914. He was a retired cotton gin-ner and was a deacon in the Assembly of God

Church. He married Viola Oates, September 13, 1970 in Spur. Survivors include his wife, two sons, Flavious of Spur and Lonnie of Nevada, Calif.; a daughter, Virgie Franklin of San Jose, Calif.; two stepsons, Junior Sprayberry of Spur and G. S. Sprayberry of Fort Worth; three stepdaughters, Oleta Stanley of Jayton, Hazel Fuller of McAdoo and May Archer of Nevada; a brother, Marvin of Spur; a sister, Eva Hussey of Fresno, Calif.; 17 grandchildren; 19 great-grandchildren; and one great-great-grandson.

Fair Meeting Is Set

A fair meeting will be held at Girard, Thursday, August 23, at 7:30 p. m. The rules for the women division will be completed at the meeting. Everyone who is interested in the fair is urged to attend regardless of race, national origin, or economic circumstances.

Subscription Prices Are Changed

The changes in subscription prices to the Jayton Chronicle are now in effect. The price in Kent County, and Stonewall and Dickens County is \$4.00 per year. Elsewhere it is \$5.00 per year. Please bear this in mind when subscribing or renewing. 4.7 per cent the lowest rate in more than three years, the Government has reported.

Unusual Date On Social Security Checks

Some 29,000,000 Social Security Checks will have unusual date on them this month-September according to R. R. District Manager Malone.

1973, Labor Day comes on the 3rd making the 2nd fall on Sunday, it was decided to use September 1st. Thanks to the cooperation of the Treasury Department and the Post Office, some 50,000 beneficiaries in the Big Country should get their checks for August two days early.

Parallel Terracing Gaining In Popularity In Kent County

Although parallel terraces have been an established conservation practice for some eight years this type of practice is gaining in popularity with Kent County farmers. During the winter of 1972-73 Kent County farmers installed approximately 230,000 feet of parallel terraces covering approximately one thousand acres. This is the most footage installed this year in the Lubbock SCS area. These terraces were installed on the farms of E. M. Jones, F. O. SoRelle, V. Thomas, Fowler and Kenady, Bill and Bob McCormick and Elbert Miller.

struction was completed in late December of 1972 and even though the final layout varied some from his original plans Mr. Walker states that he is well pleased with the results.

Parallel terraces have gained in popularity partly because like any business man the farmer has to keep his expenses as low as possible in order to show a profit on his operation. Parallel terraces help him achieve this objective by cutting his plowing, planting and harvest time and decreasing equipment operating time and expenses. They are also flexible enough that they can be designed to fit almost any field and farming operation, including modern 8, 10, and 12 row equipment.

Parallel terraces should continue to gain in popularity as area farmers realize more and more that they are not only a good investment but do an excellent job of erosion and moisture control.

Hot Weather Is Bad On Cattle

Hot, dry summer weather can be a big pain in the eye for cattle. The reason is "pinkeye."

"Pinkeye is an infectious eye disease of cattle of all ages and breeds," says County Extension Agent Geeslin. "However, younger animals under two years of age appear to be more susceptible than older ones."

The eye inflammation occurs most often in summer and fall and is generally more prevalent in white-faced animals. Dry, dusty conditions, bright sunlight, feeding in tall grass and the presence of flies all tend to aggravate the condition.

"The disease is caused primarily by a bacteria," points out Geeslin. "The eyelids swell and a watery discharge increases and thickens. The white of the eye becomes inflamed and a white, gray spot appears near the center of the eye. This spot swells and later opens to form an ulcer."

The agent advises cattlemen to isolate for at least 60 days all new animals brought into the herd. Cattle that have recovered from pinkeye may still be capable of spreading it for some months.

Iowa No. 1 Now In Farm Population

Iowa, Minnesota, and Illinois now have more farm residents than any other states in the nation.

This was brought out in a recent U.S. Department of Agriculture study spanning the decades from 1970 back to 1910. The report marked the first time in USDA records that a Southern state did not have the largest number of farm residents. North Carolina and Texas previously were the heaviest farm-populated states. By 1970, they fell to fifth and fourth places, respectively.

The decade of the 60's continued the long-time downward trend in the number of persons living on farms, dipping from 15.7 million in 1960 to 9.7 million in 1970. Biggest drop was in the South, where farm population decreased by nearly half. The loss principally resulted from the migration of Mr. and Mrs. Billy Wallace, O-O Ranch, Clairemont.

Taxes Run Higher Than Food Costs

Taxes take almost twice as big a chunk out of the consumer dollar as food does. In 1973, the average American will have to work 2 hours and 39 minutes of each 8-hour day just to pay his taxes. But he'll only have to work 58 minutes to pay for his food and beverages.

From cotton farming's mechanization and near-abandonment of the share-tenant system of farming, the report said. In addition, non-farm areas with higher employment opportunities lured a large number of farm residents. The South's black population decreased by well over 60 per cent during the '60s. North and South Dakota led all other states in their percentage of population on farms. Both had about 1 out of every 4 residents living on farms in 1970. Only 13 states in the nation had a farm population that accounted for 10 per cent or more of their total. This was in sharp contrast to 1920—the first year state data became available—when 11 of the 48 states had a majority of residents living on farms.

Bill Wallace Is Freshman At Rice

Rice University's entering freshman will number 640 when the academic year begins August 27. The students are from schools in 42 states and 10 foreign countries. In the group are 116 high school valedictorians, 35 salutatorians and 90 national Merit Scholars. Rice seeks the student with a record of scholastic achievement, intellectual potential and a wide range of talents and

interests. The criteria used in an attempt to predict these qualities are (1) high school record, (2) scores on the Scholastic Aptitude and Achievement Tests administered by the College Entrance Examination Board, and (3) evaluation made by high school teachers and counselors and University representatives in personal interviews. The entering freshman include Billy Joe Wallace,

In Today's Agriculture—

They're Spotting Flies From The Skies

Spotting a tiny fly from an altitude of 10,000 feet may sound even more absurd than looking for the proverbial needle in a haystack.

But that's what entomologists are doing successfully in Texas, and their high-altitude sleuthing could insure an abundance of citrus fruits on consumer tables.

The insect the entomologists are looking for is the citrus blackfly. It's an oriental pest that has taken up permanent residence in Mexico and is now attempting to invade the lush citrus groves in this country.

While the insect—which is only 1/12th of an inch long—can't actually be seen from the air, his whereabouts can be accurately determined

from color-infrared photographs taken from the air.

Trees infested by the blackflies develop a sooty black fungus mold as the result of a honeydew secreted by the insects as they feed. The mold shows up with a distinctive color in the aerial photos.

This new method of detection is faster and less expensive than ground surveys. Its ability to pinpoint small infestations in large groves allows growers to spray only affected areas rather than blanketing the whole grove.

Besides cutting down spray costs, this reduces the amount of pesticides in the environment and causes less disruption of beneficial insect populations.

Entomologists in Texas, Florida, and California are always on the alert for citrus blackfly invasions because of the severe damage they inflict. Short-term infestations can cut crop production in half, and those lasting more than a year can completely wipe out a crop.

The current infestation has been declared a major emergency by the U.S. Department of Agriculture. If it should spread, the nation's citrus production would decline in both quantity and quality and send consumer prices sky-rocketing.

Observers are hopeful that the new weapon provided

them by high-altitude photography will help check the insects' spread.

Meanwhile, this same technique is being applied to other areas of agriculture as well. The National Cotton Council reports it's being used to spot insect and fungus damage in Western cotton fields. It's also proving effective in determining areas in the fields that are deficient in minerals.

In Maine, aerial photography is being tested for a two-fold purpose. One is to give potato growers early warning of crop blight, and the other is to safeguard honeybees.

Since the photography allows precise spraying on pinpointed targets, it's hoped that blanket spraying which endangers honeybees can be eliminated.

Why the concern for honeybees? Crops worth about \$1 billion still depend on bees for pollination.

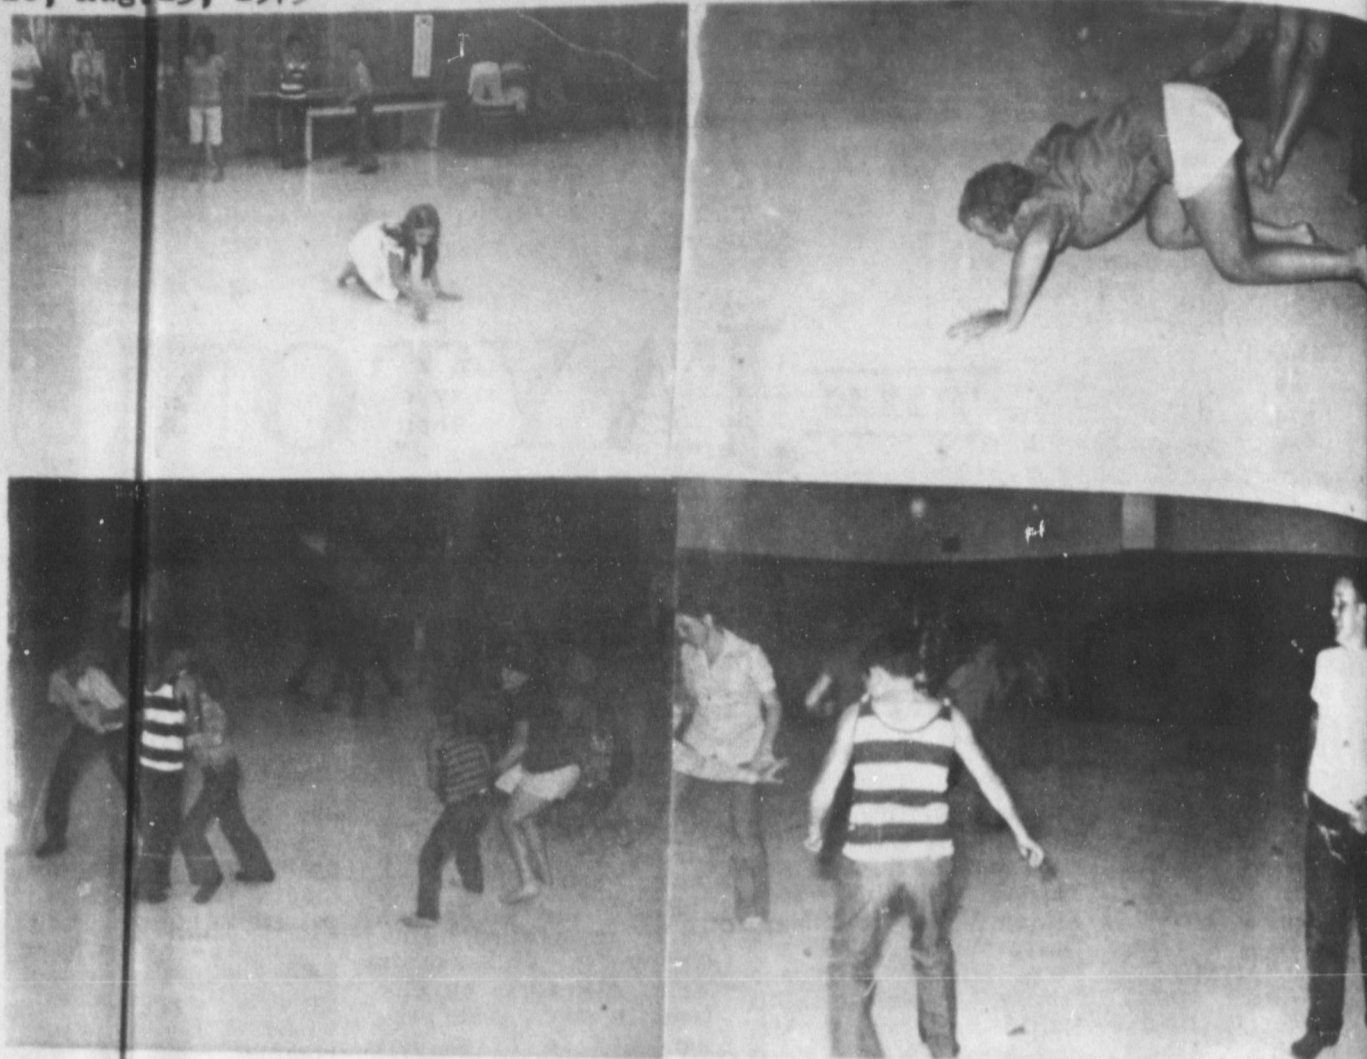

The scope of color infrared photography is expected to be greatly widened in the future as the result of earth-orbiting satellites. New knowledge about crops and forests already is being transmitted back to earth from the satellite launched by NASA last July. And scientists are busily translating data from 550 miles up for down-to-earth applications.

shun the doors of a bank as he would the approach of the plague or cholera.

Far from shunning bank doors, today's farmers are among a bank's best loan customers.

Increasing costs of land, equipment, fertilizer, chemicals, seed, and other materials have made it necessary for farmers to borrow more capital than ever in order to produce the nation's growing food and fiber needs.

On Jan. 1 of this year, outstanding farm debt—not including price support

Optimistic Outlook Held For Future Farm Output

Agricultural research economists are optimistic about the American farmers' ability to provide the added food and fiber that's going to be needed in the next 30 years.

But they're also quick to point out that a lot of help must be developed through research to get the job done. New methods, new approaches, and new ideas are some of the tools farmers will need.

Studies indicate that capital equipment, chemicals, more intensive use of farm land, and more know-how will be available.

Provided the studies are correct and new technologies are developed by research, the Economic Research Service sees big increases com-

ing in crop production in the next seven years. Average corn yields, for instance, are projected at 105 bushels per acre in 1980 compared to 86.8 bushels in 1971.

Sorghum grains' average yields are estimated at 64 bushels compared to 53.9 bushels, barley at 55.0 bushels compared to 45.6, wheat at 36.2 bushels compared to 33.8, oats at 62.5 bushels compared to 55.7, soybeans at 31.0 bushels compared to 27.6.

Other estimates included cotton at 510 pounds compared to 438, rice at 5,300 pounds compared to 4,630, and peanuts at 2,580 pounds compared to 2,045.

Ways Being Sought To Up Beef Supply

One way scientists are working to insure an adequate food supply for tomorrow's growing markets is through animal breeding programs.

A recent study by the USDA's Agricultural Research Service shows that young bulls will generally produce 25 to 40% more lean meat than steers on the same diet.

A related study also indicates Holstein dairy steers may become an even more important source of beef. Tests revealed that Holstein steers produced acceptable carcasses and performed as well if not better in the feedlot than Hereford breeds.

For A Growing Nation

All farm production in the U.S. will have to increase 32 per cent in order to meet the nation's food and fiber needs by 1985, according to current estimates.

Cotton Aids Trade Balance

Cotton exports in the current season are expected to contribute approximately \$750 million to the nation's export earnings.

Corn In Skyscrapers?

Starches and sugars derived from corn play an important role in the manufacture of many components used in the construction of modern-day skyscrapers.

Hired Farm Workers Rise

Total number of paid farm workers in the U.S. was 2.8 million in 1972, marking the second consecutive early increase. Reason for the rise, says the USDA's Economic Research Service, was last year's over-all high production.

Scientific Solutions Sometimes Simple

Scientific solutions to some agricultural problems sometimes prove to be amazingly simple.

To solve the problem of trying to get newly hatched turkeys to eat, poultry scientists put bright-colored marbles in the feed trough.

As the poults peck at the marbles, his beak slides off into the feed. Then after about a dozen or so attempts, he finally begins to eat.

Helicopters In Farming

Helicopters are being used in a variety of new ways in agriculture. In nut-growing areas, they're used to blow pecans and walnuts off trees. And when excessive rains threatened to rot the cherry crop in Washington's Yakima Valley, the down-draft from helicopters helped dry the crop.

Dubious Honor

Recent research shows that nutgrass has the dubious distinction of being the world's worst weed. In one crop or another, nutgrass is found almost everywhere in the world except in the Sahara Desert and the polar regions.

Yesterday's Advice Won't Cut It Today

If today's farmer heeded the advice given his grandfather, he wouldn't be in business long.

That advice—which appeared in a farm magazine back in 1938—was to avoid any dealings with bankers. In fact, the magazine declared, "a farmer should

loans—totaled \$70.1 billion. That's equivalent to about 19% of total farm assets, and reflects a \$5.5 billion increase over a year ago.

Cost of entering the farm business runs slightly higher than the old 40-acre-and-a-mule system did. It's now calculated that the minimum capital required for an aspiring farmer to get in the business is about \$100,000.

California's Top Crop
Cotton is California's leading field crop. In 1972, the state's cotton crop had a gross value of \$291 million.

Here are four scenes from the 4-H Rally made by a 4-H photographer. Jackie Sue Harrison is seen finishing the tennis ball race. Lesa Pickens is racing for the finish line during her contest. Bottom Shows other club members as they participate.

ROLE AS A PARENT

am responsible for my children. I have them in their most impressionable years, and for the greatest amount of time. The school and the church can help but the prime responsibility is mine.

must set a good example by manner, word, and deed.

must provide the right environment; a good atmosphere at home, and the proper influence elsewhere. This means knowing where my children go, and for how long. It is I who should decide which movies should be seen, which companions are acceptable, which books are permissible, and which TV programs are not objectionable.

must teach my children good habits, not only of health and study, but of work, and consideration of others.

must be willing to make sacrifices, not to materials things but to my time and attention to their needs and problems. I do not need to entertain my children, but I do need to exercise reasonable control over their pleasures.

must maintain discipline, tolerant but firm. Children want, need and appreciate good discipline. This means self-discipline - doing what is right because it is right, to have respect for themselves and others. I must insist that they take a share of the responsibility of the home.

must show love for my children by encouraging them to do, rather than for them.

Fraud By Mail

To Eddie, the idea seemed like a sure thing. He mailed out phony invoices to a number of businessmen, billing them for ads they had never ordered, and waited for the money to roll in. Some money did. But so did two federal investigators, who haled Eddie into court on a charge of "using the mails to defraud." In short order he landed in jail, following the path of countless get-rich-quick artists who have run afoul of the United States Post Office.

Under our legal system, most crimes are local. Robbery and riot, murder and mayhem ordinarily come under the jurisdiction of local governments.

But mail fraud is federal business, because the Constitution gives exclusive control of the postal system to the federal government.

Of course, to constitute the crime, the fraudulent scheme must include some significant use of the mails. However, that need not be the central feature. Consider, for example, the case of a man who used chicanery to sell lots in a cemetery. All of his sales were made in person, not by mail.

But he followed up with letters to his customers, partly to allay their suspicions and partly to discourage them from taking him into court. Such use of the mails, a court ruled afterward, was enough to support a federal charge against him for fraud.

Still, there must really be fraud, not just deft salesmanship. In another case a woman was accused of mail fraud because she had been selling "lucky stones" through the mail. But at the trial, she pointed out that she had made no claim of magical virtues for her product - beyond the name itself. Dismissing the charge, the court said:

"There is nothing immoral in the belief that amulets affect the wearer's fortune. If (the defendant) wishes to sell lucky stones for what they are, without lying about them, she is not acting fraudulently in so doing."

LETTER TO THE EDITOR

Mr. and Mrs. J. L. Smith of Fremont, California spent twelve days with her parents, the Moreland and R. A. Jr. They spent some time with me at Rotan Hospital where I spent a week, very ill.

We all enjoyed their visits, but of course my illness threw a damper over the occasion.

I am at home now, much improved. They boarded a plane for their return to California, Saturday, August 18.

I am improving now, slowly.
Adolphus Moreland

Penny-pinching people are often dollar losers.

Insects Could Rule The World

Insects far outnumber human beings. While there are approximately 3 billion people in the world, scientists estimate there are that many insects for every square mile of the earth.

Here's Latest Bug Count

Scientists estimate that American farmers have to

i'm Serious!

Maybe you like smiling babies? Sorry to disappoint you, but I've got a lot on my mind. There's something wrong in America... and I'm the chap who is getting hurt!

Our Constitution says that no one can be denied the right to worship God. I'm an American! According to the Constitution I have the right to learn about God, to hear the Bible Stories, to be taught the Christian Way of Life.

But here's the hitch. While the Government can't deny me the right to attend church school and church—MY PARENTS CAN. They can rob me of my most sacred right just by neglecting my spiritual needs.

Did you know that about half the children in America are growing up without religious training? And yet there's a church in every village!

Yes sir, I'm serious! Instead of talking about it, we ought to do something! And we ought to start Sunday!

Jumbo Cartwheels

Whether it's a tailgate picnic, an over night camping trip or just a simple outing, delicious tasting jumbo cartwheels chock-full of semi-sweet chocolate morsels are a must. Easy to make, the jumbo cartwheels go well with fruit and instant ice tea.

2 cups flour
2 teaspoons baking powder
1 teaspoon salt
1/2 teaspoon baking soda
1 cup butter, softened
2 cups firmly-packed brown sugar
2 eggs
1 tablespoon water
1 1/2 teaspoons grated orange rind
1 1/2 cups granola (oatmeal type cereal)
1/2 cup chopped nuts
1 6-oz. pkg. (1 cup) Nestlé's Semi-Sweet Chocolate Morsels

Preheat oven to 375°F. In bowl combine flour, baking powder, salt and baking soda; set aside. In large bowl combine butter and brown sugar; beat until creamy. Add eggs and beat well. Blend in water and orange rind. Add flour mixture; mix well. Stir in granola, chopped nuts, Nestlé's Semi-Sweet Chocolate Morsels. Drop by teaspoonfuls, 3" apart, on lightly greased cookie sheets. Bake at: 375°F. Time: about 12 minutes. Makes 3 dozen cookies.

Two-Way Honey Sticks

For an extra treat or something sweet to put in the cookie jar, try the Two-Way Honey Sticks. The Honey Sticks are easy to make. Be certain to divide the batter in half. Mix 1 cup unmelted morsels into one half of the batter and 1 cup melted morsels into the remaining batter. This way, you will have two different types of Honey Sticks.

2 6-oz. pkgs. (2 cups) Nestlé's Semi-Sweet Chocolate Morsels
2 cups flour
2 teaspoons baking powder
1 teaspoon salt
1 cup shortening
1/2 cup sugar
2 teaspoons cinnamon
2 teaspoons vanilla extract
2 eggs
1 1/2 cups honey

Preheat oven to 400°F. Melt over hot (not boiling) water 1 6-oz. pkg. (1 cup) Nestlé's Semi-Sweet Chocolate Morsels; cool. Combine flour, baking powder and salt; set aside. Combine shortening, sugar, cinnamon and vanilla extract; beat until creamy. Beat in eggs. Alternately add honey and flour mixture. Divide batter in half. Stir 1 6-oz. pkg. (1 cup) Semi-Sweet Chocolate Morsels into one half and melted morsels into remainder. Spread each batter into a greased 15" x 10" x 1" pan. Bake at: 400°F. Time: 12 minutes. Cool. Dust with sifted confectioners' sugar, if desired. Cut into 2" x 1" sticks. Makes 8 dozen cookies.

LIVE 'n LAFF

"It's been exactly nineteen years, three months and two days since you last said you loved me!"

combination of moisture, temperature, and nutrients before they will germinate.

This is why, they add, that farmers may suddenly be confronted with a weed problem they thought they had cured years earlier.

Few Holds On Catsup
Tomatoes are showing the biggest increase in consumption of any processed vegetable in the United States.

And the reason, experts say, is all that catsup being served up by fast food stands and pizza emporiums.

Weed Damage Measured
Only in recent years has research made it possible to accurately measure crop damage resulting from weeds. Latest study shows

that one pigweed per row foot in soybeans cut yields by one-fourth.

VACATIONING
Mr. and Mrs. Coy Hoggard of Denton spent their vacation visiting Mr. and Mrs. G. H. Hoggard.

HOUSTON VISITORS
Mr. and Mrs. Boyd Hoggard of Houston visited Mr. and Mrs. G. H. Hoggard during their vacation.

Mr. and Mrs. Calvin Hoggard of Lubbock spent the week end with Mr.

Cream Cheese Cookies

1 cup butter or margarine, softened
2 3-ounce packages cream cheese, softened
1 cup sugar
1 teaspoon vanilla
1/4 teaspoon salt
1 egg
2 tablespoons milk
2 cups sifted all-purpose flour
3/4 cup chopped peanuts

In large mixer bowl, cream together butter or margarine, cream cheese, sugar, vanilla and salt. Add egg and milk; beat well. Add flour; stir in peanuts. Drop from teaspoon onto ungreased cookie sheet. Bake in 350° oven for 15 to 17 minutes. Remove to wire rack to cool. Make: 4 1/2 dozen cookies.

No-Bake Cookies

6 cups sugar
5 Tbsp. cocoa
1 1/2 cups oleo
1 1/2 cups milk
1 1/2 cups peanut butter
2 qts. oatmeal

Mix sugar, cocoa, oleo and milk. Put on stove and let boil for two minutes; set off and let cool. Then add peanut butter and stir until mixed and then add oatmeal.

LETTER TO EDITOR

Dear Mr. Richards,
Please put a write-up in the Jayton paper about the Aspermont and all consolidated school district's homecoming on September 29. The Ex-student Association officers need any addresses of ex-students and teachers that we can get.

Please urge them to send these to any of the officers here in Aspermont. The officers are: George Kenady, President; Buddy McNutt, vice-president; Lady Pittcock, treasurer; Nancy Douglass, secretary; and Alice Graham, reporter.

We need these addresses soon and appreciate your help. We will send you a write-up of the homecoming to put in your paper when all plans are completed. Thank you so much. Alice Graham

NOTICE TO BIDDERS

Notice is hereby given that sealed bids will be received until 10:00 a. m. August 27th, 1973, by the Commissioners' Court of Kent County, Texas, at which time all bids will be opened at the Courthouse in Jayton, Texas, for the purchase of one new diesel powered tandem drive motor grader with the following minimum specifications:

- 125 horse power, 6 cylinder engine
- Electric starter
- Cab
- Heater
- 12 Ft. hyd. sideshift moldboard
- 1300 x 24, 8 ply tires
- Four wheel hydraulic boosted brakes
- Steering booster
- Weight not less than 25,000 lbs.

The Court will offer as trade in one used Caterpillar motor grader, Serial No. 70D-3868.

The Commissioner's Court reserves the right to reject any or all bids. By order of the Commissioners' County of Kent County, Texas. Signed: Norman Hahn County Judge, Kent County 27-2tc.

NOTICE OF HEARING

Notice is hereby given that Kent County Commissioners' Court will have a hearing on the County Budget; adopt a budget, and set the county tax rate, Monday, August 27, 1973 at 10:30 a. m. Signed Norman Hahn County Judge Kent County, Texas 28-1tc.

and Mrs. G. H. Hoggard. Selfish individuals contribute very little toward a better world.

VISITING HERE

Guests of Mr. and Mrs. H. T. Stanaland last Sunday were Mr. and Mrs. S. C. Jones, Mr. and Mrs. Jerry Guynes and girls of Caruthers, Calif., Mr. and Mrs. Babe Tarpley of Merkel, Mrs. Mattie Gregory, Mr. and Mrs. Troy Gregory of Big Spring.

Mrs. Jones and Mrs. Gregory are sisters of Mrs. Stanaland.

VISITING HERE

The children of Mr. and Mrs. H. T. Stanaland Jr. are here with their grandparents, while they attend a National Convention in Miami, Florida.

IN NEW MEXICO

Mr. and Mrs. Royce Stanaland and family spent the week end with Mr. and Mrs. Tommy Schuessler of Lovington, N. M.

The man or woman without faith in anything or anyone gives evidence against themselves.

MIAMI VISITOR

Pattie Erving of Miami spent the weekend with Leella Hall.

IN HOSPITAL

Katie Dyer is a patient in Stamford Hospital.

SUNDAY VISITORS

Mr. and Mrs. Leslie Cheyne of Aspermont, Mr. and Mrs. Marvin Cheyne of Abilene and Mr. and Mrs. Olen Cheyne of Jayton visited Mrs. Velma Cheyne Sunday.

WEEKEND VISITORS

Mr. and Mrs. Don Schafer and Mr. and Mrs. Chester Schafer of Lubbock visited Mr. and Mrs. Lynn Schafer this weekend.

VISITS PARENTS

Billy Parker of Snyder visited Mr. and Mrs. Jarri Parker Sunday.

VISITS MOTHER

Mr. and Mrs. Charley Champion of Junction visited Mrs. Ruby Mathews this weekend.

High school sophomores, juniors, and some seniors will take an important step this fall toward college selection and admission. At the same time, junior students will be entering the nation wide competition for the prestigious scholarship programs administered by the National Merit Scholarship Corporation.

In the third week of October, 1973 students here will join with more than one million other high school pupils in taking the two-hour Preliminary Scholastic Aptitude Test/National Merit Scholarship Qualifying Test (PSAT/NMSQT). The test is administered in participating secondary schools on either Tuesday, October 23, 1973, or on Saturday, October 27, 1973, whichever date is selected by the school.

This test is administered each year in October and is the first step in the competition for National Merit Scholarships. Last year 57,488 students from 981 Texas schools completed the examination. Early this fall a group of these students will be named National Merit semi-finalists and will continue to compete with students from other states for academic recognition and for scholarships worth more than \$7 million dollars.

The nationally standardized test measures the two basic abilities used in college -- verbal and mathematical aptitudes. It is designed to assist students of all ability levels -- low, average and superior -- to plan their further education.

Each student, as well as the high school counselors, will receive not only the test scores but an interpretive booklet giving information about what those scores mean in terms of planning courses for the remainder of the high school years and of selecting a college and a college program.

The scores and the information which accompanies them will enable students to:

- Identify strengths and capitalize on them by getting ready to try for college credit by examination. One of the most significant changes in Southwestern colleges in the past decade has been the growing willingness to award credit on the basis of examination.
- Identify weaknesses and modify high school course schedules to correct them. Students who take the examination in their sophomore year have the maximum time to plan how to take advantage of strengths and overcome weaknesses.
- Estimate how well they will do on the Scholastic Aptitude Test (SAT) used by many colleges for admission.
- Take advantage of other College Board services such as the College Handbook and College Locator Service to compare scores with those presented by applicants at hundreds of colleges as well as to estimate chances of acceptance and success at various colleges.

In addition, juniors who wish to do so can ask that their names be placed in the College Board's Student Search Service files. Colleges interested in attracting students with certain characteristics use this service to identify such students and communicate with them directly information about the institutions, and special programs.

Weed Seeds Germinate After 50 Years

Weeds are the original di-hardies in civilization. Scientists who ran germination tests on weed seeds buried for up to 50 years came up with startling proof of this.

They reported that 51 of 107 weed species tested still had viable seed after 20 years. Weed seed with the greatest longevity were dock and pigweed. Scientists said 52% of dock seed buried for 50 years germinated, while 66% of pigweed seed sprouted after 40 years.

Tests also showed that 74% of morning glory seeds germinated after 5 1/2 years, and 29% of Johnson grass seed after 3 1/2 years.

The reason these seeds remain in the soil for such a long period without sprouting is apparently related to environmental conditions. According to the scientists, some seeds need just the right
