The Jayton Jays Scoot Past Rule In Friday Game

The Jayton Jay played hard against Rule in Jayton, May 30. The game was originally scheduled at Rule, but was played in Jayton because of rain in Rule. The game resulted in a 14-12 victory for the Jays. Jay pitchers were: Rusty Crawford 4 innings and Lanny Hall, 3. 10 runs were batted in by: Gene Cleveland, 3; Robert Segura, 2; Kenny Kidd, 3; and Lanny Hall, 2.

Home runs were hit by two Jayton players, Gene Cleveland and Kenny Kidd. These were the only two extra base hits, the additional hits being singles. Umpires for the game were John Gibson, David Fincher and Boyed Dees.

Herman Dunham coaches this fine team with W.D. Hall as Manager, and Mike Wilson and Steve Kidd as assistants.

Congratulations on a very fine game. Keep winning!
Reported by, Janet Johnson

Mrs. Lillian Nichols Honored May 23

Friday, May 23, from two to four p.m., Mrs. Lillian Nichols, retiring teacher, was honored with a tea in the Homemaking building of Jayton High School.

On behalf of the faculty and staff of the Jayton School, R. N. Pierce, superintendent, presented the honoree with an Omega wrist watch. Mrs. Nichols was also the recipient of many other lovely gifts.

Included in these were a set of Stoneware pottery and a set of stainless steel flatware from members of the National Honor Society, of which she has been sponsor for the last nine years.

Mrs. Glenda Bradley, Mrs. Sherry Kay Hall, Mrs. Sue Alexander, and Mrs. Nina Fincher presided at the refreshment

table. Miss Zephie Brown registered guests.

More than seventy guests registered, including county workers, students, ex-students, school patrons, and friends.

New School Law Will Cost Jayton People \$91,000.00

Austin...State Senator Ray Farabee was one of several rural Senators opposing Senate passage of a new school finance plan. The measure, known as the Revised Foundation School Plan, has passed the Senate.

Farabee said he voted against passage of the bill because portions of the legislation would cause increases in the amounts local school districts have to raise. School districts under the present plan are required to raise at least 20% of the cost to participate in the Foundation Program. Under the new plan, districts would be required to contribute approximately 30%.

Under this new program," Farabee said, "it is estimated Jayton-Girard ISD would have to increase its local payment by \$91,000. In return, the would receive no increase in State aid."

The Senator explained that a portion of the increase in local money required would be offset by increases in State funding.

"Since some programs are currently being paid for with local money," Farabee said, "it is

unclear as to whether new taxes will be required at the local level. It is my contention that the Legislature should not pass a state-wide program such as this one and then expect local districts to shoulder such a tremendous portion of the burden for funding the program."

During Senate debate, Farabee and other West Texas Senators attempted to amend the bill to insure that no school district would lose teachers over the number they presently employ. At first, the amendment was not accepted; however, it was later included in a modified form.

Farabee pointed out several portions of the bill which he felt would be beneficial to rural areas. One section provides a 62.5% increase in transportation allotments. The Senator acknowledged that such an increase would be a great help in the face of rising transportation costs. "Particularly in our rural areas where the school districts cover a large area," Farabee said.

The new program would also provide some funds for Driver Education Programs.

Bull Riding Is Added To The Program at Fair

LUBBOCK -- Open jackpot bull riding and an open championship cutting horse contest have been added to the growing list of attractions of the 58th annual Panhandle South Plains Fair here, Sept. 20-27.

Steve L. Lewis, general manager, said the two events were being co-sponsored by the fair association and the Lubbock County 4-H Clubs.

"We feel they will add a whole new dimension to the fair," Lewis said.

Both events will be held in the new livestock pavilion.

The bull riding is slated Sept. 24 and will be limited to the first 50 bull riders who enter. Entry fees will be \$40 (\$30 jackpot) and six places pay back on one go-round. Added money of \$500 has been earmarked for the event, Lewis said.

The show secretary will be Mrs. Ann Rasmussen.

The purse for the Sept. 25 cutting horse contest will be \$500 plus entry fees. There will be six placings for one go-round.

The entry fees have been set at \$50 each, plus \$35 cattle and office charged for a total of \$85.

Mrs. Rasmussen also will be secretary for the contest. Judges will include Bill Undershill of Gainesville and Spencer Baize of Stamford. The National Cutting Horse Association representative at the show will be Wayne Pooley of Lubbock.

The highly flexible features of the new livestock pavilion are ideal for shows such as the new additions to the fair card, Lewis said in announcing the two events.

Farm Bureau Urges Farm Loan Plan Be Rescinded

WACO -- Texas Farm Bureau President Carrol Chaloupka has asked the U. S. Department of Agriculture to rescind the May 23 action on cotton loans and extend the loan period on the 1974 crop from 10 months to 18 months.

"This would allow our cotton producers to work that cotton onto the market and not be forced to compete with Commodity Credit Corporation inventories," Chaloupka said in a message to Agriculture Secretary Earl Butz.

Chaloupka made the request following Friday's announcement by USDA that the loan period would not be extended. Many outstanding loans on the 1974 cotton crop are coming due June 1, the state farm leader said.

"The USDA decision not to extend the loan period is a great disappointment to Texas cotton producers," the Farm Bureau leader said. "The cotton industry faces continued disaster if some measure of assistance is not provided."

Chaloupka said that loan program has given producers an alternative to taking great losses in the marketplace in recent months.

The Texas Farm Bureau first asked the CCC in March for an extension of the loan period, saying at the time that recovery of domestic and foreign markets for cotton was unlikely before June.

Chaloupka said CCC President Clayton Yeutter's reply at the time indicated that future conditions would dictate the course of action.

The spot market for cotton has already responded by breaking significantly lower," the state farm leader told Butz. He reminded the Agriculture Secretary that federal regulations permit CCC to extend the time of repayment or to carry the loans in a past-due status.

Hubert Humphrey, Senator (D-Minn.), on aid cut to Israel:

"Undue delay as a way of pressuring Israel will not be condoned . . ."

Frank G. Zarb, Federal energy chief, on strip mining bill:

"We can't visit that kind of thing on the American people even if the objective is as noble as this one."

Ladies Jayton Golf Luncheon Club News June 10

The regular meeting time for the ladies prayer luncheon is Tuesday June 10th at 11:45 a.m. in the Jayton Community Center. Ladies come and bring a friend.

At the last meeting Mrs. Truett Kuenstler was in charge of the meeting due to the absence of Mrs. Bill Perkins the President. Mrs. Joe Favor brought a good devotional.

Club Meets

The Jayton Art and Craft Club met May 22 at the Community Center. The business meeting was in regular form by Mrs. Bill Vencil in the absence of the president, Mrs. M.V. Jay.

Nine members answered roll call and enjoyed a delicious lunch. Next meeting will be at Jayton Community Center June 12 from 10:00 a.m. until 3:30 p.m. New members and visitors are invited.

Gardeners Need A Plan For Spraying

Home gardeners should follow a complete spray program during the growing season if they expect to produce quality peaches, plums, and pecans without disease problems.

Spraying of fruit trees should begin at pink bud and continue at two-week intervals throughout the season until the fruit is harvested, points out Kyle Smith, county agent for the Texas Agricultural Extension Service. Effective materials include sulfur, captan and benomyl. Sulfur is the cheapest of these but is less effective in areas of high rainfall and high humidity. To produce top quality

A Jack and Jill tournament was played June 1. The eighteen hole tournament started at 1:30 p.m.

Winners were: First place, Mr. and Mrs. Larry Hildreth. Second, Mr. and Mrs. Sterling Fudge. Third place, Mr. and Mrs. Buddy Gallagher.

A total of twelve teams were entered. The Annual Partnership Tournament will be played June 7 and 8. There will be 18 holes played each day with a \$30 per team entry fee.

General Crude Oil Company has reserved the clubhouse for their annual tournament June 14.

The Men's Club Championship will be played on June 21 and 22. This will be a full handicap tournament with eighteen holes played each day. Entry fee is \$5.00 per person.

Dean Burch, on a meeting of the President's campaign planning committee:

"The biggest topic was the Federal election act of 1974. None of us has ever been familiar with it."

Your Pet May Get Cancer Too

The recent publicity about Breast Cancer has prompted Dr. Dennis McIntosh, Public Information Chairman of the Texas Veterinary Medical Association, to emphasize the fact that veterinary patients are also susceptible to many forms of cancer.

Breast cancer is relatively common in mature, unsprayed female dogs. Any enlargement of the mammary chain, or the presence of a lump in this area should be checked by your veterinarian immediately.

A lump that occurs somewhere else on the body should be watched

closely and, especially if it appears to be getting larger, your pet should also see his or her doctor. Any odd lumps, raw sores that won't heal, constantly draining infections, or painful areas should have immediate attention. Early removal and diagnosis are extremely important, and the spread of this disease may possibly be stopped.

Cats are not free from danger, either. The key in both species is early detection and treatment. Dr. McIntosh recommends contacting your local veterinarian if you have any questions.

A Special TSCRA Meeting at Gail

Dear Mr. Richards, Mr. Rich Anderson is having a membership meeting of the TSCRA in Gail, June 7.

This will be an important and informative meeting for our area concerning the economics of the cattle business.

We would like to have good news coverage and think you will find it worth while. There will be a press room set up and hopefully copies of the important speeches will be available. The T.V. and radio stations from Lubbock and Midland are expected to cover the meeting, also.

Five hundred invitations have been extended to cattlemen in the twelve surrounding counties, including Kent County.

The meeting should offer some very interesting copy. An agenda is enclosed for your convenience.

Sincerely, Barbara Anderson Ed., The Borden Star Box 153, Gail, Texas 79738

It's True You make more friends by becoming interested in other people than by trying to interest people in you.

Vickers Reunion

The Vickers reunion will be held at Clairemont June 7-8. Friends are invited to come for a visit.

Thank you, Mrs. Ollie Miller

Proof Positive A fanatic is a guy who can't change his mind and won't change the subject.

blood on the ground.

Also, advanced medical students, I am sure would get a charge out of going out and practicing with their knives, by performing this type surgery on these animals.

There "has got to be" a definite reasonable answer to this thing. It is only a mystery, because those doing the job are getting by with it, and not getting caught.

Sooner or later someone will be caught, and then the whole situation will unfold and will be very fundamental.

The lines are drawn, the declarations have been made, and a battle ensues between President Ford, and the Congress over the energy situation.

In the meantime, everyone says the price of gasoline at the retail pump is going up-up-up.

This is a deplorable situation. If Congress had gone to work when it was first proposed, and got started with the Alaskan pipeline to get the oil out of the far north regions, the oil shortage would not be so acute. Also, many people feel that, down through the years the oil lobby has done an extremely good job on the members of Congress, and they pretty well have things going their own way.

Former Texas Governor John Connally is now making noises like a man running for President. He recently said he was not a candidate but made it known he would not be too reluctant about becoming one. He was quoted as saying that President Ford has not proven himself yet, and he did not think Ford and Rockefeller should be handed the two top places on a silver platter.

All of this indicates politics are going to be popping in 76.

With the Republicans is the president, Reagan, Connally, Baker, Rockefeller, Weicker, and perhaps others.

Right now with the Democrats, there is a stop Wallace campaign going on. Then of course Kennedy is always around the corner, as is Jackson. Texas' Lloyd Bentsen is an announced candidate, with several others yet to come on.

Also, Texas senior senator John Tower is keeping his ears to the ground, sounding out public opinion.

It is not too unthinkable that Texas would have a man in second place on both tickets.

The school bells have rung for the last time on the current session. Now, the kids (children) are on their summer vacations, and not many of them are unhappy about the situation.

Some of the teachers are still around with chores to do, but most of them are also on vacation.

Some of them will be taking summer jobs, and others will enroll in school somewhere, to further their educational achievements, to get new degrees,

A news item in a recent issue of the Lubbock paper, points out a bad practice that many judges have been using for a long time.

One of the bill of rights amendments to the constitution says that excessive bail shall not be required of people in jail. In this case it was pointed out that Lubbock District judge reduced bonds for local people in jail from \$25,000 to \$2,500. This is putting it down to only one tenth of what it had originally been set by the local justice of the peace.

It is not uncommon to read of instances of this. Biased judges are in the habit of doing this, which in effect is denying bond.

Sometimes in minor cases, of misdemeanor, the bond may be as much as ten times as much as the fine would be if the person entered a plea of guilty.

This practice, also is used by justices of the peace, and corporation court judges, in an effort to force the defendant to enter a plea of guilty.

Most people don't know the law in this regard. It states that the judge MAY (not MUST) require the defendant to make bond.

The Texas Legislature is in its last hours. It has passed a very highly controversial school bill. Local school people say this new law will serve to give local school taxes a big hike.

Also the Legislature passed a watered down bill that tends to set limits on mal-practice suits against doctors and other medical people. Doctors in many places are going on strike because their insurance rates have gone so high they say they can't pay them.

All around the country for some time, there appears here and there a case of an animal killed and mutilated. Each case is surrounded by mystery, as to how they were killed, and what was the situation around the case.

I went out and inspected the animal killed in the Estacado community about a month ago.

Lubbock county sheriff Chas. Blanchard is quoted as saying he thinks the animals recently killed in his county WERE NOT killed by human beings. I am inclined to differ with him. I think it definitely was done by humans. How it was done, I don't know, but I have some ideas.

It is very likely they were killed with some sort of a medicated shot, maybe a poisoned charge, similar to the ones used by big game hunters that shoot the animal with a shot that keeps him out for awhile. An animal could just as easily be killed this same way depending on the type dosage in the charge.

This guess is rather far out, but not unreasonable.

If you notice, most of these killings are within reasonable distance of medical, or Vet schools. Some advanced medical students or a student, or even graduate of morticians school, would know how to kill an animal where there would be no massive bleeding, and no

Tips Given To Farmers On How To Speed Up Process

College Station -- Just what can livestock producers do to speed up indemnity payments in the brucellosis eradication program?

This question arises at virtually all brucellosis educational programs held in Texas, as a result of the lag time that follows the slaughtering of animals that react to the brucellosis test, says Dr. James Armstrong, veterinarian with the Texas Agricultural Extension Service.

To get the answer, Dr. Armstrong contacted U. S. Department of Agriculture veterinarians with the Animal and Plant Health Inspection Service (APHIS) in Austin, who with the Texas Animal Health Commission officials administer the program.

"Reason for paying brucellosis indemnity is to compensate the owner of a reactor for the loss of an animal maintained as part of a beef breeding herd. Reactors disclosed at slaughter plants are not eligible for indemnity, but reactors found in herds that are tested as result of slaughter reactors are eligible for indemnity," says Dr. E. S. Cox, APHIS veterinarian in charge.

Reactors found on a test at auction markets are eligible for indemnity, provided the herd of origin is tested, Cox adds.

According to the federal veterinarian, there are nine requirements for brucellosis indemnity. They are:

1. Reactors must be disclosed by an approved test for brucellosis, and properly identified on all documents.
2. Reactor animals must be tagged and branded within 15 days after disclosure.
3. Herd of origin must be quarantined or tested within 30 days after disclosure of reactor at livestock markets, veterinary clinics, or other concentration points.
4. Movement of all reactors from a quarantined herd must be

permitted either directly to slaughter or to an approved market for consignment directly to slaughter.

5. Premises must be cleaned and disinfected. Under certain range conditions, this regulation may be waived.

6. Reactors must be slaughtered within 15 days after tagging and branding. Slaughter must be verified by a receipted movement permit or other acceptable documents from Meat Inspection Personnel. (Form 1-27 signed by Meat Inspection veterinarian).

7. Indemnity claim forms ANH 1-23 and 1-23A (USDA) must be submitted.

8. Registration papers for purebred reactors must be submitted (original document required). No indemnity is paid on grade males.

9. Signature of mortgagee on the claim form is required if reactor cattle are mortgaged.

Cox said there are some 10 common problems which prevent prompt payment of indemnity claims. Some claims are lagging more than six months behind schedule as a result of the following problems:

1. Records do not provide clues for tracing reactors to the probable slaughtering plant.
2. Slaughter plant records are incomplete so that positive verification is difficult.
3. The same reactor is reported to be slaughtered in two or more plants, which requires a field investigation to clarify.
4. Reactor eartags are removed or lost prior to slaughter.
5. Lack of acceptable documentation when herds of origin are not tested.
6. Lack of acceptable documentation to establish legitimacy of beef breeding herd status. (Must be an established breeding herd).
7. Signature on claim does not correspond to

New Texas Films Are Very Popular

New Orleans -- Two new Texas Highway Department films, "The Missions of Texas" and "Festival Time in Texas," have captured the travel industry's "Oscar" in competition with travelogues produced by government offices throughout the United States.

Finishing ahead of other municipal, state and federal film programs, the Texas travelogues were judged the best of the year at the annual Discover America Travel Organization's conference which concluded here last night.

"The Missions of Texas" deals with Texas' earliest centuries of recorded history. Narrated by Ricardo Montalban, it explores 10 ancient mission sites stretching from El Paso to the East Texas Piney Woods. Indian, Spanish and Mexican-American heritages are woven into a dramatic account of the New World frontier that was Texas.

"Festival Time in Texas" takes an entirely different tack. A feminine narrator conducts a light-

hearted romp through more than a dozen events where Texans congregate for fun. It captures the exuberance of celebrating Cajuns, the belting rhythm of deep soul music, fiery Mexican fiestas, and lots of down-home entertainment where guitars and fiddles are king.

Both of the new motion pictures are in the quarter-hour format especially suitable for television. They will be seen this year by some nine million viewers on TV broadcasts across the nation. In addition, the Highway Department lends prints for free showings to club, school and group functions throughout Texas.

Available in 16mm sound and color, prints of the award-winning films may be borrowed from the Texas Highway Department, Travel & Information Division, P. O. Box 5064, Austin, Tex. 78763.

4-H Offers Practical Experiences

Practical experiences in production, marketing and animal nutrition are a great part of 4-H agriculture projects along with group interaction and personal satisfaction, contends a 4-H and youth specialist for the Texas Agricultural Extension Service. During the past year more than 70,000 4-H youth participated in agricultural and related projects. All joined in the excitement of competing, with some winning championships. However, all engaged in learning and maturing experiences along the way. They have also developed certain skills through decision-making opportunities and leadership experiences.

The number of births is headed up again. The main reason is that the number of women of child bearing age is the highest ever--yet women are having fewer children than before, reports Dorothy Taylor, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

He's 'Westing'
A lady opening her icebox spies a drunk there.
Lady: "What are you doing in my icebox?"
Drunk! "This is a Westinghouse, isn't it?"
Lady: "Yes."
Drunk: "I'm just 'Westing'!"

Useful
"Have you done well with your bees this year?"
"Yes and no. They haven't given much honey, but, on the other hand, they stung my mother-in-law."

Heavy Tipper
This bum walks up and says, "Say buddy, can you spare \$5 for a cup of coffee?" And I say, "\$5 for a cup of coffee? Are you nuts?" And he says, "Yeah, I'm a heavy tipper!"

ON PET TURTLES
WASHINGTON--The Food and Drug Administration has banned the sale of pet turtles because they are carriers of salmonella bacteria and is easily transmitted to children.

ROCKET LOSS
CAPE CANAVERAL, FLA. A U.S. rocket carrying two satellites was lost in space recently, dooming a \$57-million mission aimed at establishing the final link of a worldwide military communications network.

ON DIRECT VOTE
A constitutional amendment, introduced by Senator Birch Bayh (D-Ind), calling for the election of Presidents by direct popular vote was approved by a Senate Judiciary subcommittee.

A RECORD AT YALE
NEW HAVEN -- Degrees were conferred by Yale University on 2,859 men and women, more than at any commencement ceremony in the institution's history.

Every citizen complains about the taxes that he has to pay.

GENERAL REVENUE SHARING PLANNED USE REPORT

General Revenue Sharing provides federal funds directly to local and state governments. This report of your government's plan to use the money will be sent to you to encourage citizen participation in determining your government's decision on how the money will be spent. Note: Any expenditure for the sixth entitlement period, July 1, 1975 through June 30, 1976, plans to spend these funds for the purposes shown.

PLANNED EXPENDITURES

The Cost

Information revealed in dribbles since the recovery of the thirty-nine American seaman from Cambodian custody now indicates the United States lost more servicemen in the recovery than the number of seamen recovered.

Though this doesn't mean the operation should not have been mounted, it reveals that it was regrettably costly, and--in retrospect--could have been handled better. It was, by necessity, of course, a hastily organized undertaking and mistakes are certain to occur in such operations.

The net effect of the rescue of the seaman, worldwide, was good but the best description of the operation itself remains, "regrettably costly."

Arthur Burns, Federal Reserve Chairman: "We're in a turning zone other: 'I like men who make and I think this is a time to things. Like M. Potter. He pause as far as fiscal policy is concerned.'"

He Did: One sweet thing to another: "I like men who make and I think this is a time to things. Like M. Potter. He pause as far as fiscal policy is concerned." -Topnotcher.

Isn't It So? Stupid Steve says: "Too many of us are like wheelbarrows: useful only when pushed, and easily upset." -News, Detroit.

No Answer: The question today is "what is the world coming to?" but "When?" -Herald, Britain.

Double your money!

SWEETWATER SAVINGS NEW \$1,000 SAVINGS CERTIFICATE WILL PAY YOU \$2,000.27 IN 9 YEARS AND 11 DAYS!

Unbelievable? But true. While Sweetwater Savings new 7 1/4% savings certificate requires a minimum of six years to reach maturity, you can elect to leave it longer. As this example shows, at 9 years and 11 days your \$1,000 becomes \$2,000.27 without you ever adding another penny. That's an average yield of \$111.00 annually and all Sweetwater Savings accounts are insured up to \$40,000 by the FS LIC. Honestly, where can you earn more on insured savings?

CURRENT ANNUAL RATES

7 3/4% 6 YR. CERT.—\$1000 MIN.	6 1/2% 1 YR. CERT.—\$1000 MIN.

Jayton, Texas

Favorite Recipes of Opal Richards

Mother's One Egg Cake

1 cup sugar
 1/2 cup shortening
 1 egg
 1 cup milk
 2 cups flour
 2 tsp. baking powder
 1 tsp. vanilla
 1/4 tsp. salt
 Cream sugar and shortening. Add egg and cream

well. Add vanilla. Add milk gradually, and alternately using the flour, that has baking powder mixed with it. Put ingredients in 2 layer pans, that have been well floured and greased. Bake 30 to 40 minutes in a 350° oven. Ice with favorite icing.

Banana Split Cake

2 cups graham cracker crumbs
 1/2 stick butter or margarine, melted
 1 box powdered sugar
 1 package (3 oz.; cream cheese
 1/20 oz. can crushed pineapple, well drained
 3 cups sliced bananas, about 4 or 5
 1 9 oz. carton dessert topping
 1 4-ounce jar maraschino cherries, drained (1/2 cup)
 1/2 cup coarsely chopped

pecans
 Combine margarine and cracker crumbs and press in a baking dish. Combine beaten eggs, powdered sugar, cream cheese, and softened butter. Beat five minutes. Spread over crumbs. Spread pineapple mixture. Place bananas over pineapple. Spread whipped topping over pineapple. Sprinkle pecans and cherries on top.

Chill for 6 hours or overnight.

ABOUT YOUR HOME

Save on your food budget by planning menus for a week, and buying accordingly. Why not have a "left-over" meal and serve portions in individual servings?
 When your new magazines arrive, tape a recipe card on the front cover and jot down the page numbers with recipes or other information you wish to clip out.

Fashion
 Needlework of all kinds is being revived. Many people find it relaxing as well as a delightful way of decorating the home--pillows have come back in and many foot stools and chairs are covered with needlepoint or beigns done in one of the new stitches.

ON TIRE RATINGS
 The Government has ordered tire companies to mol ratings on treadwear, traction and temperature resistance into the sidewalls. State tire companies have cot tested the rules.
 There's little honesty left in conversations these days.

Notes From Washington

By Cong. OMAR BULLISON

Washington, D. C.—THE MOUNTING PROBLEM OF DISPOSING OF SOLID wastes plagues all America. Cities, towns, manufacturing and commercial operations are finding it more and more difficult to meet standards in disposing of liquid effluence but getting rid of solid materials is even more so.

IN THE PAST FOUR OR FIVE DECADES, ACCORDING TO REPORTS, THE amount of solid waste discarded per person in this Country has doubled. Collections of throw-away stuff amounts to more than 225 million tons per year with disposal costs of more than \$5 billion annually. The National League of Cities reports that about half our towns and cities will run out of current disposal capacity in from two to five years.

THE INCREASE IN THE VOLUME OF MATERIALS ENTERING THE SOLID WASTE stream has a potentially serious drain on our national resources. The U. S. Geological Survey has warned that by 1985 our Nation will be dependent on foreign imports for more than one-half of its supply of nine basic raw materials. Some studies on the subject warn that we are approaching a mineral crisis which could rival the energy shortage unless steps are taken to encourage the recovery and re-use of raw materials.

IN SPITE OF THE CONTINUING INCREASE IN THE SIZE OF OUR NATIONAL trash can the U. S. today recycles a lower percentage of discarded solid materials than ever before. It is estimated that we recycle only 1% of municipal wastes. Published statistics gathered by the Environmental Protection Agency indicate that we recycle only 19% of all wastepaper, 18% of

aluminum, 5% of glass and 4% of textiles. According to the Midwest Research Institute, recycling and the need for economic incentives to do so.

STUDIES SHOW THAT THE RECOVERY OF EVEN A SMALL PORTION OF THE 110 million tons of industrial solid wastes which must currently be disposed of each year would produce significant energy savings. The President's Advisory Commission on Environmental Quality estimates that more than 90% of energy presently required could be saved if worn-out aluminum products were recycled. Paper manufacturers could save upwards of 66% if full use was made of recycled paper, instead of the use of wood pulp. If steel and other scrap metals were recycled to the full potential, 50% of present energy use could be saved.

AT A TIME WHEN WE ARE SEARCHING FOR WAYS TO CONSERVE ENERGY, Federal tax policies and freight rates continue to favor the use of virgin materials. One of the most sensible sections of the energy bill now pending in the Congress provides incentives needed for recycling facilities for millions of tons of wasted raw materials. It provides tax credits for research and development, to find ways and means to get rid of solid wastes and allows certain tax credits for facilities installed to cope with this very serious situation.

OUR AFFLUENCE IN THIS COUNTRY HAS LED US TO THINK THAT WE HAVE an inexhaustible supply of natural resources but we do not. This, together with the fact that we are cluttering our environment with cast-off materials, is enough to make it obvious that there must be better answers to present practices.

Texas Taxes

By BOB BULLOCK, State Comptroller

Austin—When we talk about energy in Texas we are talking about oil. And when we talk about oil we are talking about big money in state taxes.

But despite oil's importance to Texas, the future and the fortunes of our oil tax revenue depends on the actions and situations at the national and international levels.

This is why President Ford's energy programs—and whatever the Congress does about them—will have a drastic effect on our state treasury.

In the first place, the President has announced that effective June 1, he was putting a \$1 a barrel import tax on all foreign oil coming into America. Congress gave him authority last year to order such import taxes up to \$3 a barrel. He levied \$1 of the \$3 in February.

The net result of raising the price of imported oil \$1 a barrel is to raise the price of oil produced in the United States also. The result of price increases is an increase in tax revenue because Texas' oil production tax is figured at 4.6 per cent of the oil's market price.

Based on price increases we saw when the first dollars' worth of import tax was put on in February, we estimate that the new increase will bring in an additional \$32.5 million in tax money—above the \$1.1 billion oil production taxes will produce in the next two years.

But there is a chance Congress will override the President's plan. Therefore, Texas can't bank on this money until Congress has its say.

The man who was boasting of his love for hot weather some months ago should be satisfied.

The President also wants Congress to phase out price controls on what we call "old oil". This is just a name—and not a very good one—given to the amounts of oil produced by each producer in 1972. Today oil produced up to the 1972 level is under a federal price ceiling of \$5.25 a barrel. Oil produced above the 1972 level is considered "new oil" and is not under price controls. It now sells for about \$11 a barrel.

Obviously, if the \$5.25 price ceiling is removed—altogether or by phases—the price will rise and as it does the revenue from the 4.6 per cent tax will increase.

We estimate that taking off the price lid would bring about a fantastic tax revenue increase of between \$175 million and \$225 million because about 60 per cent of the oil produced in Texas is under the price control.

But again, it may be several months before Congress finally acts on this and we know where we stand. Whatever gains we get from whatever federal action is taken comes too late for use on this year's budget. By early next year the picture will be in focus and if we had annual budget sessions of the Legislature the money could be used then.

But as it stands, whatever dollars we gain will just have to build up in the treasury as a surplus for use in the 1977 budget session—a situation very similar to the past two years when we built up a billion dollar surplus from oil prices skyrocketing during the Arab embargo.

Texas runs on oil—as far as the federal government lets it. Abundant Supply Talk is cheap because the supply is greater than the demand.

Courier, Ottumwa, Ia.

South Korea

Since the collapse of South Vietnam much is being heard about South Korea, the other Asian country the United States fought to reestablish in the post-war years.

The disintegration of South Vietnam brought speculative warnings that South Korea was next. U.S. military spokesmen in Asia responded to these rumors with hints this country would use tactical nuclear weapons if South Korea were attacked.

Communists in North Korea replied with charges Washington was threatening nuclear war. The President, speaking in generalities, assured the world the United States would meet its worldwide responsibilities and treaty obligations. Etc.

Thus the United States is newly committed, for the record, to defend South Korea. The collapse of the Thieu regime in Vietnam made that necessary, since this was seen as a U.S. defeat, though U.S. armed forces had left South Vietnam almost two years ago.

South Korea, of course, is not vital to the United States, nor U.S. security. It is, perhaps, vital to Japan. Eventually, a U.S.-Japanese guarantee, or responsibility, would be appropriate for South Korea. It's now time for a strengthened Japan, playing a major role in defense of democracy in Asia, to take up whatever slack has resulted from the collapse of South Vietnam, buttressing U.S. military and economic influence in Asia.

Dennis Cheyne Gets West Texas Degree

WTSU - In exercises May 17 in the Amarillo Civic Center Coliseum, 1,005 West Texas State University graduates received diplomas.

University President Lloyd I. Watkins presented the diploma covers to the students, as well as recognized the six retiring faculty members. Rev. Bill M. Kent, minister of the First United Methodist Church of Canyon, delivered the invocation.

The six retiring faculty members are Dr. Robert C. Busted, former head of

the Biology Department; Dr. C. C. Callarman, former dean of the School of Business; Nora Killian, assistant professor of biology; Col. John Luke, professor of military science; Helen White Moore, associate professor of English; and Dr. J. D. Strickland, director of the Educational Media Center.

The graduate from Jayton was Dennis Johnnie Cheyne, son of Mr. and Mrs. John Cheyne of Route 3 with a Bachelor of Agriculture.

NEWS REPORT FROM WASHINGTON

WASHINGTON, D. C. -- White House and Pentagon sources believe Cambodians who captured thirty-nine American seamen in the Gulf of Thailand hoped to win a two-pronged propaganda victory.

The capture of the seamen was the first. The repulse of a small Marine landing force at the island where the prisoners were initially taken would have been the second. The inside story of the cunning exhibited by the Cambodians is fascinating evidence supporting the theory.

The Cambodians took the seamen off the captured merchant ship and in daylight allowed U.S. aircraft to observe them being moved to the island later invaded by the Marines—an island uninhabited and all forest, except for its beaches.

That night, however, the Cambodians moved the men to the mainland. U.S. aircraft were circling above, however, with searchlights and flares. Pilots had orders not to allow the Cambodian gunboats to move the Americans to the mainland. But they also had orders not to sink the gunboats if Americans were observed aboard.

One U.S. pilot that night thought he saw Caucasians on the deck of one of the gunboats. U.S. aircraft were firing warning shots and gas (and sunk some of these boats). The pilot's report was so electrifying he was put in immediate connection with Washington—nine thousand miles away.

The Rescue—The Inside Story—The Strikes—Cambodian Cunning—

The decision was made to allow the boat to proceed to the mainland. That boat carried the captured Americans. But the landing operation of the Marines and other military strikes went on, as planned, next day. Marines landing at dawn were hit immediately by fire from troops which had been moved to the island before the Americans had been landed there (and then removed).

A mortar round hit the first helicopter, which burned. Less than half the crew got out. Meanwhile, the Cambodians, fearful of a U.S. landing on the mainland, had moved the Americans to still another island—unknown to U.S. officials.

When the massive American reaction became clear, the Cambodians decided to surrender the American crewmen. The Marines hung on after landing that day and were withdrawn with difficulty that night. Had only a handful of Marines landed, it is thought, they might have been repulsed and the Cambodians would have claimed a great "face" victory over the mighty U.S.A.

WINDMILL POWER

RICHMOND—A steady 15-miles-per-hour wind starts Robert Heider's windmill turning to generate power for operating lights in his house. It took him two months and \$50 to build the windmill from scrap metal parts from washing machines and automobiles.

TOWER TALKS

by U.S. Senator for Texas JOHN TOWER

Cold Turkey

WASHINGTON—Irresponsible meddling by Congress in foreign affairs could cost the United States the support of a vital ally, with drastic consequences for the entire Free World.

A foreign policy calamity more severe than the catastrophe in Southeast Asia is brewing along the "soft underbelly" of Western Europe.

All along the sunny Mediterranean Southern Flank of NATO, the strategic position of the Western Alliance is crumbling. If present trends are not soon reversed, our Sixth Fleet will be left "flapping in the breeze" without a Mediterranean port in which it would be welcome.

The most publicized blow to NATO has come from Portugal, where the Communists are slowly but surely consolidating their power. American bases in the Portuguese-owned Azores are an important part of our antisubmarine defense network, and made possible the resupply of Israel during the Yom Kippur War.

Events in Portugal are being closely watched in Spain, where the death or resignation of General Franco could spark a similar political upheaval.

France already has withdrawn from the command structure of NATO. Italy is going through yet another of its innumerable governmental and fiscal crises.

Greece has thrown the Sixth Fleet from its home port in Athens, and withdrawn from NATO because of our refusal to take their side in the explosive Cyprus situation.

And now Congress, by precipitously and discriminatorily cutting off military aid, may succeed in driving from NATO the other disputant in the Cyprus conflict and our most loyal and valuable ally in the Mediterranean—Turkey.

The Turks fought side by side with us in Korea, and have remained steadfast friends ever since. Their friendship has been extremely valuable, for Turkey's strategic position is without parallel. Turkey borders on the Soviet Union. It borders on Syria. It borders on Iraq. The Turks control the vital straits of the Dardanelles, the narrow sea passage through which Soviet warships must pass to reach the Mediterranean.

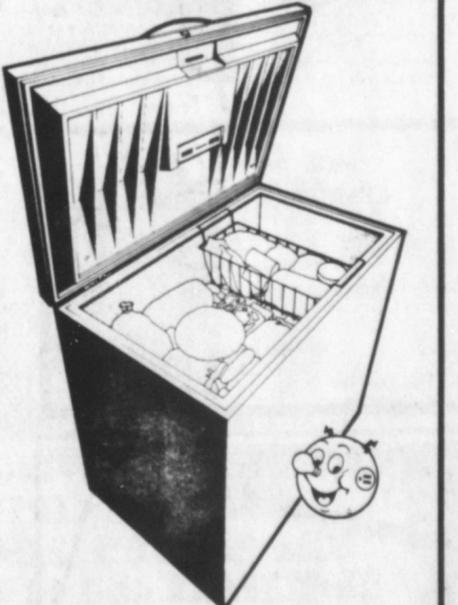

But Congress seems prepared to discard this valuable friend, to drive Turkey into the camp of the radical Moslems, to in effect mortgage the security of the Free World for the sake of placating some ethnic emotions in the U.S.

Congress has dabbled too much in the formation and implementation of foreign policy, which is properly the province of the Executive Branch. This meddling must stop.

The problem of living is to find time for the things that we would like to do. Never hold a proof-reader responsible for the editor's mistakes.

Remember **Reddy** Supplies the energy—but only YOU can use it wisely!

REDDY'S HELPFUL FREEZER TIPS

Lock in flavor. Use moisture and vapor-proof materials especially designed for freezers to wrap your foods. Tightly sealed, these lock in flavor and moisture and prevent "freezer burn" (surface drying) on foods. Don't use wax paper, bread paper or regular cellophane for freezer foods.

Label packages. Date and identify freezer packages so (1) you don't accumulate a lot of mysterious shapes and (2) you'll be able to pick out foods that have been in the freezer longest.

Take advantage of sales. Avoid overstocking with commercially frozen food that's always available, use your freezer as your own bargain counter and store foods you can buy on sale. But do allow space for short-time baked goods, leftovers and special party foods.

Pick up your FREE copy of "ENERGY CONSERVATION" Booklet from **Frigidaire** Home Environment Division of General AI

West Texas Utilities Company

Chill candles in refrigerator 24 hours and they will burn more evenly.

To reclose partially used bags of frozen vegetables, use a spring-type clothes pin; they also work well on bread bags.

Prune your rambler roses immediately after blooming unless you need the foliage for shade or screening.

Needlework of all kinds is being revived. Many people find it relaxing as well as a delightful way of decorating the home--pillows have come back in and many foot stools and chairs are covered with needlepoint or beigns done in one of the new stitches.

To Advertise Meeting of the Board of Equalization in Newspaper (at least 10 days before meeting)

BE IT REMEMBERED that the Board of Equalization in and for Jayton-Girard Independent School District, Kent County, Texas, having been in session on this the 23rd day of May A.D., 1975, the following order was upon motion of Mr. Woodrow Hodges a member of the Board of Equalization, duly seconded by Mr. Billy Wallace, a member of the Board of Equalization, unanimously carried and adopted, to wit:

The secretary of the School Board is hereby authorized and directed to give notice of meeting of the Board of Equalization by publication in a newspaper of general circulation in Kent County, Texas, for at least ten days prior to said meeting of said Board, that the Board of Equalization will again meet on the 25th day of June, 1975.

The secretary is also instructed to give individual notice to all taxpayers who rendered their property and whose properties are raised, if their addresses are known.

BY ORDER OF THE BOARD OF EQUALIZATION. Hobert Lewis, Chairman of the Board 16-2tc

NOTICE OF EQUALIZATION

In obedience to the order of the Board of Equalization regularly convened and sitting, notice is hereby given that said Board of Equalization will be in session at its regular meeting place in the Courthouse in the town of Jayton, Kent County, Texas, at 10:00 a.m. on Wednesday, the 25th day of June, 1975, for the purpose of determining, fixing and equalizing the value of any and all taxable property located in Kent County, Texas, for taxable purposes for the year 1975, and any and all persons interested or having business with said Board are hereby notified to be present.

Zana Sherer, County Clerk, Kent County, Texas. Kent County, Jayton Texas 24th day of March, 1975. 16-3tc

Correspondence schools studied for fraud.

THE STATE OF TEXAS

To any Sheriff or any Constable within the State of Texas-GREETING: YOU ARE HEREBY COMMANDED to cause to be posted for not less than ten days, exclusive of the day of posting, before the return day hereof, at the County Courthouse door of Kent County, Texas, or at the place in or near said courthouse where public notices customarily are posted, a copy of the following notice:

THE STATE OF TEXAS TO ALL PERSONS INTERESTED IN THE ESTATE OF Eugene Nolte Goodrich, Deceased. No. 462, County Court Kent County, Texas. Jo Ann Swinney filed in the County Court of Kent County, Texas, on the 30th day of May, 1975, an application for APPLICATION TO DETERMINE HEIRSHIP AND WHETHER ADMINISTRATION IS NECESSARY

Said application will be heard and acted on by said Court at 10 o'clock a.m. on the first Monday next after the expiration of ten days from date of posting this citation, the same being the 16th day of June, 1975, at the County Courthouse in Jayton, Texas.

All persons interested in said estate are hereby cited to appear before said Honorable Court at said above mentioned time and place by filing a written answer contesting such application should they desire to do so.

The officer executing this writ shall promptly serve the same according to requirements of law, and the mandates hereof, and make due return as the law directs.

GIVEN UNDER MY HAND AND THE SEAL OF SAID COURT at office in Jayton, Texas, this the 30th day of May, A.D. 1975.

Zana Sherer, Clerk of the County Court, Kent County, Texas.

Mrs. Pat Parham, Greg, Terry and Nanci of Lubbock visited in the home of her mother, Una Hunnicutt over Memorial week end.

About Beef

The new system for beef—the first change in the U.S. grading system since 1955—allows beef with less fat (younger animals) to be graded choice. (The change took effect April 14th, but it may be some time before most beef on market counters reflect the change.) Those who feel the new system is a step backward are not entirely correct. There is now less emphasis on fat. That means Americans will be eating, on the average, less fat.

Some butchers say housewives will like the new grading system because many cuts will have more lean and less fat. Of course, it's true that the new system reduces feeding costs, and should help to slow the rise in beef costs as a result. On the whole, the new system is desirable, though a choice steak in the old days may have been tastier than today's choice steak, since it had more marbling. But today's may be healthier fare and one can always turn to prime—only about four per cent of all beef graded—if necessary. And, many butchers say, most choice steaks will still be so tasty the buyer won't notice a difference.

On the whole, the new system is desirable, though a choice steak in the old days may have been tastier than today's choice steak, since it had more marbling. But today's may be healthier fare and one can always turn to prime—only about four per cent of all beef graded—if necessary. And, many butchers say, most choice steaks will still be so tasty the buyer won't notice a difference.

The School Year

The 1974-75 school year is nearly over, but five and six-year-olds are being enrolled for next year and a series of immunization shots may be in order.

Often a complete physical examination will uncover defects that a child may have and that have been unnoticed. It is important, if a child has a defect, that the parents and teachers know about the defect so that they can help the child overcome the handicap.

These examinations will undoubtedly mean healthier and happier children.

Nursing Home News

Visiting in the home recently were: Mr. and Mrs. Henry Harris and Mr. and Mrs. Edward M. Steph.

Vi Hall and Bessie Pearson were Thursday visitors in the home. Mr. and Mrs. Charlie Harris of McAdoo and Mr. Fuqus visited his mother Sunday.

Mr. and Mrs. Milton Butler are new residents. Cody Myers visited his grandmothers and friends in the home last Tuesday. Mrs. J. H. Hagins of Spur is a new resident of the home.

AT SAN SABA PARK Mr. and Mrs. Lee Parker met Mr. and Mrs. Gary Hogan, Holly, Heather and Donny at San Saba Park Saturday. Holly and Heather returned home with them for a visit.

Even a new broom won't sweep clean unless someone uses it.

Norman Ford Funeral Held In Snyder

Services for Norman Edgar Ford, 52, of Snyder, farmer and rancher, were held at 2 p.m. Saturday in Snyder First United Methodist Church.

Officiating were Paul Clanton, S. V. Clanton and Louise Sutton. Burial was in Snyder Cemetery, directed by Bell-Seale Funeral Home.

Mr. Ford died Wednesday morning in Methodist Hospital in Lubbock after a lengthy illness.

Born Aug. 6, 1922, in Kent County, Mr. Ford was a lifetime Snyder resident. He married Leona Sullenger Jan. 15, 1945, in Snyder.

Survivors include his wife; three daughters, Donna Sue Keller and Paulette Cypert both of Lubbock and Debbie Ford

Why should business meetings, sales meetings and business calls sometimes be planned in consideration of prevailing weather conditions?

We have suggested in an earlier piece that salesmen can profitably take advantage of high pressure periods for making calls and do their "homework" during low pressure periods.

This is true because low pressure automatically affects the nerves by causing dehydration of the tissues. Some people begin to ache and others feel a mental depression. This is not imaginary; it is quite real.

Thus sales meetings, conferences and sales calls could be profitably planned to take place in good weather periods, quite often, when salesmen and prospective buyers are feeling their best. A glance at the weather map will show when high pressure areas (usually fair weather periods) can be expected to arrive in your locality.

Lunch guests of Mr. and Mrs. Buddy Gallagher and NaRae on Memorial Day were Una Hunnicutt, Pat Parham and Greg, Terry and Nanci, Johanna Gallagher of Lubbock, Don and Sue Turner of Amarillo and Mr. and Mrs. J. A. Kidd, Steve and Kenny.

UNDERWAY

There she goes... UNDERWAY at last! You can almost feel her confidence when she hits the water. But who knows what adventures await her on the Seven Seas? How many crucial tests must the captain face before she finally rests at a harbor of safety?

We're the captains of our own ships in the voyage through life. We begin with determined optimism. We have health and strength. But as we get "underway," we soon find ourselves faced with sudden trials and obstacles. It is in these moments of crisis that our faith and courage are challenged.

Just as the ship has its modern equipment and its lighthouses, so we too have a tower of direction and strength found in the Church. In the Church of Jesus Christ we find a lasting faith, guiding us into the calm harbor of ETERNAL life.
