The Jayton Jaybirds Open The Season This Friday Night

Friday night fever was white-hot last fall when the football season ended with the Jaybirds losing the state quarter final game to a big powerful Groom eleven.

It is hoped by Jaybird fans that the locals can take hold this Friday night, and begin to show the signs of a championship team again, as they travel to Roscoe to angle with the Plow Boys in their annual season opener.

Coach John Richey and his staff of coaches have been working hard to shape up a team after tremendous losses from the championship team of 75, and they hope it will all stick out Friday night.

Win or lose this first game, they will be fighting down to the wire for the district championship. Regional sports writers have them picked to lose the championship and end up in about third place in the district. These are words some one may have to eat.

Jayton Homecoming Set For Oct. 15th

The homecoming committee has been meeting for the past several weeks. The committee had hoped for a Saturday night game this year but efforts have failed.

Homecoming this year will be on October 15 and 16. Friday's schedule will consist of a ballgame at 7:30 p.m. with Roby. Following the game a teen dance will take place.

Saturday's schedule will consist of a barbecue, parade, program and an adult dance. Times for these events will be disclosed later.

The committee urges everyone to start thinking about these dates and how each can contribute to make this our best homecoming.

The Texas Rangers Have Been Around For 150 Years

The Texas Rangers have served their state over 150 years, and now visitors to Jayton High School Library may see a pictorial summary of their story in a Ranger exhibition produced by the Institute of Texan Cultures in San Antonio.

The show, entitled "The Texas Rangers: Their First 150 Years," will be up from September 1 to September 30. It is sponsored here by Jayton School. The public is urged to take advantage of this opportunity.

The Ranger service long has been internationally famous, but it has not always been called the Texas Rangers. Visitors to the exhibition will see that in early days the Rangers were called "mounted gunmen," "volunteers," "militia," and "Ranging companies," among other labels, including some meant to discredit the force.

CARDS OF THANKS

CARD OF THANKS:
The deep concern expressed by the people of Jayton and the surrounding area was a great strength in the recent death of Suewelyn. There is no way to adequately express how much each act of concern meant to the family. Each card, flower, word, prayer, visit and dish of food had an important part in lifting our hearts, easing our sorrow and meeting our needs. They will remain long in our memories.
We thank the Lord for your friendship and for a Saviour who offers victory over death.
Sincerely,
Don L. Turner Jr.

CARD OF THANKS:
The family of Millie McLauri wishes to take this means of thanking all our friends for your kindness to us at the time of her illness and death.
For your every kindness, the visits, the food, the flowers, the cards, the prayers, and even your kind thoughts we shall be ever grateful. May God richly bless you, is our prayer.

TREMENDOUS TRIFLES
THE ARROW THAT DESTROYED A CITY
Henry Morgan, the notorious buccaneer, once formed the project of sacking Panama, then the most important city in Central America. His plan would have failed but for the shot of a single arrow that lodged in the arm of one of his men. Here is the episode.
On the West Indian island of Hispaniola, Morgan assembled a cutthroat crew of more than two thousand. They were of all races and all mixtures. They had one thing in common: they would slit a throat for gold. After stealing and building the necessary boats and gathering supplies for the venture by plundering neighboring islands, Morgan was ready to move against Panama.
The principal obstacle was a fort called the Castle of Chagres, which blocked passage up the Chagres River to the city. Morgan delegated the reduction of the castle to Bradley, next in command. Bradley was assigned a large force for the task.
The men put ashore several miles downstream from the fort. From here they hacked their way through the jungle until they came in view of the Castle. The prospect was a forbidding array of bastions, with moat and drawbridge.
The brigand crew feared that the fort could not be taken, and wished to return. Bradley, however, ordered several assaults, which were repulsed. At nightfall, the brigands withdrew into the jungle to count their severe losses.
While they were thus engaged, a defender from the fort shot a chance arrow into the dense growth. It went straight into the arm of one of the pirates. The victim tore it from the wound, and roared with rage. "This damned arrow will destroy all the Spaniards!" With a sudden thought, he seized a mass of surgical cotton, tied it to the arrow, and lit it. Flaming, he discharged the arrow back into the fort. It landed on a thatched roof, and immediately set it afire.
Soon a rain of flaming arrows was falling on the fort! The magazine was exploded, and resistance was at an end. The Castle taken, Morgan proceeded to sack and burn Panama. He returned with his loot to Jamaica, where he was made governor of the island by King Charles II, and created a baronet.

What is fog? It is really a cloud on the surface of the earth?
Yes, fog is nothing more than a cloud. All clouds are formed when some kind of cooling process lowers the moisture capacity of the air to the point where moisture becomes visible particles--thus a cloud.
This process can occur in several different ways and under different circumstances. In the fall, when fog is seen most often in most parts of the country (the west coast experiences much fog in winter), fogs are usually caused when the earth (heated during summer) loses its heat into the cooler night air.
As the warmer air from the earth's surface rises and is cooled, fog forms. Cold ground, in spring, for example, can make its own fog when warm moist air blows over it--by cooling the air to the cloud stage.
Fog, then, is nothing more than a land-locked cloud.

"LABOR IS LIFE"

Let's talk about labor -- work, if you please, for that is what labor is. Labor has come a long, long way since ancient times when work was closely related to slavery. Aristotle described a slave as "a tool with life in it." In the Middle Ages, labor gained dignity and respect as slavery declined and Christianity spread. Then, later in the 1700's and 1800's the industrial revolution created conditions that led to the modern labor movements. Today labor has gained respect, wages and working conditions hitherto unknown before.

Labor is life. Work is satisfying. Through his work a man accomplishes, and creates, and provides for himself and his family. When deprived of the opportunity or ability to work, man often becomes depressed, even ill.

I Corinthians 3:9 tells us that "We are laborers together with God." We are His hands, feet, voice, and compassionate heart here on earth to spread the gospel, lift up the poor, eradicate ignorance and destroy disease.

Honor God and Labor this week by attending church.

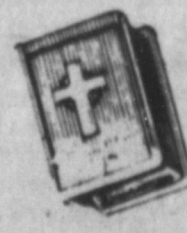

EVERYONE IN THE CHURCH IS THE CHURCH IN EVERYONE

The Church is God's appointed agency in this world for spreading the knowledge of His love for men and of His demand for men to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

ABOUT YOUR HOME

By April Rhodes

Tack a strip of old carpet along the bottom edge of your garage door to prevent dirt and leaves from blowing under it.

Plants and shrubs to be brought inside should be potted so that they will have time to get established before moving inside.

Fruits that are too ripe for freezing and canning are excellent for jams, jellies, preserves, and marmalades.

When a recipe calls for shaved chocolate, use your vegetable peeler on slightly warmed semisweet chocolate squares.

When cleaning cabinets, wax shelves before lining them with fresh paper and the paper will not stick when something is spilled.

Colorful jackets worn over your late summer sleeveless dresses are the answer to cool nights while the days remain hot.

Many home-grown vegetables and fruits can be stored for months provided your storage areas meet temperature, humidity and ventilation requirements.

To keep your lawn looking good in late summer, it needs proper mowing and at least one inch of water each week.

We see white pants, shorts, jump suits, skirts, etc., everywhere but they usually are worn with a bit of color in the shape of a scarf or T-shirt.

The weather is warm but fall fashions are beginning to be shown in some shops. Knits are still popular and braid is used as a trim.

Boots are being worn and scarfs of every kind and fabric continue to be favored.

When a recipe calls for shaved chocolate, use your vegetable peeler on slightly warmed semisweet chocolate squares.

As It Looks From Here

by Rep. Omar Burleson
Member of Congress, Texas

WASHINGTON, D.C.—Under new procedures, the Congress is required to have all appropriation bills completed by September 15. After that time it is the feeling of quite a few of us that the Country would be better off if the Congress adjourned for the remainder of the year. As long as it is in Session, there is always someone dreaming up some new expensive scheme in the name of "benefits" to the Country.

There is some encouragement in the fact that the leadership in both the House of Representatives and the Senate has abandoned consideration of several highly controversial proposed measures. One such measure is the so-called Humphrey-Hawkins bill providing for full employment and balanced growth. This measure has been discussed here before and will be around in the future but, at least for the time, there is little prospect of its being passed in this Session. Hopefully, it will not be in the next or the next but it will doubtless be pushed.

The oil "Divestiture" Bill which would force oil companies to engage in only one facet of the business is also being abandoned for the time.

Natural Gas Price Deregulation, although approved by the Senate Commerce Committee, is not likely to be considered. It lost some of its impetus when the Federal Power Commission raised the ceiling price for new natural gas.

Any National Health Insurance Legislation is too big a subject to tackle at this late date. Heretofore, it will be around in the next Session as it has been for the last several years.

The Postcard Voter Registration Bill has passed the House of Representatives but it is in dispute in the Senate as to which Committee has jurisdiction over it. It is fortunate the prospects for its final enactment into law are slim. This is a measure which attempts to tell States how to conduct their voter registration. It is obviously an imposition on States' rights. Although our State of Texas has a postcard registration law it

Wedding Plans Told

New Arrivals

Don L. Turner, Jr., son-in-law of Mr. and Mrs. Buddy Gallagher of Jayton, announces the birth of a baby boy, Scott Lynn at 11 p.m., August 20. Scott weighed 7 pounds 2 ounces and was 18 inches long at birth in High Plains Baptist Hospital in Amarillo.

Grandparents are Buddy and Jan Gallagher of Jayton and Mr. and Mrs. Don L. Turner of Pampa. He is the great-grandson of Mrs. Una Hunnicutt of Jayton, Mr. and Mrs. J.F. Turner of Tulsa, Oklahoma and Mrs. Mildred Beard of Sand Springs, Oklahoma.

Mr. and Mrs. Eugene Lee of Jayton are the proud parents of a baby boy born August 26 in the Rotan Hospital. The new arrival weighed eight pounds and three ounces at birth and has been named Thomas Elwin, after his two grandfathers.

The maternal grandparents are Mr. and Mrs. Thomas Marshall of Matador, and the paternal grandparents are Mr. and Mrs. Elvin Lee of Jayton.

Labor Day

The first man to suggest a day be set aside in honor of labor—the working man and the spirit of industry in the nation—was probably Peter McGuire. He was President of the United Brotherhood of Carpenters and Joiners of America in 1882 when his suggestion was adopted by the Central Labor Union in New York.

The first Labor Day, then, was observed in 1882. In 1884 the Federation of Organized Trades and Labor Unions, which later became the American Federation of Labor, adopted the suggestion and the states (Oregon was the first) began to declare the first Monday in September a holiday.

Gun Control Legislation has been approved by a Senate Subcommittee but the sponsors say no further actions will be taken unless they are assured that the House will act. Just this past week, the House turned down gun control legislation passed by the District of Columbia Government controlling handguns which pretty well assures that there will be no gun control legislation in this Session.

An Omnibus Revision in the Federal Criminal Code, although good in some parts, hardly has a chance of passage before the adjournment of the Congress and has taken a low priority in both Chambers.

Tentative plans call for the Congress to either adjourn or recess on October 2. Due to the November election on November 2, it is necessary that members return home for their campaigns. If the usual pattern is followed, there is good chance that the Congress would only recess and return after the election and would likely be in Session for the remainder of the year. It is worth repeating that the Nation would probably be better off for the Congress to remain out of Session until next January.

Mr. and Mrs. Donald L. Wilson of Jayton, announce the engagement of their son Donald, Jr. to Mary Margaret Palmer of Houston. She is the daughter of Mr. and Mrs. William R. Mainland of Marina Del Rey, California.

Miss Palmer attends the University of Houston in Houston.

Donald attends the same university in the school of pharmacy. He is the grandson of Mrs. Anna Wilson, 604 S. Poplar, Urbana, Ill. and the late Mrs. Cora Cummings of Champaign, Illinois.

Wedding plans are set for April.

TEXAS JOB TALK

The state unemployment rate dipped to 5.7 per cent in July, Texas Employment Commission Chairman Harold K. Dudley has announced in Austin, adding that the rate is four-tenths of one per cent below the June figure.

"The decline follows a seasonal pattern," Dudley said. "Each year, many people looking for summer jobs remove themselves from the labor force if they have not found employment by midsummer."

"This year's July rate compares favorably with last year's July rate of 6.0 per cent," he noted.

Figures announced by Dudley showed a July labor force of 5,469,500 in Texas, with 5,156,500 people being employed. Total employment in June was 5,149,000.

"During the month, employment increased by 7,500 while unemployment decreased, resulting in the unemployment rate's decline to 5.7 per cent," Dudley commented. "The current figures indicate that Texas is in a steady economic situation as far as the labor force is concerned. We are hopeful that joblessness will continue to subside in the months ahead."

"Texas continues to run below the national unadjusted jobless rate which was 7.8 per cent for July," Dudley said.

Unemployment rates for the major labor areas in Texas include Abilene, 4.1 per cent; Amarillo, 3.5; Austin, 4.7; Beaumont-Port Arthur-Orange, 7.2; Brownsville-Harlingen-San Benito, 10.5; Corpus Christi, 6.1; Dallas-Fort Worth, 5.1; El Paso, 10.3; Galveston-Texas City, 7.3;

Also, Houston, 5.9; Laredo, 12.1; Longview-Marshall, 6.7; Lubbock, 4.0; McAllen-Pharr-Edinburg, 11.5; Midland, 3.7; Odessa, 4.1; San Angelo, 4.4; San Antonio, 7.9; Sherman-Denison, 9.4; Texarkana, 8.4; Tyler, 4.9; Waco, 5.2; Wichita Falls, 4.2.

Moss & Medical Fraud

Senator Frank Moss (D-Utah) has dedicated much time and investigation to a broadening scandal in Medicare and Medicaid. He is convinced about four per cent of the nation's doctors are stealing \$1.5 billion a year from the American taxpayer.

The disappointing part of the story is that despite Moss's persistent investigation and exposure not enough has been done by the Justice Department and the American Medical Association to uncover the crooked doctors so they can be prosecuted.

Moss says Medicare's investigative branch has over a period of years discovered 20,000 suspicious cases (possible fraud). Less than 500 have been referred to the Justice Department and only 219 have gone to trial, with 150 convictions. The convictions brought light penalties: three two-year terms, two one-year terms and nine shorter terms. The remainder of the convicted doctors escaped with fines or probation.

Obviously, this is not good enough. It is not enough surveillance and prosecution to sufficiently discourage the estimated four per cent of the nation's doctors stealing from the government. Congress, and the President elected in November, should act vigorously on Moss's findings and end this scandalous \$1.5 billion annual theft of Medicare and Medicaid funds.

Ford-Dole Chances

Current polls indicate the Republican presidential ticket may, after all, have a chance against the Democratic ticket. Much may depend on televised debates between President Ford and Governor Carter.

The new reasoning is based in part on the developing underdog theme of the Ford campaign, the President's new speaking ability (demonstrated in Give'em-Hell style at the convention), the suspect speaking ability of Jimmy Carter and an alleged Carter vagueness on the issues.

Certainly the last few weeks have proven more positive than had been anticipated by some Republicans. The party is united, with Ronald Reagan and supporters backing the Ford-Dole ticket. The President struck a sympathetic chord among voters by pitching his campaign on peace, prosperity and his two-year record as earning him a four-year term of his own.

Though Carter had led Ford two to one after the New York convention, an incumbent President has undeniable public relations advantages. And President Ford has surprised and impressed many with a new aggressive speech-making ability.

Fall Fever

September brings with it the first cool winds (in most parts of the country), school, football, burning leaves and nostalgia.

Why is it autumn produces such a tug on memories? Perhaps it is because growth and a summer are dying and the end of a life cycle is so visible. It is a beautiful death—red and yellow, brown and orange in the fields and forests.

But colder weather is coming on, the end of a year as well as a season, and naturally one looks back. All of which are good in our fast-moving world, when so few of us take time to remember the old days, the good friends, the great moments and the dear ones far away.

A Weekly Report Of Agri-Business News

Compiled From Sources Of The TEXAS DEPARTMENT OF AGRICULTURE
John C. White, Commissioner

An Amazing Comeback... New Regulations... Moving On

Cotton, which has been counted down and out several times, has and is making an amazing comeback this season. A year ago at this time, cotton prices to producers averaged 37 cents a pound.

Now, a year later, the statewide average is 70 cents per pound. Cotton is also now nearing the parity ratio, although it still has about a dime a pound to go before getting there.

Despite the cotton price, commodity prices on the average increased only two per cent this past month. And livestock prices showed a three per cent decline.

Putting everything together price-wise, agriculture continues to be way below parity. The ratio of parity is now at 67; that compares with 68 a month ago and 71 a year ago.

A look at individual commodity and livestock prices tells the story even more clearly when comparing them with parity.

Wheat averaging \$3.51 a bushel in Texas is about \$1.40 per bushel below parity. Sorghum, which averaged \$4.54, is more than a dollar under parity. The only crop above parity is oats at \$1.66, and that is only a nickel above the ratio.

Take a look at livestock and you see even more discrepancies between prices and parity.

The only bright spot there is sheep at \$17.20; that is 70 cents above parity. Hog prices averaging \$44.30 are about \$9 under parity. Calf prices averaging 35 cents are almost 50 per cent below parity, and beef cattle averaging \$32.40 are \$25 under parity.

NEW REGULATIONS ARE IN EFFECT in relation to the screwworm eradication program. All livestock shipped out of the state must now be certified by state authorities or accredited veterinarians to be free of screwworms.

And livestock going into southeastern states must be sprayed or dipped for screwworm control even though they are screwworm-free.

Screwworm infestations are now threatening several states and are becoming more of a problem in Texas every day. The big increase in infestations will occur now through November.

Meanwhile, screwworm officials at Mission urge livestock producers to check livestock regularly, treat wounds on livestock with approved screwworm control remedies, delay surgery on livestock as long as possible, and submit suspected samples of screwworms to the fly lab at Mission.

By cooperating along these lines, livestock producers will be doing their part to hold down the infestations at as low a level as is possible.

WITH SUMMER MOVING ON, so is crop harvesting. Cotton harvesting is picking up speed in the southern portions of the state and is just beginning in the central areas.

Sorghum harvest is moving along rapidly and planting of fall sorghum is underway in the Lower Rio Grande Valley.

ON FATHER ID RULE

The government has announced plans to relax the rigid requirement that mothers applying for welfare must help in identifying the father of the child and collecting child support payments from him.

ON FOOD STAMPS

The House Agriculture Committee has approved a total revamping of the food-stamp program that would disqualify an estimated 461,250 families now receiving stamps.

Plans Being Finalized For The Panhandle South Plains Fair

LUBBOCK--All variety pigeon and poultry shows will be featured during the 59th Annual Panhandle South Plains Fair here this fall.

The shows will be staged on September 25-27, first three days of the eight-day run, according to Steve L. Lewis, general manager.

Jay Miller of Albuquerque will judge both events, scheduled in the rabbit and poultry building. Cecil Hill will serve as superintendent of both shows.

Entry fees of \$1 per bird will be charged and entries will not be accepted after September 22. Judging will get underway at 9:00 a.m. September 25 for poultry and at 9:00 a.m. September 26 for pigeons.

Regular premiums will be paid according to the number of entries in each class. Ribbons will be given through four places, Lewis said.

Special awards include: \$25 and a trophy for the champion pigeon, \$15 and a trophy for reserve champion, \$7.50 and trophy for best fancy, best performer, best utility and largest (pigeon) entry.

A premium of \$7.50 will be paid by the fair for the best of pigeon breeds provided there are 15 or more per breed. The Lubbock Racing Homer Club will pay special premiums for best racing homer, best young racing homer and champion racing homer. Junior awards also will be given.

Special poultry awards include \$25. and trophy for the champion, \$15. and trophy for reserve champion and \$10. for largest entry. The fair also will pay special premiums in the following classes, providing there are 15 or more specimens per class: American, Ornamentals, Asiatic, Oriental, Mediterranean, Game, English, miscellaneous, Polish and Hamburg. Junior broiler and Capon competition also is scheduled.

The fair's "Festival '76" edition--continuing the bicentennial celebration--will feature an all-star cast on stage in Fair Park Coliseum, including: Charley Pride along with Dave and Sugar, September 26, Freddy Fender and Barbara Mandrell, September 27-28, Charlie Rich, September 29-30, Neil Sedaka, October 1-2.

Shows will be presented at 5:30 p.m. and 8:30 p.m. daily and tickets are priced at \$4, \$5, and \$6. Ducats may be obtained at the fair offices or by mail by writing to the fair at P.O. Box 208, Lubbock 79408. Mail order requests should include a self-addressed, stamped envelope.

In addition, tickets also are available at Luskey's Western Wear Store, Sears' downtown store, Dunlap's in Caprock Center or at Lubbock Western World.

Plenty of good seats still are available for all shows, Lewis said.

Doubletake--Barbara, left, and Betty Campbell, twin daughters of Mr. and Mrs. Kenneth Campbell of 335 W. Ansley, San Antonio, may give Texas Tech Red Raider game officials and opposing volleyball teams double trouble this season. Barbara plays both as spiker and setter and Betty as spiker. McCollum High graduates, they played four years there and helped lead the Cowgirls to the 1976 state AAAAA championship. Both were named to all-state and all-star teams and won individual honors. Barbara also is a track star, and Betty plays softball. Betty holds an athletic scholarship at Tech.

ABC's Baseball

Millions of Americans enjoy baseball--this year new attendance records are being set in the Major Leagues--and thus a comment on televised baseball.

For years NBC has stood alone in televising Major League baseball. But ABC, striving mightily to be number one in sports, has of late produced Monday Night baseball.

So far this year the two ABC announcer teams have failed to produce. NBC's Saturday game, with a first-team of Joe Garagiola and Tony Kubek, attracts more viewers. Both are highly knowledgeable, interesting conversationalists. Ditto the second team.

ABC's two teams are laboring and unsure, trying to be humorous personalities, rather than inside baseball men. Veteran Bob Prince, with Warner Wolf and Bob Uecker, are one team; Al Michaels, with Bob Gibson and Norm Cash, are the other.

Uecker, Gibson and Cash are former Major Leaguers. They should be telling fans inside baseball, commenting favorably and unfavorably on plays and players, going into depth on teams, strategy, potential, etc. (Bob Gibson, a great pitcher, remains mostly silent and thus dignified. Cash, a fine hitter for years, goes about half way.)

Ronnie Arledge, who sees to it that he gets plenty of mention and credit as director of ABC sports, has apparently attempted to transfer his success formula with humorous teams doing football telecasts (which were good) to baseball. It doesn't work.

Announcers should be ex-Major Leaguers, if possible, with a gift for announcing and a continuing relationship with, and interest in, players and the game. Tony Kubek is personification of this goal. They should speak out, and call a spade a spade.

Gibson, Cash and Uecker may succeed if given a real chance. Humor fine, joking fine. But first meaningful comment--and criticism when due--and horseplay only as icing on the cake, if the cake is first well done.

DOLE & GOP

ON VP SELECTION

President Ford has suggested that the change in vice presidential selection that he defeated at the Republican National Convention might not be a bad idea.

Life On Mars

Despite the early excitement among scientists (and reporters) about the possibility of life on Mars, most scientists now believe the findings of tests carried out by the space craft landed on that planet indicate little likelihood of living beings or organisms there.

That was the presumption of most scientists at the beginning of the ambitious Viking project. It seems tentatively confirmed.

We are left then with the conclusion that only the earth among the sun's solar system contains living beings. Maybe it's just as well. If Viking had discovered red men living on Mars, surely they would have found some way to apply for a loan from America.

Congress would have found some way to grant it--with the taxpayer's money.

School Discipline

It is well to take stock of our local schools every so often, and the beginning of the new school year is a good time to review local conditions.

In the first place, capable school administrators--from the superintendent and principals on down--are not as easy to find as some imagine. The really good officials in this field are the subject of much competition.

Parents of children--many of whom have been raised on progressive theories which are now largely discredited--have an obligation to cooperate with school authorities in every way possible and to make their task easier as they attempt to guide, train and educate the children of the community.

Children must be disciplined, as well as educated, for if they are not disciplined they cannot be educated. This is one point parents must keep in mind. Also, it should be remembered that proper disciplining never hurt anyone, and is a prerequisite in our social order.

Take Bad With Good Wife (heatedly)--You're crazy, you're worthless, you're bad tempered, you're shiftless, you're a thorough liar.

Carrier Midway heads to Korea.

The above picture shows cotton with grain sorghum planted in the blanks. The cotton can be rotated to the feed rows the following year. This is one other method to get cover crops on your cotton land and help improve your soil.

Cotton Is A Soil Depleting Crop

COVER CROPS NEEDED FOR COTTON LAND

Cotton is a soil depleting crop. It takes from the soil out puts very little back. For this reason, land that is planted in cotton badly needs a cover crop for several reasons. To reduce wind and water erosion during the winter and early spring. To add organic matter to the soil which will improve the productivity of your land. A cover crop will also improve the water intake rate, help in aeration and improve the tilth of your soil.

Cotton should be rotated with forage and grain crops if possible but a cover crop can still be planted where cotton is planted on the same land each year. Rye or wheat makes an excellent cover crop and can be planted in the blank rows of your cotton. It can be drilled or sown by broadcasting in the blanks when the last cultivation is made in late summer or early fall. It will not interfere with harvesting your cotton. Growing wheat or rye will get some moisture in the fall but after the cover gets to a good growth, usually by late December, then the crop can be killed by undercutting with sweeps. The dead cover should be left on top of the land until about April 1.

By following the above practice you can still get the benefits from a cover crop and not interfere with your cotton production.

For more information on Cover Crops contact the Soil Conservation Service, assisting the Duck Creek Soil and Water Conservation District, in the Court House in Jayton.

Joint Centennial Celebration Gives People A Good Time

The joint Kent County centennial and bicentennial celebration was termed as a huge success by local citizens as well as visitors that attended it August 21. Activities for the day began with a parade which was led by the 4-H riding club composed of Craig Murdoch, Donnie Shipp, Eddie Roby and Dian Roby. They carried the colors.

The floats, wagons, buggies and carts carried out the centennial theme. The parade also featured several horse riders from the various ranches in the area.

The float winning first place in the parade was the one from the H and M Department store. It featured an early day bar with those riding on the float in appropriate costumes. The second place float was the one submitted by the Kent County State Bank.

On it was an outdoor scene featuring live animals such as a pig and chickens, with people in costumes representing the early day pioneers.

Jayton's First Baptist church was awarded the third place.

The early day brush-arbor church was depicted on their float, with several in early day costumes in attendance at the service. Honorable mention went to the Jayton Foods and to Kent Co. Lumber and Supply.

Another feature of the parade was the first appearance of the Jayton Jaybird Band, for this year.

Following the parade the program began. It was held in front of the old bank building and near the new memorial plaza. Master of ceremonies for the occasion was Beryle Murdoch. The speaker was Bobby Ted Gallagher, former Kent County Judge and Sheriff, who is now the executive director of the council of Government, with offices in Abilene. During the program the dedication of the beautiful new memorial plaza was held. The plaza is across from the court house, bank and community center. A continuing variety show, put on each hour from noon until six o'clock featured local talent. A drawing each hour was held with \$25.00 given away each time, furnished by local Jayton merchants.

A large crowd enjoyed the free barbecue supper with many attending the closing activities of the day which were free swimming in the pool near the school and a dance at the tennis courts. Those living in Kent County proved that they were indeed proud of their heritage by making the day such a successful one.

ON ILLEGITIMACY

The first official Census Bureau survey of premarital childbirth shows that 52.6 per cent of the first children born to black mothers in 1969 were illegitimate and 10.1 per cent of the first babies born to white mothers were born out of wedlock that year.

The Reason

Minister--I am glad to see that you come so regularly to our evening services, Mrs. McSwish.
Mrs. McSwish--Yes. You see, my husband hates to have me go out in the evening and so I come just to spite him.
