### Final Pep Rally Held Here Friday

The last pep rally for football this year was held Friday, November 5, in the gymnasium.

The Seniors won the spirit stick.

Skit: As Little Red Riding Hood (Shelly Williams) and her Jaybird friends (LeAnn Kuentler, Sally Garcia, and Kathy McMeans) were strolling through the woods (tree-Danella Sartain), they met a man (Boyed Dees) who told them how to get to grandma's house. Enroute they met the wolf (Harold Parker) representing the Sterling City Eagles. He ate a cookie and wished them a happy day. He beat the Jaybirds to grandma's (LaDonna Stanaland), got rid of her, and dressed in her clothes. When Red Riding Hood and friends arrived, they discovered grandma was the wolf. They ran him out of her bed and chased him out of the woods—the Jaybirds won again.

LeAnn Kuentler and Kathy McMeans presented the pep speech.

**THE HARVEST**  
"While the earth remaineth, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease."  
Genesis 8:22

The harvest each year should remind us of God's great promise to man. This promise was made right after the great flood, from which only Noah and his Ark survived. Just prior to the flood, all men lived so evilly that it grieved the Lord that he had made man of the earth.  
Today the churches stand as a bulwark against evil. Attend church regularly so that never again would man grieve the Lord as before.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

## Assembly Thursday

The students of Jayton schools attended an assembly Thursday, November 4, in the auditorium. The program was presented by Happy Dayze, a clown.

Happy's performances included juggling, riding a unicycle, and performing characterizations. His theme was "do the best you can in all you do—but always be yourself."

This Week

If the powers that be who are used to running the parties, and the party bosses take a good look at this year's election, they may see something they don't like.

First, Jimmy Carter, a political upstart, and a political unknown, took to the hedges and the highways in the primaries, and won very strongly the Democratic nomination. He had it sewn up before the convention. And in this victory he bypassed the big politicians, and pushed aside the professional presidential runners, and beat them hands-down.

And then in the general election, the sitting president running for a term of his own was defeated, and almost in his home state.

President Ford, while a member of the Congress for 26 years, was liked by his colleagues in Congress. And really no one disliked him as president. But too many people disliked his party, and too many people disliked the fact he was elected vice president, and president by one vote, and was the vote of the disgraced former president, Richard Nixon.

This may be a sign of things to come. This means hopefully, that no more can the big party bosses run the country, and cram what ever they want to, down the throats of the American voters. This means the people are thinking individually, and they are each "doing his thing" when he or she goes to the polls to vote.

Again in Texas, we see the great need of it being a two party state.

The Republicans generally over the state do not have primaries. Therefore the local office holders in most parts of the state are named in the Democratic primary. Yet, in the areas where good solid citizens have come out in the fall on the Republican ticket, many of them have won. As an example Joe Robbins, channel 13 news caster, who came out at the last minute as a Republican candidate for State Representative, beat out the Democratic candidate. And Edgar Chance, a former Falls school teacher now in Lubbock, was nominated handily in the Democratic Primary, but was notified Saturday he was beat by a Republican—but later in a vote shuffle it was decided that he had in fact won his race for Commissioner.

Texas needs to be a two party state very badly. Texas needs to have Republican candidates in their own primary every May, and then let the real race be witnessed in the November General Election.

There is going to have to be some ground breaking in this area to get results. Republicans in every county should come out and say they are Republicans, and run for local offices on the Republican ticket—then—and only then, is Texas going to be a real two-party state.

If a Republican candidate for president can poll more than a million votes in Texas, then they should come out in the open and support the Republican party. How a party that does not really exist in a state can get up in the general election and poll more than a million votes—I cannot see. But it does.

Texas is full of people who are Democrats 1460 days out of every four years, and then become Republicans, one day every four years, on the first Tuesday in November during the general election.

What kind of citizens are these anyway?

### COTTONSEED AS A COW FEED

Cow-calf producers should consider feeding cottonseed as a winter supplement, say two specialists with the Texas Agricultural Extension Service. Cottonseed has a high feeding value—23 percent protein and 90 percent total digestible nutrients—and cows require less of the material than they do range cubes. Cottonseed is also economical—about \$100 per ton compared to \$150 to \$165 per ton for range cubes. Disadvantages of feeding cottonseed to cows include the need for storage facilities and the ability to handle the material in bulk.

### TAX LEGISLATION AFFECTS ESTATE PLANNING

The new tax legislation that has just become law will have a big effect on farm and ranch families, contends an economist for the Texas Agricultural Extension Service. For instance, the "current use base" will be used in establishing the value of farm and ranch lands. The new tax law will also increase the exemption level as far as estate taxes are concerned.

## Burleson Reports From Washington

WASHINGTON, D.C.—Congressman Omar Burleson (D-Tex) said today that the Civil Service Commission is now receiving applications for the 1977 competitive examination for summer employment with the United States Government. The examination, which includes a written test, applies to most Federal summer jobs in clerical and administrative positions, as well as in engineering and the physical and biological sciences, GS-1 through GS-4.

The Congressman urges applicants to file early to receive maximum consideration for employment because opportunities for summer employment are extremely limited.

Tests are scheduled locally by CSC area offices. Applicants who file with an area office by December 9 will be tested in January. Those who file by January 13 will be tested in February. Any applications postmarked after January 13 will not be accepted.

Notification of when and where to report for the written test will be given about two weeks in advance.

Those candidates who took the test and qualified for summer employment in 1976 may renew their eligibility without taking the written test again by submitting an updating form by January.

Complete instructions for filing for the written test and for renewing eligibility, along with all necessary forms, are included in the CSC announcement No. 414, Summer Jobs in Federal Agencies, which may be obtained upon request through Congressman Burleson's Washington office, 2369 Rayburn House Office Building, Washington, D.C. 20515, or from Federal Job Information Centers, most college placement offices, or from the Civil Service Commission, Washington, D.C. 20415. The nearest Job Information Center is listed in most local telephone directories under "U.S. Government" or the toll free distance telephone number in Texas can be obtained by calling 800-555-1212.

The U.S. Postal Service is not participating in the 1977 summer employment program. Inquiries regarding summer employment in the Postal Service should be directed to the post office where employment is desired.

### Fashion

Short coats with hoods are quite popular this season for sport wear. Cape-like garments with attached hoods are also in the shops.

The long hair, covering half of the face, is definitely out for now. Shorter hair, either blown out or close-cut hair seems to be the "in" thing.

School-age children eating breakfast make sharper decisions, become less tired and work and play longer than children who omit breakfast. Breakfast should supply one-fourth of the day's intake of calories and nutrients, Mrs. Mary Sweeten, foods and nutrition specialist with the Texas Agricultural Extension Service, The Texas A&M University System, advises.

Parents who allow their children to make decisions at an early age and continue to trust them as they develop enable their children to be independent thinkers and decision makers, Debby Johnson, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System, says.

## Report On The Screwworm Problem On Texas Ranches

MISSION, Nov. 1: Maggots collected from wounds in 27,082 animals in 194 Texas counties this year have proven to be screwworm.

This report comes from Dr. M.E. (Cotton) Meadows, Jr., of the U.S. Department of Agriculture (USDA) Screwworm Eradication Program.

Noting 7,104 of these samples were identified during October, the screwworm fighter says he expects cooling fall and winter weather to slow the problem. In only three of the past 14 years have November cases out-numbered those identified in October.

Screwworms are flesh eating larvae of the screwworm fly. Adult females of this species mate only once in their lifetimes. The Screwworm Eradication Program, operated for USDA by the Animal and Plant Health Inspection Service (APHIS), is based on this fact.

Sterile flies, produced in the APHIS insectary, are released to mate with wild flies. Eggs produced as the result of a sterile to fertile mating will not hatch, ending the life cycle.

Starting the second week of November, Program officials intend to concentrate all sterile flies produced at the Mission plant in the overwintering areas of South Texas. Cool winter weather is expected to eliminate screwworm populations farther north.

At the same time, sterile flies produced by the Mexico-U.S. Screwworm Program, will be released in Mexico just south of the Rio Grande. It is hoped this two-pronged attack, coupled with strong preventive efforts by livestock owners, can bring about complete eradication of the parasite in Texas.

## ABOUT YOUR HOME

Small amounts of leftover cooked vegetables can be added to casseroles. A little chopped pimiento and chopped boiled egg add color and taste to casseroles.

When grilling evening steaks, get the most from your charcoal by grilling a few other meat for fuel. If it doesn't get completely done finish in oven—it will have absorbed the charcoal flavor, and may also be frozen.

It's time to store yard and garden tools. Clean with steel wool, file cutting tools and lubricate metal parts. Treat your small hand tools in the same manner.

Obey the rules of the road if you would like to live longer.

Regardless of whether your candidate won or lost, there is a certain amount of excitement in seeing a new president elected.

We have felt good about both Ford and Carter since the results of the election were known. Ford has done his best since Wednesday to begin making the government accessible to Carter. The President has already sent Carter many things to help with the transition.

At the same time, Carter emphasized in his press conference that Ford was still the President in charge of running the government and that Carter still actually had no authority.

We appreciate that attitude in both men. It makes us feel good about our political system when we see two men, who have been engaged in a heated battle for the highest ranking office, then turn to work together after it is over. We see both a good winner and a good loser.

Ford has taken his loss exceptionally well. He fought for it hard and didn't give up; but he quickly recognized when he was defeated and acknowledged it. We've seen many cases in which the loser didn't want to acknowledge defeat and caused a turmoil among the candidates and the public.

Also, we were pleased that Carter hasn't tried to move into office so quickly. He has publicly emphasized several times that he still has absolutely no authority and that Ford is still running the country through January.

We in the voting public should take similar attitudes. We need to be good winners and good losers.

If you voted, regardless of for whom, then you are a winner in the election. The American voter has become thoroughly educated through this 1976 election—perhaps more so than any other of the last few presidential elections. We were exposed to Watergate, political and sex scandals and every possible campaign issue. We went to the polls with a complete knowledge of issues and candidates.

That's why we are all winners. We became involved in the government process and voted in record numbers.

The only losers were those who didn't vote...especially those who didn't care to vote.

A little bit of information everyone should file away and keep just in case the conversation at a party ever falls off:

Platform shoes increase the distance it takes to brake your car to stop, according to the University of Missouri.

Two test sessions were conducted, one in which 17 participants wore platform shoes and another in which normal shoes were worn.

Although all were accustomed to both types of shoes, their brake response time wearing platform shoes was .91 second, against .81 second with regular footwear, representing an increased stopping distance of 1.42 feet for each 10 miles per hour of speed.

That could only have come from the "Show Me State."

Mr. and Mrs. Bill Harrison and Mrs. Nadine Cheyne went to Snyder shopping Friday.

Mr. and Mrs. Bill Harrison went to Lubbock Saturday to visit Kerry Grant in Methodist Hospital.

Mr. and Mrs. Gordon Cheyne and Bill Harrison visited Clint Edward in Stamford Hospital Tuesday.

**Proper Energy Management Can Save You Money**

*In Your Home Laundry*

- ★ Utilize the washer's full capacity. Wash larger loads -- wash less often.
- ★ Same goes for dryers. Dry more than just a few items at a time.
- ★ Use the washer's load selector to save on hot water when you must wash small loads.
- ★ Use a cold rinse whenever possible to conserve hot water.
- ★ For more efficient drying, clean the dryer lint screen after each load.
- ★ If your dryer has an automatic cycle, use it to prevent unnecessary overdrying. Also, when allowed to overdry, clothes tend to wrinkle, thus require more ironing.
