Mrs. Hall was born here and has resided here most of her life. She began and finished school in Olton and says that she has always had more than a passing interest in the work-

ings of the school system. At present, the Hall's have two children in school here-a daughter who is a senior and a son in the eighth grade. Another son finished his high school education here.

"I believe that a mother's influence and ideas in shaping the policies of the school will be beneficial," she said. "Mothers and fathers work together to build the right type of home, and I believe that such a combination will work toward the betterment of the schools.

Mrs. Cade has two children in Olton schools at present, and another who will start next year. She is a graduate of Lubbock High School and attended Texas

"I believe," Mrs. Cade said, "that a woman's representation is needed on the school board. There are many things that a woman can handle and understand better than a man."

Neeley is a farmer in the Hart district and graduated from high school in Spade before attending a business college in Plainview. He has two children now attending Olton schools.

Neeley said that he entered the race because he is "very interested in the schools and feels that someone from his district should be on the board."

Bley, who farms near Olton, went through school here and attended Texas Tech. He has CONTINUED ON PAGE 6

Late Filing By Incumbents Crowds Once-Empty Ballot

The drought is over and it ended in a flood.

Two weeks ago, Olton was without a single candidate running in the April 4 election for two city council spots and the mayor's seat.

Early last week, the drought was given some relief when two men, Charles Polk and Bob Gullett, entered the race for council men.

But the ballot was still one man shy . . . nobody wanted to be mayor.
Then the flood came.

Thursday (March 24), Cecil Gallaway and Charles McClain, pushed the election into a halfway race when they filed for council men and mayor respec-

"The price support for all

participating farmers in this county will average close to \$1.88 per hundredweight," Aten said, "as compared to the gross average of \$1.48 in 1960." Those farmers who partici-

pate in the program, therefore, can expect to gross slightly more on grain than they did last year, even though they have 20 per cent less acres in cultivation.

Add a compensation payment of one-half of the crop average received at the new \$1.88 price support for the 20 per cent retired, and income from the production of feed grains should rise considerably in the

"It's a good program for the farmer," Aten commented. "It will be hard for him to lose under this new set-up."

Using an estimated 240,000 acres as the total grain sorghum acres under cultivation in Lamb County during 1960, Aten exampled the new situation this way:

"Of the acres under cultivation, approximately one-third (80,000) were dryland, producon the average, 1000 pounds of grain per acre. The remaining two-thirds (160,000) were irrigated and averaged 4000 pounds.'

With these figures as a gauge, Aten estimated the income from the 1960 crop (county-wide) as \$10.6 million at the average price of \$1.48 per hundred. may harvest off each acre in to help hide the eggs.

of grain land may be retired under the plan, and, as an added incentive for the "second 20", farmers who receive compensation will be awarded 60 per cent of the price support on the addition acreage. Corn, too, is included in the grain program. Price supports it are upped, under the per cent land reduction, from \$1.06 per bushel in 1960 to \$1.20. Too, compensation payment are included for corn at the same rate as grain the same rate as grain sorghum.

Getting down to an individual basis, if a farmer around the Olton area raised 200 acres of irrigated grain sorghum last year and harvested 4,000 pounds an acre, he would have grossed \$11,840 at \$1.48 a hundred.

"EXACT STANDARDS"

The exact standards you want in your home are provided when only the most carefully selected lumber is chosen to become a part of your home. SPIB 77 southern yellow pine must pass rigid tests for strength, moisture content, and straight, true grain. These exact standards bring you added protection for the lumber investment in your home. When you see the SPIB 77 grade mark, you'll know that your home will have sturdier framing ... a built-in protection and structural soundness you will enjoy for years.

* SENATOR BLAKLEY is the winner of the Texas Poll directed by Joe Belden and subscribed to by 21 leading Texas newspapers. He also is the first choice in many other surveys and polls conducted throughout Texas.

SENATOR BLAKLEY'S ACTION PROGRAM FOR TEXAS

\$100 MILLION MORE ANNUALLY FOR SCHOOLS: A home-rule aid-to-education plan that would return to each state 5 per cent of federal income taxes for support of locally administered public schools. In Texas this would mean over \$100 million more annually for our schools - without federal interference!

INCOME TAX RELIEF FOR PRESSED PARENTS: Also, for families putting their children through school, additional income tax exemptions of \$1,200 for college or university student, \$400 for son or daughter in high school. Parents deserve a tax

A HELPING HAND FOR OUR SENIOR CITIZENS: A bill to raise ceiling on what Social Security recip-

ients may earn without being penalized. Senator Blakley would raise ceiling from \$1,200 to \$1,800 a year to help many retired persons.

SHARP REDUCTION IN FOREIGN OIL IMPORTS: Reduce by one half the amount of foreign oil being brought into U. S. Texas' economy, schools, state government, all suffer when foreign oil floods market, causes Texas production to shut

INDEPENDENCE! WE MUST KEEP IT ALWAYS: Retain Connally Amendment to World Court. United States should maintain its sovereignty without question. Senator Blakley is fighting against repeal of this vital guarantee.

LET'S KEEP SENATOR BLAKLEY IN THE U.S. SENATE

hrough the ventilation duct. The smaller of the two, Henderson, crawled down the metal chute, dropped into the office and opened the rear door for his companion, officers said.

After going through desks drawers and filing cabinets, the duo said they discovered the safe in a small office but were unable to open it.

They said they then hopped the fence of the lumber company, entered through the rear | pital. of the office and cracked the safe with tools they found there. Taking what money they could find, the pair then re-entered the Southwestern Public Service office and, using tools

taken from the lumber company, opened the safe there. County Attorney Curtis Wilkinson said both boys have previous records with police authorities and are on probation in Hockley County on a simil-

ar charge. Some of the stolen money and tools were recovered. Officers said the boys "bought some clothes with part of the loot before they were cap-tured."

Texas ranks 34th among the 50 states in average salary paid teachers.

Does Your Man Meet The Test?

With both the school board and city council elections coming up, and with local interest seemingly high, this seems a good time to reprint a "test for school board candidates" which was published this year in a California magazine.

Would the quality of school boards be improved if the public rated board candidates on the following items? The California School Boards Association thinks so. What do you think?

You can change each question to fit the situation and rate the city council candidates with this list of questions. How do you score the eight men seeking city posts and the candidates running for Olton school board?

1. Has the candidate an unselfish interest in the public schools, the community and in every child? 2. Has the candidate arrived at a position of recognized

leadership in the community? 3. Is the candidate seeking the position for personal prestige or political gain?

4. Is the candidate a leader in his own occupation or

community group? 5. Is the candidate a known quantity in the community? 6. Is the candidate able to think independently and objectively about a problem?

7. Will the candidate accede cheerfully to the decisions of the majority?

8. Has the candidate a record of the kind of leadership that will represent the district as a whole rather than a record identifying him with a particular group, cause, or geographical area?

9. Will the candidate work to develop unity among the members of the board, contributing to harmonious development of the program?

10. Will the candidate give the necessary time to this important position?

11. Is the candidate capable of recognizing and distinguishing the jurisdictional power and functions of the board and administration? 12. Does the candidate know the political boundary and

physical geography of the school district? 13. Does the candidate have the courage and ability to explain and enforce a rule which might not be popular but

which is proper? 14. Does the candidate understand that leadership often involves the turning of public opinion from an erroneous attitude to the acceptance of a feasible rule?

15. Is the candidate aware of the cross currents of thinking pertaining to the basic concepts of public education and will he remain loyal to his trust under stress?

16. Does the candidate have a layman's relationship to

17. Does the candidate make a habit of whithholding judgement on critical issues until the facts are available?

18. Is the candidate able to carry on cheerfully when public appreciation of his efforts seems to be lacking?
19. Does the candidate have personal interests that would

invalidate his service to the board? 20. Does the candidate have a sense of humor?
21. Does the candidate show evidence of knowledge of

moral and spiritual values?

The ideal candidate would rate "yes" on all items of this check list except 3 and 19, which require "no" answers.

ofwater

Whatever the make of your present vertical turbine pump, your Peerless Dealer has the right motor and bowl combination for your pump and well. He has a plan to give a full pipe of water*. Think of all the advantages of this "Peerless Plan for Plenty" you'll enjoy lower energy costs, less irrigation time, and less plant wilt in hot spells when you need a fast irrigation.

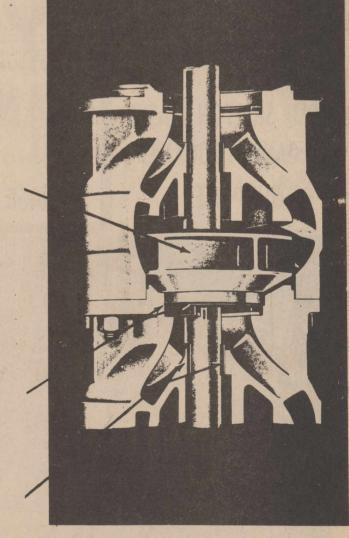

PEERLESS PUMP BOWLS ARE YOUR BEST BUY

Amarillo Highway

- Peerless Impellers are fully enclosed making the impeller less subject to wear. Bronze, Cast-Iron, or vitreous enameled impellers are available (your option at no extra cost). The basic Peerless enclosed impeller design makes possible the double seal ... for higher efficiencies, reduced operating costs, and longer pump
- Double Seal is a feature in the Peerless Bowl to seal the Peerless impeller on the bottom as well as on the sides. When impellers are lowered to compensate for normal wear by use of the adjusting nut under the motor helmet, the rubber end-seals 'wear-in' to the impeller . . . again forming a seal to minimize "shortcircuit' water loss. This single feature will increase water delivery again and again . . . over the life of the
- Bowls and Bearings are the heart of a turbine pump. It's important that these vital parts are well lubricated. All Peerless turbine pump bowls and bearings receive instant lubrication by the water being pumped for more dependability . . . and less wear.

DON SPAIN OF OLTON FARM SUPPLY, new dealer of LIQUID FERTILIZER in Olton, shows how you eliminate the heavy work when you use LIQUID FERT-LIZER. No more of that lifting heavy bags, just pick up a hose, says Don. It's not only easy, but safe No danger from vapors, acid or high pressures. You can use LIQUID FERTILIZER for pre-plant fertilization, sidedressing or YOU CAN

Fertilize As You Plant

Authorities at Lubbock Agricultural Experiment Station report that we have the biggest underground seasoning we have had since 1927. The big rains we had last summer brought moisture up to field capacity, and growing crops couldn't deplete it all, leaving a big moisture 'carry-over.' The bountiful subsoil moisture at present indicates that a lighter-than-normal irrigation will be required before planting - even if relatively dry conditions prevail in the near future. You can conserve even more of that moisture if . . . YOU

USE A

"STINGER This simple little attachment will let you plant and apply SOLUTIONS, all in one easy operation. There will be only the one disturbance of the soil . . . one less time over the field . . . less pneumatic packing of the soil . . . plus getting the fertilizer near the seed. And with LIQUID FERTILIZERS — Solutions — they are ready to go to work instantly, assuring you of a healthier and more productive crop. Go by your nearest LIQUID FERTILIZER dealer and let him show you how easy it is to rig-up your planter unit with "Stingers," in order
