Popejoy, Farris Married

Miss Connie Lou Popejoy and Billy Joe Farris were united in marriage Friday, July 10, at the Dennis Memorial Chapel.

Rev. Denzil Leonard officiated at the double ring ceremony.

The bride chose a gown of crisp nylon organza designed with a scalloped sabrina neckline and long sleeves that tapered to petal points over the hands. The fitted lace bodice extended into an organza skirt enhanced by alternating tiers of wide lace that swept into a chapel train. The elbow-length veil of silk illusion flowed from a white satin pill box ornated with embroidered sequins. She carried a cascading cluster of dramatic white gladiolus and white stephanotis with accents of greenery.

Linda Popejoy, sister of the bride, was the maid of honor. She wore a light blue crystal de-peau dress with a scalloped neckline, and carried a crescent bouquet of white gladioli.

Candlelighters were Ricky Farris, brother of the groom, and Miss Darla Bostick, niece of the bride.

Miss Darla Bostick wore an identical dress of the attendant with a wrist corsage of patrician white gladioli.

Best man was Ronnie Farris, brother of the groom. Ushers were Lonnie Bradley, of Plainview, and J.D. Myrick, of Hart, brothers-in-law of the bride.

The candlelight ceremony was performed before an altar of tiered seven and fifteen branched candelabra. They had white tapers entwined with bridal wreath and greenery flanked with arrangements of white gladioli and mums. The aisle was marked with satin bows.

The bride's mother chose a beige silk dress with matching accessories and wore a corsage of callie glads from florets of patrician white glads. The bridegroom's mother was unable to attend due to illness, but she was presented with her corsage following the ceremony by the bride and groom.

A reception in the bride's home followed the wedding.

There was a traditional three-tiered cake with milk glass and silver appointments on a cloth of white satin covered with white net. The centerpiece was crystal holders bearing blue tapers and the maid of honor's bouquet.

For the wedding trip to Colorado Springs, the bride chose a light blue silk suit with matching accessories. Her corsage was three cymbidium orchids.

Both are graduates of Hart High School, and Mrs. Farris was an employee of the Farmers State Bank.

They will make their home in Dimmitt.

Agronomist Discusses Weeds And Nutrients

By Bill Bennett, Agronomist

Everyone knows that weeds are detrimental to crop yields. They use both water and plant nutrients which could be used by the growing crops.

Some interesting figures obtained by Dr. Alan Wiese of the Bushland Experiment Station show the quantity of plant nutrients contained in tops of mature weeds. The figures given are on the basis of pounds of nutrients per acre and are based on two plants per square foot of space.

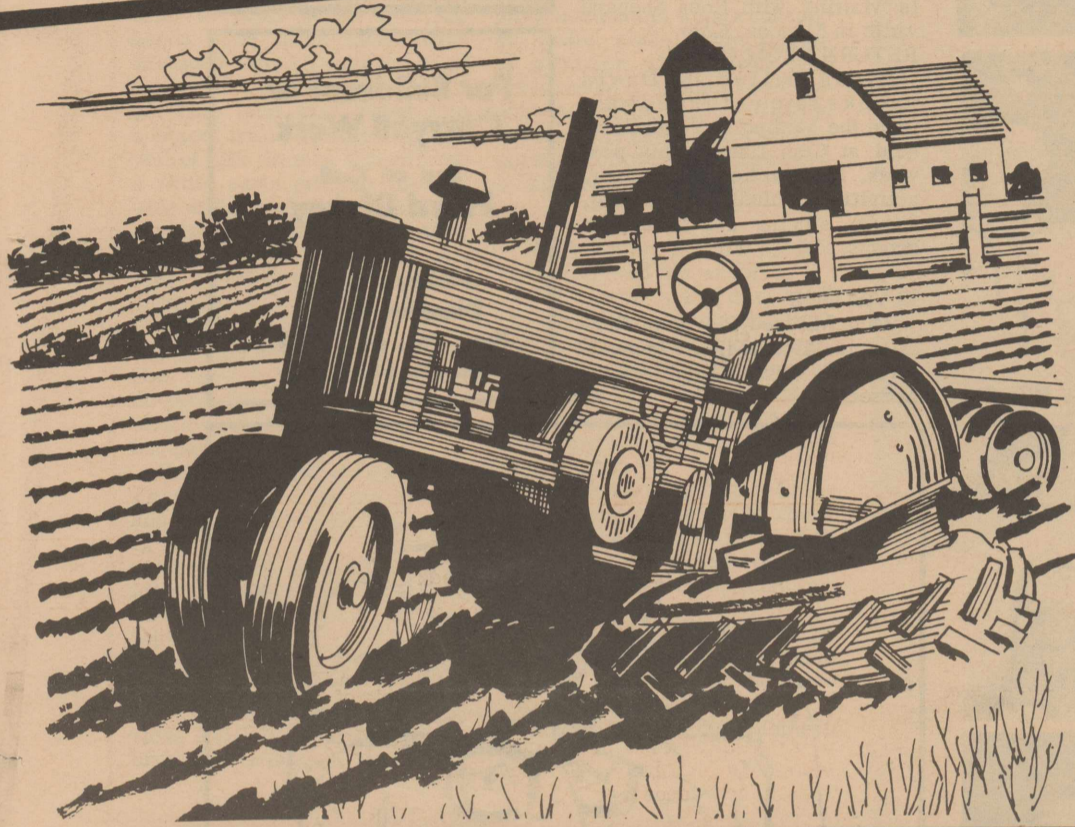

Kochia weeds would contain 205 pounds N, 19 pounds phosphorus pentoxide and 426 pounds potassium oxide. Other weeds with the quantities of nitrogen, phosphorus and potassium are as follows: crabgrass--63-10-313; Russian thistle--194-21-576; puncture vine--54-6-86; buffalo bur--100-15-119; and pigweed--123-18-209.

Compare these quantities to a normal crop of 6000 pounds of grain sorghum, which would contain about 210 pounds N, 27 pounds phosphorus pentoxide and 80 pounds potassium oxide.

Seed produced by weed plants is also of interest. Dr. Wiese figured 28,500 seeds for kochia, 94,500 for crabgrass, 9,000 for Russian thistle, 1,000 for puncture vine, 8,000 for buffalo bur and 37,000 for pigweed. This points up the importance of controlling weeds before they go to seed.

Be Wise! Follow These Six Safety Suggestions

1. Keep all equipment in good repair — know and use the safety rules in operating machinery on the farm and highways.

2. Treat animals with caution — always speak to an animal as it is being approached. A frightened animal can be deadly.

3. Eliminate all fire hazards around your farm — and be aware of fire dangers at all times. Don't smoke in barns!

4. Many accidents can be eliminated by keeping your farm clean and neat. Keep buildings in sound condition, too.

5. Be careful around water holes, wells, and lakes. Learn how to swim and never go out in or on water by yourself.

6. Learn the methods of first aid — keep a kit handy — and always apply first aid promptly when an accident occurs.
