## Highway Construction To Begin

CONSTRUCTION CREWS moved into Hart this past week to start a street improving project which will include raising and grading roadways and installing curbs, gutters, sewers, and drains where necessary. The project, approved by the city in July, will cost a total of \$65,514 and will cost as much as \$5 a foot for property owners along the 10 streets involved. Of the \$5 tax, \$1.70 will be paid for each foot of curb and gutter and the remaining \$3.30 per foot is assessed for all other improvements, according to the original city resolution. All existing streets now in need of repair are eligible for patching under the newly-voted plan.

### Correct Address A Must On All Overseas Mail

Postmistress Jewel Brooks today urged the citizens of Hart to be sure to use the correct address on their letters and packages going to servicemen overseas to avoid serious delays in delivery.

Postmistress Brooks reported that millions of letters and packages going overseas have been delayed because they were insufficiently addressed. She said that one of the biggest problems has been the failure of persons to include the very important 5 digit APO or FPO number in the military address. Mail not containing this number is incorrectly addressed.

She said that last year more than 9 million pieces of mail were delayed in delivery. Of this number, 3 1/2 million pieces failed to include the complete 5 digit APO or FPO number in the address. This improperly addressed mail had to be sent to a military locator directory where time-consuming searches were made to determine the proper addresses.

"As the Christmas mail volume going overseas is expected to increase up to 30 per cent or over 4 million pounds above last year, every precaution should be taken by friends and relatives of servicemen to address their letters and packages properly to assure rapid delivery to its destination,"

Postmistress Brooks said.

There are four essential elements to an overseas military address. They are:

1. The serviceman's identity - grade, full name, and service number.

2. His military unit - complete

3. Gateway post office - New York, San Francisco or Seattle.

4. APO of FPO - a 5 digit number.

When any of these elements is missing, the letter or package will be delayed in delivery.

A contract for a highway construction project in Castro and Swisher Counties has been awarded by the Texas Highway Commission during its November meeting, according to O. L. Crain, District Highway Engineer at Lubbock.

The construction, consisting of grading, structures, base and surfacing, will be on 11 miles of Farm to Market Road 928, extending from FM168, five miles north of Hart east to FM 1424, five miles south of Lakeview.

Kerr Construction Co. of Lubbock, which submitted the low bid of \$217,183, has been awarded the contract.

Construction is expected to

take approximately 150 working days and will be under the active charge of H. C. Weaver, Resident Highway Engineer at Plainview.

### Extension Phones May Be Installed

## Santa Claus Writes, Asks For Letters

It won't be long until Santa Claus will be making his yearly ride with a sleighful of toys and gifts for all good boys and girls.

But he cannot make the right deliveries unless his little friends let him know what they want for Christmas, so get your orders in now. When St. Nick is through reading your letters he will send them to the Hart Beat to be published.

Address letters to Santa Claus, North Pole, 99701, but be sure and mail them no later than December 15.

The Hart Beat received the following letter from the jolly bearded-gentleman:

Toyland, North Pole  
November, 1967

Hart Beat  
Mrs. Sue Cannon, Editor  
Hart, Texas 79043

I'll see you  
Dec. 22.

Dear Sue:

Once again I'm getting anxious to see you and all my little friends in and around Hart. It's been almost a year since I have been able to visit in the area, and that's a long time to be away from the fine group of friends living in the Hart area.

There have been a lot of changes made around here during the past year, and they have made the old workshop a lot more efficient. My helpers and I have been very busy all year long, and we have the best presents in the history of the workshop this year -- and in record-breaking numbers, too.

We're just waiting for the proper time to spread happiness and good cheer all over the world this year. We're doing our best to see that everyone has the very nicest and happiest Christmas ever this year -- we wouldn't want it any other way.

Sue, please remind the children in the Hart area that I still have a Zip Code (same as last year--99701) and ask them to please use the zip number on all their letters to me.

Oh yes, and ask them to include their own zip numbers on their return addresses. It would sure make things a lot easier on old Santa if every boy and girl would take just a minute or two and add a zip code number for me to use when I make the rounds this Christmas.

You see, one of the changes we've made around here was to install one of those computer gadgets to sort the mail. It really zips them through, but it goes all to pieces when it gets hold of a letter without a zip number -- and then one of our helpers has to stop making presents and go sort out the letters without any zip numbers.

And then, too, the zip numbers make it a lot easier for me to find my way around and get the proper presents to the proper children when I make my trip through Hart on Christmas Eve.

Until I see you again, I send my love, best wishes and hopes for the merriest of merry holidays to you and all my friends in Hart.

Sincerely,  
Santa Claus  
North Pole, 99701

Add water, cover, cook over slow fire until tender, about 3 hours. About 1 hour before meat is done, add vegetables which have been washed, peeled and quartered. For gravy: Skim off fat from pot. Add 3 tablespoons flour, mix with rest of drippings, stir over fire until smooth, add seasoning. Serve hot.

## Christmas Seals Being Sold For 61st Year

It's Christmas Seal time again!

Seals mean a great deal to people who deal with tuberculosis and other chest-respiratory diseases. The first one was mailed in 1907. Emily Bissel designed it to read like this, "Put this seal with message bright, on every Christmas letter; Help the tuberculosis fight, and Make the New Year better."

People like it, and thus began the first Christmas Seal campaign! This is the 61st.

Sheets of the Seals are in the mail to literally thousands of residents in the 23-county area covered by the West Texas tuberculosis Association, as well as across the nation.

And even though they're attractive additions to Christmas cards and gifts, there is another picture.

The other side of the Christmas Seal begins when the dollars begin to pour into TBA offices across the country. In the case of WTTA, 93 cents of this dollar remains in the state of Texas to work for the local area. Seven cents goes to the national association, only to return home in the form of educational materials and medical research in emphysema, bronchitis and asthma, as well as the common cold. All this is done in addition to the research done in tuberculosis.

Many people do not know that TB is still a major killer among infectious diseases. Because of the magnificent work done in TB research and care, many are not even aware of its existence today, nor the extent to which it is a problem for everyone.

The TB Associations are acutely aware of this, however, and take giant strides to fight tuberculosis and other respiratory diseases.

All this work is dependent on the voluntary response of the individual. In the case of the West Texas area, the sole income is from Christmas Seal Sales, monies from the Mobile X-Ray Unit and from personal contributions.

And here are just a few of the ways in which the TB Associations work for you:

Tuberculin testing in schools is done completely without charge and provides a comprehensive evaluation of the number of infected children. Tests are given when children are in the first, seventh and ninth grades in public school.

Chest X-Rays, made in the Mobile Unit or at the local public health department, are follow-ups in many cases, to the skin testing. A doubtful or positive reaction indicates the need for further testing. This usually includes an X-Ray.

Professional help is given in the form of Doctor's Symposiums and Nurses Clinics. All these are staffed and planned by TB Association workers.

Another everyday occurrence is the volunteer work which goes largely unsung that is done by doctors.

There is no expense to the public. The work is financed by the WTTA through the contributions made in the sale of Christmas Seals.

Few people realize that constant research has come up with a new use for an anti-tuberculosis drug called Isoniazid (INH). Extensive trials conducted by the United States Public Health Service in cooperation with the National Tuberculosis Association over the past 15 years, show a consistent reduction of morbidity in groups taking isoniazid (INH) as chemoprophylaxis.
