## Passing Through

## O'Donnell Telephone Co. Will Extend Its Lines

### New Lines will Cover Large Territory Singleton Hardware Co. Now in New Home C. of C. Now Behind O'Donnell Trades Day

One of the most important matters to come before the newly organized Chamber of Commerce on Monday morning of this week was the building of a telephone line to Seagraves, Post, Pride, Lou, Scrapp town and Ashmore, out of O'Donnell.

The proposition was brought before the meeting by C. H. Doak who has been working with Mr. Huff, owner of the local telephone system, for the past few days visiting the above towns and communities. Messrs. Huff and Doak stated that at each of the above mentioned places they received encouragement and a pledge of full co-operation from each of the communities. The cost of such an extension from the O'Donnell office would necessitate an expenditure of approximately \$2700.00. This amount is to be subscribed by the different towns and communities to be benefited by the telephone connections. It was reported some of the communities had already subscribed their quota and others were expected to raise their quota within the next few days. A committee composed of C. H. Doak, C. E. Ray, and W. E. Guise was appointed to raise O'Donnell's quota of \$850.00 and before the meeting adjourned the committee left on their mission. We understand they raised a copy of the quota before night which was quickly and willingly subscribed by the merchants and business men, all of whom were of the same opinion that the building of such an extension to O'Donnell's telephone system would be a great benefit to the town and the people to be served by the system.

According to reports the project is assured and work will be under way within the near future.

### BOX SUPPER POSTPONED

The box supper which was to have been Friday night, October 19th, at 10:30, for the Amer. con. Legion, sponsored by the Home Demonstration Club, will be postponed indefinitely. The date will be announced later.

### GENERAL SCIENCE CLASSES PROVE INTERESTING

Students in General Science classes are finding their work exceedingly interesting. Recently they came out excited over burning wood and other combustible substances in oxygen, burning wire with sulphur and other unusual experiments. Much of their enthusiasm is due to the manner in which Mr. Burkhalter conducts the classes.

### SENIORS WEARING NEW CLASS RINGS

Our High School Seniors are proudly displaying their handsome class rings, which arrived today. They are dignified and simple in design and something of which their owners are justly proud. Perhaps they may well be proud, for they are the symbol of a mighty big estate.

Singleton Hardware Co. now is properly located in their new home, which is just being completed. The move was made Wednesday afternoon and night without a great deal of interruption of business. Painters and finishers are still at work on the finishing touches to the new home but a glance will readily convince one that when everything is completed it will be the most modern business house in the city. New fixtures are also being installed, which adds greatly to the attractiveness of the store. The new fixtures are of the most modern design which enables the store to display their merchandise attractively and in the most convenient manner to the customers. Drop in and see them in their new quarters, they have reason to be proud of such a modern home.

### HOME ECONOMICS CLUB INITIATES NEW MEMBERS

The Home Economics club of the High School, of which Miss Beulah Gates is president, initiated several new members the last of this week. As each candidate for membership entered the club room, she was introduced and asked to make a speech. Then, one at a time they took the oath of membership: I do solemnly swear that henceforth and forever I will boil water without either scorching or burning it.

They were then examined for degrees, some of the questions asked relating to how to fry eggs without grease, and to tell the steps in making a buttonhole. Each new member was asked if she could roll home without grease. One declared that she could, but finally decided it was impossible. As the candidates proved their eligibility, their attention was directed to an electric iron heated all white hot and they were asked where they preferred the H. C. brand, on the arm or on the neck? Then after being blindfolded, each one was handed—with a piece of ice.

As a continuation of the initiation the new members were one stocking and one shoe of a kind all day on Thursday and Friday, and carried as part of their equipment a rusty tin bucket in which reposed a copy of the constitution and by-laws of the club and an odoriferous onion of the common garden variety. Each time they were addressed they must reply by saying "White Elephant", the name of the P. T. A. play.

Those enjoying the pleasures of this initiation are high school students, general public, and the initiators, Miss Irma D. Palmer, Pauline and Ozzell Wheeler, Ruth Roberts, Mervin Hut, Evelyn Edwards, Madeline Morrison, and Mildred Aten.

Little Miss Lorraine White injured her knee last week at school, and has been compelled to miss several days. She is a member of the fifth grade.

Mr. Ben Coin says the only place he has gone lately is home at night and to work in the morning.

At a meeting of the newly organized Chamber of Commerce on Monday morning plans were completed for the holding of Trades Day on the first Monday in November. Trades Day was postponed on the first Monday in October for several reasons and at the meeting Monday it was decided to double the amount of prizes to be given away on the first Monday in November. \$200.00 will be given to the people of this territory in the same manner as was given on Trades Day in September.

According to arrangements everything is in readiness for the giving of \$200.00 on next first Monday, which is expected to attract people from miles around. So folks be here ready for the free distribution of the prizes, it will be to your advantage.

### REGISTERED JERSEYS FOR SALE

Vernon Martin reports having made a trip to Talia, Texas, the past week-end to look over a herd of Jerseys for sale there. Mr. Martin reports a fine herd of 18 registered Jerseys of Sybil Gambaage breeding and have a booking of 600 pounds of butter fat. These are 5 mature cows and 15 heifers. All are live good type and show marked uniformity. The herd is on the market at \$150 per head and will be sold to the first applicants.

This is a real opportunity for the interested farmer as it is very doubtful if the price can be beat quality anywhere in Texas. There is probably no greater needed enterprise in the community than dairying and it seems that we should take advantage of an opportunity so near home.

### CHANGES IN SCHOOL SCHEDULES OF INTEREST

Of importance to patrons of the school, the following changes in the school schedule is announced. First bell at 7:45, teachers leave home.

Second bell at 8:00, pupils enter the building.

3:30—Classes begin. 12:15 to 1:00—Noon intermission. 3:15—School dismissed.

These changes are made for the benefit of those pupils who are needed to help with gathering the cotton crop. It is estimated that attendance is reduced by one-third while the harvesting rush is on. It is hoped that more pickers will come in and these students will soon be back in school.

### CLEMENTS TAILOR SHOP MOVES TO LAMESA

Mr. Bob Clements sold his tailor shop equipment this week to "Doc" Clements of Lamesa, who will move the establishment to that city. We understand that Mr. Clements will remain here.

## G. C. OF C. TAKES PLACE OF LUNCHEON CLUB O'DONNELL

The O'Donnell Luncheon Club which has been functioning for the past several months and doing a wonderful work for the town and surrounding community is no more.

At a meeting of officers, directors and members on last Tuesday morning in their offices back of the First National Bank it was decided to reorganize and be known in the future as the O'Donnell Chamber of Commerce. The Luncheon Club has been serving as a Chamber of Commerce since its organization something like a year ago, so it was decided to change its name with the reorganization and work entirely on a new system, known as the budget system, which all lines Chamber of Commerce use. A complete survey of the town was made to ascertain the amount of money that could be raised for the year's budget. After conservatively checking the survey the budget was placed at \$1,200.00 for the coming year's work.

The O'Donnell Chamber of Commerce elected the following officers at its meeting Monday morning: C. H. Doak, president; J. P. Aylor, vice-president; J. L. Shoemaker, Jr., treasurer; with the additional Board of directors: Ben S. Coin, E. M. Haymes and C. H. Mann. The above officers of the newly organized Chamber of Commerce will meet within the next few days and employ services of a secretary whose duty it will be to attend to correspondence and collection of dues and the keeping of the organization's records and other duties of the office. All of the newly elected officers were elected by acclamation.

## Rochelle Hotel Will Open Next Week

Johnnie Rochelle, well known Cafe man of this city, has leased the O'Donnell Hotel owned by C. H. Doak which has been closed for the past few months and will open to the public by the middle of next week according to an advertisement elsewhere in this paper.

The building has been completely renovated and dressed with new paper and painted walls. The cold water and bath has been added, in fact, nothing has been overlooked in an effort to make it as modern as any hotel in this section. It has been newly furnished throughout and Mr. Rochelle states everything will be in tip-top shape for the opening to the public the middle of next week.

Hotel Rochelle will be operated on the European plan for the present, but Mr. Rochelle states it will be changed to the American plan as soon as he believes business will justify.

## Cold Wave Proves The Worth of Gas

The decided drop in temperature here, this week has already shown us a taste of the convenience of gas stoves. While the cold wave was not even freezing weather, so sudden a change made new heaters most welcome.

Mr. Doak, our local weather prophet, says a cold wave is forecast till November 20, and unless he should one time miss on a prediction the greater part of the fall crop should be matured and well up off freezing a while longer.

One enterprising hardware dealer is accused of donating an overcoat and standing in front of his establishment with his collar turned up and his teeth chattering so that people would feel sorry when they saw him and thus pep up his stove sales. De don't know just how true that is, but we are kind of sure that heaters are the ultimate emancipation.

## FACULTY WORKING ON THE WHITE ELEPHANT

This elephant doesn't have any connection with political parties, so far as we can learn, but it is an elephant you don't want to miss.

The faculty is rehearsing a play by that name which will be a whizzer. They are not yet ready to announce their date, but it will probably be presented three weeks from tonight (Friday). If you enjoy a real play, one packed full of fun and good situations, you are ready to see "The White Elephant."

## SENIOR CLASS HONORED BY LOCAL THEATRE

The twenty-one members of the Senior class of our local high school were the delightful recipients Thursday evening of a gracious act on the part of Mr. Mullins, manager of our theatre.

Several days ago he extended an invitation to them to be his guests at various times through the year, and this was the first occasion to take advantage of the offer. This courtesy is much appreciated by the members of the class, who are glad indeed to enjoy Mr. Mullins' hospitality.

Mr. and Mrs. E. T. Wells were in Tahoka Wednesday on business.

who diversifies every about his bank

## Is 31 T 21 Monday

## at Election Monday

## Cast Shows of Interest

held on Monday of the purpose of voting sum of \$28,000.00 for the City of O'Donnell. The City of O'Donnell, the vote in favor of the proposition being opposition. The result was very small difference. About one out of ten voters, of the City of O'Donnell, voted in favor of their vote in Monday.

## Pickers Are Available Now

representing the Bureau of Labor at Ft. Worth on Tuesday in this section's need of cotton pickers. The pickers are found in the best Texas and the fee as he ever saw any.

## "Kit Carson" Is Film Epic

## Fred Thomson Does Two Chapters in Life Book of Scout

Spectacular backgrounds, mass movements of whites and Indians, struggles between trappers and the red men, with Fred Thomson and his white horse, Silver King, at their best, combine to make "Kit Carson" one of the outstanding pictures of the season. Carson's life was a series of adventures and Mr. Thomson has skillfully chosen many of them in building up a remarkable dramatic story for his Paramount special which opens at the Lynn theatre Monday and Tuesday.

## Two Pleasing Love Stories are threaded into the drama

of the drama with the story of a young girl, and the other with a Spanish woman. This latter role is played by Nora Lane who first leaped into fame in "Jesse James," and later added to her laurels in "The Pioneer Scout." The Indian girl, a newcomer, is Dorothy Johnson.

## Old William Courtwright, who portrays his now famous lovable character, takes care of the sombre moments of the film.

And Raymond Turner as "Smoky" furnishes plenty of comedy relief. Paul Paoli as the French-Canadian trapper and the Indian girl does an admirable piece of work. The film version of the two romances episodes in the life of Thomson's famous Indian scout and military leader is authentically done, the intensive research work undergone by Mr. Thomson in getting it on the screen, being manifested realistically. It compares favorably with any of the best Westerns specials produced in the various departments.

## EPWORTH LEAGUE ENTERTAINS ZONE VISITORS

The local Epworth League, was host Sunday to other Leagues in the various departments. The entertainment was profitable and highly enjoyable and profitable day was spent.

## Visitors began pouring in at Sunday School time and continued to arrive until almost noon.

Their presence in the class was much appreciated, several guests leading in discussions in the various departments. A splendid sermon by Rev. Weems, a delightful social hour and lunch was enjoyed at the Church, and at one o'clock the day's work was entered into with great spirit. Perhaps the outstanding number on the program was the value of an Epworth League to a Community, which was discussed by Mr. Wall of Lamesa.

## About sixty members were present at the Epworth League taking the loving cup with an attendance of twenty-three, who came fifty-five miles.

## The next meeting will be held at Lamesa, the fourth Sunday in November.

## CRIPPLED STORY-TELLER DELIGHTS LOCAL STUDENTS

An interested and responsive student body in the school auditorium last Tuesday morning.

Mr. White, who is an excellent teacher, quickly captured the attention of his audience and kept them in a state of laughter with such stories as "Brother Skunk Changes His Name," "Don't Forget the Bee," "The Story of Jonah," "Brother Croak and the Bull Frogs," and the dramatic "King of Scotland."

## Lamesa Invites O'Donnell to Lecture

Lamesa has invited O'Donnell to fellowship with her business men one night during the last week in October when Ben B. Yardman of Chicago, nationally known business and community lecturer will conduct a greater business and community institute there. Word is coming to the Lamesa Chamber of Commerce every day now that the neighboring towns here in Lamesa at least one night with as many of their business and professional men as possible.

Yardman will speak in the evenings on such subjects as "Building the City Four-Square," "The Master Salesman," "Romance in Merchandise," "The Art of Making a Sale," "Handling Various Types of Customers," "Increasing Business Through the Use of Suggestion." The first subject mentioned will be discussed at the Lamesa High School Auditorium at 8:00 o'clock Sunday afternoon of the 28th, while the other will take places each evening as they are named beginning with Monday evening the 28th of this month.

The Chamber of Commerce of O'Donnell has been able to take the lead in securing a large attendance from O'Donnell. The evening O'Donnell comes will be advertised as "O'Donnell's Evening" and all who will be so recognized. It is urged that all who can get in touch with the secretary of the Chamber of Commerce make ready for O'Donnell night.

INDIVIDUALISM VS. CO-OPERATION

Time was when every business man in this nation regarded his competitor with suspicion. He regarded each one as an enemy...

But as time went on he began to learn of the error of his ways. He began to realize that it might be worth while to get acquainted with his competitor in order to learn something from the experience of others in the same business.

This change now enables him to pay better wages which in turn enlarges the market for his own products and the products of others.

This new spirit—the spirit of co-operation—has its effect upon communities like O'Donnell as well as upon business institutions.

INSTRUCTION IN TEAMWORK

Fall. Crisp, invigorating weather. Jack Frost has just painted our hillsides with his scarlet brush.

And this reminds us of a little talk we like to give at the time of the year. Every time we see the members of the local high school football squad trot out on the field for a work out, we feel like shouting: "Go to it boys. It's an important part of your education."

The work of coach Dennison and his band of young huskies should be regarded, we feel, as a course in team work.

The boy who goes through a hard season's work with the team or squad learns that the work of the team is more important than the spectacular playing of individual stars.

He also learns the value of loyalty—learns it in a sort of subconscious way, for it takes loyalty to the last bit of energy for the honor of O'Donnell High.

There are other important lessons that Coach Dennison is indelibly impressing upon the minds of his wards. He is teaching them to become good sportsmen, never to take unfair advantage of an opponent, to play the game according to the rules—in short to become good American citizens.

KNOW TEXAS

Manufacture of carbon black from natural gas is a growing industry in Texas and now employs about 1,500 people.

Texas has moved into second place in production of natural gas, registering a 45 per cent increase last year.

The Southwestern Bell Telephone Company will have 1,270,000 telephones by 1950. It now has about 625,000.

Of the 14,000,000 acres of the original pine forest in Texas only about 1,100,000 acres remain in virgin timber.

The farm population of Texas is now 2,199,173.

Gray mold, or neck rot, of onions, one of the most destructive storage rot attacks this vegetable, should be controlled by thoroughly and rapidly curing the onions at harvesting time to prevent infection.

The casual fungus can grow and cause decay at cold-storage temperature, and it is too late to effect control at the time of refrigeration.

BUSINESS METHODS MAKE FARM PAY

Farm as Well as Factory Must Cut Production Costs

The difference between profit and loss to the farmers is often a matter of production cost, according to agricultural authorities.

Modern competition, states a recent bulletin of the United States Department of Agriculture, necessitates modern methods of business, and the farm problems are just as much a matter for production cost studies as are the problems of modern factory management.

The feeding of live-stock for market, agricultural experts agree, has many of the aspects which face the manufacturer of any community.

The farmer's live stock represents his outlay or productive machinery. His raw materials are his grains and his feeds. His finished product is his milk, his beef, or his pork.

Lined seed and other concentrates, Mr. Vrooman, whose name is signed to the bulletin, points out, when fed with roughage such as straw or stover, gives twice the food value as the same amount of corn, and while lined seed and roughage cannot actually be substituted for corn as a supplement, it can, to an extent, be used to cut down his feed bills.

In a series of experiments carried out by the agricultural experiment station at Wooster, Ohio, C. G. Williams, director, states that he increased the gain in hogs from 75 pounds per year to 92 pounds daily at the same time cut the cost per 100 pounds of gain from \$6.45 to \$6.22 by supplementing his ration of corn with salt and limestone with lined seed.

The pigs that were fed lined seed ate only 406.4 pounds of feed per 100 pounds of gain, whereas hogs on the ration from which 100 pounds of feed was eliminated ate 421.1 pounds of feed per 100 pounds of gain.

Saving in production costs just such as these, agricultural experts explain, are the factors which enable modern manufacturers to earn dividends. The farmer, they say, must do this in this modern day of lowered marginal profits.

It is, of course, an ancient belief and warning, points out the Washington Post, New York has for generations had the problem of curing far these outlanders who failed to find a living much less riches, within its gates. The problem has become more acute, however, with the increase of motion pictures and the circulation of fiction dealing with the opportunities in the big city.

600 TEXAS BOY STUDENTS IN VOCATIONAL AGRICULTURE

Approximately 600 Texas boys, students in vocational agriculture in various public schools over the state, have already enrolled in about twenty-five local chapters of the Future Farmers of Texas organization, reports from the school of vocational teaching of the A. & M. College of Texas shows.

The idea of this comparatively new organization, for students taking vocational agricultural courses in the public schools, was launched in Virginia in 1926 and was adopted for Texas during the past summer. The Texas organization is being sponsored by the vocational division of the State Department of Education and the school of vocational teaching of A. & M. Purpose of the organization includes the promotion of vocational agriculture in the high schools of the state.

The first local chapter was organized at Winters under the supervision of R. E. Homan, teacher, the early part of being issued monthly chapter was organized at the Cisco high school. Monthly news letter under the title of Future Farmer News is being issued monthly in the interest of the organization with E. R. Alexander, professor of agricultural education of A. & M., as editor.

It is well to wait at least two weeks after turning under a cover crop before planting the next crop, according to the U. S. Department of Agriculture. The rate of decomposition determines the time that should elapse between the turning under of a cover crop and the seeding of the next crop.

As an aid in insuring even grazing by cattle raised on the range, the salting place should be changed from heavily grazed areas to areas that have been slightly grazed. Salting away from the water supply should be practiced to prevent overgrazing near watering places.

The first few weeks in the feed lot is a very critical time for the feeder steer. It is essential to start him on very limited quantities of concentrates and increase them gradually during the first 30 days. Roughages of good quality may be fed in any quantity without serious effect, however.

PEANUTS ARE FOUND TO BE A PROFITABLE CROP

Peanuts had not been an important commercial crop in Texas until the war-time demand for vegetable oils brought the crop into prominence, and in 1918 a peak of 7,117,000 bushels was reported, which declined in 1926 to 1,614,833 bushels. The principal demand at present is for shelled peanuts, which are used in the manufacture of butter, confections, and for roasting.

Approved methods of planting, cultivating, harvesting, and curing peanuts are discussed in Bulletin No. 881 of the Texas Agricultural Experiment Station. Experiments at Beville and Lubbock indicate that close planting from three to six inches in the row will produce larger yields of both forage and nuts than when a greater distance is given between plants in the row.

The culture of peanuts is adapted to the sandy soils of the State, and fits well into a crop rotation. Peanuts produce forage comparable with the clovers as a feed for dairy cattle. Peanuts also make good feed for hogs but when the nuts are not properly fed, either whole or as meal, they frequently produce a condition known as soft pork which is penalized by the packing trade.

There is practically no difference in the yields of peanuts, when planted in the hull, or where the hulls are broken or cracked. Peanuts produce higher yields of forage when planted in thirty-six-inch rows, but higher yields of nuts are obtained when planted in eighteen-inch rows. The Macspan peanut, a selection by the Texas Agricultural Experiment Station from the Little Spanish variety, matures earlier, is more productive and uniform, and the kernels probably contain a higher percentage of oil than the common Spanish peanut.

For a copy of this Bulletin address A. & M. College Experiment Station, College Station, Texas.

Hens should have water in the morning as soon as they get off the roost to eat scratch feed and mash. In cold weather some arrangement should be made to keep the water from freezing. On the Government poultry farm at Beltsville, Md., a home-made electric water heater consisting of a wire coil in a metal tube does the trick. An electric light with a carbon bulb placed in a pail of water may also be used. The bulb should be tightly covered with a piece of black cloth or painted black so that no light will be thrown into the pail.

SELECTING THE LAYERS

To develop an egg-laying strain requires careful selection of pullets from among the best layers in the flock. As an aid in choosing the color of the beaks and shanks, the U. S. Department of Agriculture says that in breeds whose beaks and shanks are normally yellow, those pullets which lay with the greatest intensity after they begin, or at the highest rate, will usually bleach out the normal color of the beaks and shanks more quickly than pullets which lay only intermittently. Therefore, if the farmer observes this flock rather closely during the fall months he can readily determine those birds that are laying at the heaviest rate and they can be marked for inclusion in next year's breeding flock.

Well-cured seed corn will yield a much better crop than seed originally as good but injured through lack of care. Good seed is often ruined because it is thought to be dry enough when gathered and insufficient care is taken to cure it.

B. Y. P. U. PROGRAM OCTOBER

- Subject—"Baptism, Why?" Supervised by—Deanna Alta Lee Payne. 1. Why is Baptism? 2. Who should be baptized? Mrs. Guye. 3. Why not sprinkle? Vaughn. 4. Let us Forget—ville. 5. Conclusion—Miss B. Y. P. U.—6:30 Communion.

B. Y. P. U. MEET AT

The B. Y. P. U. will meet at 6:30 so as to get ready for church services. We had a Bible School last Sunday. "Some Home Missions" was the subject. Mrs. Leta Rogers, began the session, which was followed by others. Be there next Sunday, you.

FIXED TO STAY

When we make a repair on your car, we fix it to last. That is one of the iron clad rules by which the Service Department is guided. Let us prove the value of our policy of ours to you. We can show you how it will save you many dollars in a year.

Our Service Department

Our Service Department is presided over by Johnny Neenan who has had fifteen years experience, the past five of which have been in a Chevrolet Garage, which qualifies him among the best. We are installing a new electrical cylinder grinder which will do all our work quickly and satisfactorily.

All Work Guaranteed

Wilder Chevrolet Co.

To the 5000 who daily become owners of the new Ford car

The service obligation of the Ford Motor Company and its dealer organization is now growing at the rate of 5000 cars a day. It is to these new car owners that this message is addressed.

The new Ford is a remarkably fine car for one that costs so little. It is simple in design, constructed of the finest materials, and built to unusually close measurements.

These are the reasons it performs so wonderfully. These are also the reasons its service requirements are so few and the up-keep cost so low.

When you receive your new car, the dealer will explain the simple little things that should be attended to at regular intervals to insure the best performance. He will also tell you something of his own facilities for doing this work promptly and at small cost.

With the purchase of your car, you are entitled to Free Inspection Service by your dealer at 500, 1000 and 1500 miles. This service is due you and we urge you to take full advantage of it. Proper care during this breaking-in period means a great deal to the life of your car.

Wherever you live, you will find the Ford dealer very helpful in keeping your car in good running order for many thousands of miles at a minimum of trouble and expense.

He operates under factory supervision and has been trained and equipped to do this work promptly, thoroughly and economically.

### WHAT'S DOING IN WEST TEXAS

A 10,000 egg capacity electric incubator will be in operation in Tarkenton by January, and the owners, Prof. Taylor, White and Vernier Smith, will be in the market for eggs from certified flocks, after that date.

The new Booker bakery recently built has equipment installed and is being baked for a week. L. N. Traylor is manager of the new bakery and states that he is able to feed the whole town.

An effort is being made in Nolan County to get a County Health Unit with financial assistance from the Rockefeller Institute. The county would finance half the project which would insure a full time doctor and four helpers.

A survey of the whole of Dawson county to account for every cow in the county is being sponsored by the Lamesa Chamber of Commerce to interest a milk plant there. The milk plant pays 18 cents more per butterfat pound and deliveries are made after the milk.

T. L. Kimmel, proprietor of the Electric Hatcheries at Hockley, has doubled the capacity of his incubators this year and will handle 15,000 more eggs. This is one instance of the increasing interest in poultry in the town.

Randall County Scored at the State Fair at Dallas, winning second place, in the Agriculture exhibit. The exhibit was sent to the fair by the Canyon Chamber of Commerce and Randall County Commissioners, with County Agent W. H. Upchurch in charge.

Between 15,000 and 20,000 rabbits have been poisoned in Midland this year with the county furnishing the poison. In counties where the rabbits were not poisoned damage to crops is estimated as high as five per cent.

Paving of 16 down-town blocks is going on at Pecos. Six blocks have been graded and prepared for the paving with gutters and curbs constructed. Laying of the bitulithic pavement has begun. Each block will be opened as it is finished.

Eight boys winning first place in the South Plains Fair were given a trip to the State Fair at Dallas by the Lubbock Chamber of Commerce. The boys were from eight different communities in the section.

G. W. Bittern, who lives three miles northeast of Littlefield received three car loads of hogs from Benjamin for fattening purposes. On account of the large grain crop it is cheaper to move the hogs to the stock pen than to ship the grain to the stock.

The business men of Moran are

### Printed and Plain Jersey Smartly Combine

No fabric, knitted or otherwise, ignores the vogue for gay print this season, not even jersey. Indeed, novelty printed jersey is the jersey of distinction for fall. Plain and printed jersey also smartly combine. Many two-piece models are styled after the manner of the model shown.

helping defray the expense of the band. The members themselves pay \$2.00 per month. The band is under direction of G. W. Collum, of Cisco. Concerts are given regularly and are well attended.

White and Ledbetter of Melvin and Eden loaded out a full train load, twenty-nine cars of two years old steers from their ranches here recently. The cattle were shipped to the White and Ledbetter ranch in Northern Oklahoma.

Over half the story of a good feeder is told in his head and face. A well-bred, choice feeder has a broad nose, full nostrils, and square jaw. This type of animal is most likely to consume, high-priced concentrates at a profit and maintain his quality and beef-type conformation while fattening.

One of the easiest and least expensive practices for improving cotton yields is the growing of legumes as catch crops, winter cover crops, or as part of the regular cropping system. Cowpeas and velvet beans can be used, or other legumes like soy beans, peanuts, vetches, bur clover, Lespedeza, and red, crimson, alkali, and sweet clovers, and Canada field peas.

### OFFICIALS SAY THAT COTTON CROP JUST RIGHT THIS YEAR

Dallas, Texas, October 19.—Unquestionable deterioration in the cotton crop during the past five weeks has taken place, according to reports compiled by the Department of Public Relations of the Southland Life Insurance Company.

In this quarter of all cotton, including times at which no two people agreed as to the outlook, general opinion has centered in the belief that cotton crop will neither be too small to assure prosperity to the state as a whole, nor too large to make possible the securing of a fair price for the product.

Reports received in the last five weeks indicate, without reservation, that rapid deterioration is going on and very probably will continue. This shrinkage of the crop is, of course, due to various reasons—root rot, weevils, hot and dry weather, boll worms, and even slight damage, by frost. As far as the general outlook is concerned, two factors must be taken into consideration. One of these is the noticeable improvement in the quality of cotton produced this year, especially in north and north-east Texas, and the other the fact that acreage this year appears to be producing an unusually large amount of cotton despite deterioration.

Other aspects of Texas' chance for prosperity this fall are extremely favorable for next season. The grain crops have been unusually large and profitable, the cattle industry in the extreme western part of Texas is more nearly on its feet than it has been since the war, and sections which have suffered most from near crop failures dur-

ing the past two years appear to have been the most fortunate this season.

Noticeable spots on the crop map for this month are Dallas, Potter, Randall and Deaf Smith counties in the Panhandle where the biggest grain crop in history is reported; in the Rio Grande Valley which is producing a one hundred per cent vegetable crop and the Gulf counties around Corpus Christi, where weather conditions appear to be extremely favorable for next season.

Any business map of Texas at the present time would be a spotted affair, ranging from almost hopeless

outlooks to the brightest of prospects. In the main, however, farmers, city folk and business itself believe conditions better than average.

It has been found that the soil, as well as the plant, has an "appetite" or affinity for fertilizers and is not merely a receptacle to hold the fertilizer until it is needed for the crop, although the exact reactions that take place between soils and fertilizers are not fully known. Further knowledge along this line will undoubtedly do much toward improving fertilizer practices, says the U. S. Department of Agriculture.

### WHY THE FIRE WENT OUT

By DOUGLAS MALLOCH

MOTHER asked Mary to fix the fire. Mary waited and asked her sister, William told Bobbie some wood to bring. Bobbie told sister to get it quick. Sister told Fido to fetch a stick. Fido barked and he was about—

And that's how it was that the fire went out.

That's how it is there are many things to do. Still unfinished when day is through. That's how it is that the set of sun finds so much of our work undone. Whether the task is great or small, it never really gets done at all. It's shovelled and shifted and passed about—

And that's how it is that the fires go out.

(© 1928, Douglas Malloch.)

### SOMETHING TO THINK ABOUT

By F. A. WALKER

#### QUALITY OF CLEARNESS

WE READ a great deal in the newspapers about Lloyd George and as we read, especially if we are given to reflection, we marvel at the clarity of his thought, always so lucidly expressed that the average schoolboy can follow and understand it.

All the arguments of this wonderful man of Great Britain are plain, convincing, forceful and simple. It is luminated from beginning to end with clear thinking.

Even to those who do not at all times accord with his beliefs, his words of wisdom find lodgment in their hearts and give them much to think about long after his utterances have been published.

If you will carefully consider clearness of thought, you will discover that it has much to do with success in all walks of life, and particularly where thoughts are expressed in little words whose meanings are as open as daylight.

To make yourself understood, in any worthy work or cause, is to make yourself useful.

And this usefulness, which may be confined to yourself alone, will become apparent to all who will aid for your ability, glad to give you a place from which you may continue to rise to larger spheres and greater heights.

It is the clearness of the diamond that gives its value.

It is the clearness of truth that imparts to it its potential power.

If you would seek value and power, make yourself clear in thought and word and act.

However humble your place may be, if you make yourself understood show each day that you are sincere in your effort to advance, that the interests of those who give you employment are your interests, you will encounter no serious difficulties.

To become a leader among men you must, like Lloyd George and others, be frank with yourself, for frankness is really the basis of true greatness, which in turn is clearness unblurred.

The this and there never will be any doubt about your success, or the loyalty of your friends, when you act for some selfish or envious reason may be questioned by your enemies.

### SUPERSTITIOUS SUE

#### SHE HAS HEARD THAT—

If a Jane has a dimple, it should be cherished as a heaven sent gift, for it is said to be the finger print of an angel who has turned her face up to kiss while she was sleeping.

(© by McClure Newspaper Syndicate.)

#### To Mend a Fault

To retract or mend a fault at the admonition of a friend in no way burts your liberty, for it is still your own activity which, by means of your own impulse and judgment and by your own mind, makes you see your mistake.—Marcus Aurelius.

### PERSONAL MENTION

W. H. Veasey made a business trip Lovelland and Littlefield Monday.

Mr. Homer Deakins of Big Springs spent Sunday in O'Donnell visiting friends.

Mesdames B. M. Haymes and Paul Gooch spent Saturday in Lubbock, shopping.

Mr. and Mrs. J. W. Campbell and Mr. W. E. Campbell were in Tahoka Sunday evening on business.

Mr. Hugh McLauren will return today or Saturday with a truck load and a car load of cotton pickers.

Mr. Phipps of Wells community, returned from Austin this week with a crowd of cotton pickers.

Mrs. Belle Knight has been quite ill, but is able to sit up for a few minutes at a time now.

J. J. Scott and mother of Fort Worth, were visiting D. M. Estes and family. Mrs. Scott is moving to Big Springs.

See us before you sell your Kaffir, Maize and other small grains. We pay the highest market prices at all times. Henderson & Koeninger, phone 42.

Miss Frances Chandler spent several days in Colorado this week visiting Mrs. W. M. Patton. She also went to Sweetwater and Snyder on the trip.

See us before you sell your Kaffir, Maize and other small grains. We pay the highest market prices at all times. Henderson & Koeninger, phone 42.

Public wagon scales on Highway No. 9, on Southeast corner of Harrison-Williams Gin lot for convenience of the general public. Headquarters for all maize buyers. State inspected Mell Pearce, Public Weigher.

Mr. and Mrs. H. L. Hohn and two sons were in Sweetwater Sunday, where they attended the funeral of an old friend of the family, T. H. Hampton, who died there on last Saturday.

Public wagon scales on Highway No. 9, on Southeast corner of Harrison-Williams Gin lot for convenience of the general public. Head-

quarters for all maize buyers. State inspected Mell Pearce, Public Weigher.

Mrs. Harvey Everett, news reporter of the Tribune, left Saturday for ten days visit with her two children who are in school at O'Donnell. Mrs. Everett formerly resided in O'Donnell prior to taking up her residence here. The newsgathering proclivities of our reporter have been greatly missed and account for the length of our personal column the past two issues.—Wink Tribune. (Uh huh, they're finding out down there how we folks left behind feel.)

#### A STORY OF PROGRESS

Four thousand six hundred American cities and towns are now served by gas companies, and customers number 11,400,000, an increase of 850,000 in a year.

It is in the memory of many living persons when gas was not a practical agency.

Today it has more than 21,000 industrial uses and is used for cooking in a great percentage of homes. The story of gas shows the gigantic progress that is made in America by anything worth while.

#### SELECTING THE LAYERS

To develop an egg-laying strain requires careful selection of pullets from among the best layers in the flock. As an aid in choosing the heaviest layers this fall, notice the color of the beaks and shanks. The U. S. Department of Agriculture says that in breeds whose beaks and shanks are normally yellow, those pullets which lay with the greatest intensity after they begin, or at the highest rate, will usually bleach out the normal color of the beaks and shanks more quickly than pullets which lay only intermittently. Therefore, if the farmer observes his flock rather closely during the fall months he can readily determine those birds that are laying at the heaviest rate and they can be marked for inclusion in next year's breeding flock.

# An Investment with an EXTRA DIVIDEND

THERE'S a big difference between an investment and a speculation. You can speculate in any old gasoline and hope it will deliver a satisfactory number of miles per gallon. You can invest in Summer Conoco and be sure of an extra dividend—a bonus of extra miles.

Your purchases of gasoline during the touring season represent a substantial investment. Make sure that the returns from that investment are the highest you can get.

Fill at the Conoco pump.

#### CONTINENTAL OIL COMPANY

The SANDMAN STORY

ABOUT BOASTING

"NO LANDLORD," said Mother Kangaroo, "can complain of my children."

"If they get a bit wild or if they're apt to get into trouble I can put them in my pouch and carry them so they don't bother anyone."

"I'm very superior," Mother Kangaroo ended.

"Ah," said the Cat who was wandering about the zoo and who belonged to a lady who lived very near the zoo, "I rode in a taxicab the other night."

"Yes, when all the people were coming home in their automobiles and in taxicabs from the theaters one evening last week, I was riding with my mistress in a taxi. I looked out of the side window and when all the cars were stopped by the big policeman, so other cars could move in the other direction, all the people saw me from the windows of their cars."

"They looked at me and then turned and nudged each other so that everyone looked at me."

"My mistress was much amused and she held me up a little higher so I could see and be well seen."

"I can tell you I was a proud cat. I wouldn't be at all surprised if some of those people wondered if I had been to a theater."

"I hadn't been to one. My mistress had been out of town for several days and I had been with her and we were on our way home."

"Oh, it was a splendid experience for a cat to have. I certainly have the right to boast."

"You have the right to boast," said the Kangaroo, "but there is more excuse for your boasting. I have even greater reasons for boasting when you think that I can look after my children in such a fine way."

"Father of your yard near by," has as much reason or right for boasting as I have."

"Now, I can yawn quite openly when I'm bored or sleepy or tired and you will admit that my yawn is quite a yawn."

"It's not a child's portion, nor a misses or junior size. It is a real, real hippo's yawn."

"If people are bored or tired or sleepy they have to pretend that they are quite wide awake."

"They have to cover up their yawns and appear not to be yawning. And if they're caught yawning they apologize and say:

"Dear me, I don't know what makes me yawn. I'm sure it's not the company."

"Now, I don't have to say any such thing. I don't have to apologize. They can think it's the company or not, as they see fit. I don't care."

"I can do as I choose."

"There's more reason and excuse for my boasting than for either of you," said the Kangaroo.

"Just what I say about you and Hippo," said the Cat.

"Just what I say about you and Cat," said Hippo to the Kangaroo. And so they boasted.

Again and again they told their stories. The Cat told of his ride in the taxi through the city streets at night when the people were coming from theaters and when they looked at him as though he, too, came from one of the theaters and had seen one of the plays.

The Kangaroo boasted and Old Hippo boasted.

But all of a sudden they stopped boasting.

For word came that the Elephant's mate was very ill and perhaps would not get well.

And the Elephant was trumpeting his grief—oh, such sad trumpet walls and sounds—and he was pacing up and down, refusing any food, hoping with all his great affection that his mate would get well.

And the three who had been boasting felt ashamed that they were so fond of themselves and so boastful when the Elephant cared not for himself, but for his mate.

They stopped boasting then and were very quiet, wishing a great wish that soon the Elephant's mate would be well!

The Cat Told of His Ride in the Taxi.

LOWE REALIZES LIFE AMBITION AS SERGT. QUIRT

Featured Player in "What Price Glory" Gave Up Law to Become Actor

As the rough, tough Sergeant Quirt in "What Price Glory," which comes to the Lynn Theatre October 29 and 30 Edmund Lowe realizes an ambition which he has harbored since he first gave up trying to be a lawyer to become an actor—to get away from "handsome lover" parts and play a role which gives full rein to his histrionic talents and permits his looks to be forgotten.

Lowe is a native of California and a graduate of Santa Clara University in San Jose. As a college youth his goal was the bar, but before he hung out a shingle as a lawyer he decided he was better qualified for the stage. His first theatrical engagement was in a stock company in the Alcazar Theatre in San Francisco. After a short apprenticeship he was given leading parts and then came east. He appeared on Broadway in a number of legitimate attractions produced by Belasco, and then, returning to California, went into moving pictures.

The list of photographs in which he has appeared as leading man is a very long one. Most notable among them are "The Fool," "East Lynne," "The Silent Command," "In the Palace of the King" and "Siberia." In the last named he played opposite his talented wife, Lillian Tashman. His impersonation of such a character as Sergeant Quirt, so different from anything else that he has done, is considered a great tribute to his ability.

### ZEP SETS NEW AIR RECORDS

#### Endurance and Distance Marks Are Broken on Flight

Washington, October 15.—The Graf Zeppelin has established a new endurance distance record in its epoch-making flight to the United States, naval dirigible experts said Monday night.

At 5:35 p. m. the great airship had been in the air more than 111 1/2 hours and had traveled an estimated distance of 5,500 miles, breaking all previous records for sustained long-distance flight by a craft of this type.

The Los Angeles is credited with a nonstop flight of 5,081 miles in eighty-one hours from Germany to the United States in 1924.

The longest previous distance flight, according to available records, was that of the Zeppelin L-Z in 1917, which flew 4,230 miles from Bulgaria to Central Africa. On that flight the L-Z was in the air sixty-five hours.

The endurance record has been credited to the French dirigible D-5 made, which remained aloft 198 hours in 1925.

Records to have recognized the record of the Graf Zeppelin will probably be taken by aeronautics officials, in the opinion of aeronautics experts.

The distance of 5,500 miles for the Graf Zeppelin's flight was accompanied by aerial hydrographic surveys, which have been giving the ship's position at intervals during the voyage on their charts. While in flight the dirigible also carried out hydrographic surveys, which have been giving the ship's position at intervals during the voyage on their charts.

The hydrographic surveys are being carried out by the ship's hydrographic party, which is composed of several officers and crew members.

The hydrographic surveys are being carried out by the ship's hydrographic party, which is composed of several officers and crew members.

The hydrographic surveys are being carried out by the ship's hydrographic party, which is composed of several officers and crew members.

### PROPERTY VALUATIONS OF COUNTY INCREASE

The commissioners court has been in session this week attending to routine matters. Having completed their work as a board of equalization they announce that the property values of the county this year amount to \$6,205,104.00, which is an increase of approximately \$149,000.00 over last year. This increase is not due to a raise in valuations but is due to additional properties being placed on the tax rolls.—Lynn County News.

### KNOW TEXAS

Preliminary estimates for 1928 place the values of Texas crops for the year at \$800,000,000 and of livestock at \$400,000,000, making a total of \$1,200,000,000.

Texas produces between 700,000 and 800,000 barrels of oil a day.

A survey indicates there are sufficient growing citrus trees in the lower Rio Grande valley to produce a commercial crop of more than 10,000 car loads of oranges and grape fruit within a period of five years.

Texas has the first unattended dial system telephone exchange in the Southwest. It is located at Pasadena, one and one-half miles east of the Houston city limits. The plant works automatically without the attention of any attendant. A second such plant is to be installed at Lubbock near Dallas.

# U. S. BATTERY IS 152 YEARS OLD

## Army Unit, Organized During Revolution, in Every War Since.

New York.—It has been 152 years since the Battle of Fort Mifflin. The day is still celebrated by a unit of the United States Army which received its baptism of fire in the Long Island engagement. On a Monday not long ago Battery D of the Fifth Field Artillery, at Fort Bagg, N. C., counted its 240-millimeter howitzers with cosmo-line and took the day off.

At least for a while, what is now Battery D was the whole regular army. It was a little larger, however, those days, though it was perhaps as large in proportion to the population of the United States as is the army of today. Alexander Hamilton commanded it in action. Its first fight was on August 27, 1776.

Originally known as the New York Company of Artillery, the battery was organized on January 6, 1776. Created by the Provincial congress, it soon became a part of the "national" or Continental army, and was attached to General Scott's brigade, with which it served continuously during the entire struggle for independence.

After the war it was the only artillery unit of the regular army and was used on the frontier against the Indians. It marched into the old Northwest and penetrated the wilderness as far as eastern Ohio and Indiana.

At the Battle of New Orleans. When the new nation began to extend its frontiers to the south the battery was in the vanguard again. It fought in Tennessee, Georgia and Alabama, working its way to the southwest until, in 1802, it reached Fort Adams, in the Mississippi territory. By 1808 it had moved south as far as New Orleans. In the famous post-war victory of January 8, 1815, when Andrew Jackson captured New Orleans from the British after the official cessation of hostilities, Battery D formed a part of Old Hickory's fighting force.

Captain Wolfstonscraft's mortars were emplaced at Fort St. Charles, one of the defenses of New Orleans. The British fleet, supporting Pakenham had bombarded the fort for eight days, but under the fire of the mortars was forced to withdraw. The fort commander was Major Overton, and of him and his assistants Gen. Andrew Jackson, in his official report, had this to say:

"The conduct of this officer and those who acted under his merits, I think, great praise. He maintained their own colors to the standards and placed those of the enemy under them, determined never to surrender the fort."

The battery did not return to New York until 1827, having done frontier duty in the meantime throughout the Mississippi valley. It remained in the East for five years, being stationed successively at West Point, Governors Island and Fort Hamilton, at the Narrows in Brooklyn.

The Black Hawk war of 1832 found the battery on the frontier again as a part of General Scott's force. While mopping up the Great Lakes the mortality of its men fell victims to cholera, and it was a depleted unit that returned to Fort Hamilton after the campaign.

From 1830 to 1838 the battery was engaged in the war against the Creeks, operating from the Carolinas to Louisiana and up the Mississippi as far as the present state of Arkansas and west to Oklahoma. When the battery returned to Governors Island it found itself minus its artillery, having been converted into an infantry company, and it was as doughboys that its soldiers spent most of the years in between this period and the Civil war.

It was as doughboys that the predecessors of the present battery fought in the Mexican war. The command was a part of Twig's famous Second division of regulars. It was present at the siege and capture of Vera Cruz, was in the march to Mexico City, took part in many minor engagements, and members from the unit formed part of Casey's party which stormed the heights of Chapultepec.

Bravery at Buena Vista. At Buena Vista (where Zachary Taylor with 5,400 men faced Santa Ana with 20,000) the battery, then known as Light Company B of the Fourth artillery, greatly distinguished itself. As General Taylor described it later in a reply to Gen. Winfield Scott's request that the battery be sent to him ("I cannot possibly dispense with the services of this battery"), the outfit was pretty much in demand. While most of the battery was held in the center of the line, one platoon under Lieut. J. P. J. (John Patrick Joseph?) O'Brien was sent, with one 12-pounder, one 6-pounder and one 4-pounder, to guard the left flank. Well, did they guard it!

Himself wounded, one gun disabled many horses and all but a few scattered cannoners killed or wounded O'Brien stood his ground after two regiments of opposing infantry had been forced back and until the Mexicans advanced were in his position. Then, with the artilleryman's bitter and traditional reluctance, he abandoned the disabled gun and drew off the other way.

So far, so good, but John Patrick Joseph (if that was his name) did not stop there. He went to Captain

Washington, who was doing a day's work himself, borrowed two 6-pounders, more cannoners and returned to the scene of his exploits, where he stood off the attack on the left flank until William Tecumseh Sherman and Braxton Bragg came to his support. Too late, however, to save the 6-pounders. Buena Vista was won when Zach Taylor's left flank was saved.

Guns Recaptured. Winfield Scott succeeded in his purpose. The battery was assigned to him. Four hundred paces from the Mexican line at Contreras, it received heavy fire from two 6-pounders. The colors of the Fourth artillery, torn by grapeshot, fell from the hands of the dying color sergeant. They were snatched in midair by Lieutenant Benjamin D. Buttery, who cried, as he recognized the weapons, "Washington's guns!" With a wild yell the regiment swarmed over the position, wresting the 6-pounders from the Mexicans.

General Scott, a little later arriving at the scene of the jubilation, joined in the cheers and extended congratulations on the recapture of the guns, "lost on the field of Buena Vista without dishonor and recovered with glory."

The general also promised that these guns, with an appropriate inscription to his honor, should be given to the regiment in perpetual token of its achievement.

At the storming of Chapultepec, which followed, the battery, under Capt. S. H. Drum, with Fitz John Porter as second in command, earned again the admiration of the Mexican official reports.

In the Civil war the organization became a light battery of artillery again. It was engaged in the battles of Manassas, Antietam, Chancellorsville and Gettysburg. From 1865 to the outbreak of the war with Spain the battery became a frontier force again. In November, 1872, the men were among the first of the American Troops to serve in Alaska, Alaska.

The battery fought in Cuba in 1898 and then moved to the Philippine Islands to take part in the war against the followers of Aguinaldo. The Mexican border troubles of 14 and 15 years ago found the battery on duty in Texas, and when the World War drew in the United States Battery D of the Fifth "went over" with the First division and took part in all of its famous battles on the Western front.

Gets Back His Hat and Faith in Human Nature. Louisville.—Walter Fisher had his faith in human nature restored to the state of a check-book manager at the state fair grounds.

Mrs. H. H. Foskett saw Mr. Fisher standing near the checkroom with a large box of candy under his arm. "Don't you want to check that box with us?" asked Mrs. Foskett.

"No," Mr. Fisher replied. "I checked a hat here last year and lost it."

Mrs. Foskett asked for and received a description of the hat, and produced it from the checkroom. Fisher was so flustered he presented the box of candy to Mrs. Foskett and wore the hat off having gone to the fair bareheaded.

### AN OBITUARY

Beatrice, Andrews youngest daughter of Will and Adama Andrews, was born in McCloud, Oklahoma, in the year of 1913, November the 2nd and departed this October 13, 1928, aged 15 years, eleven months and eleven days. She was of kind and loving disposition. To know her was to love her. She had a kind word and smile for everybody. She moved with her parents from Oklahoma in the year 1923 to Texas near Tahoka in the T-Bar community and while there she was assistant Sunday School teacher in the T-Bar Sunday School. After living in the T-Bar community two years she moved with her parents to the New Moore community which was her home until her death. She was converted 2 years ago at New Moore in a protracted meeting. She was attending High School in O'Donnell at the time of her death. She leaves a father and mother, one sister and three brothers to mourn her loss, but their loss is her gain. She has left a host of friends wherever she has lived. The writer has known Beatrice for a little over five years and will say that I have lost a true friend. She was confined to her bed for 15 days with that terrible disease known as typhoid fever. In her afflictions she was never known to murmur. She passed away peacefully, almost without a struggle. Funeral services were conducted by Rev. W. K. Horn, pastor of the Baptist Church of O'Donnell. There was a large concourse of people present to pay their last respects to Beatrice. Her remains were laid to rest in the O'Donnell Cemetery on Sunday evening, October 14, 1928.

Will say to the bereaved father, mother, sister, brothers and relatives your loss is her gain. Weep not for Beatrice for she is done with troubles, trials and tribulations of this world. Will say in behalf of the T-Bar, O'Donnell and New Moore communities, we extend to the bereaved family our heartfelt sympathy. When the last summons comes to our loved ones we ought to be able to say as did David of old, "The Lord giveth and the Lord Taketh away, blessed be the name of the Lord."

Written by her friend, J. W. Nicholas, O'Donnell, Texas.

### CHURCH NOTES

The Presbyterian church enjoyed the new pastor's first day very much. Rev. Arnfield is the possessor of a pleasing personality and both sermons Sunday bore eloquent testimony to his understanding and sincerity. The other churches held a cordial welcome to him. He will preach here on the second and fourth Sundays in the month.

Rev. J. T. Weems preached two splendid sermons Sunday at the Methodist Church taking as his subject for both the "Church the Hope of the World." He held the attention of a large congregation at the morning service, quite a number of visiting Epworth Leaguers helping swell the ranks. Though numbers were less in the evening at a crowded day, the message was interesting vital.

Elder Wallace filled the pulpit at the Church of Christ Sunday. He is a two-year student at Abilene Christian College and is already showing promise of ability in the Ministerial field.

Rev. W. K. Horn preached two splendid sermons Sunday to large congregations.

Sunday School were unusually well attended at all churches. The International lessons have dealt with the life and ministry of Paul for several weeks and will be their subject for some time yet.

The W. M. U. met Monday for an all-day meeting. Five quilts were finished and prepared for mailing to Buckner's Orphan Home at Dallas, and after a delicious lunch served at the church an unusually interesting lesson was discussed.

The W. M. S. met at the Methodist parsonage Monday afternoon, when a short business session was held after which "Memories of Scarritt" one of the Jubilee Books, was discussed. Next Monday, beginning promptly at 9:00 o'clock, Mrs. J. T. Weems will lead in the discussion of "The Way of Jesus." All members are urged to be present for the last and best of the study course.

## 3 BIG JOBS for an active Organization

Providing Electric Meeting Constant Power

New electrical equipment is added in homes, offices, stores and factories each day. New homes and factories are built, new stores and offices are opened, all demanding more electric service. It is a big job for electric power companies to keep up with this increasing need.

Changes in the methods of making, and distributing electric power take place over night. Good equipment of yesterday will be obsolete tomorrow--something newer and better takes its place. These changes call for continual study on the part of power and light engineers.

Planning for Greater Needs

Power plants built to serve the needs of today will not be equal to tomorrow's demands. Construction of today must be planned so that instant and unlimited increases in electric power can be made when needed. Cities must have this type of electric service or they can not grow greatly.

The Texas Electric Service Company does these three big jobs in a manner unexcelled in any section of the country. This Company's service can not be equalled by an isolated power plant.

The Silent Partner of Progress

Texas Electric Service Company
