New Legislation Extends Benefits of FHA-Insured Mortgage Plan to Farms

Farmers may now use an insured mortgage to build or repair houses, barns, sheds, poultry houses, silos, put up windmills or other farm structures.

As much as 90% of appraised values can be loaned in some cases, land may be either bought or refinanced on this plan when 15 per cent or more of the loan is used for materials and labor on the construction or repair of buildings. These loans are made by lending institutions, they are not government loans, but private capital insured by FHA.

The interest is 4 1/2 percent, payments can be made monthly, semi-annually or annually, in equal installments, depending upon the distribution of the farmer's income throughout the year.

At the discretion of the lender the loan may be paid over a period of 20 to 25 years. This means that the responsible farmer can provide his family with a modern attractive home without waiting years to accumulate the cash—a tenant farmer can buy his own farm—and the farmer burdened with short-term high-interest mortgages can replace them, modernize his farm, and clear the debt completely in convenient payments.

For Appraisals and Applications, See or Write.

HEART DISEASE IS MAJOR CAUSE OF LYNN FATALITIES

A survey as to the causes of deaths in Lynn County in 1932 was made by the Health Unit. It was found that there were a total of seventy-four deaths in this county, the causes being as follows:

Heart Disease	17
Pneumonia	11
Cancer	7
Tuberculosis	6
Cerebral Hemorrhage	5
Accidental	5
All Others	28

The Health Unit would like to point out what can be done this year to lower the death rate from some of the above diseases.

Heart Disease is the leading cause of death throughout the country since the exact cause of much of the heart disease is not known. Public health authorities, however, do know that the stress and strain of the modern world is a major factor in producing a great majority of the heart diseases. Deaths in heart disease can be reduced by regular examinations by the family doctor and by normal, sane living.

With the advent of the new drug, arrange its academic year in order to provide an annual Easter vacation.

sulfapyridine, and with the use of specific serum, the death rate from pneumonia is steadily dropping. The occurrence of pneumonia can be reduced creditably by seeing your doctor when colds hang on and when influenza and other respiratory infections set in.

The occurrence of cancer is a major public health problem since the exact cause has not as yet been determined. Nearly all cancerous conditions, however, can be cured in the early stages if handled by a occurrence of tuberculosis, qualified physician. As long as peo-

ple consult quacks and charlatans about treating cancer, the death rate from cancer will continue to remain high. The death rate from tuberculosis can be greatly lowered if an early diagnosis is made and proper treatment is instituted by the family physician. Education of the public as to the cause of tuberculosis and its

prevention will greatly reduce the occurrence of diphtheria, can be practically eliminated by vaccination of the baby during the first year of life.

Typhoid fever is one disease which can and should be prevented. Good sanitary conditions and proper sewage disposal will practically elimi-

Scouts at Both Fairs Again

Boys Scouts participate in the New York World's Fair and Golden Gate Exposition at San Francisco. Top view—New York World's Fair—Boys Scouts at both expositions.

THRILL-STUDD SHOW AT HOUSTON

The greatest aggregation of attractions ever to come to Houston, the fact notwithstanding that the Ringling Brothers-Barnum and Bailey Circus spends several days each year in that South Texas metropolis, will greet the thousands who attend the Houston P. A. Stock Show and Livestock Exposition, which opens Saturday, March 23, for a nine-day run.

Instead of merely being a fat stock show, the exposition this year will consist of five divisions, each packed with thrill-studded entertainment.

First and foremost will be the world championship rodeo—the same rodeo that will thrill blue New Yorkers next October at Madison Square Garden. However, the Houston rodeo will be larger than the one in New York because Houston's million dollar coliseum has a larger arena space than Madison Square Garden.

Grating more or less peacefully all winter and getting ideas, scores of wild horses will be in Houston to make life tough for the cowboys who attempt to ride them. Likewise the wild steers—animals that for the past six months have been roaming the wilds of Mexico.

Cowboys, as well as cowgirls, who sleek to ride their hair-raising, will find that they have undertaken a truly Herculean task, avers J. W. Sartwell, exposition president. As the rodeo will be such horses as Hell's Angel, described as the world's meanest, toughest horse.

Several scores of the rough riders who are out for their share of the more than \$6000 prize money will try to buck with Hell's Angel, the animal that has busted up the chances of many rodeo daredevils ever becoming champions.

Prize cattle from five states has been entered in the Fat Stock Show. More than 2000 exhibits will be seen—the largest number since the show opened in 1932.

An innovation this year is the elaborate musical revue, "Shooting High," which possesses a cast of artists from the screen, the stage and radio. The performance runs for 90 minutes and is presented on a revolving stage, which flashes acts in rapid succession.

Blooded horses from the blue grass regions of Kentucky as well as the prize stables of millionaires throughout the country, will be seen at the horse show.

The first division of the exposition, one of importance to the groupings as well as the kiddies, is the Bill House Show—32 carloads of glittering carnival midway attractions.

"A program of industrial development centers around the manufacture of raw materials into finished products"

LOCATED in all sections of Texas, 141 refineries manufacture into finished petroleum products 80 per cent of the State's crude oil production.

In contrast, Texas processes only 8 per cent of its cotton production and none of its wool or mohair.

Petroleum refining now constitutes 41 per cent of the value of all Texas manufactures.

Of the 225,000 Texans regularly employed by the oil business of the State, 25,000 skilled workmen and 5,000 office employees (to \$20,000,000 annual payroll) are employed in this one division of our oil industry.

All of the Texas oil refined in our State, whether used in Texas or shipped to other states, paid last year in taxes an average of 6.5 cents per barrel.

General Motors Builds 25-Millionth Unit

In photo, left to right: C. E. Wetherald, general man-
ufacturing manager, Chevrolet; Mr. Coyle, H. H. Curtis,
general manager, Buick Division; A. P. Sloan, Jr., chair-
man of the board, General Motors; Fred Brown, veteran
Chevrolet employee; C. S. Mott, vice president, General
Motors; C. E. Wilson, executive vice president, General
Motors; and Mr. Knudsen.
The car was taken at once to Detroit, to play a major
part in the "March of Men and Motors" celebration
staged that night in the Masonic Temple.

for livestock, and while they may
offer some protection to the land
against erosion, a cover of weeds
does not in any way compare to a
good grass cover in prevention of
loss of soil by wind or water. It is
not the desire of any farmer to
develop a weed pasture for his live-
stock, but he does work toward this
end when he allows his grass to be
overgrazed.

"Few things compare with grass
as a land cover to prevent erosion
and hold moisture, and perhaps no
other method excels in protection,"
the Soil Conservation technician de-
clares. "If grass is to form a land
cover, it must not be trampled and
grazed during the early spring. At
this tender age, mud or more grass is
destroyed by trampling than by
grazing, and the benefits to live-
stock at that time may be far more
than offset by the damage to the
stand of grass." Firestone warns.

"There can be little or no soil
movement on land that has a good
grass cover. Wind cannot reach soil
that is well covered and bound to-
gether by grass, and water will be
held where it falls and find its way
down through the topsoil to be
stored in the subsoil.

Protecting pasture land against
early grazing and protecting it at
all times against overgrazing will
generally assure a good stand of
healthy grass, and drought will not

Typical of the home food production work carried on by home
demonstration club women and 4-H club girls in the South Plains in
cooperation with county home demonstration agents and the Texas
A. and M. Extension Service is this fine garden in Lubbock County.
Shows are Elizabeth Brooks, assistant home demonstration agent of
Lubbock County, and Mrs. Fred Kveton. To statements that vegeta-
ble production is impracticable in that section, the Kvetons point
out an acre of field garden, the fine home garden shown, a frame
garden for out-of-season production, and a pantry stocked with
hundreds of cans of home-grown products.

greatly affect grass land if the cover
has been well protected.
If overgrazed pastures are sove
to respond even under controlled
grazing, it is usually due to lack of
moisture, as much of the rainfall is
lost through run-off. Contour fur-
rows designed to hold and distrib-
ute the water will aid greatly in
increasing grass growth.

FILLING STATION AT GRASSLAND IS DESTROYED BY FIRE WEDNESDAY

TAHOKA, March 21 (Special).—Fire of undetermined origin completely destroyed the Farmers Co-operative Filling Station at Grassland at an early hour Wednesday night.

The fire spread rapidly after it was discovered and the entire building was soon enveloped in flames. The Tahoka fire department was notified and a number of the boys accompanied the truck out to the scene. The fire was finally extinguished but not until the building and its contents were almost completely destroyed.

The supply of gasoline and oil had just been replenished Wednesday afternoon, it is said, and the loss was heavy. It was only partially covered by insurance.

Postmaster and Mrs. J. Mack Noble and sons visited their parents near Tahoka Sunday.

CANYON AGRICULTURE GRADUATES HONORED

Canyon March 21.—Three Texas vocational agriculture teachers chosen to receive gold Lone Star keys at the recent F. F. A. meeting in Fort Worth are graduates of West Texas State College.

This was the first time the three teachers so honored each year came from one institution.

The key teachers are John Gillham of Clarendon, a graduate in 1931; Walker Todd of Seagraves, who graduated in 1933; and Arlin Hartson of Meadow, a member of the class of 1935.

Partly because each of these men are his former students, Prof. Frank R. Phillips, head of the West Texas State department of agriculture, was asked to speak at the state F. F. A. Luncheon.

GIFT TEA GIVEN FOR RECENT BRIDE

To honor Mrs. Doris Sumrow who was Miss Annette Brewer before her recent marriage to Medames C. J. Beach, Joe Gauer, Waldo McLaurin and Barley Brewer were hostesses for a gift tea Wednesday in the Beach home.

Miss Ann Brewer, twin sister of the honoree presided at the guest register.

At the refreshment table tea, open face sandwiches and cookies were served.

Violet corsages with "Annette and Doris" inscribed were plate favors.

About fifty guests called.

Mrs. J. W. Gardenhire of Shallowater, sister of the honoree was an out of town guest.

RECENT BRIDE IS HONORED FOR TEA

A Saint Patrick tea was hosted Saturday by Mrs. Ben Moore Sr. and Miss Oleta Moore for Mrs. Ben Moore Jr. and Miss Deane Williams of Caney, Kansas.

Guests were introduced to the honoree by Mrs. Moore Sr.

In the dining room the lace covered table was centered with green tapers burned in crystal holders.

Mrs. J. H. Crawford and Miss Oleta Moore served green punch, dainty green and white sandwiches and green mint.

Corsages of white sweet peas with Deane and Ben were given guests. There were fifty seven callers to meet the bride.

SHEPHERD—ROCHELLE

Dr. O. H. Shepherd and Mrs. Bonnie Rochelle both of this city were married in a quiet wedding ceremony Friday night.

The couple left immediately after the ceremony for Rockport where they will spend several weeks.

GIBSON—SOLSBERRY

Miss Minnie Solsberry of Near Tahoka and Mood Gibson of his city were married Saturday by Justice of Peace Foster.

The couple returned Monday from a short trip to San Angelo.

They will make their home in this city where Mr. Gibson is employed by his brother Roy W. Gibson.

FROM De KALB

Mrs. E. J. McKinney of DeKalb was a guest in the Ora Blocker home last weekend. Mrs. Blocker accompanied her to Lubbock Sunday where she will visit relatives.

Mr. and Mrs. J. T. Middleton Sr. and Mr. and Mrs. D. J. Ebelh have returned from Ft. Worth where they attended the Fat Stock Show.

Mr. and Mrs. Charles Kirkland were in Lubbock Monday.

Mr. and Mrs. W. L. Palmer returned Sunday from a weekend trip. Mr. Palmer having accompanied his sister, Mrs. W. A. Emerson to her home in Wichita, and Mrs. Palmer visited her mother, Mrs. N. M. Poe near Hamlin.

Mr. and Mrs. J. T. Middleton Jr. were among those in Ft. Worth last week to attend the Fat Stock Show.

Betty Crocker KITCHEN CLINIC
 Prepared by Your Newspaper—Betty Crocker Home Service Department

THAT CUSTARD PIE PROBLEM

Whenever I start to talk about custard pies I think of the old problem about what would happen if an irresistible force came in contact with an immovable body. Because making a custard pie involves two baking principles that are as opposed to each other as this famous force and body.

At first glance you wouldn't think they could possibly be reconciled. But like many problems in human affairs they can be managed by a compromise. These two problems are—first, that an egg and milk custard mixture cannot be baked at a high temperature without breaking down—that is, separating or curdling. . . . second, that the pie crust must have a high temperature to "set" it quickly before the soft filling has a chance to soak into it.

HOT AND NOT SO HOT

The "compromise" here is that we bake the pie at a high temperature for the first 10 to 15 minutes. This "sets" the crust so that it will not become soggy. Then, before the custard mixture has had time to realize that the oven is so hot—we quickly reduce the heat to "moderate" and continue baking at a temperature more to the liking of the custard.

But this isn't quite the end of it all. We have made a great number of custard pies in an effort to overcome the soggy crust evil—which you know is the bane of custard pies. We discovered two other precautions that will help insure a flaky tender crust with not a hint of sogginess—as well as a smooth creamy filling with no trace of curdling.

CHILL AND BRUSH WITH EGG WHITE

We make our pastry for custard pie the day before, roll out the crust and fit it into the pie pan. Then we brush the top of this crust with egg white and set it in the refrigerator overnight. The pastry becomes more dry—the egg white forms a sort of "soak-proof" film over the crust.

PLACE LOW IN OVEN

In our custard pie-experimenting we also discovered that it helped safeguard the pastry if we placed the custard pie very low in the oven to bake. In this way the pastry has the benefit of the flash heat from the burner at the bottom of the oven. This helped to bake the crust quickly and make it nicely browned underneath—and also helped make it more flaky.

Here is the recipe for the custard filling to go in this pie shell.

CUSTARD PIE

Pastry for one 9-inch pie shell 1/2 tsp. salt
 3 eggs 1/4 tsp. nutmeg
 1/2 cup sugar 2 1/2 cups milk

Beat eggs slightly. Blend in sugar, salt, nutmeg and milk. Strain mixture into a pastry-lined pan. (To prevent the crust of custard pie from becoming soggy by baking, the pastry in the pan should be brushed with egg white and chilled several hours before adding filling.) Bake about 45 minutes or until silver knife inserted in center of custard comes out clean. Bake in a hot oven, 450° F., for the first 10 to 15 minutes; then reduce heat to 325° F., slow moderate oven, to finish baking.

COCONUT CUSTARD PIE

Substitute 1 tsp. vanilla for nutmeg in Plain Custard Pie and add 1 cup shredded coconut.

LIKE A BRAZIL NEW SPRING BONNET!

Because it's spring—and we always like something new and different in the spring—I'm suggesting a new shiny dark brown bonnet for this old-fashioned custard pie to wear. Can you just imagine how a rich, smooth chocolate fudge top will set off the creamy custard—both in appearance and taste? This Fudge Topping is easy to make, too.

FUDGE TOPPING FOR CUSTARD PIE

Mix 1/2 cup confectioner's sugar, 1/4 tsp. salt and 2 tbsp. cream together. Add 1 sq. chocolate (1 ounce) and 2 tbsp. butter, melted. Blend thoroughly and spread evenly over the cooled custard.

If you have any specific cooking problems, send a letter requesting information to Betty Crocker in care of this newspaper. You will receive a prompt, personal reply. Please enclose 3 cent stamp to cover postage.
