Bob Harris To Be Here

Tuesday morning Joe Burkett said that Jack Huddle, TV entertainer of Lubbock, would be on the benefit program courtesy of Bell Milk Co.

The O'Donnell March of Dimes benefit show will be held here Friday night Jan. 28th in the High School auditorium with the program beginning promptly at 7:30 p. m. Joe Burkett and friends will present the musical variety program and Bob Harris, Lamesa radio announcer, will be master of ceremonies. Those remembering the program of last year know that Mr. Burkett puts on a tip-top variety program with 30 entries from here, Lamesa, Wilson, Tahoka and Grassland. Admission will be 75 cents and 35 cents and all the money is net to the O'Donnell March of Dimes quota. The Fire Department will sell the advanced tickets and sponsor the program. John Ellis, local Drive Character, said that O'Donnell's quota is \$1475 with that of Tahoka being \$2800 and Wilson \$350.

The Mother's March of Dimes will be staged the same night of the program at the close of the musical. Please have your porch light on indicating you wish to give.

The Lynn County chapter had one case of polio last year, that of a little girl from Wilson, and \$3700 was spent on her treatment from the national fund.

Mr. Ellis said that any group wishing to help in this drive to contact him. Other suggested events might be, game parties at school gym, bake sales, basketball games etc. All organizations are urged to stage some sort of fund raising program for the community polio fund quota. Let's go over the top in January.

T. B. IS STILL A MAJOR ILLNESS

Tuberculosis, many years ago the nation's leading cause of death, is losing out because of man's fight for better health. Once the leading death in Texas, too, tuberculosis now ranks ninth in Texas as a cause of death, says Dr. Henry A. Holle, State Health Officer. Last year all forms of tuberculosis killed 1,070 Texans while twenty years ago with a population of only two-thirds of our present population there were 4,020 deaths.

Tuberculosis usually attacks the lungs. The disease is spread from person to person, through germladen droplets or sputum discharged by an infected person. It can be spread through kissing, breathing air containing tuberculosis germs, and through handling objects used in common with tuberculosis persons. Children are easily susceptible to tuberculosis infection as they are to other disease germs.

Tuberculosis victims have a good chance to recover, if the disease is found in its early stages, and a physician's instructions for treatment are carefully followed. The outlook is becoming more encouraging as time goes on, but we cannot rest while the disease is taking so many lives.

Often, tuberculosis does not show any noticeable symptoms until its victim has become extremely sick.

2 Inch Snow Benefits Area

Like Old Times

It looks like no lane is so long but what it has a turning as our baldies got the second big snow of the winter Sunday amounting to 2 1-2 inches and 25-100ths inches of moisture. Rain one nite last week amounted to 5-100ths inch.

The snow of Sunday was in a near-calm and no drifting resulted. Although the two snows within two weeks gave only a combined 1-2 inch of moisture the benefit is greater as snow has a beneficial effect on soil texture. Farmer-generally are well pleased over crop prospects.

Mrs. Delbert Mires and children of Plainview visited her son Mr. and Mrs. Harold Mires Sunday.

O'Donnell Schools to continue self appraisal

Last year, O'Donnell along with most of West Texas public schools began an appraisal of their school. Following this survey, the Texas Education Agency came out with 12 Principles subdivided into about 150 standards by which Texas schools would be judged for accreditation. For the 1954-55 school year two of the 12 principals will be applied to schools over the state.

Principle VII reads as follows: "The methods, techniques, and procedures employed by teachers conform to the maturity, needs, and abilities of the pupils and to the requirements of the subject and Principle IX, "There is a planned instructional program in operation that leads to discovering and meeting the needs of each pupil."

The Texas Education Agency states the "all accredited schools in Texas are expected to take part during the 1954-55 school year in this self-evaluation program. . . . the findings to be reported to the agency on the November request for funds to operate schools for the following year.

This survey and study will be conducted both on school time and after school hours. In a very near issue of the paper the schedule will be announced.

TAKE TIME TO TAKE STOCK OF YOUR HEALTH

If you have not had an audit made recently of your physical assets and liabilities, go to your doctor now and have it done in the advice of the State Health Officer to all grown-ups in Texas. It is quite as important to check up on your physical resources as it is to look into the state of your financial possessions. By regular care under your physician's direction you can conserve your physical assets and avoid the accumulation of destructive liabilities.

Each of us starts with a certain amount of physical capital. Merely as a business proposition, it is worthwhile to conserve it to the best of our ability. In infancy and childhood our physical resources, as a rule, are safeguarded for us. As we grow older, the responsibility for doing so rest upon the individual. The critical period may come in middle life with the sudden realization that the physical capital is yielding diminishing returns in the way of physical well being. A large number of the deaths reported each year in Texas is due to the degenerative diseases of middle age.

Nearly all of these diseases have slow beginnings, and their onset can often be recognized in the course of a thorough physical examination before they have gained serious headway. In the majority, early detection of menacing conditions with a readjustment of physical expenditures and a better budgeting of activities, under a physician's direction, will help to shift the balance from unfavorable to the favorable side of the ledger.

VA Quiz

Q. Is it possible for two veterans to take Korean GI Bill farm training on the same farm? Or must each veteran-trainee have his own farm?

A. Generally, each farm trainee is expected to train on a farm he owns or manages. However, two veterans may train on a single farm if conditions are favorable enough to assure successful training and eventual self employment for each.

Q. I am entitled to 36 months of training under the Korean GI Bill. Does that mean my GI on-the-farm training course can last for 36 months?

A. Not necessarily. The length of your farm training program will depend on how long it will take you to reach your objective. Your program is tailor-made to fit your own needs and experience; it may be

shortened to take advantage of the farming you already know.

Q. May I take on-the-farm training on a part time basis under the Korean GI bill?

A. No. Under the law, GI farm training must be taken on a full time basis.

Q. I am taking Korean GI farm training. My school has just informed me that it has extended the length of the course beyond that which has been approved by VA. Will I get GI allowance payments for the extension?

A. No. GI allowances, under the law, may not be authorized for extensions beyond the period requir-

Farmers' May Retire

In a previous article in this series we told you about farm workers and self-employed farmers coming under social security many for the first time—on January 1, 1955. Beginning then earnings for farmers and farm hands will be counted under Social Security. But no doubt many of you are wondering what you are "buying" when you pay your social security taxes. You are buying old-age and survivors insurance, that is, when your earnings stop because of your death or because of your retirement at age 65 or later, payments will be made from the fund you helped build up, and will be made to you and your dependents, or to your survivors. Here are the types of benefits:

1. RETIREMENT PAYMENTS

(1) Monthly payments to you as a retired farm hand or farmer.
 (2) And monthly payments to your—
 a. Wife, age 65 or over.
 b. Child under 18.
 c. Wife, regardless of age, if caring for child entitled to benefits.
 d. Dependent husband.

2. SURVIVORS' OR DEATH PAYMENTS.

(1) Monthly payments to your—
 a. Widow, age 65 or over.
 b. Widow, regardless of age, if caring for child entitled to benefits.
 c. Child under 18.
 d. Dependent widower, age 65 or over.
 e. Dependent parent, age 65 or over.
 (2) Lump-sum payment to your—
 a. Widow or widower, or
 b. To the person who paid burial expenses.

Benefits for a retired worker run from \$30.00 per month to \$108.50 per month, depending on the amount of your past earnings from employment of self-employment covered by the Social Security Act. Family benefits may run as high as \$200.00 per month. For more information about social security for farm families, write to the Lubbock Social Security Administration office and ask for "Facts for Farm Families".

AN EXCITING NEW DIRECTION in motorcar styling begins with Chrysler for 1955 . . . longer, and inches lower than other big cars, in the most striking new car design of recent years! Noteworthy is the new sweepback Super-Scenic Windshield that "wraps around" both top and bottom for greater (and safer) vision. All Chryslers are now V-8's, with

engines up to 250 hp. The new Chrysler look of mobility and purposeful power is further translated into action by the most automatic transmission in any car . . . exclusive Chrysler Full-time Power Steering . . . and Power Brakes with a new, safer acting double-width brake pedal. By all odds, this is definitely the car to look at and drive first in 1955!

CHRYSLER'S 100-MILLION-DOLLAR LOOK! . . . a forecast fashion for all cars to follow!

GOOD DRIVERS DRIVE SAFELY!
