

The O'Donnell Index

O'DONNELL, LYNN COUNTY, TEXAS, FRIDAY, OCTOBER 26, 1927

NUMBER 5

40 Bales Cotton Ginned To Date

Continued fair weather has cotton to begin moving more together with the steady in-pickers from the Southern part of the State where about all picked. At present is coming in at the rate of 250 bales per day. At the same time some 250 bales per day are being ginned. Up to Thursday there had been ginned by the Southern ginners, 2,040 bales of the fleecy staple. On the same date a year ago, 3,057 bales had been ginned. Cotton pickers are coming in by the hundreds and it is expected that the seven gins will be full time by the end of another week provided the weather remains fair.

is the report from each of the gins up to Thursday noon:

TO DINNER PARTY GIVEN BY CLUB CAFE

of the loveliest social affairs of the season was the six o'clock dinner given by the Club Cafe at Tahoka, Oct. 20 honoring the Home Demonstration Club by reason of their club exhibit at the Club in September.

The color scheme was carried out in the table decorations of fall colors. Each course of the meal was of some beautifully blended tone. The meat and salad course to follow dinner mints and coffee dinner was one of perfection. Only dahlias were used as place cards. Mrs. Harvey Everett acted as hostess and introduced Miss M. Hasley who gave the welcome address in her own sweet way. Each person felt without a care, the welcome she so generously gave. Mrs. Paul Gooch was introduced and responded to Hasley in a very dignified way, expressing the sentiments of each in her words of response. Mrs. E. Gillispie was next introduced and gave a very charming little toast. Her very gracious host and hostess, Mr. and Mrs. Jake Leady, after Mrs. Ben Moore, upon being introduced spoke a few chosen words in her appreciation to Mr. and Mrs. Leady for their splendid banquet prepared for our pleasure. A host of rising thanks by the club was extended the house. The guests of this lovely affair were Mesdames: Aldo McLaurin, D. W. Estes, J. P. Egan, J. N. Lines, George, L. C. Williams, Bob Gary, C. C. Jones, Joe D. W. Harris, Dud Middleton, L. Schooler, Ben Moore, C. E. Smillion, Paul Gooch, W. K. Horn, E. Gillispie, W. A. Treadway, J. Earls, J. W. Campbell, J. W. Harris, R. O. Stark, N. T. Single and Harvey Everet.

First Christian Church To Sister Churches

The First Christian Church will host to the various churches of the city Monday, Oct. 31 from 3 to 5 o'clock. The ladies of the church have a very interesting program arranged and will provide a pleasant social hour. They extend a cordial invitation to every church member to come.

T. M. Ward West of Town Exhibits Large Egg

T. M. Ward, of west of town, believes he has the champion hen when it comes to producing large eggs. On Monday of this week he brought to the Index office an egg laid by one of his Rhode Island Red hens that measured 7 3/4 inches around the long way and 6 inches around the short way which weighed one quarter pound.

Ray Everett sold a splendid crop of spring calves to J. C. Dorwarll of Snyder, consideration not known.

W. P. Knox New Scout Executive

The Executive Board of the South Plains Area Council of the Boy Scouts of America announces the selection of Mr. W. P. Knox of Beaumont, Texas as scout Executive for the area.

Mr. Knox comes to the South Plains council well qualified to put over the work of scouting in this area where most of the work will have to be done with the small town and rural boy. Mr. Knox was reared on the farm in New England and was graduated from the New Hampshire A. & M. College. He served in the infantry, cavalry and artillery during the world war. Mr. Knox has had practical experience on both the farm and ranch; has served as county agent for Kleberg county in South Texas; and has been superintendent of a large farm connected with the vocational work of the U. S. government. He has also served as dairy specialist for the Chamber of Commerce of San Antonio, Texas. As county agent, Mr. Knox put over an outstanding piece of work in connection with community and county fairs. His boys agricultural clubs won both district and state honors in livestock and grain judging.

For three years Mr. Knox served on the regional staff doing organizational work for the Boy Scouts of America in the states of Texas, Oklahoma and New Mexico. For the last two years Mr. Knox has been at Beaumont, Texas where he has developed an outstanding Boy Scout Camp. The Boy Scout exhibit at the South Texas State Fair at Beaumont was considered the largest Boy Scout exhibit of the South West.

Mr. Knox's special ability is developing community projects and all kinds of handicraft work. He is skilled in the use of many kinds of tools and in handling of rope and the use of the bow and arrow.

Mr. Knox is married and has two children. He is a Rotarian, a Legionnaire and a member of the American Archery Association.

The Scout Plains Area Council of which Mr. Knox will be executive consists of the following counties: Lamb, Floyd, Dickens, Cochran, Hookley, Lubbock, Crosby, Yoakum, Terry, Lynn, Garza, Gaines, Dawson, and Borden. With Mr. L. G. H. Williams, the Area Commissioner, area, meeting the various business and professional men as well as the organizations and institutions interested in boys.

Dempsey-Tunney Fight Pictures To Be Shown

According to announcement made by Mr. Mullins, manager of the Lynn Theatre, the Dempsey-Tunney Fight picture will be shown at the Theatre on Saturday, both matinee and night. Advertising has been sent out and Mr. Mullins stated he expected to show to a capacity house during the run of the picture. He has repeatedly tried to secure this picture but only succeeded in booking it this week.

The above news will no doubt be of interest to the general public as the Dempsey-Tunney championship bout aroused greater interest than any battle in the history of the prize fight ring.

H. M. Anthony Open for Business

H. M. Anthony who operated a dry goods business in the Warren building last fall has opened a dry goods store in his own building, formerly occupied by Armstrong's shop just across the street from the Fritz Filling Station. The store has been open for business the past several days with a small stock of dry goods but Mr. Anthony is daily adding to the stock and expects to have a complete stock of dry goods and men's clothing by the time this paper is off the press.

Vanishing (Indian) Summer

O'Donnell To Have New Baking Plant

By the time the ink is dry on this paper, O'Donnell will be baking her own bread again for the first time in several months.

J. P. Jackson, formerly of Lamesa has rented the Sanderson building, formerly occupied by the W. E. Guye Dry Goods Co. and is opening a first class bakery shop. Mr. Jackson stated he expected to make his first bake today. The oven was installed the first of the week and the building is undergoing a complete remodeling and when completed will be one of the neatest and most up-to-date bakeries in this section of the country. Mr. Jackson is an experienced baker of many years experience and promises the people of O'Donnell a bakery that will supply the needs of the people at all times with the best bread, pies and cakes and everything in the pastry line. A 220 loaf oven has been installed which will give an output of 2,000 to 3,000 loaves of bread a day.

We welcome Mr. Jackson to our city and predict for him a splendid business in the future.

Beauty Specialist At Corner Drug All Next Week

According to announcement made by B. J. Boyd, manager of the Corner Drug Store, Oct. 31 to Nov. 5 will be known as Martha Lee Beauty Week.

Miss Ollie Lewis, representative of the Martha Lee Co. of Waco, will be at the store all next week and invite the ladies of O'Donnell to come in and receive entirely free of charge, a facial and skin analysis. The facial will be given by the Martha Lee Beauty Specialist who will also give the ladies personal advice. She will endeavor to teach the real art of blending the rouge and powder, also the powder shades that are more suitable for each particular type.

The Boston Store Preparing to Open

The Boston Store is the name of the new firm which is preparing to open a dry goods business in the Sanderson building just south of the Sanderson Filling Station. Mr. Chas. Cabool, who was manager of the Salem Dry Goods Co. here last fall will be in charge of the new store. He states a general line of dry goods with ladies-ready-to-wear will be carried in stock and he expects to be open for business Tuesday.

Mrs. Chas. Cathey Dies Friday

Mrs. Charlie Cathey who took ill on Saturday, Oct. 15 at midnight, with a severe attack of appendicitis, died in the Lovelace-Bennett hospital in Lamesa Friday. Mrs. Cathey seemed to be doing splendidly, but having had an operation after suffering from a ruptured appendix, and a serious case of gangrene following, a sudden turn for the worse developed Thursday night resulting in death.

Mrs. Cathey was born in Scurry county, Texas, April 4, 1906 to Mr. and Mrs. J. P. Allen and christened Johnnie Allen upon her birth. She was converted when a little child, and united with the Baptist church when only twelve years old, living a consecrated, sweet christian life, until her death Oct. 22, 1927.

In 1913 Mr. and Mrs. Allen moved to this country and settled near Pride, where Johnnie met Mr. Cathey with whom in childhood a feeling budded which grew with the years and finally bloomed into a love which terminated in marriage on Oct. 22, 1924. The marriage took place at Gail, Texas, the little town where Charlie had spent his earliest boyhood days. Mrs. Cathey lacked one day of having been married three years when death claimed her. Interment was made in the family burial plot at Pride, Saturday Oct. 22, 1927, at four p. m.

Besides leaving a little nine months old baby boy, and husband to mourn the loss, there is a father and mother, several brothers and sisters besides a host of relatives and friends who sympathize with loving hearts, and the very best we have to offer the bereaved is, "God giveth a peace passeth understanding."

Norett Brothers Opens Store Today

Norrett Bros., formerly proprietors of the Army Store, which operated next to the 'M' Store until the first of the year has rented the Warren Building next to the old First National Bank Building and is opening another stock of dry goods. He expects to be open for business today.

Chester Horn returned home Friday from Winkler County where he has been for the past month as tool dresser for Black and Penn drilling Co. Chester has accepted a position with the Ely McDonald Gin Co. and will be at home here in the future.

Day by Day In Every Way Business is Better

The return of old times was evident Saturday when hundreds of shoppers and visitors thronged the streets and crowded the stores of the town which left the merchants and many clerks jumping from morning to night. Fact is, it was the busiest day for the local merchants since the fall of 1925 according to reports from the various business concerns of the city. There was hardly a business house in O'Donnell but what broke all sales records for a single day during the past two years. The Editor of the Index was not altogether forgotten as he was made smile on several different occasions during the day when Tom, Dick and Harry approached him wanting to pay their subscriptions to the Index. Not only did we receive many renewals but we added several new readers to our list. We are very thankful to the old as well as the new ones. It is evident that old man Hardtimes is swiftly making his exit.

Mrs. Fred Taylor of Midland who spent the week here visiting her parents, Mr. and Mrs. C. B. Morrison left Tuesday for Portales where she will visit with her uncle, U. B. Cathey and family.

"Hour Glass" Will Be Shown At Theatre Sunday

Ceaselessly the scroll of time unrolls, bringing to every mortal the changes to which are attached whatever of interest life may hold. The hour glass, which symbolizes the passing of time, supplies the title for a photoplay as told in motion pictures, which will help to bring every man who is, or hopes to become head of a family a fuller realization of his responsibilities. First presentation of "The Hour Glass" in O'Donnell will be given at the Lynn Theatre, Sunday at 3 p. m. o'clock. It will be shown under the auspices of O'Donnell Camp, Modern Woodmen of America, by special arrangement with the national headquarters at Rock Island, Ill. This is a brand new four-reel film with unusual spectacular features and true-to-life action. Part of the story was filmed at the Society's free Sanatorium near Colorado Springs where the bright sun and vivid color contrasts make the camera so effective. Here, in large part, was enacted an interesting little drama which might have ended in tragedy, but didn't. Modern Woodmen, who know the signs of the forest may guess why. Others will be afforded the opportunity to find out for themselves when they witness the showing of this interesting photoplay.

Admission will be free and the public is invited to come as guests of M. W. A. O'Donnell Camp.

Thanksgiving Proclaimed by Coolidge

WASHINGTON, Oct. 26—President Coolidge Wednesday issued a proclamation setting aside Nov. 24 as Thanksgiving Day and calling upon the people to show suitable gratitude for " manifold blessings" which have come to them during the year.

"We have had the peace and of honorable relations with our sister nations throughout the world," the proclamation said. "Disasters visiting certain of our states have touched the heart of a sympathetic Nation, which has responded generously out of its abundance.

"In continuing to remember those in affliction we should rejoice in our ability to give them relief."

The President recalled that "not alone have we enjoyed material success" in a domestic sense, but that this country has also "advanced in wisdom and in spiritual understanding."

Clyde Smith of San Saba, Texas, is here on a visit to his uncle, W. L. Palmer. Mr. Smith contemplates locating here in the near future.

Charlie Cathey and little son returned to Portales with his father, N. B. Cathey Tuesday for a visit.

LET'S VOTE BONDS FOR WATER WORKS

O'Donnell has just emerged from a water famine. Up until Wednesday of this week water was considered precious fluid. In fact, it was almost alarming in some instances. For ten days or more the water supply of O'Donnell has been getting weaker to still days. Windmills have been almost at a standstill for ten days, consequently the storage capacity was used up and for once since we have been living on the Plains we were glad to see the wind increase its velocity sufficient to cause the windmills to run.

The need of a city water system was more forcibly brought to bear upon the minds of the people of our city and if we could have voted on a water bond issue during the first part of this week, we believe it would have carried without a dissenting vote. Fact is, we believe the good people of O'Donnell are ready to vote upon the issue and build a water system today.

When a town is facing such a situation as confronts us today it is time to do what we can to relieve the distressing situation. "Procrastination is the thief of Time."

MISS ERMA D. PALMER ENTERTAINS FRIENDS

Miss Erma D. Palmer was the charming hostess Friday night, entertaining a few friends with a "Tramp Party."

The invitations which were sent out earlier in the week were unique in the extreme, being cross-road signs, signaling the guests in regard to the necessary steps to take to be present on this jolly occasion, even the envelopes which contained the invitations were suggestive of the affair being covered with "patches."

Of course the guests arrived dressed to represent tramps and some were so trappy looking they almost failed to get admittance to the party.

To begin the evening's entertainment the guests "tramped" in a body down to the Carnival grounds and almost "took in" or was it almost "were taken in," by the Carnival. When they returned to the home of Miss Erma D. where games were enjoyed, in the "Tramp Hand-out," Slim Guye won the prize. The real hand-out consisted of sandwiches, cornbread sticks, baked sweet potatoes and red lemonade, served in tin plates and tin cups to the following guests, who all agree that Erma D., in her own, quaint, original way cannot be equaled when it comes to entertaining: Misses Maggie Wilson, Hazel Burke, Pauline Hamilton, Fannie Del Busby, Kitty Aylor and Mildred Bowlin, Messrs R. V. O'Neal, David Chandler, Eugene Cook, Vance "Slim" Guye, Noel Sikes, Travis Everett, Harvey Jordan and Harvey Lines.

THE O'DONNELL INDEX

ORDINANCE

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF O'DONNELL, TEXAS.

An ordinance granting a franchise and certain privileges to the West Texas Gas Company (a corporation) with its principal office in the City of Amarillo, Potter County, Texas, and establishing rules and regulations for the use of natural gas for light, heat and power, and establishing a maximum limit for price to be charged for such gas.

WHEREAS, WEST TEXAS GAS COMPANY (a corporation) has applied to the Mayor and City Council of the City of O'Donnell, Texas, to grant said company the right to lay and maintain and operate a gas plant for the distribution of natural gas for light, heat and power within the City of O'Donnell, Texas, upon the following terms and conditions and reservations, such rights and franchises to be as follows, to-wit:

SECTION 1

That the right to furnish, distribute and sell natural gas for light, heat and power, for all such other purposes for which gas may be used within the City of O'Donnell, Texas, for a period of twenty years from the date of the passage and approval of this ordinance is hereby granted to the WEST TEXAS GAS COMPANY (a corporation) its successors and assigns, hereinafter called the grantee, subject however, to the provisions hereinafter incorporated in this ordinance and for such additional period or extensions of time as may at the expiration of said term of years, and upon conditions then found to be satisfactory to the officials of the City of O'Donnell, and to this grantee, and provided that this ordinance and franchise is to be in effect and run from and after the day and date of its passage and approval.

SECTION 2

That the said grantee is to have the right to lay mains, pipes and equipment, and to construct such buildings and install such machinery or equipment and to sell or lease such equipment to the citizens of O'Donnell, Texas, as may be necessary or advisable in their judgment for the proper performance of the service to be rendered to the City of O'Donnell, and to its inhabitants and citizens to the best interests of the gas consumers and to have, at all times, access to the streets and alleys of said City for the purpose of laying such mains, pipes and equipment as may be needed from time to time during the term of this franchise, or any extension thereof, provided, that at no time shall the grantee obstruct such streets or alleys so as to interfere with the public use thereof for a period longer than twenty-four (24) hours, and that immediately such mains, pipes or equipment is laid and tested same shall be covered and such streets or alleys shall be replaced in the same or as good condition as before such work was done.

All excavations to be properly guarded by barriers by day and by red lights at night, and the said grantee shall hold the said City of O'Donnell harmless from any and all damages to persons or property resulting from their negligence in the manner of constructing such distributing plant or system and guarding the same while under construction, by a good and sufficient bond executed by the grantee and some reputable surety company permitted to do business in the State of Texas, in the penal sum of Twenty-five Thousand Dollars (\$25,000.00).

The work done in connection with the construction, maintenance and operation of said plant and transmission, transportation and distributing system, and the location of regulating stations, vent pipes, thorax, gate valves, gauges, stock-boxes, manholes, low, intermediate, and high pressure mains, pipes, feeders, service pipes and conduits, and service pipe extensions and all appurtenances in the streets, highways, alleys and other public places in the City shall be subject to and governed by the regulations, rules and ordinances now in force or that be hereinafter lawfully adopted.

SECTION 3

That all mains shall be laid at least eighteen (18) inches below the surface of the ground, and so laid not to interfere in any manner with water mains or pipes or sewer lines of said City, or pipes or conduits of other utilities already in existence, and the connections with such mains and pipes shall be made at the expense of the grantee. That the grantee shall not be required to extend main lines more than one hundred and fifty (150) feet to any one consumer.

SECTION 4

That said grantee shall at all times after said gas distribution system has been established and placed in operation, be prepared to furnish said City and its inhabitants with a good quality of gas for light, heat and power, and other purposes and said grantee shall furnish such gas for all purposes for which same may be used in sufficient quantities to supply the needs of the said City and its citizens.

The said gas shall be furnished to said City and its inhabitants for domestic use at a net price not to exceed sixty-seven and one-half (67-1/2) cents per thousand cubic feet for all gas used; provided, however, that gas used for heating public buildings, churches, hotels and apartments shall be sold at the following rates:

For the first 50,000 cubic feet used per month — 67 1-2 cents per M
For the next 100,000 cubic feet used per month — 50 cents per M
For all used in excess of 150,000 cubic feet per month 40 cents per M
That the maximum rate for industrial gas shall not exceed the rates set out in the following schedule:

For the first 50,000 cubic feet used per month — 45 cents per M
For the next 150,000 cubic feet used per month — 35 cents per M
For the next 300,000 cubic feet used per month — 30 cents per M
For the next 500,000 cubic feet used per month — 25 cents per M
For the next 10,000,000 cubic feet used per month — 22 1-2 cents per M
For the next 20,000,000 cubic feet used per month — 20 cents per M
For the next 29,000,000 cubic feet used per month — 18 cents per M
For the next 60,000,000 cubic feet used per month — 16 1-2 cents per M
For all above 120,000,000 cubic feet used per month — 15 cents per M
That all above rates are to be charged for gas used through one meter only.

used per month — 45 cents per M
For the next 150,000 cubic feet used per month — 35 cents per M
For the next 300,000 cubic feet used per month — 30 cents per M
For the next 500,000 cubic feet used per month — 25 cents per M
For the next 10,000,000 cubic feet used per month — 22 1-2 cents per M
For the next 20,000,000 cubic feet used per month — 20 cents per M
For the next 29,000,000 cubic feet used per month — 18 cents per M
For the next 60,000,000 cubic feet used per month — 16 1-2 cents per M
For all above 120,000,000 cubic feet used per month — 15 cents per M
That all above rates are to be charged for gas used through one meter only.

That all bills shall be due and payable monthly, and within ten days from date rendered, and in case of default or non-payment within said time, the grantee shall have the right to discontinue service to said consumer, and to make an additional charge for the gas used for any purpose equal to one-ninth (1-9) of the bill rendered. And in case said consumer shall make application to have services re-established and gas re-connected with its premises, he shall be required to pay all delinquent bills, together with the penalty thereon and pay a cut-on charge not to exceed \$1.50 for domestic use and heating purposes, and \$2.50 for industrial use. It is further provided that the grantee shall be allowed to make a minimum charge of \$1.50 per month for gas for domestic and heating service and \$25 per month for industrial gas service.

All gas furnished or supplied by grantee shall be metered, and for this purpose the grantee shall, at its own cost and expense, provide and install for each consumer a good and accurate meter of standard make. Grantee shall also provide and maintain at its proper cost and expense facilities for testing gas meters, and said grantee shall also provide and maintain, at its proper cost and expense a standard meter prover of not less than five cubic feet capacity equipped with suitable thermometers and other necessary accessories which shall be maintained to the accepted standard of accuracy, all to be to the satisfaction and approved by the City Council.

Such meters shall be and remain the property of said grantee, and the grantee shall have the right to require the customer or consumer to deposit with it a sum equal to the maximum monthly bill of the consumer, provided, however, that no deposit shall be in a less sum than \$10.00 for domestic meter, and \$15.00 for industrial meter.

SECTION 5

The natural gas to be furnished hereunder shall be at all times kept to a standard of eight hundred British thermal heat units or higher per cubic foot at the point of consumption at a temperature of thirty-two degrees Fahrenheit or zero Centigrad and to determine whether the gas supplied is of the heating value above specified, the City of O'Donnell may have tests made by a competent analyst under recognized and scientific processes, according to the approved method of making such tests, and said tests shall be from samples of gas collected from the grantee's mains at any point or points within the City. If the result of such tests show that during a month the daily average of the gas supplied was below eight hundred British thermal heat units, then there shall be deducted from the customer's bills for gas during such month a proportionate amount, based upon the deficiency below said eight hundred British thermal heat units. In any month when such tests are being made, the City shall advise the grantee of the results of each test within a reasonable time after it is made, and the official report of such analyst, of which said grantee is so advised, shall be taken and accepted as the agreed prima facie correct test of the heating value of the gas furnished during such month and thereafter until a different result is determined or ascertained in a similar manner; said grantee shall furnish gas to consumers at a pressure of not less than four ounces, nor greater than eight ounces, measured at the consumer's meters outlet.

Said grantee shall supply and install not less than one and as many as may be needed approved self-registering pressure and gas gauge, capable of recording the pressure of the gas, in the mains at points in the City designated by the City Council, and said self-registering pressure gauge shall be placed at a station which in the opinion of the City Council fairly represents the pressure on adjacent territory; and such station shall be securely inclosed under lock and duplicate keys to said station shall be retained by the City Manager or some office authorized by the City Council; and such self-registering pressure gauges shall be equipped with removable recording dials to record the pressure, and the said City Manager, or some representative authorized by the City Council, shall remove or cause to be removed from said pressure gauge the pressure records of the preceding period, and provide the gauge with recording blanks for the next period during which such record is desired by the City; and each record taken from such pressure gauge shall be filed in the office of the City Secretary of the City of O'Donnell, and a record thereafter be entered upon the books of the City by the said City Secretary; and the said City Manager, or some representative authorized by said City Council shall keep self-registering dials in said pressure gauge continuously for a month, or as often as is required by the City Council and the said gauge record and the said book record shall each be competent and prima facie proof of the pressure at the point at which such record was made at the time as shown by said gauge record.

Each consumer of gas shall install and maintain suitable piping within his property lines and suitable appliances and fixtures, except meters, subject to the approval of the City Council or such supervisor, inspector or other representative as may be authorized by said City Council to pass upon the same.

The City reserves the right to lay and permit to be laid electric conduits, water and other pipe lines or cables, and to do and permit to be done any underground work that may be deemed necessary or proper by the City Council, in, across, along or under any street, alley, highway, or other public place occupied by the grantee; and whenever, by reason of changes in the grade of any streets, or in the location or manner of constructing water pipes, electric conduits, sewers or other underground structure, it shall be deemed necessary by the City Council to alter, change, adapt or conform gas mains and service pipes of Grantee, such alterations or changes shall be made by the grantee when ordered in writing by the City Council or any supervisor or other representative of the City Council so authorized to act, without any claim for reimbursement for damages against the City; said grantee shall indemnify and save harmless the City of O'Donnell from any and all claims for injury or damages to persons or property occasioned by or arising out of the construction, maintenance, operation or repair of said grantee's transmission, transportation and distributing system, and by the conduct of the business in the City.

The right to use the streets, alleys, highways or other public ways or places of the City of O'Donnell by the Grantee, as provided in section two above, shall be and is subject to the following restrictions, limitations, and conditions viz: that in building additional mains or lines of pipe said grantee shall build and construct the same along and under the alleyways where alley exist, rather than along and under streets, and shall only use the streets for same insofar as may be necessary in connecting from one alley to another; and said mains and pipe line shall be placed below the surface of the street or alley and so as to protect all paving wire cables, water pipes, underground wires or sewer laterals, and shall be so constructed and located with reference to water lines and sewer mains as not to interfere therewith, and under the direction and to the satisfaction of the City Council or the City Engineer.

That the City Council hereby reserves the right to install at the point where said grantee receives its gas for distribution in the City a meter through which all gas for distribution to the City and its inhabitants shall be passed, an adequate self-registering pressure gauge adequate to record the amount of gas distributed to the City and its inhabitants and the pressure at which the same was received by the grantee.

his property lines and suitable appliances and fixtures, except meters, subject to the approval of the City Council or such supervisor, inspector or other representative as may be authorized by said City Council to pass upon the same.

The City reserves the right to lay and permit to be laid electric conduits, water and other pipe lines or cables, and to do and permit to be done any underground work that may be deemed necessary or proper by the City Council, in, across, along or under any street, alley, highway, or other public place occupied by the grantee; and whenever, by reason of changes in the grade of any streets, or in the location or manner of constructing water pipes, electric conduits, sewers or other underground structure, it shall be deemed necessary by the City Council to alter, change, adapt or conform gas mains and service pipes of Grantee, such alterations or changes shall be made by the grantee when ordered in writing by the City Council or any supervisor or other representative of the City Council so authorized to act, without any claim for reimbursement for damages against the City; said grantee shall indemnify and save harmless the City of O'Donnell from any and all claims for injury or damages to persons or property occasioned by or arising out of the construction, maintenance, operation or repair of said grantee's transmission, transportation and distributing system, and by the conduct of the business in the City.

The right to use the streets, alleys, highways or other public ways or places of the City of O'Donnell by the Grantee, as provided in section two above, shall be and is subject to the following restrictions, limitations, and conditions viz: that in building additional mains or lines of pipe said grantee shall build and construct the same along and under the alleyways where alley exist, rather than along and under streets, and shall only use the streets for same insofar as may be necessary in connecting from one alley to another; and said mains and pipe line shall be placed below the surface of the street or alley and so as to protect all paving wire cables, water pipes, underground wires or sewer laterals, and shall be so constructed and located with reference to water lines and sewer mains as not to interfere therewith, and under the direction and to the satisfaction of the City Council or the City Engineer.

That the City Council hereby reserves the right to install at the point where said grantee receives its gas for distribution in the City a meter through which all gas for distribution to the City and its inhabitants shall be passed, an adequate self-registering pressure gauge adequate to record the amount of gas distributed to the City and its inhabitants and the pressure at which the same was received by the grantee.

Said grantee shall also supply and install one distant pressure gauge under the direction of the City Council and at the place designated by the City Council which will indicate the pressure at such designated point said gauge to be placed in the City Hall in the office of the City Engineer.

That after the said gas distribution system shall have been fully constructed, equipped, and in operation as herein provided in the City of O'Donnell, if the said grantee shall then fail to substantially comply with the conditions of this franchise, the City of O'Donnell shall have the right by ordinance duly passed therefor to forfeit all the rights and franchises herein granted to the said grantee, provided that the City of O'Donnell shall give the said grantee, its successors and assigns, sixty (60) days notice in writing, specifying the conditions claimed to have been violated, and giving full and fair opportunity to be heard thereon before declaring such forfeiture which notice shall fairly and fully set out all of the

conditions claimed and complained of and shall be given by the said City and shall be signed by the City Secretary under the seal of the said City, after having been properly authorized by the Mayor and City Council of the said City; provided, however, that the said grantee shall have sixty (60) days after receiving such notice in which to rectify and correct such violations and to substantially comply with the terms and conditions of the ordinance; should the violations of this ordinance so complained of not have been rectified and corrected and the terms and conditions of this ordinance fully complied with at the end of said sixty (60) days, then and in that event the City shall have the power to forfeit this franchise on account of the violations specified in said notice. That in case of forfeiture as herein provided, the City of O'Donnell reserves the right to purchase the distributing plant of the grantee at its fair appraised value or to allow the grantee to remove same within one year from the date of such forfeiture, provided that before any of said property may be removed, the grantee shall be required to give to the City a good and sufficient bond that the streets and alleys will be placed and left in as good conditions as found.

For each and every breach or violation of any of the provisions of this ordinance by the grantee, it shall be liable to a penalty of Twenty-five Dollars to be recovered in any court of competent jurisdiction by suit, of any person, firm or corporation injured or damaged by such breach or violation; and if the breach or violation shall be a continuous one, each day during which such breach or violation continues shall be deemed a separate breach or violation and a separate ground for recovery against the grantee.

That in further consideration of the privileges and franchise granted to the WEST TEXAS GAS COMPANY, it shall adopt and use all and any reasonable safeguards to provide for the protection of persons or property against injury or damage growing out of the use of gas and that they shall construct and maintain in good order all mains, pipes and equipment used in said City for the distributing of gas, and shall always be prepared to furnish said City and its inhabitants a sufficient quantity of gas for all purposes; provided, however, that in case of explosion or accidents of any character or nature beyond the control of grantee, to the main lines or to the distributing system provided herein, or shortage of gas supply in the fields from which grantee secures the gas and the grantee is not able to furnish on account of such unavoidable conditions gas for all purposes, that preference shall be given domestic consumers, schools and hospitals in the use of the gas until such time as the supply may prove adequate for all purposes. Provided further that grantee shall not be liable for any damage resulting from such accidents either to the line of the grantee or to the lines on property of consumers.

It is provided that the grantee shall in good faith begin the construction of its main lines and distributing systems by May 1, 1928, and shall complete such main lines by Nov. 1, 1928, and shall be prepared to serve gas to consumers on or before Dec. 1, 1928, provided, however, that grantee shall not be liable for time consumed out of such period by strikes, acts of providence, acts of constituted legal authorities, or acts beyond the control of grantee.

That the grantee herein shall have the right and privilege of assigning this franchise and all the rights and privileges granted herein, and wherever the word "grantee" appears herein it shall be construed as applying to its successors and assigns.

passage and approval and publication as provided by law.

PASSED AND APPROVED THIS 6th day of October, A. D. 1927.

WHY DEPOSIT IN BANK
BECAUSE—your money is safer in the bank than any place else.
BECAUSE—paying bills by check is the simplest and most convenient method and your check becomes a receipt for the debt it pays.
BECAUSE—a bank account teaches, helps and encourages one to save.
BECAUSE—the bank officials are glad to give to their customers assistance of all kinds, and valuable advice and information that cannot be obtained elsewhere.
TODAY IS THE DAY TO START SAVING!
THE FIRST NATIONAL BANK

A COTTON STUDY PROGRAM THAT MAY BRING MILLIONS TO TEXAS COTTON GROWER

The production of three increasingly large crops of cotton in each of which the yield has outdistanced consumption causing a carryover of 1,610,000 bales in 1924, 3,543,000 bales in 1925 and 3,762,029 in 1926 was accompanied by lowered prices unprofitable production and much dissatisfaction among growers, states Dr. B. Youngblood, director of the Texas Experiment Station, on leave Senior Agricultural Economist in the Division of Cotton Marketing bureau of Agricultural Economics, United States Department of Agriculture.

The spinning utility studies include grade and staple estimates seeking to ascertain the appropriate influence of the supply upon prices when the correct grade, staple and tenability of the supply are known. This feature includes evaluation of the carryover as to grade, staple and character in order that cotton so low in grade as to be unspinnable may not serve to depress the market improperly. An experiment in the determination of grades and staples at selected gins has been begun and from the data secured, estimates will be compiled as to grade, staple and character of the crop in two selected areas representing an annual production of about 1,000,000 bales each. One of these comprises the State of Georgia and the other includes 27 counties in Western Texas and Southwestern Oklahoma. This work is intended to be expanded another year to cover the entire cotton belt and to develop information that will aid in the improvement of the quality of the supply as well as in the removal of untenderable and other low grades from an equal influence with good cotton in the market.

Spinning tests are being run thru cooperation with Clemson college, South Carolina, wherein the different commercial growths or types and varieties of cotton from the different sections of the cotton belt are spun so as to determine the spinning utilities of the various cottons as well as the relative qualities of the breeders who avail themselves of its benefits, to save years of time by having progenies of their cottons tested for these several elements of spinning quality from year to year instead of waiting until the crop has been distributed on a commercial scale. Cottons that have been harvested by different methods such as picking, snapping or riddling are also given spinning tests whose results will probably have a profound influence on the improvement of harvesting methods and of harvesting machinery by use of which the crops may be more cheaply and satisfactorily harvested.

The universal standards now in use are being scientifically checked in the laboratory and the spinning utilities of the lints studied are traced over into the yarns employed in the manufacture of basic fabrics. In the studies of consumption, classification is being made of the demand not only in the aggregate of all cottons used, but the demand for each class or grade which actually should enable production of classes found to be most in demand. Incidentally these studies may lead to the discovery of opportunities for new and extended uses of cotton. A further value may flow from these

studies in that cotton which may be grown to best advantage on particular farms or in particular sections may be further improved by breeding and attention is called to the fact that two-thirds of the Texas crop is still being planted to gin-run seed. Studies of the quantity of the demand as well as of the supply are designed to aid in measuring price-elevating and price-depressing influences and should tend to stabilize the level of actual values.

Doctor Youngblood states that in these studies of consumption, the fact should not be overlooked that the demand for cotton is rather flexible. Beyond the limits of what might be accepted as normal, rising prices curtail, while lowering prices encourage consumption. In any efforts to bring about improvements in cotton marketing, the aim should be a supply and a price which normally would compensate the growers at current rates for productive effort and at the same time tend to encourage a healthy rate of consumption of cotton and cotton goods. The problems connected with such an objective are technical in character and are an appropriate part of any adequate origin of research in cotton.

All in all, Dr. Youngblood's discussion of the program makes interesting reading and copies may be had by making requests to the Bureau of Agricultural Economics, Washington, D. C.

HOME DEMONSTRATION PARTY OCTOBER 31

The Home Demonstration Club will entertain themselves and husbands with a real old fashioned ghostly party Monday Oct. 31 at the home of Mrs. J. B. Curtis.

The County Agent, Miss Milly M. Halsey, will be with us and with a dozen real live women at work on the program, entertainment and refreshments, a very generous good time is assured. Watch for your invitation.

MISS THIRA PAINTER HOSTESS JUNIOR EPWORTH SOCIETY

One of the most happy occasions of the season was enjoyed by the Junior Epworth Society Tuesday from three to six p. m. o'clock when the hospitable home of little Miss Thira Painter was thrown open to its members. Among the games enjoyed was a contest in "Thimble, Thimble, Who's Got the Thimble," in which Mavis Norma Hart was the lucky one winning a doll as prize.

The children were all reluctant to bid this charming little hostess adieu when the time arrived and hope to be again entertained by her.

Delicious fruit custard punch and marshmallows were served to the following: Mavis Norma Hart, Alice Joy Bowlin, Kathleen Veazy, Margaret Hicks, Hope Shook, Frances Ramey, Verda Ballew, Ina D. Everett, Thyna Painter, W. B. Hicks, Jr., Jennie Ramey, Junnie Lee Shook, and J. W. Painter.

Mr. and Mrs. F. N. May returned Tuesday to their home in Santa Anna after a week's visit with their daughter, Mrs. Roy Gibson and son, Homer May and families. They were accompanied home by their little granddaughter, Frances May, who will visit them a couple of weeks.

FOR SALE—160 acre improved farm three miles north of Newmore, 70 acres in cultivation, balance tillable, this place is priced right, can take good car and small cash payment, price \$25.00 per acre.
C. C. Jones, O'Donnell, Texas

REED—BROWN

Sunday evening about 6 p. m., Mr. Olan Brown of Post, and Miss Roena Reed of Slaton drove to our city and at the Pastor's home of the first Baptist Church and were united in Holy wedlock in the presence of a number of folk. After the usual ceremony the young couple, who so recently been made one, drove hurriedly to Slaton.

Messrs Noel Sikes and Naymon Everett went to Lamesa Tuesday night to secure the services of another barber for the Tonsor Barber Shop.

Index Ads Get Results—Try Them

What's Doing In West Texas By W. T. C. C.

Presidio—Rapid progress is being made on the Orient Railway and the lines will soon be to this city from the Old Mexico terminus.

Tulia—Considerable improvement is underway at Hotel Tulia. Gas stoves have been installed, and concrete walks are being laid about the building.

Canadian—The Hemphill County Agricultural Exhibit was shown at three fairs this year, the Tri-State Fair at Amarillo, The Texas-Oklahoma Fair at Wichita Falls and the State Fair at Dallas. This exhibit took third place at Amarillo, fourth at Wichita Falls, and third at Dallas beating every county that scored above it at the other two fairs at the Dallas showing, except Garza county.

Abilene—President R. W. Haynie of this city, and manager Homer D. Wade of the West Texas Chamber of Commerce will motor to Brady on November 10 to attend the annual Turkey Trot held in that place November 11.

Fluvana—Oil and mineral tests are being made in this section, but the Fluvana section is not depending upon such development for prosperity. Agriculture is the main stay of this region. The Fluvana Community exhibit won first place at the 1927 Scurry County Fair, and it displayed many excellent home-grown agricultural products.

Loraine—New four inch water main are being laid into the Templeton addition in the eastern part of town, and will be complete for service at an early date.

Sweetwater—Date for the West Central District Convention of the West Texas Chamber of Commerce has been reset for November 28. The previous date scheduled was November 14.

Stinnett—Work of laying concrete on the highway has been started at the south line of the county and is well under way.

Mason—Native stone is being quarried and hauled on the grounds for construction of a second story to a local building. The addition will house the leading law firm of the city.

Eastland—Plans are now being made for construction of eight or ten new business houses to be occupied by new firms.

Lubbock—The last mile of grading on the Estelline-Lockney-Lubbock line of the Ft. Worth and Denver South Plains Railway above the caprock is underway. Trains are expected to be in operation over the entire line by May first, 1928.

Messrs Noel Sikes and Naymon Everett went to Lamesa Tuesday night to secure the services of another barber for the Tonsor Barber Shop.

Ginger Most Popular Tonic of Middle Ages

Ginger is the oldest spice known. It figures largely on the tables of the Romans. They probably took it to England, for gingerbread was known in England long before the Norman conquest. In the old leech books of the Eleventh and Twelfth centuries ginger is often recommended for medicinal purposes. It was in the Middle Ages that there arose the custom of making gingerbread cakes in the shape of dolls, horses and other objects. In the markets of old times stalls filled with these gingerbread shapes occupied a prominent place. At the fair of St. Bartholomew, in London, the chief articles of merchandise were "peppermint drops, 20 a penny; wooden babies; cakes of gilt gingerbread; and also gingerbread horn books, gingerbread women and gingerbread husbands, of all sizes." The old fashion of gingerbread toys lasted to the last century. In some books of children's stories of the Victorian era may be found allusions to "a gingerbread horse" or "a little gingerbread man." Large quantities of gingerbread "babies" were baked and given to the people to celebrate the birth of an heir—afterward the ill-fated Richard II—to the Black Prince.—London Tit-Bits.

Science Explains How Israelites Were Fed

The nature of the Biblical manna is thought to have been established by an expedition which recently returned from central Sinai.

The traditional theory was that the Biblical manna was identifiable with the tamarix mannifera, a species of the tamarix shrub which exudes a sugary secretion called manna. It was thought that manna was a natural secretion from the twigs or buds which were pierced by rodent insects.

The expedition has determined that manna is an excretion of the insects themselves, which produce a clear syrup-like drops that, if sufficiently abundant, fall to the ground, forming whitish grains from the size of a pin's head to the size of a pea. The quantity of this secretion depends on the rain, but in a good season a man can collect about three pounds a day.

A Free-For-All

Pat was on an ocean liner bound for America. It was his first trip on the water and every ordinary event on the boat was a new one in Pat's experience.

On the third day out the ship burst into flames. The fire was rapidly consuming the boat.

All the passengers were appropriating the life preservers, life savers, and life boats. Pat stood by for a few minutes, watching the mad rush. Finally, perplexed and disgusted, he exclaimed:

"Well, if everybody is goin' to steal stuff off o' the ship, O'll be gosh darned if O'l don't get in on the stealin' myself."

So saying, Pat grabbed a crowbar and jumped overboard.

Frozen Eye Glasses

Optical glasses cannot be cut unless fixed immovably. To this end they are glued to iron frames of different sizes and various shapes. Until recently, when finished the plates of glass have been knocked from the frames with a light mallet, cautiously struck upon the edges of the plates. The work was hard and as the least shiver of the edge, though imperceptible, disqualified the lens, the workman needed a very light, skillful hand. The discovery was made by an expert optician that the blocks of crystal separated more easily when they had been exposed to the cold during the night. This discovery has effected a revolution in the manufacture of special glasses.

Shakespeare Pall-Bearer

In a corner of an old cemetery near Fredericksburg, Va., says Capper's Weekly, a gravestone has been found lying flat on the ground under a tangle of weeds and creepers. The inscription, in old English, is quite dim, but still traceable. It reads:

"Here Lies the Body of
"Edward Heldon

"Practitioner in Physics and Chirurgery. Born in Bedfordshire, England, in the year of our Lord, 1542. Was contemporary with and one of the pall-bearers of William Shakespeare, of the Avon. After a brief illness his spirit ascended in the year of our Lord 1618, aged 76."

His Early Training

Two men had met on the bench at Shrimpsca. Both were attired in swimming costume, and the conversation turned toward this sport. After a few remarks the elder man said:

"I'll race you to the end of the pier and back."

"Right you are," agreed the other who was a professional at the game. "Bet you ten bob I win."

They plunged into the water, and the professional swimmer was badly beaten.

"My stars!" he exclaimed. "Where did you learn to swim?"

"Me?" said the other. "I need to be a newsboy in Venice."—Exchange.

Dobbin Gets Thin

More than one woman rides horse back to reduce; but as often as not it's the horse that gets thin.—Farm and Presidio.

PARENT-TEACHER ASSN.

The P. T. A. met in the High School building Wednesday at 3 o'clock with eighteen present.

The meeting was called to order by the president, Mrs. Dr. Roaten. A letter from the State President was read, inviting us to send delegates to the convention of The Congress of Mothers and P. T. Associations. It was voted to send Mrs. Harvey Everett as a delegate, the date being Nov. 14-18. Some business was taken care of and we were dismissed by Mrs. Paul Gooch.

WANTED—Girl to do housework, at once. Apply at The Popular. Itc

SENIOR B. Y. P. U

The Senior B. Y. P. U. met Sunday at the Baptist church with 19 members present. A splendid program was rendered and enjoyed by all. We meet every Sunday evening and have a good program for next Sunday. We extend a cordial invitation to all the young people of our town to come and join us.

INTERMEDIATE B. Y. P. U.

The Intermediate B. Y. P. U. met Sunday at 4:30. Bro. Horn gave us a good talk.

We elected our group captains, Olen Yandell for one side and Eula Belle Miles for one side. We invite you to come out and meet with us next time.

R. C. Boswell was a business visitor from Lubbock Tuesday and Wednesday. Mr. Boswell is a salesman for the Charles C. Hornsby Hardware Co.

The ex-Seniors of O'Donnell High School will assist in the Style Revue given at the Carnival Friday night. These seniors are the classes of 24-25-26-27 and hope to help make a great success. Don't fail to see the styles from the colonial days until the "flapper" styles of tomorrow.

DON'T FORGET THE CARNIVAL FRIDAY, OCTOBER 28

The High School Carnival will be open from eight to twelve o'clock, Friday, October 28. You are extended a very cordial invitation to bring your money and the children and see the fun. Various booths of all the many interesting and funny things will be provided for your entertainment. Be sure and come!

J. M. Christopher and Mrs. Marvin Cadell, and to other business interests in the

From The O'Donnell Schools

LOW FIRST Mrs. Carl Cox will have a booth at the school Friday, Oct. 28, "For Admission will be 5 cents to see it.

Those present were Jeff Music, Bill Phillips, W. F. McGill, J. F. Lines, W. L. Maxwell, John Etter, Cecil and A. C. Lambrecht.

MILLWEE'S ROOM Mrs. Carl Cox, mother, Mrs. Carl Cox, and served us the best story about the White Cat and Little Benita Sanderson.

HIGH SECOND Mrs. Everett, mother, Mrs. Everett, and served us the best story about the White Cat and Little Benita Sanderson.

LOW THIRD Mrs. Everett, mother, Mrs. Everett, and served us the best story about the White Cat and Little Benita Sanderson.

HIGH and LOW FOURTH Mrs. Everett, mother, Mrs. Everett, and served us the best story about the White Cat and Little Benita Sanderson.

HIGH FIFTH and LOW SIXTH Mrs. Everett, mother, Mrs. Everett, and served us the best story about the White Cat and Little Benita Sanderson.

LOW AND HIGH SEVENTH Mrs. Everett, mother, Mrs. Everett, and served us the best story about the White Cat and Little Benita Sanderson.

week and feel as though we have off victorious. We are just having three days of school this week on account of Institute. The teachers leave Thursday for Tahoka where it will meet. We are all working hard getting ready for the High School Carnival Friday night. This room is to sell pies and polly-pops as our part.

Messrs Payton Stevens and Albert Shipp came up from Wise county last week and are visiting with their uncle, D. C. Stevens.

We are sorry to report the illness of Mrs. J. A. Rickard, but happy to state she is much better at this writing.

Ed Redwine was in O'Donnell Monday attending to business.

Mrs. Mat Cathey was in from their farm near Pride, Monday shopping.

Mrs. C. C. Whipp is here from Waco visiting her brother A. F. Edwards and family.

Mr. and Mrs. L. L. Busby made a business trip to Lubock Sunday.

Mr. and Mrs. J. D. Schooler left Thursday for El Paso after quite a visit here with relatives.

Ben T. Brown of Tahoka was among business visitors to O'Donnell this week.

Bert Bailey was here from Amarillo Monday on business.

Mr. and Mrs. E. L. Sorrells went to Amarillo Thursday remaining with friends and relatives until Sunday.

AUCTION SALE will be held at the A. C. Fairley residence on Nov. 5 at 2 o'clock p. m. D. T. Fairley will sell to the highest bidder many useful articles. Come! 2p.

For Meditation By LEONARD A. BARRETT CONSCIENCE

ACCORDING to the laws of the early Puritans, a man who transgressed the marriage law was punished by death. Upon the woman was branded a scarlet letter. It happened upon this occasion that the judges were more lenient with Hester Prynne and permitted her to substitute for the branding the wearing of a scarlet letter of cloth. Arthur Dimmesdale, refusing to confess his crime, felt something not unlike that pang of conscience expressed by Lady Macbeth: "What, wilt these hands never be clean? All the perfumes of Arabia will not sweeten this little hand."

While Hester Prynne went to her prison cell with her great secret locked in her heart, the soul of Arthur Dimmesdale was harassed with tortures of an outraged conscience. The day of restitution came. He climbed the pylon and confessed in words that all could hear: "I stand upon the spot where, seven years since I should have stood. Lo, the scarlet letter which Hester wears—but there stood one in the midst of you at whose infamy ye have not shuddered." With a convulsive motion he tore away the band, and the scarlet letter which he had worn in secret was revealed. Thus did conscience take its toll. (© 1927 Western Newspaper Union.)

WHEN I WAS TWENTY-ONE By JOSEPH KAYE

At 21—Nellie Meiba was a better pianist than singer.

AT THE age of twenty-one a most important event took place—the marriage of Charles Nesbitt Frederick Armstrong, youngest son of Sir Andrew Armstrong, Bart., of King's county, Ireland, to Helen Porter Mitchell, eldest daughter of David Mitchell of Melbourne, Australia.—Nellie Meiba.

TODAY—The modest woman who married Charles Nesbitt Frederick Armstrong, son of a baronet, is a singer who is as infinitely known in every home as the days of the week. But in those days she little dreamed that she would have such a future. Her ambitions were centered in the piano. It was as a pianist that she gained her local reputation as a musician and it was because of the piano that her father, David Mitchell, took great pleasure in seeing her married. He was against her music study and thought that this event would banish all thoughts of a professional career from her mind.

It was while playing and, just for fun, singing a little, before the wife of the governor of Victoria that the latter told her that her voice was better than her fingers. This eventually led the future prima donna to train her voice. (© by McClure Newspaper Syndicate.)

Odd Contradictions in Famous German Writer

Made miserable by fundamental contradictions in character, Heinrich Heine, a genius best remembered for his poems, cried: "I am tragedy—I am comedy." Though he was probably the greatest German poet of his century, the author of "The Lorelei" was constantly appalled by the vastness of his vision and sought a firmer footing on other paths of expression. When he could curb his poetry he was a splendid journalist.

While he hated despotism he was an ardent admirer of Napoleon. As a cynic his laughter still is remembered for its hilarity at sentiment, yet he was such a sentimentalist that his scorned love for his cousin gave exquisite wings to many a poem. He wrote history without method and philosophy with no crystallized philosophy of his own. The capricious quality that pervades all his writings lurks in even his tenderest poems. He shifts from intense passion to careless mockery.

His life, until his invalidism, was one agony of being jerked from poetry to materialism and back again. Yet when he was made helpless by paralysis this strange man of contradictions, who had been impatient and irritable in health, showed an extraordinary endurance and cheerfulness in the long years he spent on what he termed his "mattress grave." He died in 1856 and lies buried in Paris.—Kansas City Star.

Odd Form of "Prayer" Brought Needed Rain

Desperate after a month of drought in what was supposed to be the rainy season, the peasants in Changshintien recently dressed up two men like fish and marched them down the street, pouring water on them all the way. This is a new method of praying for rain.

It worked, too! For that night Peking and neighboring towns were drenched in a frightful storm. Nothing like it is ever seen in New York. A peculiar sort of lightning, flashing continuously here and there and everywhere, and thunder keeping up a constant "put-putting" sound feature the storm. "Lakes come into existence everywhere. The storm seems somehow symbolic of the approach of threatening nationalist troops.

Strangely, the Pekingese prayed for rain in earnest, too. In White Cloud temple, outside Hsiapienmen temple, and at Hsizu Pailou, coolies, old men and priests burned beads and bowed incessantly. They followed the ancient rain-praying rites.

But the inhabitants of Changshintien are believed to have found a new method of rain praying in the fish parade. People in Peking had not heard of it before.—Brooklyn Eagle.

Animals' Color Sense

The colorful world of green grass and trees, red meat, brownish-gray mice and yellow dogs is all just gray to cats, according to Prof. F. M. Gregg of Nebraska Wesleyan university, who experimented with the color sense of night-prowling animals. Dogs and raccoons also lack color perception. He finds. In his experiments the animals were taught to recognize various color combinations. They learned that when certain colors were shown they could come up and expect to be fed. When shades of gray corresponding in brightness to the different colors were substituted for the brilliant rainbow hues, the animals apparently noted no change in the dinner signals. The dog, a fox terrier, was quickest to learn, the cat next, and the raccoon the slowest of all.

Vital Part of Tree

The stem of a tree, also called trunk and bole, is the main axis extending from the roots to the crown, or to the tip in case of an unbranched stem. Tree stems range from long to short, straight to crooked, and from erect to prostrate. An examination of a cross-section of a stem will show bark, wood, and pith, says the American Tree association. In the central part of the stem is the pith. About it is the wood, which in many trees can be divided into the darker heartwood and the lighter sapwood. Between the wood and the bark is a thin layer known as the cambium. This is the most vital part of a tree, for it is here that all new wood and bark are made up.

Death to Mosquitoes

Efforts to find a poison that will kill the mosquito larvae and not harm fish have been successful in France. Herebefore all poison designed to spread over breeding places of mosquitoes has been harmful to other life, but the new compound will not only spare the fish, but will be harmless to aquatic plants or warm-blooded animals. It is claimed. It is a formaldehyde compound that can be applied with sand.

Dark Rubber Lasting

For rubber articles that are likely to be exposed to sunlight, rubber of the darkest color will stay "alive" the longest. Recent experiments in the rubber laboratory of the United States bureau of standards, reported by Popular Science Monthly, have demonstrated that the shade of rubber goods has much to do with their durability.

Not a Chance

No man under thirty is a match for intelligence for a woman of twenty.—American Magazine.

SAWS By Viola Brothers Shore

FOR THE GOOSE—THE teacher feels sorry for the kids because they got so much to learn an' the kids think they got every bit as good reasons for feelin' sorry for the teacher.

The three hardest words in any language is No, Enough and Goodby.

The main trouble with Enough is, you never know you've got it till you've passed it.

FOR THE GANDER—If you make a noise like a Jackass, you gotta expect women to ride you.

You might not be able to do the things a woman likes, but you oughta be able to lay off doin' the ones she don't like.

Don't joke with a woman. A good fight might convince a woman that she loves you. A wise crack'll make her feel she hates you.

Never expect a woman to be truthful. Look at all the troubles we get into, just bein' frank.

In recent experiments, hens fed on a diet containing no corn, wheat, oats, grass or milk, laid eggs that appeared normal, but the eggs did not hatch.

How It Started By JEAN NEWTON

"KNOCKING THE SPOTS OUT OF HIM"

THIS is an expression used very frequently in common speech in the sense of overwhelming superiority or a "walk-away" victory. Of late it has come into use to express punishment or chastisement, but it is with the meaning of showing superiority of skill and achieving an easy victory that it had its origin. The saying comes to us from the days when every household had its firearms and even children were taught to use them. Marksmanship was the great accomplishment. And though William Tell was dared to shoot an apple off his own son's head, the usual test of much vaunted skill in this direction was to make the target a playing card and the man who could "knock the spots" out of this was admitted to be an expert marksman and an easy winner in any contest.

And so the expression has come down to us to be used in the broader application of unquestionable victory in whatever the matter may be that is under discussion.

Ireland's "Big Wind"

The "big wind" in Ireland in 1839 began before sunset one day and raged for 12 hours. When it finally subsided but precious little was left that could be blown over. It was not a tornado but a full gale. Some 200 houses were blown down and as many more burned as the result of fires started by the wind. Twenty persons were killed and over 100 drowned. The coast of Ireland and the western coast of England were strewn with wrecks. It is said that for hours no one could stand erect in an open field because of the force of the wind. To the Irish who survived it, the "big wind" was comparable to the great September gale, which our ancestors experienced, and to the "blizzard" of 1888.—Pathfinder Magazine.

Duly Announced

Mary, upon answering the door bell, found a couple of women who had stopped to call. As she let them in she called to her mother: "Mother, you have a couple of customers."

Woman Expert Blacksmith

Rosa Steinklauber of Eggenberg, Austria, is one of the best-known artisans in her part of that country. A diploma testifies that she is "duly attested, having served her apprenticeship and satisfied her examiners that she is entitled to call herself a master blacksmith." Rosa is a cartwright as well as a blacksmith. She is a handsome woman, whose strength is equal to that of any man, and can shoe the most refractory horse.

Messrs L. G. H. Williams and W. P. Knox, Scout Executives of Lubbock were in O'Donnell Tuesday on business. They were making a tour of the South Plains Area Boy Scout district.

FOR SALE—Eight Rhode Island Red Cockerels, \$1.50 each. W. S. Venable, O'Donnell, Texas. 4-2tp.

V. E. Bonham was in Oklahoma City last week attending to business, returning Saturday night.

Mrs. Jessie Laurence of Water Valley, Kentucky, is a visitor this week in the home of Mr. and Mrs. E. L. Sorrells.

Dumas—Six new residences are under construction here. Gas and light conveniences are now available systems having been completed just recently. Oil in Moore county has helped the town and promoted record activity throughout the section.

Midland—Opening of the new Mayo Hotel has given approximately 250 Hotel rooms to the city. This number will be augmented to 400 when the new Scharbaur Hotel opens the first of January.

Artesia, N. M.—Twenty-five cars of apples have been shipped from here to date. Production is heavier than first anticipated.

MRS. JOHN. T. JOHNSON HONORS LITTLE DAUGHTER

Little Margaret Lucile Johnson was the happy little honoree at a birthday party celebrating her third birthday, Monday from four to six at her home in the south part of town. After various jolly games were played the children gathered around the dining table where a huge pink angle food cake decorated with three tiny candles graced the festive board. The little honoree did her best to blow out the candles "for good luck" but was assisted by Sonny Boy and Roy Elmo Everett and the candles were extinguished with ease. The children were hilarious over the buttons, pennies and thimbles found in the cake which donated which would be married etc.

Delicious cake and jello were served to the following: Fay Tomlinson, Alice Joy Bowlin, Olita Moore, J. W. Painter, Billie Jones, Wanda Zell Everett, Zanie Lee Jones, Harvey Ann Everett, Jim Ellen eWils, Miriam Chandler, Wilnam Edward Singleton, Mary Louise Singleton, June Gibson, Elvin Ray Moore, Roy Elmo Everett, Ina D. Everett and Christine Etter.

Mrs. Carl Westmoreland and little daughter, Yvonne, arrived Monday from San Saba for a week's visit with Mrs. Westmoreland's parents, Mr. and Mrs. W. L. Palmer.

Tibetan Wild Horse
Figures in Scriptures?

It is thought that the dziggetal, or Kiang horse, approaches as near to the primitive horse as any now found in a wild state. This is believed to be the animal so graphically described in the Book of Job.

The home of this creature, which formerly ranged farther west, is now the high plateaus of Chinese Turkestan between Lake Lob Nor and the mountainous region of Tibet. This plateau is covered with a growth of short grass on which the wild horses graze. The climate is very cold, the mercury in winter sinking to 40 degrees below zero, Fahrenheit.

The Kiang horse is a shaggy animal having bodily somewhat the aspect of a donkey except as to the tail and ears. It is, however, a genuine horse, having rather delicate legs and feet and ears by no means resembling those of a donkey or mule. The color of the head and of the upper part and sides of the body is a reddish tan shading to a bay and, though this color grows lighter from above downward, it contrasts strikingly with the pure white of the inner side of the forelegs.

Along the spine runs a well-defined stripe of thick blackish-brown hair extending to the root of the tail. The hair is long and shaggy and protects the horse against the cold in winter. The dziggetal, like all the other wild horses, live in bands or herds of 100 to 200 individuals, each presided over by an old male. This leader gives the signal when any danger approaches. These animals are preyed upon frequently by wolves, but their most terrible enemy is the ounce or Turkestan panther.

Chinese Have Faith
in Queer Medicines

A famous scientist has recently given an account of the rather scanty training of the average Chinese apothecary.

A Chinese chemist has little knowledge of many of the drugs which modern science has given us, and his principal medicines are derived from plants and animals.

Among his most favored remedies are fly maggots, fish worms, grasshoppers, dried silkworms, and beetles. The roots of the thistle, the lotus, and the ginseng and the saliva of toads are other favorite medicines.

The Chinese chemist of today is working on very much the same lines as the apothecary of the Seventeenth century. We wonder whether the Chinese are very much worse off with only these simple remedies!

Wives Purse Guardians

Statisticians say that in working and middle class families from 75 to 85 per cent of all money is spent by the wives.

Man thinks he supervises the buying because he makes out the checks for bills, but actually he knows little or nothing about those bills. He thinks his wife is no financier because she makes mistakes in adding a column of figures. He forgets that real financiers never trust themselves, but use adding machines. He forgets that the financiering comes in the planning of how the income is to be spent to achieve certain ends and avoid bankruptcy. That the majority of homes are solvent redounds to the credit of the women within them.—Helen C. Bennett in Liberty.

A Parable

Does the possession of wealth make one selfish? We read the other day a quaint parable from the Jewish folk-play, "The Dybbuk": A rabbi led his visitor, a rich old man of miserly disposition, to the window and asked him what he saw. "I see men, women and little children," was the reply. The rabbi then led him to a mirror and again asked him what he saw. "Now I see myself." Then said the rabbi, "Behold—in the window there is glass and in the mirror there is glass. But the glass of the mirror is covered with a little silver, and no sooner is the silver added than you cease to see others and see only yourself."

Inadequately Armed

In a courtroom in Iowa a tramp stood charged with stealing a watch. He stoutly denied the impeachment, and brought a counter charge against his accuser for assault committed with a frying pan.

The judge was inclined to take a common-sense view of the case, and regarding the prisoner, said: "Why did you allow the prosecutor, who is a smaller man than yourself, to assault you without resistance? Had you nothing in your hand to defend yourself with?"

"Your honor," answered the tramp, "I had his watch, but what was that against a frying pan?"

Rubber Replacing Metal

Rubber is proving a durable substitute for iron, steel and other metals in various industrial processes. One of its increasing uses is in linings for grinding mills. In a cement plant where 40-inch rubber sheets were used in a mill charged with 1,000 pounds of steel balls, not even the cloth on the rubber's surface had been worn off after 90 days use, and the rubber was not worn more than one-sixty-fourth of an inch after fourteen months of service, says Popular Mechanics Magazine. One explanation of this is that rubber absorbs the impact.

THE KNIGHTS OF NOW

By DOUGLAS MALLOCH

The knightly man is good to see. Who keeps alive love's chivalry. Though days of knightly now are dim—

No wonder women worship him! No more men wear their coats of mail. But I am sure the Holy Grail Men still may seek. Yes, I am sure The love that leaves a woman pure And leaves unwrinkled woman's brow Is just as necessary now.

The call to knightly now is clear As in the most romantic year.

Perhaps it needs a braver knight Than any ever called to fight In all our most romantic times. For now we live in looser times, And not by any lance's length We measure men, but by the strength With which they keep their morals straight. However others deviate.

Oh, knights of now, of later days, Love calls you still your flag to raise, Your armor wear upon your quest To wear her ribbon on your breast. And keep her image in your heart, Her sweetness something set apart. Her virtue something girt about That not a voice shall dare to doubt. That not a love, familiar grown, Shall stain, and most of all, your own. (© by McClure Newspaper Syndicate.)

THE WHY of SUPERSTITIONS

By H. IRVING KING

ERYSIPELAS CURE

A RATHER widespread superstition among those given to a belief in folklore medicine is that a string of glass beads worn around the neck will prevent or cure erysipelas. Many current superstitions are practically harmless from a physical standpoint. They are merely the indulgence of an atavistic tendency of the mind, a reversion, mentally, to primitivism, which may result in an unhealthy psychological state but work no immediate physical harm. But many of the superstitions of folklore medicine are of positive bodily danger since they induce people to attempt to cure themselves by necromancy and delay calling in a doctor until it is too late. Of such is the superstition under consideration. The great Jass head superposition is a survival of that belief in the magic of gems so ancient and once so universal, and so very largely medical in its bearing. Pliny, the great Roman naturalist, wrote very learnedly upon the curative properties of gems about 2,000 years ago and many a man accounted learned in his day since Pliny has done the same. In various ages and by various savants of bygone years, various curative properties have been ascribed to the emerald; and the green glass bead of our current superstition is, of course, the successor and representative of the emerald.

A long list might be written of the diseases for which, at one time or another, the emerald has been recommended. They used to apply it externally after the manner of the green glass bead necklace, or internally in the form of a powder. The Arab physicians at the time of the height of the Moorish power in Spain highly recommended a "tincture of emerald" to be taken internally. Up to a period not much antedating our Revolutionary war European druggists used to keep for sale powdered gems. Doctor Kunz quotes a portion of a price-list of one such German druggist wherein a pound of "emerald" was offered for 25 cents, which would indicate that the quality of the emerald was hardly up to that of green beads.

SOMETHING TO THINK ABOUT

By F. A. WALKER

OPTIMISM

SEVERAL years ago one of our best bankers in the world gave some of his money for the purpose of establishing a little cheerfulness in the minds of the souls who have looked so long black side of business life that have forgotten that there is a viewpoint.

The banker began his argument with this sentence: "So much in the present situation inspire confidence and hope of a future that there seems to be justification for sane optimism."

Optimism is nothing more than a wise combination of cheerfulness and confidence.

We may have one without the other and still be incomplete. We are assured of individualness and we are likely to be contributors to the joy of the world.

A good many people from a building of air castles. They are a useless and wasteful occupation. Any man or woman with an imagination will indulge in that pastime, and a man or woman of an imagination is poorly equipped for this life's problems and struggles.

The best thing ever said about castles came from Thoreau, contributed to the joy of the world by his confidence and cheerfulness.

"If you have built castles in the air, your work need not be lost; that is where they should grow out foundations under the feet. Could you think of a better life than that; to have the high aspirations and seek to make facts; to foster splendid imaginations and bring them to realities."

One of the reasons that we never found an honest man is because, living in a tub, he set a ground.

The real things of life are the ever-up things. Leave the ground to the worms and the snails, to the creep and crawl.

Find for yourself a place of heights where the air is clear, sunshine is brighter, the view broader and the world is better.

Too many of us go through the existence here looking through a slit. We see so little when the sun is so much to view.

If you have never built an altar to become the architect of one's life. Build it high and big and glorious. Adorn it with your hopes and wish it with your fondest desires, then, as Thoreau told you, put foundations under it. (© by McClure Newspaper Syndicate.)

Moliere Unhappy in His Choice of Mate

Moliere, the great French dramatist, was for a long time in love with Madeleine Bejart, who had accompanied him on his provincial tours, but when he married his bride was Armande, a younger sister of Madeleine.

Armande was twenty years old and Moliere was forty. She was an actress like her sister, and while she was fascinating she was not exactly beautiful. Though it is difficult to get at the truth of Moliere's married life, it is known that Moliere was not very happy. Undoubtedly his wife aroused his jealousy by her eagerness for admiration and her enjoyment of flirtations.

But whether he had deep reason for jealousy, it is impossible to be sure, though many biographers have attacked Armande's character. Three children were born, but Moliere and his wife failed to get on well together and finally they separated. They were reunited, however, shortly before the dramatist's death. The night of February 17, 1673, he struggled through a performance at the theater and then was sent home desperately ill. Before his wife could reach his bedside he was dead.—Detroit News.

Chinese Wall Paper of Exquisite Design

There must be in various parts of England a good deal of old Chinese wall paper such as that which the duke of Atholl recently sold at Sotheby's.

In the Eighteenth century a lot of this wonderfully painted wall paper was brought from China for decorating houses, and possibly some of it has been stored away and never used, as in the case of the 24 rolls which the duke has just sold. These were unrolled, and found just as they came from the East years ago. This Chinese paper is very beautiful, mostly with long-tailed pheasants and other brilliantly hued birds interspersed among bright flowers and green foliage, and the colors remain remarkably fresh and unfaded after being hung a century.

It is said that at Logie house, Aberdeenshire, the seat of Col. George Milne, there is some of this exquisite Oriental wall paper as good as ever it was.

A Rapid Sightseer

All records for rapid sightseeing were beaten recently when a visitor from Detroit did 4,000 pictures in the National Gallery, London, representing six centuries of painting, in twenty-seven minutes, beating by seven minutes the previous record made in 1925 by a native of Buffalo.

The visitor arrived at 12:25 with a luncheon appointment at one o'clock. Since ten o'clock he had visited the Tower, the Monument, the Guildhall and St. Paul's cathedral. He had also done a little shopping in the Strand and, as he remarked, he would have the afternoon free for visits to the British and South Kensington museums and the Wallace collection.—From the Continental Edition of the London Daily Mail.

Qualified Invitation

During a purity campaign in London a meeting was arranged to be held at the City temple, of which Doctor Parker, the famous preacher, was then minister, relates Bramwell Booth in his "Echoes and Memories." Some question arose as to whether a certain labor leader, at that time a bold and active figure, should be asked to speak. He had been already approached and had expressed his willingness to come—"but, mind, none of your d-d religion." Some one put it to Doctor Parker at last definitely whether the labor leader should be invited.

"Oh, let him come," was the doctor's reply; and then in his deepest tones: "Yes, let him come, but, mind, none of his d-d infidelity!"—Kansas City Star.

Easy to Please

Mr. Merryweather had bought a new pair of shoes through the post. When they arrived he was entertaining a bachelor friend.

"You won't mind if I try these on now?" he asked his visitor, and proceeded to undo the parcel.

He slipped his foot into one of the shoes, only to withdraw it with a howl of pain. There was a large nail sticking up in the heel.

"You'll send them back at once, of course?" said the visitor.

"No," replied Merryweather. "I don't think so. The nail was probably put there to keep one's foot from sliding forwards."—London Answers.

Interested in Milking

Junior was visiting his grandparents at the farm and all activities at the dairy barn were interesting to him.

He was getting a supply of cookies from his grandmother at milking time, and she was not hurrying as much as Junior felt that she should.

"Please hurry grandma," he begged. "I want to see them milk, and I must get back; they had the cows all 'parked' when I left."

Know Your Subject

Some people do a lot of talking in order to explain what they have been talking about. The trouble lies in undertaking to talk about what one has not sufficient knowledge. Better know more and talk less.—Grit.

Flute Players Never Popular as Neighbors

Flute playing appears to have gone out of fashion and it has been suggested that this is because of the denunciation that the instrument has received from the pens of eminent writers. Violinists and pianists sometimes figure in fiction as heroes and heroines, but performers upon the flute are generally introduced into novels only as comic or unpleasant characters, says the Philadelphia Inquirer.

At least three comic characters of Dickens were flute players: Dick Swiveller, who took to it as a "good, sound, dismal occupation," and was consequently requested to remove himself to another lodging; Mr. Mell, the schoolmaster, who "made the most dismal sounds I ever heard produced by any means, natural or artificial," and the young gentleman at Mrs. Todgers' musical party who "blew his melancholy into the flute."

Bulwer-Lytton wrote of a clever schoolboy who "unluckily took to the flute and unfitted himself for the present century," and Charlotte Bronte represents "inept curates" as performing upon it. Then there was also Goethe, who summed up the case against the flute thus: "There is scarcely a more melancholy suffering to be undergone than what is forced upon us by the neighborhood of an incipient player on the flute."

Age-Old Difference Over Welsh Emblem

The custom of wearing the leek by Welshmen on St. David's day has been variously accounted for. In the "Festa Anglo-Romana" we are told that it is worn in memory of a great victory obtained by the ancient Britons, who lived in the Welsh region, over the Saxons, they, during the battle, having leeks in their hats for their military colors and distinction of themselves.

Other accounts say that when fighting under their King Cadwallon on a field near Hethfield (or Hatfield Chase) in 633 A. D., in which that vegetable was growing, they won another victory and in jubilation they uprooted the leeks, stuck them in their hats and then returned home.

The custom has certainly remained since that date, as can be seen at any international sporting gathering with which Wales is concerned. The daffodil is largely superseding the leek in favor as the Welsh emblem.

The Button in History

The button is a product of modern civilization, since the ancient people did not have any such form of holding their clothes together. They were first used for ornamental purposes. The next step was the use of the button and loop, the buttonhole being last in the development. Buttons were first employed in southern Europe in the Thirteenth and Fourteenth centuries. Their manufacture in England did not commence until the reign of Elizabeth. The earliest mention of the buttonhole in literature occurs in the year 1561. While men's outer garments are still made with buttons and buttonholes, the trend of the present is away from such fastenings. Almost all women's clothes and many men's undergarments are now made without buttons.

Changing a Mule's Mind

Gen. William Booth, founder of the Salvation Army, used to tell a story of a man in South Africa who was exceedingly successful in dealing with mule teams. Asked how he managed these stubborn creatures, he said:

"Well, when they stop and won't go on, I just pick up a handful of gravel or soil, put it to their mouths and let them taste it. Of course they spit it out again; but as a rule they begin to go on."

"Why do you think it has that effect on them?" persisted his questioner.

"Well, I don't know," was the reply, "but I expect it changes the current of their thoughts!"

Kept the Minutes

The village football club was being reorganized. The vicar was appointed president, and a person of particularly vacuous countenance was proposed as secretary.

"You know how to take the minutes, of course, James?" asked the parson.

The secretary grinned.

"Yes, I know," he replied.

At the next meeting the president announced that the secretary would read the minutes of the previous meeting. The secretary produced his notebook and stood up.

"The meeting lasted twenty-five minutes," he said, brightly.—London Tit-Bits.

Fly's Many Eyes

The greater part of the head of a fly is occupied by the eyes, some several thousand in number, described as compound. Between the compound eyes and near the top of the head is a triangular arrangement of three simple eyes. The upper two are much farther apart in the female than in the male. In spite of the arrangement of the eyes and the great mobility of the head, it is not believed that the vision of flies is especially acute, although the range of vision is wide.

Man's Small Job

The function of woman is to serve the race. The function of man is to serve the woman and the child.—American Magazine.

You will find plenty of Neatsfoot oil and shoe polish at the Electric Shoe Shop. Now is a good time to oil that set of harness.

KNOW TEXAS

In 1925-26 the state of Texas owned 11,697 school buildings valued at \$108,327,862.

Approximately 50 per cent of the Angora goat growing and mohair industry of the United States is located on the Edwards Plateau in Texas.

In 1885 there were 350,000 cattle driven overland from Texas to out of state markets.

The first railroads were built into Texas from the east and north in early and middle seventies.

Cecil Westerman, the popular pharmacist of the Corner Drug Store was in O'Donnell Monday, enroute to his home in Crosbyton after a visit to his mother and sister in Lamesa.

W. M. S. MEETS

The W. M. S. met at the Methodist church with eight members in attendance. The scripture lesson was read by Mrs. Paul Gooch which was the 67 chapter of Psalm.

Letter from Mrs. Averett, ex-zone leader expressing her love and appreciation for the O'Donnell women was read by Mrs. Gillispie.

Mrs. French read a letter from Mrs. Scrimshire, thanking her friend for the gift sent her during her illness.

Mrs. Everett read a letter from Mrs. Gabil Bette Burton, Clarendon, asking for the report of the Historian.

Mrs. Gillispie read a letter from Mrs. Crowley, Lamesa, our new zone leader urging the support and attendance of our society to a meeting in Ackerly in Dec. We were dismissed by prayer by Mrs. Ben Moore.

Attendance Goog At Baptist S. S.

There were 141 in attendance at the Baptist Sunday school last Sunday, and others came in time for church. Two fine young men, one from Rochester, and the other from Five Mile, united with the church on promise of a letter from their respective churches.

The evening services were well attended, and such marvelous attention as is seldom seen was manifest. A number of folk were in the services that do not usually attend. We are glad to have everybody in the services.

Mrs. S. Roaten, eLader.

Mrs. Sid Lawson of Mercury visited in the home of Dr. Roaten at O'Donnell for a short visit Tuesday. Mr. Lawson is deputy sheriff at Mercury.

RHEUMALAX

The latest of all scientific discoveries for rheumatism. It reaches the cause and makes you feel like a new person. No guess work or rubbing on. Sold and guaranteed by O'Donnell Drug Co.

Teachers Attending Institute Today

Pres. Hill of W. T. S. T. C. And Supt. Green of Abilene Will Be Principal Speakers

The teachers of Lynn County will meet in Tahoka for a two-day Institute on Thursday and Friday of next week. The features of these meetings, according to Supt. Baze, will be the addresses of President J. A. Hill of Canyon and Supt. F. D. Green of Abilene. Mr. Hill is president of the West Texas State Teachers college, while Mr. Green is president of the Texas State Teachers Association.

The program has been so arranged that the public will have the privilege of hearing Pres. Hill on Thursday evening. The public is invited to attend all the meetings of the Institute.

To carry out the work the committees appointed directors of the different sections. Supt. J. A. Rickard of O'Donnell was chosen as director of the high school section; Supt. M. B. Hood of Dixie was chosen as director of the intermediate section; Mrs. L. F. Craft of Tahoka was chosen as director of the primary section. M. L. H. Baze was chosen as conductor of the Institute. All meetings will be held in the new high school building.

FEDERATION OF WOMEN'S LYNN CO. MEETS AT WILSON

The Federation of Women's Clubs of Lynn County met at Wilson Thursday, Oct. 20 at 10:30 o'clock. The following program was rendered:

- Song—America: Assembly.
- Invocation—Rev. Thompson, Wilson.
- Welcome Address—Mrs. Lumsden Wilson.
- Response—Mrs. Harvey Everett, O'Donnell.
- Music—Miss Esther Howell.
- Roll Call—Answered by books and magazines we enjoy most in our homes.
- Luncheon from 12 to 1 o'clock.
- Business Session
- Solo—Miss Velma Dawson.
- Consolidation of Rural Schools—Mr. Cavness.
- Violin Duet—Rev. Roth and Brown Bishop.
- The Value of a County Library to our Community—Miss Lelia Latch.

How to Develop a Taste for Good Reading—Mrs. R. W. Fenton.

This meeting at Wilson Thursday when the above program was given is one of the steps in the upward climb that Lynn county has shown in the eighteen months. Every number rendered was an inspiration and created a desire in the hearts of the hearers for the better thing of life which the Federation has to offer.

The address by Mr. Cavness himself was a rare treat and worth a trip to Wilson. Both Miss Latch and Mrs. Fenton entertained and held the attention of the audience by their deep and earnest entreaties for better literature in the homes and schools of our land.

The luncheon prepared by the Wilson members was bountiful and delicious and beautifully served. In the business session, this being the date for the election of officers, the following were elected: Mrs. Harvey Everett, O'Donnell, President; Mrs. R. H. Bates, New Home, first vice-president; Mrs. J. A. Beasley, T-Bar, Second vice-president; Mrs. Paul Gooch, O'Donnell, Secretary-treasurer; Mrs. R. W. Fenton, Edith, Parliamentarian, Mrs. Rayburn Metcalf, Wilson, Reporter.

A paper prepared by the visitors was read extending a rising vote of thanks to the Wilson members for the gracious hospitality shown the guests.

The next meeting of the Federation will be held in Tahoka the 1st Saturday in May, 1928.

The meeting was dismissed by prayer by Mrs. R. W. Fenton.

GAS SPOILED SLEEP. MADE HER DIZZY

"For years I suffered from gas and constipation. Used to get headaches and dizzy spells. The first dose of Adlerika gave me relief. Now I rest."—Mrs. B. Brinkley. Just a spoonfull of Adlerika relieves gas and that bloated feeling so that you can eat and sleep well. Acts on BOTH upper and lower bowel and removes old waste matter you never thought was there. No matter what you tried for your stomach, Adlerika will surprise you. Corner Drug Store

OBSERVERS ACCLAIM BEAUTY OF NEW FORD

Detroit, Oct. 25—In view of the recent announcement of the Ford Motor Company that its assembly lines would start in a few days, the Ford cars now undergoing tests on the roads adjacent to the Ford engineering laboratory are doubtless the finished product. Ford dealers and "other interested parties" are not waiting for the formal showing to see the new car. Large numbers daily gather at the well garded entrances to the laboratory grounds at Dearborn, where at least long range or fleeting view can be had of the car equipped with the new bodies.

What first strikes the observer is the eye-appeal of the new cars. The colored bodies and beauty of design plainly indicate that Ford has definitely abandoned his utility purpose alone. The sharp angles, height, "thrown-together" look and drabness of the old Ford have been supplanted by curves, stream-lines, symmetry and variety. At least half dozen different colors were noted in the three body types seen on the road on afternoon. These are grays, blues, tan and different shades of green, together with combinations of colors. While a close up could not be had, it is believed the upholstery will be of closely woven dark gray wool with stripings of various colors.

From a performance standpoint, it was observed from the roadside that the Ford is not lacking in acceleration, fleetness and silence. At one time a new coupe model passed, doing about 60, and with the apparent ease of the highpowered car which playfully challenged its speed. As they passed, the sound of the Ford motor was not distinguishable. From standpoint of performance and

eye-appeal, the new Ford even distantly related to the "ver."

RUBY HENDRICKS SOCIETY

Last Monday a group with Mrs. W. B. Hicks hour. Several enjoyable played then the officers for the coming year: Be president; Louise Edw president; Florence Hend retary; Trixie Harville, Hester Gates, reporter a gram committee consisted Joe Gates, Earl and Eva
