

ZERO WEATHER

Minus Temperature Reported in the Northern States.

FREEZING IN SOUTHERN

An Intense Cold Wave General Over the Entire Country.

WILL CONTINUE ANOTHER DAY

Previous Records for This Season of the Year Lowered—Freezing Weather in Texas and Florida—Nearly at Zero in Tennessee—Leadville Poses as a Tropical Resort, While the Rest of the Country Shivers—Warmer Weather Promised in Colorado Today—Snow Blockades and Suffering Reported From Many Sections.

Washington, Jan. 25.—The reports received by the weather bureau show an intense cold wave over the entire United States and there are no indications of relief within the next 24 hours.

The temperature has fallen decidedly in the southern and middle Atlantic states, and it has risen slowly in the Missouri and upper Mississippi valley and over the greater portion of the lake region.

The indications are that generally fair weather will prevail tomorrow in the central valleys and on the Atlantic coast north of Florida.

The weather is generally clear tonight, except in the St. Lawrence valley, the Gulf states and central Rocky mountain districts, where local snows are reported.

SEVENTEEN QUESTIONS

Will Be Asked by the Committee on the Leadville Strike.

A THOROUGH INVESTIGATION

Parties Interested Have Received Formal Notice to Appear Before the Committee—The Labor Union, the Managers, the Sheriff's Office and the Militia Are All to Be Investigated.

Special to The Gazette.

Denver, Colo., January 25.—The joint legislative committee on the Leadville labor troubles, consisting of Senators Reuter and Gallagher and Representatives Annear, Sechrist and Gardner, met this afternoon at 10 o'clock to consider the report of the committee on the trip which the committee will take to Leadville to investigate the conditions existing there.

The committee will leave Denver Thursday night, and upon arriving at Leadville will examine witnesses representing both sides of the controversy. A formal notice to the parties interested to have witnesses ready to appear before the committee was mailed tonight.

The committee will make a most rigid investigation and to this end have prepared the following list of questions to be answered:

1. What was the relation of organized labor and the employers preceding the strike, including wages paid and agreements that existed between them?

2. Were any but union men employed in the mines at the time of the strike, and if so, what was the nature of the employment?

3. What was the nature of the organization of the employers? Did the organization exist before the strike? Who composed the employers' organization, residents or non-residents of the county?

4. Did the employers prepare to resist the strike? Did they employ armed men? How many? What efforts did they make to seek protection from civil authorities? Did the employers resist violence as an organization or as individuals? If as individuals, who were the leaders?

5. Were there any negotiations for avoiding the strike prior to the time the strike was declared? What were they? Were there any negotiations after the strike was declared? What were they? Were there any negotiations after the strike was declared? What were they?

6. How many men were employed in the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

7. What was the nature of the output of the mines affected by the strike, before the strike? Their present output? What would be the probable output on resumption?

8. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

9. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

10. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

11. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

12. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

13. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

14. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

15. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

16. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

17. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

18. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

19. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

20. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

21. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

22. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

23. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

24. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

25. What was the nature of the output of the mines before the strike? How many struck? How many are now employed and where? How many are now unemployed and where? How many would find employment if the strike were settled?

A HEROD OF HAVANA

General Weyler So Denominated by Senator Turpie.

INDESCRIBABLE -- DIMINUTIVE

The Indiana Senator Calls the Captain General a Reptile, But Eulogizes Maceo—Congressional Right to Recognize the Cuban Republic Ably Defended—Canal Bill Postponed.

Washington, Jan. 25.—In the senate today Mr. Turpie of Indiana, characterized General Weyler as the "Herod of Havana," "the murderer of women and children," and as an "indescribable diminutive reptile."

The bitter words were incident to Mr. Turpie's speech of two hours on the Cameron Cuban resolutions. The speech did not develop the criticism of the secretary of state which had been foreshadowed by the remarks last week, as the senator confined himself largely to a careful analysis of the constitutional rights of congress, his conclusions being that congress, as representing the people, has the paramount authority over recognizing new governments.

Mr. Turpie frequently turned aside from his arguments to pay a glowing tribute to the present government and its leaders. General Maceo was eulogized as a hero, whose memory would be honored by the people of Cuba. He also eulogized the American people who honored the hero of the revolution.

In connection with General Maceo's death the senator referred with bitter denunciation to General Weyler. Mr. Turpie did not conclude his speech and expects to proceed tomorrow.

After 3 o'clock the day was devoted to eulogies of the late Speaker Crisp.

Investigation Asked.

Early in the day memorials were presented from the judicial electors of Delaware asking for a congressional investigation of alleged fraud and political irregularities in that state.

Mr. Chandler presented a bill providing that no person shall be tried in the courts of the United States for acts in aid of the republic of Cuba. The resolution was referred to the judiciary committee.

The military academy bill was considered briefly. Mr. Thurston (Rep.) of Nebraska, urging that the West Point cadets should be permitted to attend the inaugural ceremonies. The bill was laid aside to allow Mr. Turpie (Dem.) of Indiana to speak on the Cameron resolution for the recognition of the independence of Cuba.

Senator Turpie's Speech.

The senator was given close attention, his associates taking seats about him and the galleries filling. As he began, Senator Chandler and others of the Cuban representatives entered the galleries.

Spain's title to Cuba, Mr. Turpie said, was not one she could alienate to any power but the United States, nor could she alienate her title to the islands when its inhabitants concluded that the sovereignty of Spain and her advisers were cruel enemies and oppressors of the people.

Spain's title to Cuba, Mr. Turpie said, was not one she could alienate to any power but the United States, nor could she alienate her title to the islands when its inhabitants concluded that the sovereignty of Spain and her advisers were cruel enemies and oppressors of the people.

SUITS FOR SMALL BOYS

How Ultra-Swell Mammals Dress Their Pats. WASHINGTON'S RUSSIAN FAD

Smart Military Models Affected and the Little Heroes Now Clothed in Garments That Suggest Gunpowder.

They say down at the national capital that the Russian craze has struck mothers there with such force as to bring the coronation of the czar that they have given up dressing their small sons in sailor suits, and that the most of the Washington mothers are now dressing their little heroes in the most stylish thing for the small boy, said an au-

A Dress Suit and the Admiral.

thority on this subject. "The latest one I made of blue, well-finished serge, has either long or short trousers. If short they are full, like golf trousers, but are not finished with the golf cuff at the knee. The blouse is closed in front and has a yoke effect. A white serge shield, a broad collar, deep cuffs, trimmed with white braid, give the finishing touches. Another new style is the Admiral. It is intended for boys up to 12 years of age, and is a favorite

The Little Chap.

with the little caps. The vest of this suit fastens behind and is finished round at the bottom. The coat is short, something like an Eton coat, and is cut away so as to show a good deal of the vest.

For school and general wear the plain double-breasted sack suit is the leading style for boys from 7 to 16 years. Plain, fancy mixed, and checked cassimers and chevrons and gray corduroys are the best materials for ordinary wear, though the last is more used for outing suits. These suits have no vests.

RELIQS OF ROYALTY.

Auction Sale of Kaiser Wilhelm's Old Clothes. A large quantity of clothes worn by Kaiser Wilhelm I. were sold at auction recently in Berlin, says the London Daily Graphic. There imperial relics were given by the Emperor to Herr Engel, superintendent of the wardrobe who died a few days since. Among the objects of historical interest were the black civilian dress worn by the Emperor when he was met at the station by Becher at Baden Baden, and this same suit was worn by the then King of Prussia at Bad Ems before the Franco-German war; several military uniforms of the different German regiments, and a helmet of the Russian Grenadier regiment, "King Frederick William III of Prussia." The most interesting relic is, however, a portfolio in stamped calf, containing some small sheets of paper on which the Emperor made his first attempt at writing when he was only a few years of age.

An American Girl's Success.

Miss Essie MacDermid, the young American soprano who has been scoring such successes with the Carl Rosa Opera Company, is a native of Chicago, and from a very early age showed a special aptitude for music, especially operatic. In her birthplace she studied singing under Signor Jannotta, but she showed such great promise that it was soon decided that she should go to Paris and there work under Madame Marchesi. Last season she was one of the principal successes of the private London musical world, and at the same time a protegee of Baroness de Hirsch, Lady de Grey, Lady Helmsley and Madame Bischoffsheim. Her voice is of wide range, considerable power and unusual sweetness, and her acting promises to be all that can be desired. She has already made successes as "Carmen" and "Iris," and is well as having created the title role in "Grace Darrell" by Mr. F. C. Collinge.

Who Counted Them?

On an average each Englishman writes 40 letters a year, each Scotchman 30 and each Irishman 16. The average Italian only posts six, and the American 21.—Answers.

Both Deadly.

"He died from a complication of diseases, I understand?" "Yes; either that or from a complication of doctors."

An Unknown Quantity.

THE GAZETTE OFFICE OPEN.

For the benefit of our advertisers and subscribers and the public generally, we desire to call attention to the fact that the business office of The Gazette is open until ten o'clock at night every day in the week, including Sundays.

THE BOARD OF HEALTH TAKE NOTICE.

We called the attention of our Board of Health a few days ago to the fact that Colorado Springs had no mechanical equipment nor stipulated precautionary measures, regulating the disinfecting of homes when necessary, and the health guarding of the same.

The story of the decline of Mentone may be untrue, we are inclined to believe it false, but we do not have to go abroad to discover the interest taken in the matter.

St. Louis is now taking forcible action, and New York city has just adopted and issued the following amendment to its sanitary code, in which it declares that pulmonary tuberculosis is an infectious and communicable disease dangerous to the public health:

"It shall be the duty of every physician in this city, the amendment proceeds, 'to report to the sanitary bureau in writing the name, age, sex, occupation, and address of every person having such disease who has, or is suspected of having, or who has come under the observation of such physician for the first time, within one week of such time.'

"It shall also be the duty of the commissioners, or managers, of the principal, superintendent, or physician of each and every public or private institution or dispensary in this city to report to the sanitary bureau in writing, or to cause such report to be made by some proper and competent person, the name, age, sex, occupation, and last address of every person afflicted with this disease who is in their care or who has come under their observation, within one week of such time.

"It shall be the duty of every person sick with this disease, and of every person in attendance upon any one sick with the disease, and of the authorities of public and private institutions or dispensaries, to observe and enforce all the sanitary rules and regulations of the Board of Health for preventing the spread of pulmonary tuberculosis."

Perhaps it might be well for our Board of Health, if it ever takes any action in this matter, also to frame a suggestion to the municipal powers, that spitting indiscriminately along our sidewalks is another menace to public health and it should be stopped, according to the laws already passed, but never enforced.

A CITY OF THE FIRST CLASS.

Colorado Springs being a first-class city, it should naturally be a city of the first class. This argument may appear a sentimental one, but there is more in it than appears at first sight.

Further are our city is justly entitled to the honor. The wisdom of Colorado lawmakers has ordained that cities containing more than 15,000 may be better managed and governed by a system differing in some particulars from that applicable to towns of smaller population.

It is evident that a form of government which meets the wants of a village of 2,000 or even 5,000 people is not adequate to the needs of such a city as Colorado Springs now is. These advantages would already have been ours according to the operations of the general law, if it had not been for the failure of the legislature to pass the measure providing for the census of 1885, and the bill which will be introduced by Senator Seldomridge this week only repairs so far as this particular is concerned an omission of the legislature.

The bill then should go through as a matter of course, unless its opponents can show a reason why Colorado Springs should be made an exception to the state law now governing the organization of cities in this state, or a reason why that law is defective. The most important arguments which can be made against the bill are that it will involve additional expense and that it will open the door for abuses. Both of these statements are true.

There are no active duty in the United States navy six rear admirals. Each of these has nearly arrived at the age for retirement from the active list. They are Rear Admiral George Brown, commanding of the Norfolk navy yard, John G. Walker, president of the light house board, Washington, D. C.; F. M. Ramsay, chief of the bureau of navigation, Washington, D. C.; W. A. Kirkland, commanding of the navy yard at Mare island, Cal.; L. A. Bearse, flagship Philadelphia, and commanding of the Pacific station, and Thomas O. Selfridge, flagship Minnesota, commanding European station.

All these admirals will have been placed on the retired list prior to July 4, 1888.

The Being Sea Dispute.

It is to be regretted that the correspondence sent by the president to the senate on Monday relative to the arbitration treaty does not afford an explanation of the provision in the treaty excluding the Bering sea question from the conditions of arbitration agreed upon.

SPIDERS AS PETS, AND WRITERS AS FAKES.

The demand for novelty of topics on professional writers, and especially magazine writers, drives some of them to queer and often ghastly expedients.

zine of the day (and their name is legion), are "fakes," pure and simple, they are told as facts and with the deliberate intention to deceive.

Conventional human nature has regarded spiders with aversion and loathing from time immemorial. And now conventional human nature is told that it is entirely wrong and has been doing that interesting insect a gross injustice for ages.

Mr. McKinley's New Suit. It is announced that during the inauguration ceremonies Mr. McKinley will wear a suit of clothing made of worsted goods manufactured at a mill in Connecticut.

There is only one fault with Margaret's beautiful little essay on how to make home attractive, and that is its brevity. But probably it is a continued story and the next instalment will tell a bread-maker's wife how to "fascinate" her husband.

It would also be the part of wisdom to keep on a dog, cats and canary birds as waste-baskets for overflowing affectionate natures until we hear from Margaret Wentworth Leighton again.

The Rev. Dr. Henry McCook of the famous "fighting McCook family," is the only person in real life whom we ever knew to have a genuine banking after spiders.

Here is a chance for the stamp collector. The Cuban republic's stamps are out, and it is understood that as soon as our postoffice department becomes aware of the existence of an attempt to use them, they will be barred from the mails.

SPRIT OF THE TIMES.

Noteworthy Opinions of Journals of the World.

John Sherman and the Coming Administration. Burke said that "the great difference between the real statesman and the pretender is that the one sees into the future, while the other regards only the present; the one lives by the day and acts on expediency, the other acts on enduring principles and for immortality."

Nevertheless, Mr. Sherman is a man of prudence, and partisanship aside, he will not in his high office be apt to follow the course of the dog in the manger. Besides, as man advances in years the love of country and of religion grows stronger, it is said, in his breast; and, at any rate, age is likely to temper the tone of his mind.

It has always been a partisan, and has lived by the day and acted on expediency. He has at different periods of his career energetically applauded and denounced the most diverse views on the many questions. And it is not reassuring to contemplate at the head of the department of state a man whose ability course in respect to our foreign affairs has been conspicuous and endurable. His life is unsuited to act "on enduring principles and for immortality."

Nevertheless, Mr. Sherman is a man of prudence, and partisanship aside, he will not in his high office be apt to follow the course of the dog in the manger. Besides, as man advances in years the love of country and of religion grows stronger, it is said, in his breast; and, at any rate, age is likely to temper the tone of his mind.

Rules of the Navy.

There are no active duty in the United States navy six rear admirals. Each of these has nearly arrived at the age for retirement from the active list. They are Rear Admiral George Brown, commanding of the Norfolk navy yard, John G. Walker, president of the light house board, Washington, D. C.; F. M. Ramsay, chief of the bureau of navigation, Washington, D. C.; W. A. Kirkland, commanding of the navy yard at Mare island, Cal.; L. A. Bearse, flagship Philadelphia, and commanding of the Pacific station, and Thomas O. Selfridge, flagship Minnesota, commanding European station.

All these admirals will have been placed on the retired list prior to July 4, 1888.

The Being Sea Dispute.

It is to be regretted that the correspondence sent by the president to the senate on Monday relative to the arbitration treaty does not afford an explanation of the provision in the treaty excluding the Bering sea question from the conditions of arbitration agreed upon.

SPIDERS AS PETS, AND WRITERS AS FAKES.

The demand for novelty of topics on professional writers, and especially magazine writers, drives some of them to queer and often ghastly expedients.

both countries. It involves an exorbitant indemnity claim by Great Britain. This fact was probably the consideration that induced England in demanding the exclusion of the Bering sea question from the provisions of the new treaty.

It is somewhat unfortunate that the arbitration proceedings connected with this dispute, before the Paris tribunal, reflect rather discouragingly upon such a method of adjusting contested rights or claims between this government and Great Britain. However this may be, it is a fact that despite the long drawn arbitration proceedings in this case the dispute is still hanging in suspense, and in the meantime the bitter slaughter of the seals continues with unabated rapacity and cruelty.

It is difficult to believe that Great Britain, in view of the professions she now makes of a most peaceable and reasonable disposition, will continue to hold out against a humane consideration of this question, simply because congress refuses to sanction the ridiculously bad bargain of Mr. Cleveland and his secretary of state in the proposed adjustment of her Bering sea claims.

Parisian women, according to the New York Times, are now wearing a face-protecting mask, which shields their flesh from the cutting winds and thus prevents the hardening of the skin, which is caused by exposure. If such a woman makes her appearance in Fairmount Park she must not be mistaken for a bold, bad highway robber.

A minister once submitted an account for tithes to a blacksmith, with the exclamation, "But I don't go to your church!" "No, but the door of my church is always open."

"America," writes the Rome correspondent of the Paris Echo, "has a number of wonderful women. There is one here, Mrs. Reynolds, the secretary of the humane education committee of Rhode Island, who has presented a petition to the pope, praying for the abolition of the law which is signed by Miss Frances Willard, Lady Henry Somerset and Miss Clara Barton, and in which the pope is beseeched to give his blessing to the kindness to animals to Catholic teachers throughout the world. Such a recommendation from the head of the Roman church would have a most beneficial effect on dogs, as well as human beings."

The Boston Daily Advertiser is responsible for the statement that the pet aversion of the emperor of Austria is bath rooms. So set is her majesty in this antipathy that she positively refuses to take her morning splash in the same room two mornings in succession. She always bathes in a transportable tin tub, which when she is ready to get into her bedroom, breakfast room or study, just as the freak takes her. Another of Elizabeth's eccentricities is her mourning. Since the death of her son she has not worn a vestige of anything but black. Underwear, night-dresses—everything, must be black. In this matter she completely distances Queen Victoria, who for years was the champion royal mourner of Europe.

The Philadelphia Press states that a Moscow dentist has solved the problem of supplying the teeth which will grow into the gums as firmly as natural ones. Mr. Zamensky has performed several successful operations on dogs, as well as human beings. The teeth are made of gutta percha, porcelain or metal, as the case may be. At the root of the false teeth holes are made and also made upward into the jaw. The tooth is then placed in the cavity. In a short time a soft granulated growth finds its way from the patient's jaw into the holes in the tooth; this growth gradually hardens and holds the tooth in position. It is stated that it does not matter whether the cavity in which the tooth is to be placed is one from which a natural tooth has been removed, or whether it has been healed for some years.

The Philadelphia Press states that a Moscow dentist has solved the problem of supplying the teeth which will grow into the gums as firmly as natural ones. Mr. Zamensky has performed several successful operations on dogs, as well as human beings. The teeth are made of gutta percha, porcelain or metal, as the case may be. At the root of the false teeth holes are made and also made upward into the jaw. The tooth is then placed in the cavity. In a short time a soft granulated growth finds its way from the patient's jaw into the holes in the tooth; this growth gradually hardens and holds the tooth in position. It is stated that it does not matter whether the cavity in which the tooth is to be placed is one from which a natural tooth has been removed, or whether it has been healed for some years.

It has been evident from the start that the treaty now before the senate was only an entering wedge, and that the event of its ratification it would speedily be followed by similar agreements with other peoples. The utterances of the newspapers of Europe and the opinions of leading European statesmen all were substantially to that effect and many were directly so. And still there are some who insist that the Anglo-American treaty.

Mr. Teller declares John Sherman incompetent for his position of secretary of state. Mr. Teller has not forgotten that in 1890 John made him believe that the purchase of the Alaska territory of silver bullion per annum would be at least and perhaps quite as good as free coinage and 16 to 1, and thus beguiled him to drop the bomb he had in his mouth for one he saw in the water.—Nebraska State Journal.

It is to be regretted that the correspondence sent by the president to the senate on Monday relative to the arbitration treaty does not afford an explanation of the provision in the treaty excluding the Bering sea question from the conditions of arbitration agreed upon.

Comments and Clippings.

It is estimated that 25,000,000 roses and 20,000,000 carnations were sold in Greater New York last year.

Dr. Nansen is receiving \$25,000 per week for telling the people of Europe how cold it is a considerable distance this side of the North Pole.

Sir Arthur Sullivan can now command \$3,500 down for one song, while from "The Lost Chord" alone it is said that he has realized over \$50,000.

Of all countries the United States sends the largest number of students to Germany. In view of the fact that the year is supposed to have been well above 400.

"He was about the meanest man I ever knew," said the woman in black. "He left me as much as he could while he lived and as little as he could when he died."—Chicago Times-Herald.

A religious sect at Orissa, in the Bengal presidency, worship Queen Victoria as their chief deity. It has been discovered that she is also an object of worship in one of the temples at Toolmoong in Thibet.

Mrs. Harriet Worrell, Brooklyn's strongest woman chess player, has commenced a course of training for the chess tournament which is being arranged in London by the British Ladies' Chess club.

A Chinese girl, the daughter of a prominent magistrate in the province of Shantung, China, is her father's treasurer, accountant and general assistant in the business pertaining to his public office. She is called a "new woman" by her associates.

Mrs. M. S. Wade, of Chicago, manufactures the peculiar yellow paper used by the telegraph companies and the press associations, and she has grown wealthy from it. The process of manufacture is a secret which she will not disclose.—Demorest's Magazine.

"Might I ask," said the lady from South America, "why that plain person at the far side of the room arrogates unto herself so many airs?" "She is a Daughter of the Revolution," said the one interrogated, in awed tones. "Her ancestry fought in the Revolution."

"Oh," said the lady from South America, "I myself am a daughter of 17 of them."—Indianapolis Journal.

A minister once submitted an account for tithes to a blacksmith, with the exclamation, "But I don't go to your church!" "No, but the door of my church is always open."

"America," writes the Rome correspondent of the Paris Echo, "has a number of wonderful women. There is one here, Mrs. Reynolds, the secretary of the humane education committee of Rhode Island, who has presented a petition to the pope, praying for the abolition of the law which is signed by Miss Frances Willard, Lady Henry Somerset and Miss Clara Barton, and in which the pope is beseeched to give his blessing to the kindness to animals to Catholic teachers throughout the world. Such a recommendation from the head of the Roman church would have a most beneficial effect on dogs, as well as human beings."

The Boston Daily Advertiser is responsible for the statement that the pet aversion of the emperor of Austria is bath rooms. So set is her majesty in this antipathy that she positively refuses to take her morning splash in the same room two mornings in succession. She always bathes in a transportable tin tub, which when she is ready to get into her bedroom, breakfast room or study, just as the freak takes her. Another of Elizabeth's eccentricities is her mourning. Since the death of her son she has not worn a vestige of anything but black. Underwear, night-dresses—everything, must be black. In this matter she completely distances Queen Victoria, who for years was the champion royal mourner of Europe.

The Philadelphia Press states that a Moscow dentist has solved the problem of supplying the teeth which will grow into the gums as firmly as natural ones. Mr. Zamensky has performed several successful operations on dogs, as well as human beings. The teeth are made of gutta percha, porcelain or metal, as the case may be. At the root of the false teeth holes are made and also made upward into the jaw. The tooth is then placed in the cavity. In a short time a soft granulated growth finds its way from the patient's jaw into the holes in the tooth; this growth gradually hardens and holds the tooth in position. It is stated that it does not matter whether the cavity in which the tooth is to be placed is one from which a natural tooth has been removed, or whether it has been healed for some years.

LOCAL HAPPENINGS

Mineral Rock and Garfield-Grouse Injunction Suit.

MOTION TO DISSOLVE THE WRIT

Hearing Before Judge Lunt—Other City News—There Were Two Splendid Concerts in the City Yesterday—Yaw at the Coliseum, and Joe Newman at the Opera House.

Before Judge Lunt yesterday in the first division of the district court, was begun the hearing in the injunction suit of the Mineral Rock and Bankers company against the Garfield-Grouse. The hearing is on the motion of the defendants to dissolve the injunction. There is considerable interest in the case, and the court room was full of people all day.

It was quite late before they got down to the taking of the evidence, and a hour of adjournment only three or four witnesses for the Garfield-Grouse people had been examined. The other side will introduce its testimony today.

The plaintiffs in the suit are represented by Charles J. Hughes of Denver, and F. E. Brooks represents the Bankers company. Charles S. Thomas of Denver and Hall, Preston & Babbitt and Mr. Kincaid represent the Garfield-Grouse company.

There are two or three features to the suit, and in the present trial motions to dissolve two injunctions are being considered. The Mineral Rock company and the Bankers company brought suit some months ago against the Garfield company for trespass and asking damages. The ground in controversy is only a few small strips. An injunction was secured, and after a hearing before Judge Harris it was removed in part. On the 4th of January the plaintiffs went before a judge in Denver and secured an injunction against the Garfield-Grouse, restraining the payment of the dividend then due.

It is a hearing on a motion to dissolve both of these injunctions that is now on. The Garfield-Grouse people do not deny that they are working in the Mineral Rock side line, but claim that they have the apex of the vein and have followed it down on the dip into the Mineral Rock side line, which under the laws they have a right to do.

The Mineral Rock claim to have the apex of the vein, and that the vein now being worked by the Garfield-Grouse is only a stringer and not the main vein; that the Grouse people have left their own vein and are working in its territory. The Mineral Rock features to the case, such as the formation of two or three different companies by the same people and the transferring of property, have become of some importance only on the final hearing.

The evidence introduced yesterday was by the Garfield-Grouse people, and was largely expert testimony as to the apex of the vein, and the general underground workings.

YAW CONCERT.

Second Appearance of the Accomplished Vocalist.

The body of the house was filled at the Coliseum last night to hear the second concert by that wonderful singer, Ellen Beach Yaw, and her company of artists. The programme was equally as good as that of Saturday night, and Miss Yaw again demonstrated the fact that she can reach the highest notes with perfect ease. Her lower register was also shown to be very good. Her rendition of the mad scene from Hamlet was a duet, and she interpreted it well. At the close of the program Miss Yaw rendered "Home, Sweet Home," with all the pathos it required. Mr. Maximilian Dick, the violinist, again captivated the audience. He played the "Faust Fantasia," by Sarasate, and the "Dance of the Phantoms," by Bazzini, with wonderful execution.

NEWMAN COMPANY.

The organization proved a popular entertainment. The Joe Newman Concert company, which is about to make a tour of the state, gave their opening concert in this city last evening at the opera house. Notwithstanding the counter attraction at the Coliseum, a full house greeted them. Joe Newman has become so well known and so universally liked in this state, that it seems only necessary to post his name on a bill board with the date of his appearance and where he will appear, to bring a large and appreciative audience to greet him.

Some new talent of excellent merit has been introduced into the Newman Concert company, and a few words regarding them is not out of place. Miss Eugenie Barker, soprano, made her debut before a Colorado Springs audience last night. That her efforts were to become famous in the world of singers have not been in vain she clearly demonstrated last night. A sweet, strong voice, beautifully managed, best describes her qualifications. She was heartily applauded at the times. She was heartily applauded at the times. She was heartily applauded at the times.

Elizabeth DeWitt Kennedy, recitationist, is another member of the company who reflects considerable credit upon her home—Denver. Miss Kennedy has appeared before Colorado Springs audiences before, but has never recited to better advantage than she did last evening. She worked herself into the hearts of the audience at the first and continued to be a big favorite until the close of the concert.

Miss Mamie Herman, whom Colorado Springs claims as its own, although she has spent the greater portion of her time during late years abroad, studying, is another member of the company. As a violinist she has few superiors. As a pianist she has few equals. A splendid touch, quick, after her bowing was the best that has been witnessed in this city for some time. Her efforts by the encouragement that the large audience gave her.

As accompanist Miss Blanch Hermann and Mr. A. A. Kendall proved to be most proficient. Mr. Kendall will accompany the party on its trip.

There is one other member of the company who deserves as much, if not more, praise, for his work than any one else. This is Mr. W. H. Reynolds, who, besides being a mandolinist of unusual merit, has the management of the company in hand. Although he is a person but once upon the programme, he again showed what a master he is of the art of playing the mandolin. Without doubt the company will be popular and successful on its tour.

Next Concert Tonight. At the opera house this evening a concert will be given by the Hest company. Says an exchange, in speaking of Herr

Walther, the Belgian violinist: "The instrumental gem of the evening was Herr Walther's Nocturne of Chopin. This he excels, and the exceeding sweetness, the caressing languor, the delicate touch, the soulful, soul-quieting language, which from the days of Paganini downward has established the violin as the instrument par excellence for the production of the subtlest shades of sound."

STRICKLER TUNNEL.

Status of the Work There—The Weather Is Fine.

The Strickler tunnel is now in a distance of a little over 100 feet. Of this distance 55 feet have been driven from the west and 55 feet from the east. The tunnel measures 47 on one end and 57 on the other. The average work done this month has been about ten feet per day.

The formation which has been driven through has been granite the entire distance. On the east end it is very tough and old-timers say that it is the hardest rock to handle they have ever seen in this country. As a consequence the progress at this end is only four feet per day as against six feet on the other.

The formation at the west end is intersected with seams, which makes the shooting much easier than where the rock is in one solid mass. At the west end, for instance, an average of about nine holes are put in and it is generally possible to do all the blasting with one round of shot. At the other end it is necessary to put in anywhere from 15 to 19 holes, and the shooting operation has to be gone through from four to six times before all the rock is blasted out.

Asked as to whether anything in the shape of a gold vein had been encountered during the course of work the answer was that some small seams and veins had been encountered, but they were not large or rich enough to be of any practical account. One of the workmen had an assay on one of the veins and values of \$250 or \$300 in gold were shown.

The winter has not been very severe, but a little over a sixth of the distance has already been completed. Some 200 feet of vein cut has also to be made, but of this 100 feet has been finished. The weather is very pleasant in the neighborhood of the Strickler tunnel and on Sunday night the thermometer did not fall below 10 or 12 above zero. There is very little snow, and taken altogether, it is one of the mildest winters that has been experienced in the mountains for many years.

JUNIOR GOLFERS.

The Rising Generation Wields the Driver and the Lifter Every Saturday.

Golf is undoubtedly all the rage in Colorado Springs. The fact of this will be seen that it has been taken up by the rising generation, who while away the hours of Saturday in this fascinating occupation. The junior golfers on the line on the College reservation, where five greens have been laid out. These greens have to be gone over twice to make a round, making a total of 18 holes. There is a mistake here the green area, as in the center of each a flag (a red diamond with a white body) waves in the breeze.

The greens are very nice ones. They are marked not quite up to regulation, but they are nice green all the same, for all that is necessary to make a hole is to get on a green and the slope does the work. The hole is a well shaped yellow stick, which serves the purpose of driver, brassy, loftier, putter, iron and every other necessary and unnecessary implement used on the golf field. Another very much dilapidated croquet mallet, and a curious combination of iron and wood forms another, which serves the various purposes. But with all these drawbacks the boys play a good game, and by the time they have eaten enough pudding to twirl a full-sized driver they will be able to show the champions of today a thing or two.

DISTRICT COURT.

The Prisoners Received Sentences in the First Division Yesterday.

In the first division of the district court yesterday, Mike McNeil, charged with burglarizing the house of Robert Gardner at Cripple Creek, withdrew his plea of guilty and entered one of guilty. Judge Harris sentenced him to eighteen months in the penitentiary.

Quincy Mcarty, charged with burglary at Cripple Creek, also entered a plea of guilty and was sentenced to eighteen months.

Judge Harris announced his decision in the suit of Mrs. Zimmerman against the administrator of the estate of Max Lindenthal. The plaintiff's claim was allowed in the sum of \$1500.

Today in the first division will begin the trial of Henry Richards, charged with the murder of the barkeeper, Balatier, at Colorado City last November. It is the only murder trial to be heard this term.

Mr. and Mrs. F. H. Morley returned yesterday from their trip to the east, where they were called by the death of Mrs. Morley's sister.

Read Reed's Lo-To-Kah.

Nansen Still Has the Arctic Fever. "What will become of the Fram?" I asked the doctor.

"She will probably be kept at Horten. I may require her again soon, and cannot possibly have a better ship for arctic or antarctic work."

"Will you again attempt to reach the North Pole?" I queried.

THE WINTER MILLINERY.

A Paper Read Before the Tuesday Club of Colorado Springs by Katherine Ferris.

If, as is the custom with many papers, made the instrument speak that wondrous, soul-quieting, soul-quieting language, which from the days of Paganini downward has established the violin as the instrument par excellence for the production of the subtlest shades of sound."

These are the four great crimes; and to forsake a dependent I hold equal to them.

Where does the responsibility in this matter rest—with those who supply the market or with those who create it?

There is no doubt that the guilt is to those who wear the feathers. The killing of birds would hardly outlast one season during which the product proved unsalable.

It may be true that milliners and countrymen do not know how to be wrong, but they do it for the sake of their bread and butter. We can make no such claim. At the best we may plead ignorance and a mistaken sense of beauty; but at the worst we must own to an enervating vanity which cares not what suffers so that it be gratified.

Curiously first, and then interest, led me to look at this fashion as a matter of statistics, and the details given below are the result. The industries and occupations of man are of two kinds, of the gentler sex, and must have been a milliner to believe that one would actually prefer a hat or bonnet trimmed otherwise than as fashion dictates.

Very good, lace, quite satisfactory, flowers, these too are approved, for nowadays one may wear anything or everything on her head, and the milliner is allowed to crown her creation with what she regards as indispensable—feathers in some form, be it plume, wing, egret, or, as a last resort, the entire bird of a feather. The theatre, the concert hall present the appearance of a paralyzed aviary.

Very good, lace, quite satisfactory, flowers, these too are approved, for nowadays one may wear anything or everything on her head, and the milliner is allowed to crown her creation with what she regards as indispensable—feathers in some form, be it plume, wing, egret, or, as a last resort, the entire bird of a feather. The theatre, the concert hall present the appearance of a paralyzed aviary.

Curiously first, and then interest, led me to look at this fashion as a matter of statistics, and the details given below are the result. The industries and occupations of man are of two kinds, of the gentler sex, and must have been a milliner to believe that one would actually prefer a hat or bonnet trimmed otherwise than as fashion dictates.

Very good, lace, quite satisfactory, flowers, these too are approved, for nowadays one may wear anything or everything on her head, and the milliner is allowed to crown her creation with what she regards as indispensable—feathers in some form, be it plume, wing, egret, or, as a last resort, the entire bird of a feather. rights of women and neglect children, we cannot protect the rights of children and forget those of animals—the rights, so far as the general welfare permits, to life, liberty, and the pursuit of happiness. This idea of protection to the weak is the starting point of all civilization; it is far-reaching and fundamental, and without it no reform is, or ever has been, possible. The Mahabharata, one of the most ancient and beautiful of Hindu poems, says through the mouth of its hero: "To oppose the suppliant, to kill a wife, to rob a Brahmin, and to betray one's friend, These are the four great crimes; and to forsake a dependent I hold equal to them."

Where does the responsibility in this matter rest—with those who supply the market or with those who create it? There is no doubt that the guilt is to those who wear the feathers. The killing of birds would hardly outlast one season during which the product proved unsalable.

It may be true that milliners and countrymen do not know how to be wrong, but they do it for the sake of their bread and butter. We can make no such claim. At the best we may plead ignorance and a mistaken sense of beauty; but at the worst we must own to an enervating vanity which cares not what suffers so that it be gratified.

MINES, STOCKS AND INVESTMENTS.

Colorado Springs Mining Stock Association. Colorado Springs, Jan. 25.—The noticeable feature in the mining stock market today was the utter absence of outside orders. The brokers, for the time being, at least, are having it all their own way, and it is mainly a case of "hairs and hounds" chasing eighth. Dull periods like this, however, have existed before, and will no doubt exist many times again. The repeated "strikes" don't seem now as if about the only thing that would cause any buoyancy in the market at all, would be the resumption of dividends by one or two of the principal companies whose shares for the past few months have attracted the most general attention.

That animal called the "public" is about as queer a freak of human nature as ever faced a side show. If prices are booming, whether it be in railroad stocks, grains and provisions or mining stocks, it will figuratively break its neck to get it, but talk to them about investing in a market that has not yet felt the effervescence of a freshly drawn pot of soda water count for anything, and wisely, and says, "Oh, no, you can't catch me." This is a good deal the position the mining stock market is in at the present time; the "froth" is all gone, and presents no attractions whatever to the average investor.

All in all, there was nothing in the prices that would lead us to believe that would tend to any further discouragement; even with the utter absence of outside business several of the stocks did not go down, and in the case of Mollie Gibson, prices were considerable higher. Pharmacist was quite weak, closing nearly a full cent lower than on Saturday. Isabella held her own very well, as did also Union. Anaconda was decidedly weaker, closing at 73, three cents lower than the last sale of the previous session.

Shipping Mines. Bid. Ask. Sales. Argentum Junata 40 1/2 250. Anaconda 79 80 800. Blue Bird 12 12 1000. C. C. Con. 12 12 1000. Elktion 12 12 3500. Favorite 5 5 1000. Gold and Globe 12 12 500. The separate sales in the listed stocks were as follows: Argentum Junata, 250 at 40; Anaconda, 800 at 79 1/2; Cripple Creek Con., 1000 at 12 1/2; Elktion, 3500 at 12 1/2; Isabella, 3000 at 47 1/2; Isa-bella, stamped, 1000 at 47 1/2; Mollie Gibson, 4750 at 50 1/2; Pharmacist, 12,000 at 11 1/2; Union, 35,000 at 12 1/2; Alamo, 1000 at 11; Franklin, 1000 at 10; Jack Pot, 15,000 at 7 1/2; Magnet Rock, 2000 at 15; New Haven, 5000 at 2 1/2; Trachyte, 2000 at 2 1/2.

Colorado Springs Stock Exchange. Gold Standard, 10,000 at from 4 1/2 to 4 3/4. Prospective Mines. Buckhorn, 8000 at from 2 1/2 to 2 3/4. Panny B., 1000 at from 5 1/2 to 6 1/2. Jack Pot, 1000 at from 7 1/2 to 7 3/4. Virginia M., 1000 at from 4 1/2 to 4 3/4.

The Denver Exchange. Denver, Jan. 25.—The following are the sales and quotations on the Colorado Mining Stock Exchange today: Garfield Grouse 800 9 1/2 1000. Ingham 600 10 1/2 1000. Isabella 47 1/2 48 1/2 800. Granite Hill 14 15 1000. Dixie 10 11 1000. Sentinel 10 11 1000. Old Gold 10 11 1000. Tamarac 10 11 1000.

Colorado Springs Board of Trade and Mining Exchange. Colorado Springs, Jan. 25.—It was a regular Monday trade on the Board of Trade today. The sales were only about half what they were on Saturday, and these were confined mainly to the better class of prospects. Virginia M. attracted a good share of the attention, as did Jack Pot and Fanny B. Virginia M. and Fanny B. were both a trifle lower, and Jack Pot was some higher. There is no doubt now that the lessees on the latter company are not so sanguine as they were very good ore, and it is not surprising that the stock should remain firm and even advance. The market for the stocks principally advanced in close steady.

Mr. John W. Proudfit of this city returned from Chicago last evening, where he went on a business trip. Mr. Proudfit says that as regards investment of Chicago and eastern capital in Colorado and mining enterprises of the west in general, that the outlook is more favorable now than it has been for some time past. The last bank failure in Chicago particularly naturally had an effect, temporarily at least, but confidence is rapidly returning and capital is seeking for profitable investment. There is no question about plethora of money. A banker whose name we mentioned would be at once recognized among financiers as that of a man having national and almost an international reputation, said to Mr. Proudfit that he had in the last few days been offered sums of money aggregating millions, at the very unusual rate of one per cent. for a period of several months.

Regarding investments that more nearly affect Colorado Springs and the development of the Cripple Creek district, inquiries elicited the fact that the cessation of dividends by the Isabella and other mining enterprises had done a good deal towards decreasing the confidence in Cripple Creek mines. Investors in the east, said Mr. Proudfit, are more skeptical of mining enterprises in the west from a lack of knowledge regarding the business of mining, than from any other cause; that a continuation of the methods adhered to by the representative brokers of Colorado Springs, to treat the investor in a fair, business-like and honorable manner would ultimately result in a more liberal presentation of legitimate mining enterprises backed by the right kind of men to bring a large portion of this money to Colorado.

ONE OF THE BEST. The Ingham Comes to the Front With Some 300 Ounce Ore. One of the best of the many good strikes this year was that made in the Ingham on Saturday last when a good body of ore was encountered 250 feet below the surface. The strike was made in the Mattie D. workings and consists of from one and one-half to two feet of ore that shows very high values and was encountered at a point where the ore is of the total stopping ground. The strike is productive of some very fine specimens of ore showing quantities of sylvanite and rusty gold that assay this year at 110 to 120 per cent. This makes another body of ore opened in the mine, and it would appear that this is the most valuable and important of them all. A shipment of 113 sacks of second grade and eight tons of third grade was made yesterday by Lanteman and Given from their west Beacon hill mine. The aggregate of the two shipments made since coming into possession is four tons of second grade, 25 tons of two lower grades, and the total value of which will reach from \$5000 to \$7000.

RANDOM NOTES. A brokers' market. H. H. Dorsey sold New Haven at 2 1/2. "Feetly" is with us again after his trip to Chicago. A gold vein has been cut in the Stricker tunnel, but it did not run pay. Russell Prentice is back from the valley and sizes up the market as rotten. Arcadia Consolidated was steady at 7. "Billy" Weston is back from Arizona, where he went to report for Britishers. Dr. Morrison took a flyer to camp on Saturday last, and reports Jack Pot flourishing. One of the best strikes made in camp recently was in the Ingham. It has not been much talked about. Garfield-Grouse stockholders are now on the tip-toe of expectation. The bigger the holder the greater the tip. On sales by J. McK. Ferriday & Co. Princess sold from 4 to 3 1/2. Weyand Bros. and Heron Bros. bought. Low grade ore from the Jack Pot runs better than \$100 per ton. How's that for low. The high grade is better than \$700. The brokers say that the weather makes their ears tingle and that the condition of the market gives them cold feet. C. C. Consolidated was very dull at 12 1/2. Only 1,000 shares changed hands. Crosby-Ehrich syndicate bought and H. L. Fagin & Co. sold. Captain General Brown says that there is lots of room for good cricket fields in the Arkansas valley, but that there are no gold veins down there. Republic was sold by Weyand Bros. and Russell Prentice & Co. Stark, Tucker, Ballard & Co. and T. J. Kearney. All the transfers were at 4. Mollie went up in price yesterday and the knowing ones say that the mine is quite sure to be sold in any case in what a time dear old Mollie would have. Virginia M. was among the stocks that showed new life. Tucker, Ballard & Co. and H. S. Hawks bought. Howbert & Harris were the principal sellers. It closed at 4 1/2. Garfield-Grouse sold off a little, but closed strong at 8 1/2. Arthur Baker, W. P. Wight and H. H. Dorsey sold. H. V. Wandell, Howbert & Harris, and J. W. Proudfit & Co. were among the buyers.

Anaconda was very weak, selling from 82 1/2 to 79 on light trading. H. H. Dorsey was the heaviest seller. The stock fell from 82 1/2 to 79. H. L. Fagin & Co. and D. G. C. McNell. Mollie went up in price yesterday and the knowing ones say that the mine is quite sure to be sold in any case in what a time dear old Mollie would have. Virginia M. was among the stocks that showed new life. Tucker, Ballard & Co. and H. S. Hawks bought. Howbert & Harris were the principal sellers. It closed at 4 1/2. Garfield-Grouse sold off a little, but closed strong at 8 1/2. Arthur Baker, W. P. Wight and H. H. Dorsey sold. H. V. Wandell, Howbert & Harris, and J. W. Proudfit & Co. were among the buyers.

Mr. William Weston returned from Arizona yesterday, where he has been making a second examination of the White Hills M. and Excelsior companies' properties for an English syndicate. The White Hills are located 13 miles from Kingman, and that distance has to be traveled by stage. The properties are showing up well. It looks as if two of the newer workings on the Sheriff were soon to be classed as recently producing mines. Dr. Ramey on the south end, adjoining the Bertha B. is opening up a vast body of ore at a depth of 80 feet. The limits of the ore body have not been reached on either side as yet, and a great many tests on the values show the grade to be from \$14 to \$18 per ton. The Parsons lease on the sagittiferous ore has a foot shaft and 15 inches of fine gold quartz is exposed in the bottom, the richest of which is being sacked and the second grade piled on a platform. Both these leases will make shipments at an early date. New ore bins are being completed on the Home Fraction, where Owen Roberts recently developed a new shipper. The shaft is down 65 feet and ore is accumulating for a second shipment. The Calhoun company is working its Galena hill properties steadily. A steam plant is employed, and a fine, well-timbered shaft is now down 210 feet. Sinkings are still in progress, no effort being made as yet to exploit the ground there.

A good looking vein has been opened by J. C. Phillips, who has a lease on the Modoc of the Currency company on Beacon hill. The extent of the find and the values have not yet been determined. The famous Doctor mine on Raven hill is now sending out 30 tons of cyanide ore per day, besides the weekly output of 75 tons of high grade smelting ore. Dorse Investment Company Stocks, Room 4 Exchange Building. I will advise you what Cripple Creek stocks to buy or sell if you address me. N. LEIPHEIMER Mining Broker. P. O. Box 415. COLORADO SPRINGS. Enterprise Company. The Enterprise Mining company are pushing work on their Dolly Varden claim at Cripple Creek. They have now encountered pay ore in a drift run from the 100-foot level, and are saving up for a shipment. This shipment will probably be made some time between now and the first of the coming month. Assays on the ore taken out have varied widely, but it is confidently believed by the manager of the property that the entire shipment will bring returns of at least \$50 per ton. Howbert & Harris, Brokers, Room 4 Exchange Block. JACK POT IS ALL RIGHT. The "Low Grade" Ore Runs Better Than \$100 Per Ton. Returns have just been received from the last shipments made by the lessees on the Jack Pot claim. Some 15 tons of low grade ore were sent out and a smaller quantity of high grade. The low grade ore returned a value of \$115 per ton, while the high grade reached the very pretty figure of \$272.20 per ton, so it will be seen that the total shipment ran into very pretty figures. It is computed that the total receipts from the 95-foot hole are a total value of \$2,658.92, giving an average of \$88 per foot. The last 20 feet have averaged a good deal better than \$100 per foot, and it feels showing the way to the top. The lessees have now started to drift but continue to work very slowly, which is somewhat surprising, considering what has been shown by the high grade work. The work is being done on the tunnel at present, although a few feet more work would take it below the shaft a distance of 145 feet, where the vein would be cut. The royalties are 17 per cent. on all ore shipped, so the lessees have a fine chance to make a good stake. If they do the management declares that they will have no kick coming, as it desires to see the plucky lessees make money. In the past

We wish to place before you a list of stocks which should show good profits over present quotations within a reasonable period. Write or call upon us for them.

the lessee has done over \$100,000 worth of work on Jack Pot properties at this is the first time there has been any return. The lessees on the Mary Wynne, who struck a vein of silver ore, have made their first shipment but the returns are not yet in. They are drifting toward the phonetic dyke where it is thought that a cross vein will be encountered and the values in gold run higher. On the Ironmaster trenching has been in progress for the past few days. The work was done with the object of catching the Excelsior vein, and on Saturday some of the ore was encountered. The stuff was not in place but it looked well and the workers think that they are on the right track and will eventually open up a shipping mine. It never rains but it pours. For years the Jack Pot has had nothing but good prospects, and now all at once it has the making of three mines, and yet there have been times where the prospects were not anything like as good as that the stock was selling at much higher figures.

Back From Arizona. Mr. William Weston returned from Arizona yesterday, where he has been making a second examination of the White Hills M. and Excelsior companies' properties for an English syndicate. The White Hills are located 13 miles from Kingman, and that distance has to be traveled by stage. The properties are showing up well. THE LATEST QUOTATIONS

Table with columns for New York Money Markets, New York Produce Market, and New York Stock Market. Includes various commodity prices and stock market data.

New York Stock Market. New York, Jan. 22.—The total sales of stocks today were 122,875 shares, including American Tobacco, 6,100; American Sugar, 20,100; American Sugar, 4,000; Burlington, 15,000; Chicago Gas, 3,600; Deere and Hudson, 7,800; General Electric, 6,200; Reading, 11,600; St. Paul, 12,200; Union Pacific, 4,700; New Jersey Central, 4,100.

One of the lowest records of business recently established was made today in the stock market. The anthracite coal stocks exerted an unfavorable sympathetic influence upon the general market. The market opened weak and generally lower, under the influence of unfavorable factory London prices for American securities. The general market was very heavy and caused a general advance. The anthracite coals had been conspicuously heavy, but also signed prominently in the rally.

Business was in small volume, however, and confined to the leading property. Trading after the first hour, became impatiently dull with prices showing a disposition to ease on realizations and bear sales. The expectation of a more favorable comparison of railway earnings had previously strengthened the railway list.

The continued unfavorable conditions in the anthracite trade and the general outlook for business facilities, facilitate the work of traders in depressing the prices. The grangers, the railway road list, and the industrial stocks were sympathetically depressed fractionally. The closing was weak and general fractional net losses.

Railway bonds were quiet but generally well held. The leading property Government bonds were strong the new four coupon raising to 125 on the purchase of a block of \$100,000. The aggregate sales were \$117,000.

Table listing various commodities and their prices, including Adams Ex., Am. Express, Can. Pac., Cen. Pac., Chic. Alton, Chic. B. & Q., Chic. Gas, C. C. & S. L., Colo. C. & I., Del. Hudson, D. L. & W., E. & N. G., East Tenn., Erie, Hoop, K. & N. O., L. E. & W., Lake Shore, L. & N., Man. and C., Mem. and C., Mo. Pac., N. and O., N. J. Cent., N. J. West., N. Am. Co., Nor. Pac., and O. & C.

Daily Treasury Report. Washington, Jan. 22.—Today's statement of the condition of the treasury shows: Available cash balance, \$29,961,677; gold reserve, \$14,320,458.

CHICAGO GRAIN

Chicago, Jan. 22.—Wheat opened very heavy. May, which Saturday closed at 89 1/2 cents started this morning at 89 1/2 cents, or about 1-16 cent higher, as the extreme limit at which buyers were found. The slight improvement noticed here was because of a 1/4 advance in Liverpool, together with the severe cold which had so suddenly supplanted the previous prevailing spring-like weather.

But the extreme dullness, coupled with the rather unsatisfactory tone of some of the statistical news soon depressed the price to 79 1/2. The demand for wheat was entirely lacking, and in the absence of the demand the small world's shipments and domestic receipts and a considerable reduction in the visible supply were disregarded. A comparatively small decrease in the amount on ocean passage was regarded as an important bearish factor and an increase of 100,000 bushels in Liverpool stocks for the week were also considered of much greater consequence. The net result was a decrease in the entire stock of the United Kingdom. The receipts here were 33 cars, compared with 40 a year ago. Minneapolis and Duluth received 185 cars against 212 a week ago and 724 on the corresponding day of last year. The world's shipments of wheat and flour were 4,000,000 bushels, compared with weekly requirements of 7,000,000 bushels. The visible decreased 1,165,000 bushels compared with 465,000 bushels decrease a year ago. Export clearances from Atlantic ports since Saturday were only 155,000 bushels in wheat and flour together. The price here got down to 79 1/2, but firming up again near the close, due to an indisposition among some few scalpers to go home short, with the uncertainties of the Washington agricultural report hanging over them. The closing price was 79 1/2.

Corn was inactive and nearly featureless, the price held about steady during the first hour, but when wheat got easier corn also sold off a few cents. Provisions were very slow. There was monetary strength at the opening on the moderate hog receipts, but the market soon flattened out.

Table with columns for Articles, Open, High, Low, Close. Lists prices for various commodities like Wheat, Corn, Oats, Pork, Lard, etc.

Flour, steady. No. 2 spring wheat, 77 1/2; No. 3 spring wheat, 75; No. 2 red, 75 1/2.

London, Jan. 22.—There was a full attendance at the wool auction sales today. An excellent catalogue was offered consisting of 10,100 bales, and of this number 1,600 bales were withdrawn. Competition was strong, with American representatives very active, they making a number of long wool merinos, strong combings, the latter at full rates. The home trade and France were also active buyers, but the German buyers were rather quiet.

New Zealand, 2,800 bales; greasy, 6 1/2; 18 1/2. Cape of Good Hope and Natal, 100 bales; greasy, 6 1/2. Elgin, 11 1/2. Butter—Active; offerings, 24,500 pounds, at 1 1/2 cents; 1,500 pounds at 20 cents; 2,000 pounds at 20 1/2 cents.

LATEST NEWS FROM THE CAMPS.

STRIKE ON BIG BULL.

Report of \$3,000 Ore in the Pennsylvania Claim—News From the Victor Mines.

Victor, Colo., Jan. 22.—A rumor is current here this evening that a strike of \$3,000 mineral was made today in the Pennsylvania claim. This ore body is said to have been encountered at a depth of 40 feet. The Pennsylvania is located on the east slope of Big Bull mountain, and if the report is true it is the first time ore of this character has been opened up on that hill. The strike will be of considerable importance for this reason, and also because it will extend the present eastern limits of the gold belt.

The American Consolidated company owners of the Nellie Bly, located on the north slope of Beacon Hill, has divided the shaft into two sections, and has been let to sink a shaft to a depth of 40 feet, which shows in its bottom a 12-inch vein of low grade ore. The lessees expect to tap the Fanny B. vein after an additional 30 feet has been gained in the shaft. On block 2 Harwood and Carthers are the lessees. They have also sunk a shaft to a depth of 40 feet, and have opened up a 20-inch vein on which they are in search of an ore chute. No work has been done on block 3; it is under lease, however, and work will be started on it as soon as the small development has been done on blocks 4 and 5. The American Consolidated company base their conclusions to an extension of the Fanny B. vein running through the Nellie Bly territory to the fact that whenever the pumps on the Nellie Bly ground become flooded they have to be pumped out from this shaft. A water course follows the vein into the Nellie Bly territory.

Marshall Bell today heard through the chief of police, Albuquerque, N. M., that the mine which he had been told of had been discovered. He had been told that the mine was in the vicinity of the Nellie Bly territory, and he had been told that the mine was in the vicinity of the Nellie Bly territory. He had been told that the mine was in the vicinity of the Nellie Bly territory, and he had been told that the mine was in the vicinity of the Nellie Bly territory.

The Colorado Gazette

DAILY WEATHER RECORD.

The following meteorological report is furnished by the Colorado College Weather Bureau. Observations recorded in local time: From Jan. 24, 6 p. m. to Jan. 25, 6 p. m. Temperature at 8 a. m. 12.0

Weather Indications. Washington, Jan. 25.—Forecast—Colorado: Local snows, partly cloudy weather; not so cold; north to east winds.

Buy coal of Crowley & Richardson.

Mrs. S. K. Canary left last evening on the Santa Fe for Los Angeles, Cal.

Col. Raoul, wife and children, of Atlanta, Ga., are guests at the Antlers.

Mrs. E. P. Bissell left last evening on the Santa Fe for a trip to Wilmington, Del.

Mr. F. A. Adams was a passenger on the Gulf road last evening for Jacksonville, Fla.

A number of the local chicken fanciers have sent exhibits to the poultry show at Pueblo.

Mr. Mc. Andrews left yesterday over the Gulf road for a three months' trip to Tampa, Fla.

Cards have been issued announcing the wedding of B. F. Scribner and Miss Mary Kershaw, which occurs on Tuesday, February 3.

Mr. A. D. McLennan and party of Cleveland, O., who came here in private cars some days ago, left last evening for the west.

The meeting to organize a male chorus will be held at the Y. M. C. A. rooms this evening at 7 o'clock. Miss Crane is to instruct the chorus.

Mr. S. Ben Smith, of Smith & Welling, reports the theft of his Stearns wheel. It was taken from in front of his place on Saturday afternoon.

Mrs. M. R. Wooley, of Detroit, Mich., and Mr. Clarence Wooley, of Chicago, mother and brother of Mr. E. S. Wooley, are visiting him at the Antlers.

Miss Julia Saffel, who has been spending the past few months in the east, has returned to the city, and will remain here the rest of the winter.

Rev. C. M. Carter, of LaFayette, Ind., has announced to the First Baptist church that he will be unable to accept the call to the pastorate of the church.

Mr. Keith Conacher, of the central fire department lost a bunch of keys yesterday. Any one finding the same will kindly oblige him by returning them to him.

Mr. and Mrs. Geo. Dickey left last evening over the Rock Island for the east. Mrs. Dickey goes to Ohio, and Mr. Dickey will spend some time at Omaha, joining his wife later.

Dr. Pershing's lecture at the college will be given on Wednesday of this week instead of Tuesday. The lecture will take place at the observatory at 4:30 p. m., and the public will be welcome.

This is the kind of weather your bicycle stands like. Does it need repairing or cleaning? Remember, we have a factory-trained man in our repair department, and our prices are reasonable. W. H. Wahl, 13 Pike's Peak ave.

Mr. Irving Bonbright yesterday presented the members of the central fire department with a box of cigars as a token of his appreciation of their good work at the fire which occurred at his residence, on Saturday evening.

Pike's Peak Lodge, Independent Order of Odd Fellows, and Mt. Rosa lodge are arranging to open their new hall in the McIntyre and Barnett building with a grand ball and reception. The event occurs on the evening of February 10, and invitations are being prepared.

The mayor yesterday appointed the committee that is to investigate the charges that were brought up against Smith & Welling, the druggists, on Saturday. The committee consists of three members of the council, but who they are well remain a secret until they are prepared to make their report, which will be at the meeting next Monday evening.

The central fire department had two runs yesterday. An alarm at 10:35 in the morning called them to 323 East Blou street to extinguish a small blaze that had started in a chimney. At 1:15 in the afternoon they responded to a still alarm and made a short run to the rear of Barnes' hardware store. Some hot ashes had set fire to a pile of rubbish, and it was necessary to use the gas-tolion chemical to quench the flames. There was no loss of property at either fire.

Fanny Rice. Fanny Rice was born in Lowell, Mass., and was brought up and educated in Boston. Her professional career has been remarkably successful, and particularly interesting. When less than 16 years of age she first attracted public attention by her singing and recitations in church concerts in Boston, Mass. Her fine voice and pleasing personality soon attracted the attention of managers of opera, and she was engaged to sing second roles in a leading opera company. This engagement proved the foundation for her ultimate success. At the time when the New York Casino was the home of comic opera in this country, the manager of that institution saw in Miss Rice a remarkably clever comedienne, and secured her to play the principal roles in some of his most important productions. Her success in New York was immediate, and she became a great metropolitan favorite. For nearly three years Miss Rice remained in New York, appearing during that time in many widely different characters and always with successful results. Her greatest hit was probably made in "Nad-Jy," and she played the title role in that opera for nearly 400 consecutive times.

Her first season in this city as a star was made in "A Jolly Surprise." It was a very good vehicle for Miss Rice to show her versatility and wonderful powers of mimicry, and proved a great financial success. "A Jolly Surprise" ran for three weeks with excellent success. Last season Miss Rice produced several new plays, among them an adaptation of a great success entitled "At the French Ball," and this has proven even a greater success than "A Jolly Surprise." Miss Rice will appear at the opera house Friday and Saturday evening, presenting "At the French Ball," and her new operatic comedy, "A Flower Girl of Paris."

The subscription dance that was to have been given at the Kinnikinnic building on Friday evening, January 23, has been postponed until Friday, February 5.
