Van Diver's Statement. The Democratic headquarters were clos-ed today and all the members of the state

committee have gone to their respective homes. Before leaving, however, Chair-man Murray Van Diver gave out the folowing statement:

"As far as the joint convention of the general assembly is concerned, the mat-er is not entirely settled, and will not be until the official returns are made up. "In regard to the house of delegates, I m still of the opinion that the Democrat

will have a majority in that holy and will organize it. The election in several f the counties is so close that it is inossible to tell at present which side has ron, and I believe a recount will be demanded in Montgomery county by the Democrats, who claim that they have elected at least one, and possibly two nembers of the house, while the Republicans claim they have elected all three. A recounting may also be demanded in Talbot and Carroll counties, to determine the

result with certainty. At any rate, we have not given up our expectation of controlling the house, whether we have a majority on joint ballot or not. Anti-Gorman Outery.

## "Union" Republicans

Dover, Del., Nov. 4.-The Union Repub-lican state convention was held today with delegates present from each ward. J. Edward Addicks was not present. He is at Moosick Lake, Maine.

The resolutions adopted uphold the na-tional Republican platform, condemn Democratic "mismanagement" in the state, and denounce the provisions of the new constitution, which provides that election offenses shall be tried by judges instead of juries. There was no reference to President McKinley.

Chairman John D. Hoffecker made a speech in which he said the Union Re-

iblicans could forgive but not forget the difference of the past, and he invited all Republicans in the state to ally themselves under the union banner. The con vention, he said, was to organize the party and change the rules.

## Complete Iowa Returns.

Des Moines, Ia., Nov. 4.-The complete unofficial returns of Tuesday's vote are: For governor, Shaw, Republican, 224.-555; White, Democrat. 193,567; Populist, Middle of the Road, 5559; Gold Democrat. 5.434: Prohibition, 10,692. Total 440,198. Shaw's plurality 30,988. Shaw's total vote is the largest ever dast for a Republican candidate for governor, being 16,000 higher than the highest before. It is also higher than the vote for any Republican candidate for president in this state, except the vote for McKinley last year. The Democrats have only once polled a big-ger vote, when Boise was a candidate in

A Tissue of Nonsense.

Sir George Lewis, in behalf of the Prine of Wales and the Earl of Suffolk asked that the proceedings be quashed on the ground that the allegations were nothing more than a frivolous and vexatious tissue of nonsense, and he sub-mitted an affidavit to that effect.

The plaintiff then addressed the court, declairing that he had been told that the Prince of Wales received the money re-ferred to, and then proceeded to charge Lord Bramwell with defrauding Allen's widow out of \$750,000 in order to obtain promotion and a peerage. The plaintiff was here stopped by the

court with the warning to speak respect-fully of judges. Finally the court stopped the case and dismissed the action which was described as being "an abuse of the process of the court.

BASEBALL RULES.

## Scheme to Do Away with Disorder

at League Games. Cleveland, Nov. 4.—President Frank De Haas Robinson will propose a new sheme at the coming annual meeting o the National Baseball league. It is that

the fining of players by the umpires be lone away with and that the umpire be fined \$50 for every case in which he fails to enforce the rules. Every time a player breaks a rule, especially those regarding personal conduct toward the umpire, the umpire must put him out of the game When enough players are put out of the game to make it impossible to proceed the game must be stopped and the admission money returned to the spectators and made good to the management out of the salaries of the players.

Mr. Robinson firmly believes this plan will do away with the disorderly tactics which have lately been on the increase in the league games.

## Parker's Plurality.

New York, Nov. 4.-Complete returns from all counties in the state except Cataragus, Greene, Steuben and Yates show plurality for Alton B. Parker, Demoratic cardidate for chief judge of the court of appeals, of 56,058. The final reurns will reduce this plurality. Judge Parker's plurality in Greater New York s 133,968.

## Republicans Made Gains.

**Republicans state Gains.** Lincoln, Nov. 4.—Returns by counties served to slightly reduce previous esti-mates of fusion pluralities. They also show that the Republicans made gains in county officers. Sixty-seven out of 188 counties in the state give Sullivan, fusion,

can, 66,708. The remaining counties will not materially change this result further to slightly increase the fusion plurality.

Triple Tragedy. Dallas, Tex., Nov. 4.-What will un-oubtedly prove a triple tragedy occurred o night in Mrs. Emma Smith's boarding house at Germania and Gaston avenues, East Dallas. James Boswell, a boarder, shot Mrs. Smith in the neck, shot James Barton twice in the body and then blew his own brains out, dying instantly. vell was jealous of Barton's attention to the landlady.

More Artillerymen Wanted.

New York, Nov. 4.—At a regular month-meeting of the chamber of commerce oday a resolution was adopted suggesting to the government the advisability of increasing the army by about 4,000 arillerymen, so that the modern sea co defenses now in construction may be properly manned.

Professor George F. Holmes. Richmond, Va., Nov. 4.-Professor Geo. Trederick Holmes, of the University of Virginia, died there at 2 o'clock today.

"In Gay New York," which comes to "In Gay New York," which comes to the opera house next Tuesday night, fur-nishes one of those rarely found enter-tainments which are practically inde-scribable. It is so brim full of comedy, music, specialty, rapid movement, bright coloring and attractive groupings that it pleases the senses of sight and hearing to the fullest extent and leaves one wonder-ing how so much that is also as the sense one wonderng how so much that is clever and entertaining can be crowded into one perform-ance. Messrs. Klaw and Erlanger who ance. Messrs. Klaw and Erlanger wno direct the company presenting it, have sent on tour an organization of 75 people, made up from bright lights in comedy, opera, burlusque, vaudeville and ballet. Eddie Foy, the famous eccentric com-edian, heads the list. His prominence in Henderson's spectacular productions and Henderson's spectacular productions and in his own pieces of the same kind gave him enormous popularity throughout the him enormous popularity throughout the country and Klaw and Erlanger secured his services for 'In Gay New York' only by the payment of a princely salary. Lee Harrison, Gilbert Gregory, Yorke and Adams, Peter Curley, Arthur V. Gibson, E. S. Tarr, Wm. Sellery, Jas. A. Furey and Harry Watson, the trick bicycle rid-er, are also prominent. ## THE ELECTION RETURNS.

There is no reason for anxiety in regard war to the county in the present election. The vote as cast will be fairly and accurately ascertained and the result made known in accordance with the facts, whichever side is favored. If Doc. Lewis who appears to be "low man" on the fusion ticket, or anybody else feels that he has a just ground for contest, the law and the from the actions of the former adminiscourts will give him a patient hearing and a fair decision upon the merits of his

It is a surprise to some people that the returns are not more quickly and accu-rately made known. That they are not is due, in part, to lack of sufficient organigation, and in part to the closeness of the result. In some cases the judges and clerks, work to a late hour in the morning, and with people not accustomed to night work the final steps of the count are often made hurriedly. It is too late for the morning newspaper to get the returns, and frequently the boxes are sealed, together with the poll book, without anyone taking a copy of the results. In such cases only an estimate can be made, There are other sources of inaccuracy in the counts as first sent in to headquarters and to the newspapers, and these are generally understood, so that when the first count shows a plurality for any candidate on either side of less than 100 it is conceded that the official count, which is usually made about two weeks after the election, may show a plurality for the other side, or on the other hand it may increase the plurality originally shown. The only figures so far received in the election that amount to anything at all

are those sent to Republican headquar-The Republican managers seem fully inclined to tell the public all that they know and are using their best efforts to get at the result as nearly as possible. with an aim to find out the real facts and not to make claims in their own interests.

The fusion committee have no figures that can be depended upon. They have content to get their information from the Republicans, and to make denials and claims without any real knowledge upon which to base their state-

time to bring some danger of complications between this country and Spain. At this important crisis in our international relations the attitude of President McKinley and his administration is all that could be desired by the patriotic American. There is a dignified and at the same time a decided stand for the rights of Americans under all circumstances which has already produced most favorable results with the Spanish government. We hear no more of Americans being thrown into Spanish dungeons in Havana, and elsewhere, and kept there uests and the demands of American diplomatic representatives in the island of Cuba dismissed with contemptuous dislain. On the contrary the Spanish government, ever since the Republican administration came into power, has shown an increased disposition to listen to the omplaints made by representatives of the United States and to redress the grievances of American citizens.

Another striking illustration of the inuence which has come from President McKinley's wise policy is seen in the overthrow of the Conservative ministry in Spain and the substitution therefor of a Liberal cabinet, pledged at least to give to Cuba the form of free government. This of itself is no small accomplishment for American diplomacy and shows the influence that this nation is able to exert abroad without any serious danger of embroiling itself in the dangers of foreign

But there is even a more important way n which the present administration is showing its wisdom, and that is in not attempting to rush ahead and settle the whole matter without the consent, approval or participation of the congress. In this there is a striking dissimilarity tration. President Cleveland undertook to settle the Hawaiian question, the Cuoan question, and some other important questions without the co-operation of con gress and in some instances in direct of position to the expressed wishes of the

representatives of the people of the Unit-Boston Advertise ed States. President McKinley is wiser. He is contenting himself apparently with doing what he can within the constitutional limits of the power given to the executive branch of the government to secure to Americans in Cuba all the rights to which they are entitled undethe treaties with Spain and at the same time he is accumulating a large amount of valuable information which will be laid before congress in the due course of time and will serve as a most valuable next two or three weeks.

and necessary basis for its action. In short, the president in the Cuban the question is doing exactly what a good president who is keenly alive to American interests and American honor, and at the same time scrupulous regarding the con stitutional rights of the other departments of the government, ought to do. There are some very satisfactory features in the sale of the school bonds

which was made yesterday. One is that the bonds were sold at par and bore in terest at the rate of 31/2 per cent., which is the lowest rate for such bonds in the history of the city. Another satisfactory fact is that the securities were taken by a local institution which is in a position to know exactly how the affairs of the district are being managed. This sale will add to the already high reputation which this city sustains and will have a favorable effect on the new refunding bonds soon to be issued by the city of Colorado Springs.

Florence Maybrick's Case,

dose. She admitted she had administered the drug to him, not once but many tmes. His custom of taking it was long established and well known. He died, as every victim of the habit must die at last, with all the symptoms of arsenic poisoning, and his widow was charged with being his murderess. Her trial was so grossly unfair, the judge so bitter in his charge, saying in the course of it, "The woman is a proven adulteress-no other conclusion can be drawn than that she is capable of being, and undoubtedly is, the slayer of her hus band," that a wave of popular indigna-tion passed over England. It resulted in for months at a time without even the merest formality of a trial, nor are the reand the woman was sent away to her liv ing death. Since then numerous efforts for her release have been made unavailingly. There is now reasonable hope that Mrs. Maybrick will soon be released. She was

The law's delays, its stays of proceed ing, its appeals and its leisurely movement in trying criminal cases in this country is a fecund source of criticism in England. It may be sometimes deserved but the system, such as it is, would have settled the question of Mrs. Maybrick's guilt or innoncence and it would not have permitted a judge to passionately and vehemently invite a jury to a verdict unsustained by the most ample and complete testimony.

## The Whaling Fleet.

The news from the whaling fleet in the Arctic regions is not reassuring. It is announced that there is still some hope that the five vessels which were caught in the ice west of Point Barrow about : month ago may escape from their dan-gerous position; but the hope is far from a certainty. Almost surely, if the ves-sels are to escape at all without being compelled to endure the rigors of a se-vere Arctic winter with a constant dan ger of being crushed by the great ice floes, they must break out within the To add to the danger which threaten

crews of the imprisoned whalers, re is no longer a relief station at Point Barrow and the nearest point from which they may hope to secure provisions is Herschel island, a distance of more than 100 leagues away. This distance is so great that it is very doubtful whether an expedition from the ice-bound vhalers could struggle across to Herschel and and return with provisions in time to help any sailors who stayed with the fleet. It has already been said that fiv essels are caught in the ice. It is possi ble that the number is as large as eight, as three other vessels which were exeted to return this autumn have not re ported at San Francisco. This news from the sealing fleet is al

e more discouraging to the whaling industry, for the reason that the past sea-son in the Arctic has been one of the st in the history of the whaling in catch. The statement was sent out from San Francisco, during the present month that only one howhead whale had been taken by the San Francisco fleet this year. Of course, such a take does not

The Gazette this morning presents the latest and most complete estimates, and it is unlikely that any additional information or important changes will be had until the official count is made.

## EASTERN ELECTIONS.

The surpassing interest in the county election has obscured a view of anything else, yet there have been a good many people in Colorado Springs who have watched with interest the political contests in Greater New York, Ohio and elsewhere in the east.

Despite the fact that this is an offyear, and one in which national issues would naturally take a subordinate poprecinct 35 are being held back in orde sition an attempt has been made to twist the results in to an endorsement of the national administration and an indication of the feeling of the people of the various states in regard to the silver question. But the man who undertakes to get such indications from the present campaign is likely to be seriously misled.

The results in Nebraska, Iowa, Ohio and Kentucky would seem to be decidedly favorable to silver, especially in the case of the last two sates. On the other hand the showing in Maryland and Massachusetts is against the silver branch of the Democracy, while in New in Nebraska. York the result of the present campaign makes it improbable that the Democracy of that state will again commit itself to an endorsement of the 16 to 1 idea. The Democratic leaders of New York are not sentimentalists. They are out for power mistake, and plunder, and the difference between last year's campaign and this will remain in their minds for a long time. As to the idea that the present success of the Tammany Democracy in city and state may might have been elected. be twisted into a victory for silver, there is not the slightest basis for any such opinion. It is true that Van Wyck and other Tammanyites were committed to silver last fall and Tammany itself was enlisted for Bryan. But it does not require a long memory to recall that Tammany threw the silver plank overboard Philadelphia Time: very early in the present campaign and called forth a letter from Mr. Bryan condemning its abandonment of the Chicago platform. Neither have we forgotten how Henry George and the Thomas Jefferson Democracy were hailed as the apostles of free silver and of Bryanism. The fact is that national issues had little to do in the present campaign. It was an off year, and as is usual in such per iods the party in power suffered from a reaction.

THE FATE OF CUBA.

With the next month the fate of Cuba will be determined. At the beginning of the session of congress President McKinley will refer the whole matter to the representatives of the American people to take such action as may seem wise and best. Unless the present situation shall have changed in a surprising degree it seems more than likely that this action will be of a kind to improve very considerably the chances of Cuba's deliverance from the yoke of Spain and at the same

## New York Stock Market.

New York, Nov. 4.-Today's business on the stock exchange was larger than that of yesterday, but the losses in the prices quoted at the close are nowhere near so large as yesterday. Although the liqui-dation has been heavy, large blocks of stock being thrown on the market, there has been good support forthcoming at the decline. Although the general course of the market was downward, the course was constantly interrupted by rallies and as one of those periodical recoveries came in the last half hour of trading, the day's net declines were small, except in some of the less active stocks. Prices for American securities received from Londor at the time of the opening here showed recoveries of a fraction all round, and the opening prices here were advanced above the London parity which was the highest price of the day on the local ex-

change. Reaction soon set in and Sugar showed signs of continued weakness. Later an authorized statement reporting satisfactory recovery from a surgical operation of the president of the com-pany steadied this stock and eliminated one of the principal elements of the weak-ness in the recent market. The majority of standard railway stocks showed resistance to the downward tendency all day and helped the tone of the market. The coalers showed some recoveries from yes terday's weakness. Arbitrage brokers bought stocks in this market for London account, but this was probably to cover selling contracts made at the early higher level in London. Nevertheless, it helped to counteract the weakness in the local

market. Traffic returns from railfoads were another favorable influence. Bonds moved in Sympathy with stocks and showed declines. Total sales \$1,450,-

## Chicago Grain.

Chicago, Nov. 4.-Wheat opened firm at a shade above yesterday's closing price. Liverpool was stronger than expected, showing but %d decline, while Paris was up 30 centimes in the face of yesterday's 15%c break here. Light local receipts were taining influence.

Shortly after the opening at which time December was quoted at 92%, the market was struck with one of those extraordi-nary panics that every once in a while knock into smithereens calculations based on the sanity of the operators. The panic was apparently the result of an unskilful arrangement for the selling out of a line of 250,000 bushels December wheat upon which the holder had placed with his brokers a stop loss limit when he bought it two days previously. To insure the prompet execution of the order to stop the loss at a certain price, the brokers in anticipation of its reaching it today, di vided its amount among 10 or more agents and of course when the market got within 1-16 of the limit what appeared to be a general selling panic struck the crowd and it became impossible to get rid of any until the market had dropped three cents from the opening price of Decem-ber. May also suffered but not nearly so much, that option declining to 91%c, about a cent under the opening prices. Buying orders were quickly distributed among a number of active brokers by George B. French, supposed to be the leader of the bull clique, through whose efforts the break in the market was mended in an even shorter time than it had taken to smash it. December had run down to 92 ents, but it advanced to 95 without a The market was very unsettled after its

early break and rapid recovery but it made no more such wild skips. The ten-dency was to sink, and even the reported taking of a total of 132 boat loads at New York and outports failed to hold it up. December wobbled between 94¼ and 94% but it closed at 94 as against 95¼ yes-
