

# THANKSGIVING

AMERICAN AGRICULTURE's super efficiency is graphically illustrated by the two pictures prepared by the Texas Farm Bureau. One American farmer produced enough food for only 22 people 20 years ago (table at left). Today, one American farmer produces food for 56 people (table at right). The state's largest farm organization staged the pictorial comparison (in large color photos) for exhibition in the Food & Fiber Pavilion at the recent State Fair of Texas in Dallas.

## Todays Farmers Provide Adequate Food Supply

Thanksgiving has as much meaning today as it did for the early Pilgrims, according to Carrol Chaloupka, president of the Texas Farm Bureau.

"The colonists had reason to be thankful for the first harvest. It would see them through the winter," Chaloupka said.

"Today, Americans never have to worry about not having adequate food. It's available in abundant supply and dazzling variety at every supermarket in the land, and at reasonable prices," the Dalhart beef and grain producer said.

"American consumers are the beneficiaries of the most efficient and productive food machine the world has ever known—American agriculture," the farm leader said. "The teamwork of scientists, educators, agribusiness people and farmers and ranchers is responsible for the miracle of American agriculture."

Chaloupka said the farmer's output per man hour has increased by some 330 percent in the past 20 years. This compares with an overall increase of about 160 percent in all manufacturing industries, he explained.

"The super efficiency of American agriculture has done much to hold down the cost of living for all Americans," Chaloupka said.

The farm leader said another example of the farmer's increasing efficiency is the fact that one farmer produced food for 22 people 20 years ago, and today one farmer produces enough food for 56 people.

He points out that U.S. farm exports of some \$23 billion annually help Americans buy essential imports, such as petroleum products.

Q. Does infant formula supply enough of the essential vitamins which my seven-month-old needs?

A. Yes. Infant formula supplies essential vitamins and minerals at recommended levels. Cow's milk is lacking in a number of important nutrients—vitamins E and C, and the minerals iron and copper.

The low iron level of cow's milk can be critical since iron undernutrition is the most common nutritional problem of American babies. Iron undernutrition is often characterized by pallor, listlessness and irritability.

An infant's need for iron and other minerals often increases at the age of 4 to 6 months as the natural mineral reserves run out. Infant formula, such as Enfamil, can help replenish iron and other minerals. Unfortunately, this is the very time that many babies are switched from formula to cow's milk.

Cow's milk contains only trace amounts of iron. The leading infant formulas are available in With Iron forms offering significant levels of iron to help prevent iron undernutrition in your baby. And, Enfamil even has a significant level of iron in the Regular form.

Much information on Pennsylvania Dutch families is found in BEN SALEM UNION CHURCH RECORDS, EAST PENN TOWNSHIP, CARBON COUNTY PA. by Raymond E. Hollenbach. Softbound, 125 pps., indexed. Order from Ancestor Publishers, P.O. Box 682, Arvada, Colo. 80001, \$12. Although the major portion of the work concerns baptism (including names of parents and sponsors), 1802-1855, information also pertains to confirmations for both the Reformed and Lutheran services and the officiating pastor, 1855-1859. Surnames which appear repeatedly are ANDREAS/ ANDRES/ ANDRESS, ARNET, BACHMAN, BALLIET, BECK, FRANS / FRANTZ / FRANZ, FREIMAN / FREIMANN / FREYMAN / FREYMANN, BULDNER, HABERMAN, HANS / HANSS / HANSZ / HANTZ / HANZ, HORN, HUNSICKER, KRUM, LECHLEIDNER / LECHLEITER / LECHLEITNER / LEGLEITER, MILLER, NOTHSTEIN, OHL, PETER, RERICH, REX, RUCH, STEIGERWALD / STEIGERWALT / STEYERWALD, WEHR, and WERTHMANN / WERTMAN.

Mrs. Lucy V. Grisham, 2821 Mark Twain, Farmers Branch, Texas 75234 is trying to locate information and relatives of the VICKERS family who settled at Isla, Texas in 1834, Harris VICKERS and his wife Sarah MASON. The family originally came from Massachusetts and Maryland, later going to Georgia, where Harris was b. in 1812. Some migrated to Alabama, Louisiana, and Texas. Mrs. Grisham has much information on this family already, but is particularly interested in locating old letters, family Bible records, or word of mouth, as some of the courthouse records burned in the particular counties she has researched. The family cemetery is at Milam, Texas. Only one of the older group survives. Any help on Harris and Sarah MASON VICKERS and their many children will be appreciated.

Mr. J. Bland Pope, 8107 East Court, Austin, Texas 78759 needs the ancestry of John JENNINGS, b. in the 1730's, Camden District, S.C. Dates also needed on his son John, b.c. 1761, Camden District, Patriot, who m.c. 1797 to Mary GRUBBS, Fairfield County, S.C.

They moved to Georgia and Tennessee. Mary d.c. 1816. Some descendants moved to Missouri c. 1820 and to Texas c. 1847. Her father was Enoch GRUBBS, Patriot, b.c. 1755, m.c. 1775, and d. 1832 in Fairfield County, S.C.

Mrs. Lucille Bryars Owings, P.O. Box 106, Columbus, Ky. 42032 would like to hear from people who have ancestral roots in the Jackson Purchase: Hickman, Carlisle, Fulton, Ballard, Graves, Marshall, McCracken, and Calloway Counties, Ky. She is the curator at Columbus-Belmont Battlefield State Park in the summer months.

Anyone interested in having research done on American Indian families may want to contact Larry Watson, Rt. 1, Box 65, Lawton, Okla. 73501. He will also read the 1900 census for a fee.

## Extension Update

by Georgia Doherty Sweeten-Metric Cookbook

Are you having a hard time adjusting to the fact that "metrics" are nearly upon us? One of the hardest areas to convert to the metric system will be in cooking. Metric cookbooks will speak plain English, or so they tell us!

Probably the biggest obstacle for the cook will be learning to "Think Metric." We can't "Cook Metric" and "Think Cups, Pints and Tablespoons."

Metric, liters, kilograms and degrees celsius are easier than the present system, because they have a systematic relationship to each other—and our present system lacks that.

Metric is based on units of ten. All metric measurements have a decimal relationship to each other, which makes them easier to multiply and divide.

However, the change to metric will not mean throwing out cookbooks, recipes or utensils, no matter how old. Just keep using old favorites as always. But do not try to adapt recipes. Too many things can go wrong.

Besides, many food products and recipes now use both systems, and all nutrition labeling reflects the metric.

To get ready for the new system—and to avert kitchen calamities—it is wise to study metric tables.

The fiber of Americanism lies in the helpful spirit of neighbors found in small towns.

# Giants Win By One

by Robin Truelock

Last Friday night the Shallowater Fillies met the New Deal (Giant) Lionettes. The Fillies went in the game fighting and ready to win. The first minute of play the Fillies started with a lead. Then one of the Fillies, Terri Stanton, suffered an injury that caused her to leave the game. The Fillies pulled together and led the first quarter.

At half time the Lionettes led 32-26. The Fillies kept fighting. The first of the fourth quarter the Lionettes ran off and led the game by eight points. The Fillies made a come back and came within one point of the Lionettes at the closing second of the game. The score ended New Deal 38, Shallowater 47. The Fillies received a standing ovation for their fantastic performance.

LaDonna Pair was high pointer with 18. Following with 12 points was Jana Hayslip. Jamie Hart scored 10.

# Teamwork

by Robin Truelock

Every team must start, With teamwork in their heart. And every player must participate, Before it is too late. Teamwork has no "I", And here is the reason why. Every one feels the bruises, When the team loses. After the team has won, Every one is satisfied with what was done. It takes work, To make a team. And it takes a team, To make it work.

# I Care

by Sheila Evans

The other day I met someone, I think I ought to know. But I'm too shy and he too wild, So I think that I'll just go. He'll never miss me when I'm gone, He won't know I'm not there. But I can't go that quietly, Because I know, I care. I care whether or not he walks Through life getting all that he deserves, I care whether or not he attains The things, that fate for him, reserves. I care whether or not he's free to roam As far as the eye can see. I care whether or not he does his roaming With or without me. You see the reason I care so much About the little things he does, Is a simple reason, as old as time, It's caused my friend by love.

# JV Teams Victorious

by Cindy Jackson

The JV boys played a good game. They pulled through in the last 3 seconds of the game to win 49-48 over L.C.H.S.

Willie Johnson was high point. He threw in 12. He was followed by Huey Wooten who had 9. Allan Judah and Neal Luck both had 8 points.

The JV girls played New Deal. Fillies won 40-32. They all played well and gave great effort.

Josie Ponce tossed in 16 points and Maureen Pair also scored 10 points for the victorious Fillies. Way to go JV.

# Be Thankful

by Ruben Gomez

What do you think of when someone mentions Thanksgiving? Some people will tell you about the big dinners they have with turkey and dressing being served and pumpkin pie for dessert.

Others will tell you about the parades and football games that will be on television and the team they pick to go to the Super Bowl. All these things are great, but have we forgotten the true meaning of Thanksgiving?

The Pilgrims were thankful because they became friends with the Indians and they worked together and helped each other; that is why they decided to celebrate Thanksgiving.

We ourselves have a lot to be thankful for. We are not involved in a war and there isn't any threat that we will get into one.

Our President is Jimmy Carter. I know that there are a lot of people who don't like him, but we should be thankful that the people of this country had the right to elect him. Look at the Soviet Union. The don't elect a president. They are run by a group of people that tell them what to do and when to do it. We are lucky that we can watch football games and other things that entertain us on television. There are countries where the government controls what is shown and the citizens have to watch what the government wants them to.

The big Thanksgiving dinners that we enjoy and look forward to. Well, there are many people in our own country that don't have big dinners. Some can't afford to miss work to celebrate Thanksgiving because their families need the money for the things they need.

All I am saying is that this Thanksgiving while you are eating or watching television, look around at what you have and you will realize that you do have a lot to be thankful for.

# Season Opens Mustangs Cage Lions

by Melissa Epperson

The New Deal Lions hit the gym floor Friday night when the Shallowater Mustangs romped over them 68-21.

This was the first game for the Mustangs and with a victory like this, they should be really strong in district competition.

Key players for the Mustangs were: Rodney Jackson, Rod Warren, Clay Dixon, Stacy Hohenberger, and Lane Giles.

The high-point players were Rodney and Lane with 10 points.

The Mustangs next game will be Monday night at Ropes and Tuesday night at Ralls.

Let's all support the Mustangs in their race for District Champs.

# Scrimmage Starts A Season

by Donna Evans

Last Tuesday and Wednesday the Fillies had scrimmages against Floydada and Hart.

Both varsity and JV girls scrimmaged Floydada last Tuesday. The JV did really well. They won their scrimmage 26-21. The JV did extremely well considering this is their first year to play full court. The varsity girls lost their scrimmage 48-52. The girls learned a lot from the scrimmage and did play extremely well.

Last Wednesday the varsity girls played Hart and won 60-54 and also made their goal to make 60 points a game. Congratulations! The varsity girls did a fine job against Hart.

Come out and support the Fillies as they begin their basketball season.

# Quarter Ends

by Melissa Epperson

The first quarter has ended. And it's end marks the end of football season, the beginning of basketball season, and the beginning of something else. Do you realize that in two more quarters: the seniors will be out of school, the juniors will be seniors, the sophomores will be juniors and they will be trying to raise money for the banquet and prom, and the freshmen will be sophomores.

Let's all hope that next two quarters will go as fast as the last quarter did.

Along with the end of the quarter comes quarter tests and exemptions. This is a time for prayer and study.

Going to church is a habit that one should cultivate; there's little danger in it.

# A couple of cowpokes are about to meet a slowpoke.

Riding the highways isn't the same as riding the range. You just can't go flat out when you feel like it. Especially on rural highways. Those back roads.

Because one of the major causes of traffic deaths in Texas is the failure to adjust thinking and speed when moving from a major highway onto a rural highway. And the failure to adjust can mean the failure to arrive.

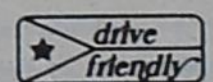

Of course, you probably think you can make better time on back roads. After all, the traffic isn't quite so heavy. But what you don't think

They may be late getting home.

But they'd rather get to their home on the range late than be dead on the highway early.

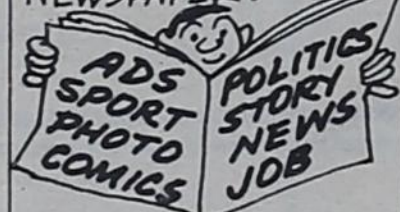

Texas Office of Traffic Safety

about is that less traffic isn't necessarily less dangerous. In fact, back road conditions are even more dangerous. Because the traffic is different. The conditions are different. There may be cattle on the road. There are dangerous curves. There are blind spots. There are deer crossing
