Coordinator; Miss Janie Serna, student secretary; Mr. James Reeves, maintenance supervisor; Custodians, Mrs. Jan Lloyd, Mrs. Julia Escobedo, Mrs. Emilia Maldonado, Mr. Austin Westbrook and Mr. A.E. Todd. Bus supervisor, Mr. Benson Mason. Lunchroom Supervisor, Mrs. Mona Bateman; lunchroom workers, Mrs. Melba Adams, Mrs. Randy Brewer, Mrs. Lilly Byers, Mrs. Pat Grissom, Mrs. Carolyn Hamm, Mrs. Ruth Harper and Mrs. Alene Randolph.

Break-In Reported At White's Store

A break-in at White's Auto Store in Shallowater, owned by W.A. "Dub" Hardin, was discovered around 7:45 a.m. Tuesday morning by Jackie Buck when he arrived to open the establishment for daily business. Approximately \$500 in merchandise was reported missing from the firm.

The break-in is being investigated by the local police department and the Lubbock County Sheriff's office. No leads were reported at press time.

Suspension of Pesticides May Have Impact on Consumer Costs

Pot-Luck Barber Shop Adds New Barber, Leon Sproles, to Staff

Dalton Potter, owner and operator of Pot Luck Barber Shop in Shallowater announces the association of Leon Sproles as a new barber in his shop, effective today, Thursday, August 14.

Sproles has had several years experience in barbering since graduating from Lubbock Barber School in 1965.

Pot Luck Barber Shop is open 5 days a week, Tuesday through Saturday, from 8 a.m. to 6 p.m. Both Potter and Sproles will be in the shop during these hours and will be able to give the customer faster service.

Sproles has been employed as a welder with Clark Equipment Company in Lubbock for the past four and one half years. He and his wife Mariana have four children, Leon, Jr., 18 years old; Julie Rea, age 15; Mary Loretta, age 13; and Lisa Gay, 10 years of age. The girls are all students in Shallowater schools.

The family resides in Camino Estate Trailer Park and are members of Temple Baptist Church in Lubbock.

Everyone is invited to drop in and get acquainted with Mr. Sproles and welcome him to Pot Luck Barber Shop as a new barber.

Commissioner's Court Blames Other Courts for Jail Situation

Over fifty persons were present Monday morning in the Lubbock

Booster Club Meeting Set Thursday Night

The Shallowater Athletic Booster Club has scheduled a meeting for tonight, Thursday, August 14, at 7:30 p.m. in the high school auditorium.

The Booster Club is not just for parents of Shallowater High school athletes, but anyone in the community who is interested in athletics.

Be sure to attend the meeting.

County Commissioner's Court to hear those elected officials attack Federal Courts and the Texas Jail Commission for not doing their respective parts to improve jail conditions in the Lubbock County Jail.

It was the feeling of the Commissioners Court that these agencies must do their part in order that a decision be made toward a speedy solution to take care of local problems in the jail.

Persons present aired their complaints previously voiced this summer of alleged physical abuses and substandard operations of the jail.

Judge Rod Shaw told the group that he was ready and willing to spend over \$400,000 in federal revenue sharing funds which are allotted by the court for jail improvement. He said: "We would

New Patrolman Employed By Shallowater PD

Dennis Dean Gray of South Texas began duties August 1 as patrolman for the City of Shallowater, assisting Police Chief Don Rackler and Patrolman Gary Farr.

A native of Harlingen, Gray has had experience in police work and has a credit of 280 hours in basic police certification schooling and 40 hours in family and tavern disturbances school.

He and his wife, Helen, have a four month old son, Shane and are residing in Triple A Trailer Park.

Chief Rackler states that the city is fortunate to obtain such a fine experienced young man and with the three man force now in operation, the city will have more secure protection in the police department.

The American urban dweller and agricultural producer both will become immediate losers if the use of two important chlorinated hydrocarbons now under fire are suspended, a Texas A&M University agricultural leader says.

Dr. L.S. "Bill" Pope, associate dean of agriculture, warns that the Environmental Protection Agency's recent action calling for suspension of the two related pesticides—chlordane and heptachlor—could have more impact on increasing costs to consumer than the current Russian grain deal.

The proposed ban poses a serious problem for producers, who depend on the vital chemicals for seed treatment for wire worms and other insects that attack sorghum grains, corn and wheat, and for homeowners interested in protecting their lawns and gardens from insect damage and their homes from termite problems.

"Since several other pesticides, including DDT, aldrin and dieldrin, can no longer be manufactured due to EPA intervention, the chemicals now under fire are the main protective shield against certain damaging insects that affect agricultural production and food supplies.

"With increasing production costs, producers cannot afford a failure. Early damage to sorghums, corn and wheat crops mean costly replanting, which could exceed additional production costs of \$22 million annually. This does not include the cost of soil treatments or yield reductions due to the impact of late plantings," Pope says.

Another agricultural authority, Dr. John Thomas, entomologist with the Texas Agricultural Extension Service at College Station, estimates that the cost of alternate broadcast or band applications of chemicals to the soils would run from \$5.80 to \$12 per acre, compared to present seed treatment costs of 11 to 43 cents an acre.

Any decline in sorghum production will seriously hit the producers' pocketbook and invariably raise the cost of food to consumers, the two men warn.

"For example, a 7 per cent loss through ineffective seed treatment of wheat, or a 3 per cent loss of the total corn crop for the same reason would just about equal the amount of each commodity sold to Russia thus far in 1975. While the public is greatly concerned about outshipments of grains to other countries, a bigger problem may be the loss of vital chemicals so necessary for food production," Pope says.

While the EPA suspension order excludes the use of these chemicals for termite damage and non-food plants such as ornamentals, Pope says that past experience of other pesticide manufacturers is that they cannot afford to continue production of a so-called "questionable" chemicals for one or two uses.

"Hence, the danger is that the two pesticides may be removed altogether. At present there are simply no available and effective

New Business Open in Shallowater

R.L. Stone Construction opened for business in Shallowater July 1, located on South Avenue L, between Highway 84 and Loop 388.

The firm, owned by R.L. Stone, has been in operation in Lubbock for the past five years, prior to moving the establishment to Shallowater.

Mr. Stone states the firm employs approximately 45 people and they build oil and feed mills, grain elevators, also water and sewage treatment plants.

Presently they are in the process of erecting a hybrid seed plant in Plainview, three new grain elevators, two in Seminole and one in Muleshoe and have been awarded the sub contract to install a water tower, treatment plant and two well houses for the city of New Deal.

The company also does shop work and builds their own elevator legs.

A member of the Texas Grain and Feed Association, Stone will be assisted in the office by Mrs. Stone.

The couple reside four miles south of Shallowater and have three daughters, Dianna, 21, who is employed by the South Park Inn in Lubbock, Zeniata, a 17 year old high school junior; and Kay, a 15 year old high school freshman.

Both attend Wolfforth schools.

The Stones' invite everyone in the area to drop by and get acquainted. They are proud to be a part of such a fine and friendly little town and are looking forward to meetin each of you.

Shown here is the inside shop of the new R.L. Stone Construction Company where the welding and fabricating are done.

Party Line

Mrs. Glyn Kirby of Groom is a house guest of her brother, Mr. and Mrs. M.T. Stanton.

Mrs. Ralph Newland, Glen and Eric flew back to their home in Jacksonville, Florida, Sunday, following a two week visit with her parents, Mr. and Mrs. Floyd Epperson and Melissa.

O.A. Lambert and his brother-in-law, Henry Jackson of Lubbock were in Hobbs, New Mexico Friday to attend the funeral of a longtime friend, Clarence Jordan and his son, Scott.

Mrs. Alice Williamson returned to her home in Woodlake, California, Saturday after visiting four weeks with her son, the W.F. Williamson's.

M.T. Stanton was admitted to the University Hospital Monday where he is undergoing a series of tests and treatment.

Mr. and Mrs. W.F. Williamson and Mrs. Alice Williamson were Friday night dinner guests in the W.W. Blackledge home in Lubbock.

Mrs. Joan Grimes' mother, Mrs. Melle Bole of the Slide Community, fell last week and broke her kneecap. She is reported doing fine.

Airman Kenneth R. Franklin, son of Mr. and Mrs. Ray Franklin, will be coming home today, Thursday, August 14th for a 10 day leave from Lackland Air Force Base. After his leave, he will be going to Maxwell AFB in Alabama.

Airman Franklin attended Shallowater High School.

M.J. Williams underwent surgery at Methodist Hospital last Thursday and is home and doing fine.

Nine year old Dawn DuLaney, daughter of Mr. and Mrs. Jack DuLaney is attending a gymnastics workshop in Levelland at Gym World this week. Dawn will be a member of the gymnastics team this winter and compete at meets with the team.

Mr. and Mrs. Jack DuLaney, Lesa, Jana and Dawn returned from Friday night from vacationing in Houston, Louisiana and Six Flags.

Visitors in the E.B. Reed home Sunday were Mr. and Mrs. George Hoover of Irene, and Mr. and Mrs. Merrell Johnson and granddaughter, Amie, from Littlefield.

Tuesday night dinner guests in the Ralph Downey Home were Mr. and Mrs. George Hoover of Irene.

Mr. and Mrs. Kinsey Young returned home Monday night from visiting relatives in Arkansas.

Lusky L. Green, 21, son of Mr.

and Mrs. W.S. Green, was promoted to Army specialist five while serving as a clerk with the 3rd Armored Division in Germany.

Mr. and Mrs. Charles Coats proudly announce the arrival of their first child, a boy, born Thursday, August 7 at 10:14 a.m. in Methodist Hospital.

Tipping the scales at an even 8 lbs., the little lad was named Matthew Charles.

Proud grandparents are Mr. and Mrs. B.C. Coats of Shallowater and Mr. and Mrs. Melvin Griffith of Plainview. The father is engaged in farming.

Bridal Shower Honors Miss Sheri Pearce Saturday

Miss Sheri Pearce, bride-elect of Glen Harris of Philadelphia, was honored with a come and go bridal shower Saturday evening from 7 to 9:30 p.m. in the lovely home of Mrs. Jack DuLaney of Shallowater.

Approximately 50 guests were registered by Mrs. T.D. Oldham as they were greeted at the door by Mrs. DuLaney and Mrs. Jim Foerster. Several sent gifts who were unable to attend.

The honoree's chosen colors of Royal Blue and white were carried

out in decorations. The serving table was laid with a beautiful lace cloth over royal blue, centered with an arrangement of white daisies enhanced with royal blue and flanked silver amber cup candles.

Amber punch, thumbprint cookies, mints and nuts were served by Mrs. Roger Pettet from silver appointments and a beautiful West German cut glass punch bowl set.

Royal blue tipped carnation corsages, tied with royal blue and white checked ribbon were presented the honoree, her mother, Mrs. Boyd Pearce and grandmother, Mrs. Wade Pearce of Brownfield.

Hostesses were Mesdames T.D. Oldham, Jim Foerster, John Anglin, Garland Boozer, Bobby Stiles, Jack DuLaney, Roger Pettet, Bryan Burgett, Glen Burgett, Neff Preston, Dalton Potter, James Truelock, LaVon McAuley, B.V. Oldham, Bob Grice, Doyle Greenway, Bill Johnson, Clifford Conner and C.L. Ichertz.

The couple will exchange vows Saturday afternoon at 3 o'clock in the First Baptist Church Chapel.

United Methodist Women Meet

The Shallowater United Methodist women met Monday evening, August 11, at 7:30 p.m. in the church parlor.

The meeting was called to order by the president, Mrs. C.M. Thomas. Roll call was answered by reading a favorite chapter in Psalms.

Opening prayer was given by Mrs. C.E. Pair and Mrs. W.C. Vaughan brought the devotional. The group discussed the forthcoming senior banquet they sponsor each year.

Mrs. Louis McMenamy provided refreshments for the nine members and one guest, Mrs. Jackie Reed, formerly of Alexandria, Virginia.

The next meeting will be Monday, Sept. 8, in the church parlor at 7:30 p.m.

Don't drown your plants with kindness. Too much water is as harmful to your plants as too little. WATER-STIKS help you protect your investment by changing color when plant needs water. Elliotts Attend Antique Car Show In Brownwood

Mr. and Mrs. Milton Elliott, Mr. and Mrs. Paul Elliot, Tammy and Anna, were in Brownwood Thursday through Saturday of last week to attend the 13th annual Grand Old Tour, Southwest Region of the Antique Automobile Club of America, held at the Riverside Motel there.

Over 800 antique cars were registered from all over the state, with one car registered as far away as Florida.

The Elliott's entered three antique cars in the event, a 1929 Ford Roadster, 1925 T-Model Ford truck and drove a 1936 Oldsmobile to Brownwood, and trailed the other two.

Judging of the cars was held Saturday morning and the driving events were held Saturday afternoon in which Paul Elliott won second place in registration on the T-Model truck in his division.

He and his wife, Charlene won second place in the Old Shoe Race driving event and Paul placed third in the cranking contest.

The group reported a real good time at the annual affair with the meeting to be held next year in San Angelo.

YWCA Schedules New Fall Classes

The Young Women's Christian Association is accepting registration for fall classes, September through December. Fall brochures with complete information are available at the YWCA office, 3101 35th Street.

The variety of programs for preschoolers and adults, high school students and their elementary school counterparts includes swimming, exercise programs, crafts, and educational classes.

Three exercise programs will be conducted including a morning exercise and swim class, a noon exercise class, and aerobic dance.

Yoga, bellydancing and karate will compliment the fall program. A 5 session class in golf is scheduled along with weekly tennis classes.

Cake decorating, crochet, macrame and needlepoint are on the agenda for fall. Also a four week upholstery class and sessions in bridge, guitar and conversational Spanish.

For the preschooler, fall classes include Morning Y-Tots and Afternoon Y-Tots. Other morning classes include instruction in tumbling, puppetry, music and dance, and a special class to set the holiday mood, "In Time For Christmas". Tumbling, Number Fun, Pooh Corner Story Hour and Ballet will comprise the afternoon preschool classes.

Saturday morning classes in gymnastics, karate, charm, and kid's kookery will be offered to elementary aged children. Elementary ballet is scheduled for Tuesday and Thursday afternoons.

Several Saturday morning classes have been scheduled especially for teens including modern dance and hodgepodge, a crafts and stitchery class. G.E.M.S. Babysitting Clinic is scheduled to begin October 18. Those satisfactorily completing the course will have their names placed on a YWCA babysitting referral list.

Membership in the YWCA is \$5.00 per year for adults, \$1.00 for teens and free with a mother's membership for children 11 and younger. Classes have an additional fee.

The YWCA is a United Way agency.

County Commissioners . . . Continued from Page One

have already had some construction underway if it weren't for the Federal courts."

He was referring to a U.S. District Court case involving the City of Dallas mail and explained that requirements placed on jails in that case are still being studied.

At least one commissioner, Arch Lamb, voiced the opinion that perhaps the best way to handle the local jail problems, as to inadequate facilities and substandard treatment; would be to begin now working toward construction of complete new facilities, which, while jailing some prisoners, would also provide outside work areas for others.

The Court did point out in the course of the public hearing that

CROSSING THE DESERT IN THE '30s

CANVAS WATER BAGS

A few years back, if you were going to take a trip, one thing you wouldn't think of going without was a water bag. The bags could be purchased from hardware stores, filling stations, and auto parts houses for one or two dollars. They usually held four to six quarts and were made of canvas material sewn together with water-tight seams. A drinking or pouring spout at the top could be closed with a cork stopper or screw-on cap. Some had removable metal cleats that could be slid off, opening up the bags for cleaning. Most had a rope strap to hang them by or carry them with.

When traveling, most people hung the bags on the outside of their car somewhere, usually on a bumper guard, head light, or door handle. The bags actually kept the water cool. A small amount of water would seep through the sides of the bag and evaporate. The evaporation would cause the contents to cool down, a chemical process I still don't understand even though it has been explained to me on occasion by those who do.

Unknowing tourists sometimes were talked into buying water bags when approaching unfamiliar arid regions. Unscrupulous filling station operators would start out by telling some dreadful story of some family who had tried to cross the desert "up ahead" with no extra water supply. They would go into great detail on how the poor folks had suffered. If the story was told well enough and with just the right expressions, some tourists were known to have bought half a dozen water bags at one time. One man I knew used to do that and he even charged them for the water to fill the bags with. Funny thing about it was he lived almost four hundred miles from the nearest desert.

The bags were very useful, not only to those on vacation trips but to farmers, ranchers and other workers as well. They required no special care and would not be broken if bumped or dropped. A wet, dripping canvas water bag was always a welcomed sight to a thirsty person.

State Senator Kent Hance Addresses County Agents

State Senator Kent Hance of Lubbock told Texas county agents in Lubbock last week that agricultural exports are central to a strong American economy.

"A strong economy is the only way for the United States to hold its strong military position in the world," said Hance, addressing the annual meeting of the Texas County Agricultural Agents Association.

"Our unfavorable balance of trade payments were partly the result of increased U.S. labor costs prompting industries to shift their production to other

while the Commissioner's Court was responsible for providing funds to operate the County Jail, the Court was not responsible for the manner in which the jail, or any other operations under the County Sheriff's office, were operated.

Judge Shaw told the group that the Texas Jail Commission must study new requirements placed on local jailing authorities before decisions could be made.

Pesticides . . . Continued From Page One

substitutes for many of the uses of these chemicals," Pope says.

While the EPA must, as one of its charges, carefully evaluate and scrutinize chemicals for possible toxicity and carcinogenic effects, the risk-benefit ratio also must be considered, he emphasizes.

countries where labor is much cheaper. The products were, in turn, imported back to America, thus causing a gold flow away from our economy," he stated.

"Not until we exported large amounts of agricultural products did this payment balance trend reverse itself," Hance concluded.

Referring to recent state appropriations for Agricultural Extension and research programs, Hance cited them as an investment in agriculture which has been and must continue to be the backbone of American progress.

The state senator challenged the county agents to assume an even greater responsibility to see that all farmers know what's available from agricultural research efforts.

"I make no apologies for any money voted by the Texas Legislature in support of Agricultural Extension and research," Hance concluded.

Outdoors in Texas By J. C. Roberts

In a few weeks, most of the topwater fishing action will be gone from our waters in this state, as the big bass head for the deeper water as the cooler weather sets in. But some tips on topwater fishing could help you put that big one on the stringer. A half dozen different top water baits should grace your tackle box, but the poppers, chuggers, and stick-up baits are the most popular. As a rule, top water fishing is best in calm water early and late, but many big bass have been caught in open water, during the heat of the day on topwater baits. When casting make the lure land "soft" by pulling up that rod tip and letting the lure land straight down in the water. In choppy water, work that lure hard, with the more noise the better. Early and late shallow fishing move it slowly . . . very slowly.

 TEXAS PRESS ASSOCIATION

Austin—First Texas impeachment trial in 44 years is scheduled in the State Senate September 3.

A 10 count impeachment resolution against 229th District Judge O.P. Carrillo was voted by the House of Representatives August 5 by an overwhelming margin (128-16).

Gov. Dolph Briscoe fixed the trial date in cooperation with Lt. Gov. Bill Hobby, presiding officer of the Senate.

Leon Jaworski, Houston attorney who was chief Watergate prosecutor, will serve as special counsel for the Senate during the expected lengthy trial.

Terry Doyle of Port Arthur will serve as House special prosecutor.

Impeachment proceedings have been voted against only three

Texas officials in the last century and just one, former Gov. James E. Ferguson, actually was removed from office and forbidden to run again. A two-thirds vote of the Senate is necessary for removal.

Carrillo stands charged with a variety of wrongs, including abuse of judicial powers, political conspiracies and using county personnel and property for his personal benefit.

Campaign On

Advocates of a new constitution have opened campaign headquarters and named a campaign director for an all-out effort to begin soon after Labor Day.

The election is scheduled November 4.

A rival "Committee to Preserve the Present Texas Constitution" also has filed necessary legal papers with the Secretary of State but has scheduled no activities.

Rep. Ronald Earle of Austin will head the campaign office for "Citizens for the Texas Constitution." Former State Supreme

Court Chief Justice Robert W. Calvert is in overall charge.

Atty. Gen. John Hill, House Speaker Bill Clayton and Lt. Gov. Bill Hobby are among strong supporters of revision.

Gov. Briscoe said he still has reservations about the legislative and financial articles, but has not decided whether to offer strong opposition.

Comptroller Bob Bullock is opposed to local government and financial articles but backs judiciary, legislative and executive article changes.

The AFL-CIO expressed opposition to judiciary and local government articles.

Tax Hike Dispute

Texas Research League disputes claims that the new state school finance law is forcing steep local tax increases.

In nearly all instances, said TRL, increases in the local share of school costs can be absorbed by shifting tax dollars from so-called "enrichment" programs into local Foundation matching fund requirements. Raising taxes is a local choice, according to TRL.

A.G. Opinions

An act granting veterans preference in governmental employment is valid, although a five-year residency requirement may be unconstitutional, Attorney General Hill held.

In other recent opinions, Hill concluded:

- County regulatory authority over solid waste disposal within cities is limited to licensing disposal sites.

- The prison system has no authority to require inmates getting college education benefits to apply for federal veterans aid or to make reimbursement.

- Port of Beaumont Navigation District may own and operate facilities within the Port of Orange, but must serve only the Beaumont district. Property and facilities may be leased to an individual or corporation for private industrial use.

- A Dallas County deputy sheriff may not also be a city councilman.

- Galveston County may not divert to other road projects \$5

SPORTS

by Joe Kelly

If Texas Tech is to have a successful football campaign, the key to achievement in 1975 may well come in the first half of the campaign.

Three of those five games will be played in Lubbock, which one SWC athlete recently told me he thought was worth at least a touchdown in Tech's favor. But those three games are not the important thing, for two of them are non-conference.

No, the real key is after the opening pair of games here against Florida State and New Mexico. This is not to put down those two schools, but they are appetizers. The real test of the Raiders comes on successive weekends.

In those three weeks Tech plays: Texas at Austin, Oklahoma State at Stillwater, Texas A&M in Lubbock. And, in all three, the Raiders will face physical opposition.

To refresh memories, last year the Raiders were sky high for the Longhorns and, though it was a physical game, they came through it in pretty good shape. The wear and tear, though, was starting.

The following week the Raiders hosted Oklahoma State and, frankly, were lucky to win, 14-13, in a game that saw them take a real physical beating and lose some players.

The next week the Raiders travelled to College Station and hopes were dimmed quickly. The Raiders could do nothing with the physically superior Aggies, who gave Tech a body beating for the third week in succession.

By this time the starting lineup was: (1) battered; or (2) sidelined by injury. For the last half of the season, the Raiders were able to do no better than play .500 ball.

There probably is more depth on the Raider squad this year, but some of the depth lacks experience. There is more size and, as long as there aren't injuries, the Raiders might well be better prepared for a gruelling season, physically.

Still, Tech is going to be tested early. Texas undoubtedly will be ranked from one to three and, especially in Austin, will be physical. Then comes Oklahoma State and A&M.

Oklahoma and Nebraska were the odds-on picks to win the Big 8, but Oklahoma State picked up some support. The Cowboys will be big, strong and more experienced.

A&M, of course, has probably the most physical squad in the conference, with depth and experience at every position and smarting from last year's disaster. It helps to have that game here, of course, but....

So, it isn't difficult to see that both the Texas and Oklahoma State games could go against the Raiders. That would put them down to their 1974 record through four games.

If A&M continued last year's mastery, the Raiders would, with half a season left, be fighting to act as spoilers. I hope it doesn't happen. All I'm doing is pointing out that you can't go on 1974's record and that, as usual, injuries could play a major part in determining Tech's success.

The idea of a super conference, long kicked around by sports writers on rainy days and others, might still be a possibility. It could be hastened by whatever action the NCAA takes at its meetings this week.

There is talk that the major universities will split from the NCAA if the smaller universities and colleges succeed in sweeping proposals that include being cut in on television and bowl receipts, reduced coaching staffs and a cutback in scholarships.

Darrell Royal, Frank Broyles, Barry Switzer and others have been most vocal in objecting to such proposals. They saw that, with the controversial "equal" rights for women, intercollegiate athletics would be all but destroyed.

They know that rising costs are hurting schools, and they know that football, at many institutions, is the only sport that is paying its way. And they favor modified reforms.

I sympathize with the so-called majors. They are fighting the pros for the entertainment dollar and they are being eaten alive by rising costs. And now women have reared their "ugly" (?) head to muddy the waters even more. What is a school going to do?

One answer might be for the so-called super powers—like Texas, Oklahoma, Arkansas, LSU, Notre Dame, etc.—to form that long talked of "super" conference.

The rub there is, as Darrell said, when asked why Texas didn't schedule Notre Dame, Southern Cal, Penn State, etc., that's the quickest way to empty the stadium he knew. A few losses and those 81,000 seats would show a lot of emptiness.

So, the answer could be the super conference, with schools of consistent strength and drawing power. It might be worth a try, with the "have-nots" continuing in lesser conferences. Then, if the super conference couldn't make it, it would be back to intercollegiate athletics.

PERSONALS

THANK YOU
I wish to say thank you to all the wonderful friends who have been so kind to my family in the loss of my precious mother. We have been blessed with concerned visitors, many lovely flowers, the most beautiful cards and delicious food. These have all made the difficult days a little easier. I sincerely appreciate everything done and request your prayers in the days ahead. God bless you all.
Love,
Jolene Shropshire and family

Rays of Hope

by Pat Stanton
"A man has joy by the answer of his mouth", Proverbs 15:23.
The words of a man's mouth are so powerful that they can produce life, health, riches, joy and peace. This is possible because man is created in God's image. God spoke the world into existence and everything is still held in place by his word.
Man's words are a living force and the success or failure of his life is largely determined by the words that he speaks.
If a man knows how to quote and say God's word for every problem and purpose of life, he will have a new creative force and power in his life.
Positive words of faith based on God's word brings life, hope, and healing.
The writer of Proverbs says that "we are snared by our words." If you find yourself caught in a "snare of life", check up on the words that you speak.

Are they words of failure, gossip, criticism, fear, worry, hate, and etc?
Learn to speak words of kindness, hope, peace, faith, love, gentleness, and progress.
Proverbs 18:7-8, "A fool's mouth is his destruction, and his lips are the snare of his soul." The words of a talebearer are as wounds, and they go down into the innermost parts of the belly.
Proverbs 16:24. Pleasant words are as an honeycomb, sweet to the soul, and health to the bones.
Proverbs 12:18, "but the tongue of the wise is health."
James 3:2, "if any man offend not in word, the same is a perfect man, and able to bridle the whole body."
Learn to control your tongue and you will find yourself really enjoying a long, good life. Psalms 34:12-13, I Peter 3:10.

Insurance Hike Asked
Insurance industry spokesmen have urged the State Insurance board to fix homeowners policy rates on an annual basis, rather than the traditional three-year period.
As an alternative, the industry urged a 22 per cent increase in the three-year premium. Inflation and unexpected losses were cited. The Board raised rates 19.3 per cent last January, but the industry claims that was insufficient.

Jobless Rate Up
Unemployment payments reached another record high last month, with \$24.8 million in benefits distributed.
Comptroller Bob Bullock said an average of 21,000 Texans received weekly benefit checks every day. Payments topped \$1 million on 19 days of July.
July payments bring to \$143.5 million the total jobless aid paid for 1975. This compared with a total of \$79.2 million for all 1974.
Highest daily payout in July was \$1.3 million to 25,180 persons and the lowest \$938,457 to 18,071, according to the Comptroller's figures.

Denture problems?
OraFix holds dentures better because it spreads better.

Tests prove OraFix® spreads better than the other leading denture adhesives — cream or plastic. Other adhesives can leave gaps between dentures and gums. So food particles and air can get in causing dentures to slip. But OraFix spreads better so it can fill even tiny gaps. Result? OraFix seals and holds dentures tight.

ORAFIX, EVERYDAY, FOR THE SEAL OF CONFIDENCE.™

4-H's Discover Breads With American Flavor

CHICAGO—Authentic American bread recipes are difficult to find. Most of the breads we eat today are based on Old World recipes brought to this country by colonists and handed down from generation to generation.
But after considerable research, and with the assistance of Standard Brands Incorporated, 4-H's have managed to come up with two genuine American breads: sourdough and Anadama (see recipe below). They're fun to bake and they're a tribute to the nation's cuisine during the bicentennial celebration.
Fun and learn-by-doing experiences are what the national 4-H bread program is all about. Boys and girls from 9 to 19 acquire practical skills and gain creative satisfaction from 4-H bread making activities. And they can work for awards donated by Standard Brands and arranged by the National 4-H Service Committee.
Incentives offered
Standard Brands offers \$800 college scholarships to six national winners, an expense-paid trip to the 54th National 4-H Congress, Nov. 30-Dec. 4 in Chicago, to one winner from each state, and up to four medals of honor per county. All winners are selected on the basis of their records of accomplishment by the Cooperative Extension Service, which conducts the 4-H youth program.
Bread projects teach 4-H's to plan, purchase, prepare and serve breads and cereals. They also stress the nutritional importance of these foods: four daily servings of whole grain or enriched breads and cereals provide some of the carbohydrates, iron, and B vitamins necessary for good health and an attractive appearance.
4-H's share their knowledge and skills with others through demonstrations,

Young persons in the national 4-H bread program sponsored by Standard Brands Incorporated are discovering that American breads are fun to make, nutritious and appetizing. 4-H bread making activities are supervised by the Cooperative Extension Service.
community service meals, the media, and exhibits at local, county and state fairs. Additional information on the national 4-H bread program is available from county extension agents.
Anadama bread
The name Anadama supposedly comes from a New England fisherman whose lazy wife, Anna, refused to bake bread. In exasperation he mixed up a concoction of his own. As he stirred and kneaded his family heard him muttering "Anna damn her," and the bread become known as Anadama.
ANADAMA BREAD
Makes 2 loaves
7 to 8 cups unsifted flour
1 1/4 cups yellow cornmeal
2 1/2 teaspoons salt
2 packages dry yeast
1/3 cup softened margarine
2 1/4 cups very warm tap water (120°F - 130°F)
2/3 cup molasses (at room temperature)
In a large bowl thoroughly mix 2 1/2 cups flour, cornmeal, salt and undissolved dry yeast. Add margarine. Gradually add tap water and molasses to dry ingredients and beat 2 minutes at medium speed of electric mixer, scraping bowl occasionally. Add 1/2 cup flour. Beat at high speed 2 minutes, scraping bowl occasionally. Stir in enough additional flour to make a stiff dough. Turn out onto lightly floured board; knead until smooth and elastic, about 8 to 10 minutes. Place in greased bowl, turning dough to grease top. Cover; let rise in warm place, free from draft, until double in bulk, about 1 hour. Punch dough down; divide in half. Roll each half to a 14 x 9-inch rectangle. Shape into loaves. Place in 2 greased 9 x 5 x 3-inch loaf pans. Cover; let rise in warm place, free from draft, until doubled in bulk, about 45 minutes. Bake at 375° F about 45 minutes or until done. Remove from pans and cool on wire racks.

New Profits Are Possible From Cotton Gin Waste

Cotton gin waste can be converted from a problem into a profit, say Cotton Incorporated agricultural researchers.

Two possibilities are selling the waste as a source for industrial raw materials or feeding it to ruminant animals as roughage in ration formulations.

"Chemical companies tell us that gin trash contains potentially valuable products," said Dr. W.F. (Bill) Lalor, manager of systems and cost engineering at the Cotton Incorporated Research Center here.

"The market is there if we can figure out a way to deliver gin trash to a user's plant at the right price," he said.

The biggest problem today, Lalor explained, is handling and transportation. To overcome the problem, Cotton Incorporated researchers are testing a new gin trash cuber.

"Although the technical feasibility of cubing gin trash has already been demonstrated many times, the problem of high cost remains," said Lalor. "The angle we are

exploring is to cut cubing costs in half by using more abrasion-resistant dies than those used in traditional cubers."

Lalor said Cotton Incorporated's test cuber, known as a "gear cuber", is now undergoing trials at a gin in Texas.

Another possibility being explored by Cotton Inc. is packaging gin trash in modules on pallets, the engineer said. "This is especially promising in areas near feed lots," said Lalor.

While costs of moduling gin trash will vary from one gin to another, he said, the average should be around \$5 a ton. A 32-foot pallet will accommodate 13 to 14 tons of stripped cotton-gin trash.

Lalor said that Cotton Inc. researchers, knowing that gin trash has traditionally been used locally as a feed for ruminant animals, conducted a study to examine the supply and demand situation for a larger market and to evaluate gin trash both nutritionally and economically.

"We found that gin trash

compares favorably with other feedstuffs of similar nature," said Lalor. The Cotton Inc. research suggested numerous ration formulations based on gin trash as the roughage.

"Our conclusion is that, where chemical contamination is not a problem, gin trash is most profitable to the gin as an animal feed," said Lalor. "To safeguard this market, ginners must not offer gin trash for sale if the crop from which it originated was treated with chemicals bearing labels prohibiting use of the crop for feeding to livestock."

New possibilities for profitable disposal of gin waste are discussed in an "Agro-Industrial Report" entitled "Productivity and Profits in Ginning," just published by Cotton Inc.

Dr. Lalor is one of the authors, along with J.K. (Farmer) Jones, associate director of agricultural research for mechanization, and Dr. George A. Slater, vice president of agricultural research.

Cotton Incorporated represents U.S. cotton growers as their fiber marketing company. Research operations are administered at the company's research center in Raleigh, N.C., and marketing operations are centered in New York City.

Copies of the "Agro-Industrial Report" are available from Dr. Lalor at the Cotton Incorporated Research Center, 4505 Creedmoor Road, Raleigh, N.C. 27612.

Registration Set At South Plains College Aug. 28-29

Fall 1975 registration at South Plains College will be Aug. 28-29.

Registration for day classes will be from 9 to 11 a.m. and from 1:30 to 3 p.m. on both days. Evening registration will be from 7 to 8:30 p.m. on Thursday, Aug. 28.

In addition to SPC, courses also will be offered at Reese Air Force Base and several area towns.

Fall 1975 bulletins containing information on courses offered, tuition and fees, may be obtained by contacting the office of the registrar, Jerry Barton, at (806) 894-4921, ext. 274.

CLEP Test

Deadline to register for the September College Level Examination Program (CLEP) test at SPC is Aug. 28.

Persons wishing to take the CLEP test, scheduled Sept. 20, should register in the guidance and counseling office, located in the College Administration Building.

General examinations measuring achievement in the liberal arts and subject exams on achievement in specific college courses will be offered.

A total of 18 semester hours of college credit may be earned at SPC on the basis of subject exams.

For more information, contact the office of Don Melton, director of guidance and counseling, or Mrs. Sherley Foster, academic counselor at SPC, at 894-4921.

Sorghum Board to Meet August 19th

The Texas Grain Sorghum Producers Board will hold its regular bimonthly meeting, Tuesday, August 19, at 10:00 a.m. in Dumas, Texas, at K-Bob's Restaurant. The group will break for lunch at noon and resume the meeting at 1:00 p.m.

The main topic of the meeting will be a discussion of the 1975 assessment collections. Special guest, Dr. Patrick Odell from Texas University at Dallas, will discuss his recent work in making paper from sorghum stubble and extracting furfural from sorghum stubble for commercial use.

American Heritage Merit Badge Now Available to Scouts

The South Plains Council announced a new merit badge, American Heritage, has been established for Scouts to earn, according to Jack Baker, Council President.

The Boy Scouts of America has designed the requirements to place emphasis on the nation's Bicentennial activities. The requirements include that a Scout learn and understand the history and development of our great nation and government and the importance of its future development. "They will have a better understanding of how our government operates and will learn that this nation didn't just happen to be, it was developed by great leaders," Baker said.

Money is only as important as you make it, after meeting the necessities.
