Cub Scout Pack 37 To Be Reorganized Tuesday Night

A meeting of the parents of all boys 8, 9, and 10 years of age in Clarendon and vicinity to reorganize Cub Scout Pack No. 37 will be held next Tuesday night, April 15, at 8:00 P. M., in the American Legion Hall in Clarendon. Pete Kunz, Legion Post Commander, announced this week.

Notices of this meeting have been handed out to all boys of this age group at the school to take home to their parents, and another reminder notice will be sent home on the day of the meeting. These notices call the attention of the parents to the fact that the meeting is to be held, and also indicate that since the program of Cub Scouting is a home-centered affair, the boys will be welcome to come to the meeting only if they are accompanied by one or both of their folks.

The purpose of the meeting is to inform the parents of boys 8, 9 and 10 what the program of Cub Scouting is—how it can help their sons, and how they can help their boys get more out of the program. Cub Scouting is the program of the Boy Scouts of America for boys of this age group and has three basic objectives: Citizenship Training, Character Building, and drawing a boy and his Mother and Dad closer together through cooperation and participation in a program for their son.

Highway 70 Receives Renewed Action

Jimmy Faulkner, manager of the Chamber of Commerce has received a copy of the following minute passed by the State Highway Commission on March 28th: "IN BRISCOE AND HALL COUNTIES on State Highway 70, from near the Prairie Dog Town Fork of Red River to Turkey, a distance of approximately 15.0 miles, the State Highway Engineer is directed to proceed with the surveys of right-of-way data for improvement of the highway and upon approval of location and completion of right-of-way data to release the deeds to the counties for right-of-way procurement.

"This action is taken at the request of the counties in the interest of advance planning with the understanding that funds for improvement are not presently available."

It is known that most of the right-of-way deeds were secured and recorded more than ten years ago. Seems that some deeds were never recorded.

This renewed action on Highway 70 is the result of a recent appearance by the State Highway 70 Association before the Commission in Austin at which Faulkner appeared as an officer of the Association.

Womanless Wedding To Be Presented April 17-18

Next Thursday and Friday nights, "The Womanless Wedding" will be presented by the Band and Orchestra Parents organization at the College gym. This is expected to be one of the best comedy presentations of this nature to be presented here in quite some time. There will be other added attractions along with the main program. An excellent cast has been secured to portray the different parts. There will be three reserved seat sections for those who want to be sure of getting a good seat. Price of admission will be 75c for reserved, 50c for adults and 25c for children.

The Band and orchestra parents organization is looking forward to a big crowd for each performance, as this will be the only money-raising event the organization will sponsor this Spring. It has been decided by the group, due to conditions being a little slow at the present time, to make their drive for operation funds next fall.

It takes money to operate the band, so each one that witnesses the "Womanless Wedding" will get some swell entertainment as well as helping this community project. Keep the date in mind—Thursday and Friday, April 17 and 18th.

Two resolutions were presented during the session. One endorsed the candidacy of Carlos Vaughn, Post 192, Hereford, for department sergeant-at-arms. The position will be filled during the August meeting in Dallas.

The second resolution was in the form of a vote of thanks to the Clarendon Legion Post and the City of Clarendon for the two-day convention which concluded today.

At 9 o'clock, a dance was staged, with more than 420 Legionnaires, Auxiliary members and guests attending.

Registered delegates to the Legion business session Sunday afternoon totaled 372. Twenty-seven of the 45 posts in the district were represented.

CHRYSLER FirePower is so much more than HORSEPOWER

It's worth remembering that today's Chrysler V-8 is not a "warmed-over" engine, but basically brand new... the first truly new type engine of modern times. It does, indeed, open new horsepower potentials, but what it can mean to you goes way beyond just that...
FirePower is also a better-built engine throughout. It doesn't require premium fuel. It runs with less waste, less heat, less wear, less carbon deposit than other type engines can do. More of your gasoline's energy is turned into actual road power, greater reserve for passing and top speeds when needed...
FirePower gives your gasoline a better place to work... the first hemispherical combustion chamber in a stock-car engine. It makes possible more power from every drop of gas. You feel it the minute you open up a Chrysler, in greater accelerating power than you've ever had at your command...
Why not drive this revolutionary new-type engine, and feel its wonderful difference for yourself? Let your Chrysler dealer show you how much more than horsepower your money can buy in the engine Chrysler has designed from scratch to do an engine's job better, longer, and more efficiently than previous engines can hope to do!

The magazine shelf is an interesting asset to the Library this week. Several have been helpful in contributing to this corner.

We have two books for the Junior shelves. These are "The Secret In the Old Well" by Carolyn Keene, which is a Dana girls mystery story.

We have "Grandma Moses" or as she states: My Life's Story. This was edited by Otto Kallir. It is one of the most popular books of today.

Please consider reading one book per month. We can happily use your quarter for membership, and twenty-five cents pays for 3 mos.

To The People of The 18th District

By Cong. Walter Rogers

CODE OF ETHICS: Several members of Congress have from time to time introduced various suggested codes of ethics for public servants. Some of these concerned all public employees, some of them included various groups of employees, and others included everyone.

"A STANDARD OF ETHICS FOR ALL I Am Jehovah Thy God. I Thou shalt have no other gods before me. II Thou shalt not make unto thee any graven image. III Thou shalt not take the name of the Lord thy God in vain. IV Remember the Sabbath Day to keep it holy. V Honor thy Father and thy Mother. VI Thou shalt not kill. VII Thou shalt not commit adultery. VIII Thou shalt not steal.

IX Thou shalt not bear false witness. X Thou shalt not covet. Man has made many futile attempts to enlarge upon and restate these Ten Commandments in different ways.

PRESIDENTIAL PRIMARIES: Presidential preferential primaries have perhaps received more publicity in the past few weeks than ever before in the history of this country.

I have always felt that a true democratic form of government demanded an expression from each individual subject to such government. Such preferential primaries, together with proper revision of the electoral college procedure, would actually give the individual voter a true voice in naming the persons to serve as President and Vice-President of this great country.

FOREIGN AID: I have received lots of mail against the proposed 7.9 billion dollar foreign aid expenditure. The proponents of this measure are going to have a hard time carrying it through Congress without some sizeable cuts.

LONE STAR
Agriculture
Released by
The Texas Department of Agriculture

By John C. White, Commissioner
The Pink Bollworm - I

Two problems in Texas Agriculture come to us across the Rio Grande—the "wetback" and the cotton Pink Bollworm.

The insect, or Pectinophora Gossypiella, has this in common with the "wetback": thinks look better to it on this side of the border, and it comes across to work in our cotton crops. It will "hitch" a ride across the international bridge on trucks and cars and clothing, or anything else that has been in contact with cotton or cotton products in Mexico. Or, in the moth stage, it will fly across.

The first Pink Bollworm was discovered in Texas near an oil mill in Robinson County in 1917. Since then, it has become the greatest threat our cotton industry has ever faced, with 193 counties now under quarantine.

The worm comes from an egg laid by the moth on the cotton plant. The larva burrows into the fruit, square or boll and reaches maturity in 10 or 15 days. It pupates, and in about 30 days from the time the egg is laid it has developed into a moth. After maturity, the female moth deposits eggs for another generation.

The worm grows to about one-half inch in length. It's made up of segments, like the tail of a crayfish. Each segment is ringed by a pink line.

The moth is less than an inch long, brown in color, and shy—hiding from the light of day under stones or brush and flying in the late evening. It can make long-distance flights of hundreds of miles, at an altitude of 2,000 or 3,000 feet—for example, from the Laguna district of Mexico to as far away as Arizona, New Mexico, and the Plains of Texas, which is a rather respectable

performance.

These little moths live only two or three weeks. But as many as five and six generations appear in one season. That means if every egg laid by one female moth should develop into an adult moth, in five generations one moth would have produced more than 10,000,000,000 hungry Pink Bollworms.

Multiply that by millions of moths on thousands of acres of cotton, and we get a rough idea of what we're up against.

(To be continued)

Pop knows he is about to get nickered but good when the wife and kids present him with long-desired gifts.

Someone has said that thirty is the proper age for a woman. If she isn't proper by that time, she never will be.

We consider every woman beautiful until SHE declares otherwise.

'Handbook of Texas' Due For Publication Sometime This Year

AUSTIN—Do you know where your town and county got their names, and the dates of their establishment?

If not, you will have a reference available next year which will provide that information. A two-volume "Handbook of Texas" has been completed at the University of Texas and is scheduled for publication sometime this year by the Texas State Historical Association.

Dr. H. Bailey Carroll, director of the association, estimates the handbook will include 2,000,000 words concerning all phases of Texas history. More than 1,000 contributors wrote articles for the publication, which has been in preparation 10 years.

Here are some samples of the information contained: Braham cattle, a breed which has existed in India for more than 4,000 years, ranks second to the Hereford as the chief range animal in Texas. The breed was introduced in Texas about 1895. The first reports of Texas buffalo were written by Alvar Nunez Cabeza de Vaca in his description of his journey from Florida to Mexico from 1528 to 1536. Gail Borden, Jr., famous as the father of condensed milk, came to Texas in 1829, and died at Borden, Texas, on January 11, 1874.

Big Bend National Park, Texas' first national park, consists of approximately 788,682 acres and is the fifth largest national park in the United States.

Mr. and Mrs. Robert Green, Lee Ann, Judy, and Steve, of Munday, Texas visited the week end with his parents, Mr. and Mrs. G. L. Green.

Mrs. Joe Terry and Mrs. Clyde Butler made a business trip to Childress Wednesday last.

Every time we stay out late at night the wife gets historical and brings up our past.

If we'd pay the same attention to the weeds as we do the flowers perhaps they would die like the rest of the plants.

Health Notes

AUSTIN—Inasmuch as the incidence of whooping cough in Texas is expected to show an increase during the coming months, Dr. Geo. W. Cox, State Health Officer, released a statement today urging that strenuous efforts be made to control the spread of this debilitating childhood disease. There were 1273 cases reported during the first 5 weeks of this year.

"Whooping cough can only be contracted by direct exposure to the disease, and isolation of cases must be universally practiced if the incidence is to be controlled," Dr. Cox stated.

"The infectious agent or germ of whooping cough is transmitted by droplets expelled in coughing, sneezing, or speaking," Dr. Cox said. "The discharges from the nose and throat are dangerous to susceptible persons; the need for early recognition and careful isolation of whooping cough is obvious. Your family physician should be called at the first sign."

"The first symptom of this disease is usually a dry cough, which persists day and night and tends to become increasingly severe. The disease is fully developed when vomiting of food and whooping accompany the paroxysm of cough. Dr. Cox stressed the fact that children who have whooping cough should

not attend school or come in contact with other children until three weeks after the appearance of typical signs of the disease.

"Prevention and control of whooping cough, especially among infants and small children, may be accomplished through use of approved vaccine and convalescent serum," Dr. Cox asserted, "and it is important that such measures be taken to protect them. Neglecting to do so, and allowing the young child to suf-

fer an attack of this disease, may seriously impair his future health."

Choir Director Is Noted Musician

Shelby Collier, director of the Wayland International Choir, which will appear here in a concert on May 2nd at 3:15 P. M. in the High School Auditorium and at the First Baptist Church at 7:30 P. M., is chairman of the college's Division of Fine Arts. The 35-voice International Choir, whose members wear costumes from countries around the world and sing songs of these nations, is now in its fourth year. Mr. Collier, widely experienced as conductor of choirs of every

type, holds the Bachelor of Music degree from Southern Methodist University and the Master of Music from Texas University. He did further study at the College of Music of Cincinnati and Southwestern Seminary. He is also a pupil of Ivan Dneprov, Lester Brenizer, and Dr. John Finley Williamson. Within the past two years the choir has made many tours giving over one hundred concerts annually. They performed before the Southern Baptist Convention in Chicago while members of the choir also presented concerts at a similar meeting in San Francisco

and Student Week at Ridgecrest. They have made numerous radio and television appearances as well as presenting many concerts at churches and civic meetings across the Southland. For two summers Mr. Collier and members of the choir have attended the University of Guadalajara to study the music, language, and customs of the people of Mexico. Mr. Collier had established an accomplished record as director of church music and teacher of voice before coming to Wayland. Mr. Collier came to Wayland after serving as Minister of Music

and Education at the First Baptist Church of Austin for five years. He held similar positions in Dallas, Paris and New Orleans. Mr. Collier is also an artist. His hobby is oil painting, an interest shared by Mrs. Collier, art teacher at Wayland and author of children's books of drawings. Some of her books depict children on mission fields around the world. EDITORS NOTE: The following resolution was passed Sunday by the more than three hundred American Legion convention delegates. It shows their gratitude to us and their acceptance of the Hospitality extended to these visitors by our town.

Motorists Urged To Have Motor Vehicles Safety Inspected

AUSTIN—Motorists are urged to have their motor vehicles safety inspected while there is a lull before the expected rush to inspection stations. G. W. Busby, chief of the Motor Vehicle Inspection Division of the Texas Department of Public Safety, said 2,400 inspection sta-

tions have been certified to aid motorists in complying with the new state law. September 6th is the final deadline for having all motor vehicles certified for safe driving. Busy said the movement of vehicles to inspection stations is lagging, with only about 40,000 being inspected weekly. If a bottleneck is to be avoided before the deadline, he said, at least 100,000 vehicles a week will have to flow through the stations.

Requirements under the new safety law have been modified considerably following an anticipated rush to inspection stations when the law became effective a few months ago. Safety Department officials said many new inspection stations are being certified weekly to aid in avoiding another bottleneck. Mr. and Mrs. Joe Johnson of Lubbock visited friends in Clarendon thru the week end.

Local Auto Inspection Stations Announced

AUSTIN — "Get your vehicle inspected and avoid the delay and inconvenience of having to wait in line", said Chief, G. W. Busby, Motor Vehicle Inspection Division, Department of Public Safety, Austin, Texas.

The 2700 official inspection stations licensed in Texas so far are inspecting some 50,000 cars per week and in order to inspect all the cars in this State by the deadline, September 6th, the number of cars inspected per week will have to be doubled.

There can be no further extension of the deadline and operators of vehicles not inspected on September 7th will be subject to arrest. The law provides a fine of not to exceed \$200.00 for any

person guilty of operating a vehicle after September 7th when such vehicle has not been inspected and approved.

More and more stations are being licensed in Texas daily and the operators of these stations are waiting to faithfully and honestly inspect your car at your earliest convenience. Take your car to the inspection station of your choice and get your approval certificate while there is plenty of time and no waiting.

When you get your approval certificate on your car, you will take pride in knowing that your car is safe to operate and that you are helping to contribute to a safer Texas.

There are 3,320 cars registered in Donley County and approximately 700 of these have been inspected and approved. The following garages in Clarendon have equipped themselves to do this inspection: Palmer Motor Co., Clarendon Motor Co., Carpenter's Garage, Heath Motor Co., and Joe Holland Pontiac.

Donley County Leader, \$2.00

AUSTIN — Texas and U. S. farmers have the greatest challenge in their history in 1952 production goals, the University of Texas Bureau of Business Research reports.

Feed grain production is being stressed very heavily in order to maintain the high-level output of livestock, dairy products and poultry. Because of its importance to the economic and military strength of the free world, the national cotton crop is again placed at 16 million bales.

If these goals are reached, the Bureau notes, farmers will have turned out a new record total production, almost 50 per cent greater than the pre-war average. Texas farm output was forced above the apparent trend in 1942, and has increased steadily since then, due to heightened demand. U. S. government contributions toward the supplies of the UN army in Korea represent a large portion of the demand.

Because of the war situation, the market for farm production promises to remain at a high level, the Bureau's forecasters state. Increased government purchases, aid to foreign countries, and increased savings in consumer hands are among factors responsible for farmers' success in 1951.

These factors, the Bureau reports, forced Texas farm income to an all-time high of \$2,148,000, a 22 per cent increase over 1950, despite devastating effects of the drought. The increase in farm income was shared by all U. S. Department of Agriculture crop reporting districts except 2, 3 & 4.

Soil Conservation District News

The preliminary planting intention reports, issued recently by the Bureau of Agricultural Economics, indicate that unless farmers plant more acres in feed grains, we will be about seven million tons or nine million acres short of the production goals for grain sorghums, corn, barley, and oats.

The Donley County goals recommended by the County Mobilization Committee are 50,000 acres of grain sorghums, 3,000

acres of corn, and 55,000 acres of cotton.

All farmers are urged to make any adjustments they can, consistent with conservation farming to help meet these goals.

The greatest need apparently is in feed grains. The Department of Agriculture is seriously concerned that the production of meat, eggs, and milk, for which the 1952 feeds will be used, may fall far below needs.

In this connection the Secretary of Agriculture has said that he does not want to lessen emphasis on the grassland program

to the extent of plowing up good pastures because ample production of high quality forage is also extremely important.

The use of good conservation practices that will get the best possible yields cannot be over emphasized. Good conservation farming should not be unnecessarily retarded to meet current production requirements.

Hygiene authorities advise us not to moisten our fingers when counting our money. We're not worried. No germ could live on our salary.

Uncle Bob, our Scotchman friend from Washburn, sent us a copy of his old home-town newspaper in Scotland. That is, it was his Old Home Town many, many years ago. He probably wanted me to use some of the jokes but I doubted that the Irish readers would appreciate them. Anyway, it seems that when a loved one dies it is a custom to print a short poem in the paper in their memory. I liked the following and thought someone might like it for their scrap book. Our memories of you are a keepsake, With which we will never part. God has you in His keeping But we have you in our heart.

All this instruction on how best to try to express your wishes in the presidential nomination carried on by some of the newspapers seems to be a few hundred years too late. And it all goes to prove that the way is first; too complicated, second too impossible and too impracticable for the average person. If political experts, and mental geniuses such as Mr. Izzard have to study up for a week or two before they can explain it to us how on earth can we be expected to inhale enough to enable us to intelligently carry out the procedure. Anyhow, all this instruction seems to boil down to this; unless you get out and do some groundwork among your friends; find out who is on your side and rally them to the precinct convention your cause will be lost. In my opinion, this gets us just about back to where we are. In other words, if we do anything we will have to out-machine the machine-politicians; become machine politicians ourselves. Why can't the issue be put squarely before the American people and let them choose the man they want. We get high blood pressure when we read that the communist only put one name on the ballot in the dominated countries and shoot every man that don't vote for that one. We give them the same one choice and figure that the automobile will get them anyway in a few days. My goodness, anyway.

For the good that I can do."

Several have expressed their feeling pro and con on the Rain-making idea, since we requested you to last week. One fellow told us this story about an old negro preacher who when the congregation had assembled to pray for rain remarked: "What Bruddern, No Umbrellas." On the other side, Joe Miller, of box 93, Goodnight sent us the following poem that was written some thirty or forty years ago at about the time that a gentleman named Post was trying to fake it rain in Texas. I think you will agree the poem is a good one no matter whether you carry an umbrella or not.

It is called - - - THE LIGHTNIN' AGE What's the world a-comin' to, a feller'd like to know, When they're makin' ice to order, an manufacturin' snow? And now, as if to vex us, another thing we hear: They're makin' rain in Texas without a word of prayer. They just git in an open field, where all the folks can view

An, fire off a cannon ball, an' split a cloud in two, An' then you hear a thunderin' an' the rain comes big and bright But L jest can't help a-wonderin' if that kind o' rain is right.

'Pears like the Lord ain't in it, when the string a feller jerks Kin fire off a cannon at'll bust His water-works; An' it's just as true as preachin', an' I'm talkin' of it plain— No crop in this here country'll ever grow from sich a rain. Anyway, thanks Joe, and will some more of you readers send us your opinion on the subject.

"The Church with a Friendly
Welcome."

WE live in an Age of Comfort... physical comfort, that is, and we like it. In fact, we demand comfort. Our homes must be comfortable... warm in winter, cool in summer, equipped with electrical conveniences and good plumbing. Our furniture must be comfortable. Our clothes must be comfortable. Our automobiles, trains, airplanes must give comfort in every detail. Even the style of our architecture has changed to reflect this modern trend toward, above all else... COMFORT.

YET, are we indulging ourselves in the Supreme Comfort, the COMFORT of RELIGION? A man with folded hands; that means a soul in fellowship with the Almighty. See what aids he has summoned in his hour of great need! As our nerves are torn ragged each day from the wear and tear that must come in every routine, do we restore our souls in the BLESSED PEACE OF OUR RELIGIOUS PROMISES? When a crisis comes, when someone dear to our hearts lies sick beyond reach of medicine or skill, when we must stand by helpless and watch death take away our sweetest treasure, or when we find that we must live daily with tragedy, do we experience the Comfort of a Divine Presence ever with us, to give us stout hearts and strong courage? Read Psalms 103:2-4.

THE HOLY COMFORTER brings joy, peace, patience, loving-kindness. As you walk down a busy street, notice how few faces reflect this Spirit within. Harried, cross, impatient, unkind faces betray a pitiful need for Spiritual Comfort. The strain and stress of complicated modern life are more than any human can bear alone. Psychiatrists are stampeded; mental institutions are overflowing. Our nerves simply can't take it. Why not turn to the COMFORT of RELIGION? The man with folded hands and open Bible; we do not know just where he is reading... But he is in company with noble souls of all the ages. FOR MAN, IN HIS DARKEST HOURS OF SORROW, SEEKS THE COMFORTS OUR CHRISTIAN RELIGION OFFERS. There's room, there's welcome, there's COMFORT waiting for you in your church.

helping
Give the little lady a hand

THIS ad is addressed to husbands—husbands who've yearned for the thrill of sitting behind a broad hood packed with horsepower—and the pride of rolling down the street in a car that tells the world, "Here's a man who knows the finest thing on wheels."
But husbands have wives. And wives have been known to say, "No big cars for me. They're too hard to handle."
Well, we have an answer for that one. It's a ROADMASTER with Buick's new Power Steering.† And Power Steering takes over any time the steering gets tough—works like a helping hand—reduces the effort of turning the wheel of a car at a standstill to about the same effort it takes to pick up a mink coat.

BUT out on the open highway—with a clear straight stretch before you—your hands still have command of the wheel—you can feel that sure, firm, easy and eager responsiveness that's a part of the fun of driving.
The rest of the fun is in something else that's new this year—the highest horsepower that a Buick Fireball Engine has ever delivered—and an Airpower carburetor that lets loose an extra reserve of power when needed, and still adds extra miles to your cruising range on each tankful of gas.
So we suggest a family demonstration. You'll both like the hushed and restful silence of this superbly able traveler. You'll like the harmonious beauty of its

interior, and the deep and luxurious softness of its seats.
You'll like the velvet-gloved grip of its Wide-Band brakes, and the most capacious trunk in Buick history.
You'll like the smooth surge of Dynaflo Drive, and you'll like—but why waste time talking, when you could be finding out more than we can ever tell you? How about making a date to do that right now?

Equipment, accessories, trim and models are subject to change without notice. White sidewalls optional at extra cost when available. †Optional at extra cost on Roadmaster only.

IT'S THE LAW in Texas

HOMEOWNERS MAY BE LIABLE FOR ACCIDENTS ON PREMISES

Dr. J. W. Evans Dentist and Orthodontist

NOTICE For the next few weeks we will be in our shop on TUESDAYS-THURSDAYS & SATURDAYS ONLY

EANES Radio Service EDWIN EANES, Owner Located at Estlack Mach'y Co.

it is difficult to state a hard and fast rule about liability for such accidents because the facts differ so much from case to case.

A postman delivering mail slipped on a child's roller skate one morning. He sued the homeowner for damages.

Then there was the case of the meter-reader who slipped and fell on the basement steps.

On the other hand, a guest sued her host because she slipped and fell when she stepped on some beans strewn about the owner's living room.

Similar cases where social calls resulted in disaster involved a guest slipping on a small scatter rug, and another overnight guest who slipped and fell in a shower.

From these cases it may be seen that the law is usually more strict about accidents befalling tradesmen and others who enter your premises in the line of duty.

This does not mean that a homeowner is absolved of all responsibility for injury to his guests. If he knows a dangerous condition exists, he has a duty to correct it and can be held liable for accidents which might happen if he doesn't.

The law is especially zealous in protecting small children. In many situations where no liability would be imposed for injury to an adult, you may be held responsible to an injured child.

a pond, a well or some other apparatus or condition attractive and dangerous to a child on your property, it may be your duty to take special pains to keep children away from it.

Fortunately, not everyone who falls down the front steps gets up and rushes off to sue his host. However, a substantial body of law has grown out of this type of negligence case.

(This column, based on state and federal law, is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may change the application of the law.)
