

## Revival Meeting Will Owe Obligations to Commonwealth Begin July 10th At Tabernacle

Beginning Sunday July 10th, 8:15 P. M. Rev. S. J. Shettlesworth, Evangelist of Breckenridge, Texas, will conduct a Revival Meeting at the Large Tabernacle in Baird. He will be assisted in the song service by Mr. E. R. Emizer of Breckenridge.

Rev. Shettlesworth comes with the very highest commendations of the people in the City where he resides and it is said that he is one of the most fluent speakers upon the platform today. He is an excellent student of the Bible, has a pleasing personality and his friends where he has gone in the past are as numberless as the acquaintances he has made.

For many years he was actively connected with the Cotton Belt Railway where he was engaged in almost all departments of service and had climbed the ladder of success until at the time of his retirement from that service he was one of the personal Secretaries to the Vice President and General Manager of the Road.

He was attracted to the Ministry of Jesus Christ through his personal contact with men which enabled him to learn that in every one there is a spark of good if properly fanned may become a burning blaze of usefulness. His message carries with it nothing of the "radical" type often witnessed upon the Evangelistic platform, but manifests a burning passion and interest in his fellowmen. He has Fraternal connections that brings to him a wonderful contact with men of all walks in life and soon they come to feel that he is one who loves and understands their heart problems and desires.

His companion, Mr. Smizer, is a singer of wonderful ability and the two are so vitally interested in the great program of Christianity that it is anticipated that they will soon find a welcome in the hearts of the people of this City and County.

They extend to one and all a hearty welcome to attend the first service, feeling sure that this will inspire a desire to attend all services.

## Who Will Baird Send To France?

Since Doughboys won the victory, Now don't you think that we should see

That one returns to tell our dead That as they fell in Poppy beds We caught the torch; the faith we kept,

Nor ate nor drank nor even slept Till we had won for them the game, Secured to them undying fame That they may sleep in peace serene In Flanders fields of red and green.

Help send a World War Veteran to the American Legion Convention in Paris, France. Cast your votes for your favorite candidate in the homerace for this trip.

## Cisco Fish Hatchery Makes Shipment

CISCO, July 2. — The state fish hatchery, just built here this year, has made its first shipment of fish. About 25,000 bass fingerlings were removed from the hatchery here this week by Joe Dixon, superintendent, and taken to Breckenridge and Ranger to stock streams there.

These represented the output of only one of the 13 pools comprising the hatchery. State Game Fish and Oyster Commissioner W. J. Tucker is elated over the production, since he had not expected any fish to hatch before the pools were filled only 10 weeks ago, late in the spawning season.—Ft. Worth Star Telegram.

We are sorry to learn that H. Windham, of Tecumseh, who has been ill about a year, is not doing well the last few days. H. Windham is a brother of Tom Windham, of Oplin and Mrs. J. W. Jones and Mrs. W. E. Gilliland, of Baird. He came to Callahan County in 1875 in charge of the cattle of his father, Dr. J. D. Windham, and has made his home at Tecumseh for fifty years. Mr. Windham served his Precinct as County Commissioner, and Justice of the Peace, for many years.

Mr. and Mrs. M. D. Hoover, of Dallas, spent the week end with Mrs. Hoover's mother, Mrs. W. L. Henry and other relatives.

## Backbone of Community Service Found in Support Merchants Give to Residents

There is a debt you owe to your home town but whatever the bill is, none will be presented to you for payment. If you do not realize the size of it, nobody will try to tell you. You know what the town has done for you, and you should know better than anybody else what you ought to do for the town.

Two questions may serve to bring the issue home to you.

When your wife and children were critically ill, was it the doctor from the city who pulled them through?

You never even thought of calling him. Your first thought was of the home town doctor, and he saved the lives of your dear ones.

When you lost your job, who gave you credit and tided you over the winter?

It certainly wasn't the store in the city that advertises "bargains" for the country shopper. The merchants of Baird stood by you then, as he has for others, and he will again some time when the emergency arises.

If these things have not happened to you, they have happened to your neighbors, and you know about them. Mere money cannot pay for disinterested service such as the doctor and the merchants render under the circumstances. And these instances are not cited with the idea of wakening a feeling of obligation toward those individuals who render us signal service on extraordinary occasions, but they are brought up rather, with the view of making every man, woman and child realize his partnership in the community and his responsibility in that partnership which means so much to him.

The doctor and the merchant are not the only men toward whom others in the community owe this obligation to maintain the community as a self-sustaining entity. They are simply given as examples of how the proposition works out.

Happiness and contentment bring about also a rich social life. You get together with your neighbors during moments of relaxation from your day's toil and enjoy intercourse with them. Clubs and organizations unite you in bonds that hold you together for one purpose or another.

A score of other things might be mentioned, but space forbids. There are the material things that minister to the comfort and well-being of the people. Among them are paved or macadamized streets, concrete sidewalks, corner lights, police protection and a fire department; electric lighting for the home, water, sewer and similar improvements and conveniences.

The stronger the community spirit the more of these there are. The taxes you pay settles the bills for the things already acquired; the weight of your co-operation with the progressive leaders assured other improvements in the future. Be a hometown man all along the line—patronize home-town merchants exclusively.

## Meeting Closed At Bayou School House

The little meeting at the Bayou School closed last Sunday afternoon with a fine service, all who came enjoyed the meeting and many were the pleasant times we all had together.

The preacher was in a substantial way remembered that made him feel good and he hopes to make it possible for him to go on and do more of the work of the King.

We are planning now for a camp meeting on the Bayou in the month of September and we shall earnestly hope for cooperation from all over the country, for it shall be a Callahan County Camp Meeting.

God bless the people down in that community, they are as fine as there are to be found this side of heaven. Joe R. Mayes.

## LANHAM HELD ELECTION

J. M. Morreset writes that in the returns as published in The Star last week the Lanham box was reported "no election held" was an error. Mr. Morreset says that he helped hold the election, that 18 votes were cast against the bonds.

## BRECKENRIDGE WHIPPED COYOTES

Last Sunday's matinee at the T P Park went to the Breckenridge Team by the score of 7 to 4; due to the Coyotes' inability to connect with the delivery of one Stedman, who was twirling for the visitors.

The Coyotes presented a pitiful appearance on the field, only nine men were in uniform, and one of these Lon Ray, had himself a bad 'charley-horse' that would ordinarily kept him or any other player, out of the game, but since no other player was available, Lon donned the mask and other regalia and did his best to do the catching; the story might have been different, had the Coyotes had one or two more players, but they couldn't make any drastic changes, for they didn't have the wherewithal with which to do "IT."

The Coyotes retired the Visitors in the first inning in short order; Stapp walked Tabor the first man up, Zarfionetis grounded out Stapp to Wristen, Tabor taking second; with Rogers at bat, Tabor attempted to steal third and was thrown out Lon Ray to Bennett; Rogers grounded out Stapp to Wristen to retire the side, but in the second inning Stapp got into a peck of trouble, Lewis the first man up, hit a terrific drive to right center for a homerun, Henderson struck out, Cox doubled to right, Mack singled to right scoring Cox, Williams doubled to center Mack going to third; Stedman bunted safely Mack scoring, Williams on third and Stedman on first with Tabor at bat, Williams scored and Stedman went to third when Lon's peg to Bennett hit Williams and rolled to the outfield, Tabor struck out; Zarfionetis got hit but Rogers flew out to Pete Bouchett in left field to retire the side after the entire team had batted and had run in four scored.

Breckenridge added another in the fourth, when Mack was safe at second on Pool's fumble and wild throw to first; Williams popped out to Bennett, Stedman flew out to Earl Hall in right field, Earl threw to third to stop Mack but the throw went wild and Mack scored; in the sixth the Visitors added two more on the generosity of Stapp; Henderson flew out to Harold Ray at short; Cox walked on four pitched balls, Mack walked after Cox had stolen second and third; Williams fley out to Wristen at first, with Stedman at bat Mack stole second, then Stedman delivered a single to right scoring both Cox and Mack, then Tabor struck out to end the agony, so far as the scoring by the enemy was concerned.

Baird counted three times in the sixth, Pete singled over second, Wristen batting left handed got free transportation and Pool hit a terrific drive to center for a homerun scoring Pete and Fred ahead of him; but the next three men to face Stedman were easy outs; Baird got another in the eighth, Pete was out second to first; Wristen trippled down the first base foul line, Pool struck out, Earl Hall delivered a single thru second scoring Wristen; the shortstop fumbled and Raleigh was safe at first, but Bennett forced Raleigh at second to retire the side.

Breckenridge got even hits off of Stapp, but the three bases on balls and one hit batter mixed in with these hits, spelled disaster; the Coyotes collected seven hits off of Stedman, but they couldn't bunch them to do any good except in the sixth and eighth; Pool led the homeguard in hitting with a single and a homerun; Wristen got a tripple and Harold Ray, Pete Bouchette, Lon Ray and Earl Hall each collected a single.

Next Sunday's attraction will be the Cisco aggregation at the T-P Park with the Coyotes endeavoring to overcome this last defeat.

Come out and help the boys win a few more ball games, they need your presence and encouragement.

## New Electric Shop Opens In Baird

Mr. Caraway, formerly of Ranger, is opening a General Electric Shoe Shop for the purpose of turning out quick work, at a fair price. He has employed Mr. Gentry, of Abilene, to assist him to keep the work up to the minute, so there will be nothing left over at night. The new shop is located first door north of the Sigal Theatre. We welcome the new enterprise to our city. The new shop will be open for business to-day, July 8th.

## BOY SCOUT ORGANIZATION

At a recent meeting, of the men of Baird, the Boy Scout Organization was discussed and plans entered into for organizing the Scouts in Baird. The purpose of the organization is to develop the best character in the boys, building up in body, mind and soul. It is to teach the boy how to care for himself and others, so that he may be able to use his knowledge to the best advantage. It teaches patriotism but not militarism; religion but not churchism; thrift but not stinginess; truth; loyalty; obedience; cleanliness in body, mind and speech. The motto of a Scout is "Do a good turn daily".

An evidence that the men of Baird believe in the worthiness of the organization by the following committees being appointed, and are ready to help in the work:

- General Committee: W. E. Melton, Cal C. Wright, Rod Kelton.
- Finance Committee: Ace Hickman, T. E. Powell, J. R. Jackson.
- Encampment Committee: Rod Kelton, Benjie Russell, V. E. Hill.
- Troop Committee: Clyde White, Ace Hickman, W. J. Evans.
- Merit Badge Committee: B. L. Russell, Joe R. Mayes, S. E. Settle.
- Court of Honor: L. L. Blackburn, A. W. Yell, Bob Norrell, Brice Jones, J. H. McGowen, J. H. McGowen, M. J. Holmes, J. F. Boren.

We expect to have a Scout Leaders Training School soon, for the men, conducted by Mr. Ed Shumway, the National Scout Executive. We also expect to organize two or more troops of boys at an early date.

The Boy Scout Encampment, for this section, will be at Leuders, July 28th to August 7th. The fee will be \$8 for each boy. He will be under proper supervision and care, and each day will be spent in study, games, woodcrafts and periods of rest.

We feel that there should be more than a hundred Boy Scouts in Baird, and we expect to have that many.

## Senior B. Y. P. U. Program, July 10, 1927

- Leader: Judith Mayes.
- Subject: "The Great Commissions"
- Introduction: Judith Mayes.
- 1. Bible Back Ground in Mathews and Mark—Lelia Lassiter.
- 2. Bible Back Ground in Luke, John and Acts—Gless McGowen.
- 3. Meeting The Disciples on the Mountain—Dorothy Boydston
- 4. Into All The World: Bessie Mae Gillette.
- 5. Can He Count On Me? Eva Robinson.

## Sunday With The Baptist

Joe R. Mayes, Pastor Sunday School at 10 A. M. Bro-Andrews will preach at 11 o'clock at the Baptist Church. Junior B. Y. P. U. at 3:30 P. M. Senior B. Y. P. U. at 7 P. M. No services at night, we are dismissing for the Presbyterian Meeting.

I call attention again to the Mid-way meeting, July 8th, and we are expecting all to help who can possibly get there. It is your testing time my dear friend; if you believe in Evangelistic Missions then show us you do by coming and taking part with us in this meeting.

We are sure all will be glad to know that we are going ahead in a fine way with our building program. and we shall very greatly appreciate any help given us by anyone.

## The Methodist Church

Cal C. Wright, Pastor Sunday School at 10 A. W. Bro. Preaching at 11 o'clock. We will not have evening services on account of the Revival in progress at the Presbyterian Church. You are invited to worship with us.

Richard, Olin, Jones and Iley Price of Van Horn, came in this week for a visit with their grand-parents, Mr. and Mrs. W. E. Gilliland. Their mother, Mrs. J. R. Price, came down some two weeks ago.

## Honors Recent Bride With Miscellaneous Shower Wednesday

Miss Belva Evans entertained in the honor of Mrs. Tom Price, with a miscellaneous shower Wednesday evening from five until seven.

The evening was spent in playing "42"; after adding in the score cards it was found that Mrs. Price had high score. The prize was presented to her which was a large basket filled with many beautiful and useful gifts.

Refreshments were served to Madams R. V. Hart, Porter, Col. Dyer, Fred Cutbirth, Everett Allphin, W. E. Haley, Tom Price, Bob Price, Hoyce Gilliland, Irving Corn, Herbert Swan and Misses Thelma White, Louise Bell, Ila White, Louise McGowen, Nina McFarlane and Ruby Harp.

## LETTER FROM ARCHIE SARGENT

Fort Wayne Indiana, July 4, 1927 W. E. Gilliland, Baird, Texas. Dear Uncle Billy:

This is my happiest day I am helping my dear old mother and father celebrate their 59th wedding anniversary and a happy and glorious time we are having. Dad is 81 and mother, 76 years of age.

I am sure gaining in weight, but not in strength, am still very weak on my pins. We were at the lake a couple of weeks, caught some nice fish when we did go out, which was seldom; sat out on the porch most of the time; the weather was disagreeable, wind and rain kept us in a few days and we slept under cover last night, July 3rd. Saw a man here that reminded me of the old Texas saying. He had on a straw hat, over coat and carried an umbrella, he lacked the fan. I am going back to the lake Saturday, July 8th. Please send my paper to Coldwater Lake, Coldwater, Michigan, Prince Cottage. I thank you. Regards to you and the office "devil". Archie.

## Over Fifteen Thousand People Attend Races At Abilene, July 4th.

Over 15,000 people attended the races at Abilene, on July 4th. The races were of the cleanest type, plenty fast and good driving. No. 37, a Gardner Special winning most money.

While in the midst of the main race, No. 17, a Ford, capsized, breaking the drivers neck and he died one hour later in the hospital.

## Presbyterian Meeting To Close Sunday Night

The Revival conducted at the Presbyterian Church by Mr. Guy W. Green Lay Evangelist, and Mr. B. Edward Zeiss, song director, assisted by Rev. A. W. Yell, Pastor, has attracted considerable interest. Mr. Green, a news paper man, is a fluent and interesting speaker and we have heard many compliments on his sermons, also compliments for the singer, Mr. Zeiss. The meeting will close Sunday night, July 10th.

Mrs. C. M. Mills and daughter, Miss Frances, returned a few days ago from a trip to New York, Philadelphia and other points east.

Mr. and Mrs. Wade Harding, of Cross Plains, spent the week end in Baird. Mrs. J. R. Price accompanied them home for a few days' visit.

Mr. and Mrs. H. A. McWhorter, and little son, Oscar, will leave the latter part of this week for Campbell, Calif. where they will visit Mrs. McWhorters father, Wylie Lambert.

Mr. and Mrs. Farris Bennett, Mrs. B. H. Bennett, Miss Ila Mae Guffey and Weldon White, spent the 4th on the Colorado river.

T. E. Powell informs us that he had a cablegram from his daughter, Miss Jean who sailed last week from Quebec, Canada, saying that she arrived in England, Wednesday.

Mrs. J. R. Price and Miss Eliaska Gilliland spent the week end with their uncle H. Windham, and family, at Tecumseh.

## CITY OF BAIRD PURCHASES BIG AMERICAN LA FRANCE FIRE TRUCK

The City of Baird took another step forward when they placed an order with the American La France Fire Equipment Company for a twelve thousand dollar truck.

The truck, which is a three combination, hose, ladder and chemical truck, arrived in Baird Wednesday and Mr. Walsh, of the American La France Company, is here giving the truck a second test, and getting the boys of the Baird Fire Department acquainted with the machine.

Some may think this truck is a little large for the City to purchase, but it seems impossible for them to continue thinking this, after they stop and reason with them selves just how much a fire could cost the people of Baird should one get from under control, which it could de very easily, had the City of Baird purchased a smaller truck. With this big, modern in every way, fire truck, and with our Fire Boys, who stand second to no company; the residents of our city are assured of the very best of protection; This type of the American La France Company is the best that they make, and is fully able to give Baird the same protection that it is giving cities much larger than Baird. We compliment the committee, which the Baird Fire Department selected to pick a truck that would be suitable, to give Baird the best of fire protection; they no doubt picked the "king" of Fire Trucks. This is one of the best investments that the city of Baird made; there isnt a thing that any city needs any more than a good water system and a good Fire Department. We compliment also, the City Council for accepting this truck that the committee picked. The American La France Truck is the truck that all of the cities pick, for fire protection, and it's record is as clear as a crystal. On with the progress of Baird.

Miss Lillie Blakley, daughter of Mr. and Mrs. Spike Blakley, who live on the Dyer Ranch, was seriously hurt on the night of July 4th, when the car in which she in company with Miss Alline Ivey, Ed Ivey, "Red" Thomas, Graham Cannon, and Ray Elliott, of Moran were returning from Cisco turned over, all were injured and were rushed to hospital at Cisco. All the others were able to leave the hospital after their wounds were dressed. Miss Blakley was found to be seriously hurt and is still confined to the hospital. She is reported as suffering from a hemorrhage of the lungs, caused by being crushed beneath the car when it turned over. Her parents are with her, and she was reported resting nicely, last night.

## Miss Lillie Blakley Seriously Hurt In Car Wreck

Miss Lillie Blakley, daughter of Mr. and Mrs. Spike Blakley, who live on the Dyer Ranch, was seriously hurt on the night of July 4th, when the car in which she in company with Miss Alline Ivey, Ed Ivey, "Red" Thomas, Graham Cannon, and Ray Elliott, of Moran were returning from Cisco turned over, all were injured and were rushed to hospital at Cisco. All the others were able to leave the hospital after their wounds were dressed. Miss Blakley was found to be seriously hurt and is still confined to the hospital. She is reported as suffering from a hemorrhage of the lungs, caused by being crushed beneath the car when it turned over. Her parents are with her, and she was reported resting nicely, last night.

## New Tourist Camp Near Baird

John H. Hughes has just opened up a new filling station and tourist camp on the Bankhead Highway, about ten miles east of Baird; just south of Homer Boatwright's ranch, which is called the "Lone Star."

## Church of Christ

Sunday School and Communion at 10 A. M. There will not be services Sunday night, as the Revival at the Presbyterian Church is still going on. Ladies Bible Class will meet Tuesday at 4 P. M. and we urge every member to be present. Special plans are arranged to discuss subjects for Tuesday, July 12th. "Samuel Fare Well" 1 Sam-12:15, 19-25. Mrs. N. M. George will have charge of the lesson.

**FOR RENT: Four room cottage for rent—Suitable for couple, Reference required. See Otis Bowyer. 31-ft.**

**Plumbing Ordinance**

An ordinance prescribing the manner in which service connections may be made with the mains or laterals of the system of sanitary sewers and water mains, the persons who may build the connections and install fixtures, and establishing the rules and regulations for their building and use in the City of Baird, Texas, and fixing a penalty for violation of any part of this ordinance:

BE IT ORDAINED BY THE MAYOR AND CITY COUNCIL OF THE CITY OF BAIRD, TEXAS:

Section 1. That it shall be unlawful for any person, persons, firm or corporation to uncover the sewer or water mains for any purpose, or to open or take off any manhole, flush tank or inlet cover, or to make or cause to be made, any connections with the mains or laterals of the sewers or water mains of Baird, Texas; or to build any sewer connections without having first received a written Permit from the Mayor or Plumbing Inspector of said City granted upon a written application describing the contemplated work, the premises to be sewered and the plumbing fixtures to be put in.

No permit shall be issued to anyone not holding an annual plumber's license issued by the City of Baird. No permit shall be issued to make connection with any main to serve premises which does not have main or lateral ready to serve such premises, or until proper arrangements have been made for an extension of the main or lateral.

Section 2. No permit shall be required under this ordinance for minor repair work, such as the repair of leaks in pipes, traps or cocks, opening up stoppage in waste or supply pipes, traps or drains, or replacing the broken fixtures when waste pipes or not disturbed, and replacing burst or frozen pipes inside of building.

Section 3. That any person, firm or corporation, desiring to engage in the business of Drain Laying or Plumbing shall be required to give a bond to said City in the sum of FIFTEEN HUNDRED (\$1,500.00) DOLLARS to be approved by the Mayor and City Council, and conditioned for the faithful compliance with all of the terms and conditions of this ordinance, and indemnify and save harmless said City from all costs, expenses, damages or injuries to said City sustained by reason of the carelessness or negligence of said party operating under this ordinance or any rules or regulations made in pursuance hereof.

No bond for this purpose shall run for a longer period than two years without being renewed and said bond shall remain in full force and effect as to any excavation or piece of work for a period of six months after the same has been completed.

Section 4. Plumbing as herein regulated is hereby defined to include the use of all pipe, fixtures and appurtenances thereto, and all connections therewith and the laying the same underground and placing the same in buildings, or structures for the purpose of conducting and disturbing water in any premises or building, or conducting or carrying off any water, gases, vapors, sewage or wastes into drains or sewers, or ventilating drains, fixtures or traps in any building, and all connections made for such purposes with the water pipes or with the private sewer or drain.

Section 5. The construction, repair and maintenance of all sewers, drains and other means of disposing of house wastes through sewers and mains, and the installation of all plumbing work in buildings shall be under the supervision and control of the inspector, appointed by the Mayor and confirmed by the City Council.

Section 6. It shall be the duty of the inspector to issue permits for the laying of drains and sewers and water connections and to inspect the same, together with the plumbing work done under this ordinance and certify to the same when completed.

He shall give general information and advice concerning the meaning and regulations of this ordinance and persons desiring same, investigate cases reported or referred to him of bad or improper work or material, whether on old or new work, and all cases of violation or attempted violation of this ordinance, rules and regulations on the part of the drainlayers, plumbers, builders, owners or agents and bring proceedings against the offending parties.

Section 7. No person, firm or corporation shall engage in or conduct the business of Drain Laying or Plumbing in said City without first having obtained an annual license from said City therefor, and given evidence of his or their qualification to ply their trade, to the inspector and sewer committee.

A fee of FIFTY (\$50.00) DOLLARS shall be charged for such license, payable to the City Secretary, in advance, and said license shall be dated either January 1st or July 1st, no license being granted having a greater or less period than one year.

No person, firm, or corporation shall allow his or their names to be used by any other person directly or indirectly either to obtain a permit or do any work under his or their license or bond.

Section 8. All applications for permits must be made upon the proper blanks for that purpose and signed by the owner or his authorized agent; when it is required, they shall be accompanied by a plan showing the whole course of the drain, its size, depth and number and kind of fixtures to be connected and such other information necessary to the inspector for the proper direction of the work and for keeping a correct record thereof.

A notice of at least twenty-four (24) hours shall be given by the plumber to the inspector, who will give the location of the junction with which connection is to be made.

No pipe shall be cut for the junction or cap removed except in the presence of the inspector.

When the drain is to be connected with a drain to pass through property not owned by the applicant the written consent of the owner must be procured and filed with the application before permit can be issued.

Section 9. Excavation in streets and alleys shall be made in such a manner as to impede travel as little as possible and the inspector may determine the time, and limit the same that such excavation shall remain open; when it is unnecessarily delayed he may direct that the number of workmen be increased to such an extent as he may deem necessary.

Red lights shall be maintained upon all unfinished work at night from dark until sunrise and sufficient barricades shall be placed at all times until the work is completed.

Section 10. All trenches shall be refilled in a careful and workmanlike manner and settled or puddled so as to replace, as nearly as possible, all of the excavated material and leave the surface in a neat and workmanlike condition.

Any refilling of trenches necessary to maintain the streets and alleys in a good condition for a period of one year shall be done by the drain layer or plumber.

Section 11. All sewer pipes or drains up to within four feet outside of any building shall be not less than four inches in diameter and larger as required; they shall be first quality, vitrified sewer pipe or well seasoned and properly made cement pipe when approved by the inspector.

All pipe must be straight, true and sound, and free from defects. They shall be laid in perfect alignment, or changes in direction shall be made with the proper branches and curves, and uniformly graded toward the sewer main or lateral at least one-eighth of an inch to one foot.

Each pipe shall be carefully bedded as laid, the joint filled with fresh mortar composed of equal parts of portland cement and clean sharp sand. A layer of jute shall be properly placed in the bell of each pipe to insure a smooth flow line and to prevent mortar entering inside of the pipe. When cement pipe is used the use of the jute will not be necessary but a swab shall be drawn through the pipe as the laying progresses to clear the pipe of any obstructions which might enter during the construction.

Section 12. Every building shall be separately and independently connected with the sewer provided, however, that when it may be advisable to connect two or more buildings with the same sewer, it shall be done so upon the approval of the inspector.

Section 13. Rain water leaders and overflow cisterns will not be permitted to discharge into the sewer under any circumstances.

Cellar drains may be connected if properly trapped. The trap for the cellar drains shall have a seal of not less than six inches and must be kept primed.

When there is danger from back-water valve must be used.

Section 14. It shall be unlawful to allow any surface water or the overflow from any vault or cess pool to enter the sewer, or to throw or deposit, or cause to be thrown or deposited, any receptacle connected with any sewer, any garbage, hair, ashes, fruit, vegetables or peelings, refuse, rags, sticks, cinders or any other matter or anything whatever except faeces, urine, the necessary closet paper and liquid house slops.

Section 15. Whenever any drain, connected with the sewer or drain becomes broken, obstructed, or out of order, or in such condition as to prevent the use of the sewer or drain or to render it unfit for the purpose of drainage, the owner, agent, occupant or person having charge of any building, yard, lot, or land or other premises which are drained by the drain or sewer shall, when directed, by the inspector, remove, reconstruct, alter, clean or repair said drain as the condition of the same may require.

Section 16. All plumbing material must be of good quality, free from defects and all other work executed in a thorough and workmanlike manner.

Drain, main and waste pipes through which water and sewage is used and carried shall be of cast iron, lead, or brass when within the building.

Cast iron soil pipe and fitting shall be of the grade and weight known as standard, and covered with a coating of tar and asphaltum.

Lead waste pipe shall not be lighter in weight than the grade called "D" or "Extra Light."

Section 17. House sewer shall not be less than 2 1/2 feet deep at the gutter when the main is in the street or two feet at the property line when the main sewer is in the alley. When the main sewer is not sufficiently deep to allow the house sewer to be at these depths standard soil pipe shall be laid from the property line to the main sewer or the sewer pipe shall be covered with concrete.

Section 18. All joints between lead pipes shall be either wiped solder joints or by means of union and red flange. Connection of lead with iron pipe shall be made either with a brass ferrule or soldering nipple wiped onto the lead pipe and screwed or caulked into the iron pipe or by use of a union and lead flange.

Slip joints will be permitted only in trap seals or on the inlet side of the trap. Unions on the sewer side of the trap of the ground shall not be concealed or inclosed. No slip joints will be permitted on supply pipes up to fixtures cock.

For water closets, pedestal urinal and trap, standard slop sink, etc., a brass floor connection shall be wiped or soldered to lead pipe, an iron floor connection shall be wiped or soldered to lead pipe, or an iron floor connection bolted to an earthenware trap flange. A metal to earthenware, a metal to metal union, or a lead or asbestos gasket washer shall be used to make a tight joint.

Any fitting or connection which has an enlargement chamber or recess with a ledge shoulder or reduction of the

pipe area in the direction of the flow on the out let or drain side of any trap is prohibited.

Joints in soil and drain pipe shall be of lead and oakum, both well caulked in, the lead joint being made at the one pouring and shall be at least 1 1/4 inches deep.

Section 19. The arrangement of soil and waste pipes must be as direct as possible. The drain, soil and waste pipes and traps must, if practicable, be exposed to view for ready inspection at all times.

The discharge from one water closet or from two or more fixtures shall be four inches in diameter and extend, undiminished in size, to a point two feet above the roof.

All horizontal piping shall run in perfect alignment and at grade or one-half an inch per foot if possible, but in no case at less than one-quarter of an inch. They shall be strongly supported in iron hangers or upon piers, posts or wall ledges, placed not more than ten feet apart.

Vertical piping shall be adequately anchored to the walls or partition with suitable pipe hooks or wall rests.

There shall be at least one four-inch cleanout provided in the main drain just inside of the wall or at the base of the soil or waste stack.

All changes in direction, either horizontal or vertical, shall be made with the appropriate use of forty-five degree Y's, half Y's, sanitary Tees, long sweep quarters, sixth, eighth and sixteenth bends.

Short T Y branches will be permitted on vertical lines only. Tees and short quarter bends may be used on exposed waste pipe and in the vent and back vent system or for cleanout openings and fixture connections.

Section 20. The placing of a house trap in the main drain or outlet from the house shall be optional but where provided, it shall be inside the foundation walls, or in an accessible location just without, provided with handhole for cleaning out purposes, a properly constructed fresh air inlet opening on the house side of the trap; having a suitable cap; its mouth shall not be nearer than twelve feet from any door or window openings.

Every sink, basin, water closet, wash tray, urinal, bath tub or set of fixtures shall be separately and effectively trapped, with traps of suitable and approved patterns, placed as near the fixtures as practicable. Every trap used on a drainage or plumbing system shall be self cleansing.

No trap which depends on movable parts for its seal shall be used, nor shall any which depends upon concealed interior partitions or deflectors for its seal or re-seal, except for earthen ware fixtures where the seal of the trap is plainly visible.

Every drum trap shall be so installed that the water seal of the trap is a protection of the trap screw from sewer air.

Traps for basins, bath tubs, sinks, or other similar fixtures shall be made from lead, brass or iron enameled inside.

Every trap shall have a water seal of at least two and one-half inches.

All trap on a drainage of plumbing system shall be rigidly supported and set true with respect to their water levels and shall be located so as to protect their seals against frost, back pressure and syphonage.

Section 21. Main or branchvent pipes smaller than two inches in diameter shall be made of standard galvanized iron pipe and cast iron fittings, or lead, brass or copper pipe or connections.

Larger sizes may be of standard cast iron soil pipe and fittings. All must be made gas and water tight.

All traps must be protected from syphonage and back pressure, and the drainage system ventilated by special lines of vent pipes and back vent pipes. The back vent of any fixture shall be as close to the fixture as practicable, and of the same size as the trap, except in the case of water closets, which vent must not be less than two inches in size for thirty feet or less in length, and three inches for more than thirty feet. When there is but one closet and the distance is not more than two feet from the stack, the size of vent may be one and one-half inches in diameter.

Where there is a group of water closets from three to five in number, the vent must be three inches for thirty feet and four inches beyond that length.

In case of no independent vent pipe through the roof, connections, may be made with the main stack of soil pipe not less than three feet above the highest fixtures.

No ventilation pipe shall be less than one and one-fourth inches in diameter.

Vents of traps from two or more fixtures may be connected at not less than one foot above the top of fixtures.

Vent pipes shall be vertical as nearly as possible, and changes in direction made at an angle of fourth-five degrees.

Where pipes pass through the roof they shall be flashed around with sheet lead flashing four pounds to the square foot, extending eight inches on every side of the pipe and not less than ten inches high, formed to the pipe and pitch of the roof and made water and weather tight.

No brick, sheet metal, earthenware or chimney flues shall be used as a sewer ventilator, and no vent pipe must terminate in such a flue or conduit, but extend up through the roof or connect with the main soil pipe as provided, above the highest fixtures.

Each sewer connection with laterals where fixtures from other than cellar or outside slop sinks are connected, shall have a cast iron pipe not less than four inches in diameter, extending up at least two feet above the roof of business, dwelling or out-buildings.

Section 22. All sewer connections with garages, butcher shops, hotels, eating houses, restaurants, laundries or private residences where much grease is used shall be provided with a grease trap placed in an accessible location for cleaning out purposes. They shall be of a form approved by the inspector, properly ventilated and kept regularly cleaned out as re-

quired.

Section 23. All stables, barns or garages having a wash rack on which wagons, automobiles, or other vehicles are washed, and such wash rack is to be connected with the sewer, it shall be provided with a sand trap having a capacity of at least twenty (20) cubic feet space for sediment, below inlet and outlet pipes.

There shall be a partition between the inlet and outlet let extending at least six inches below the bottom of the inlet pipe. These may be made of concrete, brick or tile. They shall be regularly cleaned out as often as required or when notified by the inspector.

Every garage shall have in its sewer connections, in addition to the usual sand trap under wash rack, a special trap or interceptor which will effectively exclude all oil and gasoline from entrance into sewer.

Section 24. Waste pipe from refrigerators, water tanks, drip pans or other receptacles in which provisions are stored shall not connect directly with the drainage system, but shall waste into an open tray or sink in plain sight below the refrigerator. This tray or sink may be connected with the drainage system by being properly trapped, same as any other fixture.

Section 25. No steam exhaust, blow-off or drip pipe shall connect with the sewer or with any house drain, soil or waste pipe. Such pipes must discharge into a tank or condenser, from which suitable outlet to the sewer may be provided, properly trapped. Hot water above the temperature of 140 degrees Fahrenheit should not be allowed to enter the house drain or sewer.

Section 26. All plumbing fixtures in all buildings shall be set free and open, and shall be so placed as to be readily accessible for cleaning. All material used for the purpose of plumbing fixtures shall be non-absorbent and impermeable.

The installation or maintenance of fixed wooden wash trays or sinks is prohibited in any building used for human habitation.

Wooden troughs or sinks, with or without metallic lining shall be allowed only for soda fountain sinks, or dish sinks in hotels, restaurants and public kitchens, and may be lined with only copper or lead.

The bowls of water closets shall be made in one piece and of such shape and form as to hold sufficient quantity of water when filled up to the trap overflow to completely submerged any matter deposited in them and properly flush and scour the soil pipe when the contents of the bowl are discharged.

All water closets and urinals shall have a flushing rim so as to flush the entire interior surface of the bowl thereof with water. Low down tanks water closets shall be of the syphon pattern provided with refilling devices.

Latrines or range closets may be installed in or about buildings designed or the use or occupancy of a large number of persons, but not used as residence or lodging, when approved by the inspector.

When water closets are located in any yard of any building where there is a soil pipe stack and where suitable space is not obtainable within the walls thereof, or in a building not used for human occupancy, long, hopper, anti-freezing closets may be used, being arranged so as to be adequately flushed, and the water supply pipes and traps protected from freezing by placing them in a hopper pit at least three and one-half feet below the surface of the ground.

Every water closet, or group of water closets on the same floor, subject to constant use as in schools, shall be supplied from a separate tank or cistern, and no tank shall have a flush pipe less than one and one-fourth inches in diameter.

A group of not more than three basins, or a set of three wash trays, or a combined sink and wash tray, with a trap under the center fixture, will be considered as one fixture and require but one trap.

All sinks, basins, bath tubs, wash trays or sets of trays and all urinals must have their wastes provided with strong metal strainers.

Section 27. For all fixtures above the first floor having lead safes, sheet lead not lighter than three pounds per square foot shall be used. No safe waste shall be smaller than one inch in diameter and where there is more than one safe the size of waste shall be increased. The inlet end of the waste must be covered with a strong convex brass strainer soldered to the safe.

No safe waste shall in any case be connected with the drainage system direct, but must discharge from an open and over a sink onto some place in plain sight and when run to outside of building should be fitted with safe waste valves.

All water or other pipes passing through lead safes must be of lead with wiped joints or flashed around pipe three inches high with sheet lead flashing and made tight.

Section 28. No pipes shall be covered or concealed from view until the work has been examined, tested and approved by the inspector. The plumber shall notify said inspector when the work is ready for examination or test and prepare for the same by filling all the pipes with water to the top of the soil pipe, and allowing the same to stand for four hours, or by maintaining and air pressure of ten pounds per square inch for thirty minutes. If any defects in the joints or anywhere else are found they shall be repaired or replaced before the system will be finally accepted.

Section 29. The inspector shall have access at all times to any buildings having connections with any sewer and water mains to properly examine the same, and any defective work in connection with sewers or appurtenances disapproved by the inspector shall, upon notice, be properly remedied.

INSPECTION FEES  
Section 30. The sum of one dollar (\$1.00) for first fixture, and fifty (50) cents additional fixture, shall be paid as a permit fee for fixtures, proposed to be placed in the work described in the application for permit under this ordinance.

Section 31. Any person or persons who shall violate any of the provisions of this ordinance, or fail to comply with its rules and regulations shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be fined in any sum not exceeding ONE HUNDRED (\$100.00) DOLLARS and upon non-payment of the fine and costs may be committed until such fine and costs are paid and his Plumber's License revoked.

Section 32. This ordinance shall take effect and be enforced from and after its passage when published in The Baird Star.

C. L. Dickey  
Mayor, City of Baird, Texas.  
30-3t.

Compare Baird's water supply with forty years ago. Then two bits per barrel, now it comes through the faucets, with a pressure near one hundred pounds per square inch. We had then absolutely no fire protection. We now have better fire protection than most of the larger cities of Texas could claim forty years ago or even thirty years ago. With plenty of water with an efficient Fire Department with plenty of natural pressure in the mains and with the splendid new Fire Engine, we will all feel safe from fire, and we will secure a reduction in fire insurance. The people of Baird ought to feel proud of their water system for we have one of the best systems any town in Texas with equal population can boast. True, our water has cost lots of money, and the management was not always of the best, but muddled through some how and seems to improve in spite of the criticism. The fellow on the outside always knows more than parties in control on the inside, and the man that never could make a success of his own business knows how to run every body's else's business, but his own.

Members of the Legislature who voted to increase the salary of the judges of the higher court will find it difficult to explain this vote to the voters, if they should be a candidate for reelection or for any other office. This increase of the pay of District Judges are of the higher courses in an unjust imposition upon the tax payers of the state and we hope that every member of the Legislature who voted for such increase will be defeated for every office they ever run for. The cost of state government is too much, and the people have the power to reduce the cost, and the way to start is to defeat every one who voted to increase the burdens of the tax payers by increasing the salary of the judges of our higher court.

## AIR TRIP TO HAWAII

Lieut. Lester J. Maitand and Lieut. Albert F. Hogenberg made the trip safely from Oakland Cal., to Honolulu a distance of 2,400 miles over the Eastern Pacific ocean. The flight was made in a giant Fokker army plane. They made the trip in about 25 hours or near one hundred miles per hour, landing, Wednesday.

## APPLICATION TO MAKE MINERAL LEASE

In Re Re Guardianship of the Estate of Thomas Alvin Harris and Lena Lorine Harris, Minors, No. 834, In County Court of Callahan County, Texas.

Notice is hereby given that I, W. T. Harris, guardian of the estate of Thomas Alvin Harris and Lena Lorine Harris, minors, have this day filed my application in the above entitled and numbered cause for an order of the County Judge of Callahan County, Texas, authorizing me as the guardian of the estate of said wards to make a mineral lease upon certain terms as the court may order and direct, of the following described real estate, belonging to the estate of said wards, to-wit: Beginning at a point 40 feet East of the South-west corner of said Survey No 347; Thence East with variations of 11° 12' E, 97° 1 1/2 varas to stake and stone mound; Thence North 1155.8 varas to stake and stone mound 7.2 varas South of the South-east corner of J. M. Freel's 160 acre tract out of the North-west corner of said Survey No. 347; Thence West parallel with said Freel's South line 950 varas to a stake and stone mound 7.2 varas South of the South-west corner of said Freel's tract; Thence South with wire fence 1218 varas to the place of beginning, containing 20 acres of land, less however such excess as there may be over and above 200 acres or said tract, such excess to be reserved in the form of a square out of the North-east corner of the 204 acre tract above described.

Said application will be heard by the County Judge at the Court House in the City of Baird, Texas, on the 11th day of July, A. D. 1927.

W. T. Harris  
Guardian of the Estate of Thomas Alvin Harris and Lena Lorine Harris.

## NOTICE OF APPLICATION FOR SALE OF REAL ESTATE

THE STATE OF TEXAS, To the Sheriff or any Constable of Callahan County—GREETING:

You are hereby commanded to cause to be published, once a week for twenty days, exclusive of the day of publication, before the return day hereof, in some newspaper of general circulation published in said county, which has been continuously and regularly published in said county for a period of not less than one year, the following notice:

The State of Texas. To all persons interested in the Estate of Christopher C. Dunlap, Deceased.

Known ye, that S. N. Dunlap, administrator of the estate of Christopher C. Dunlap, deceased, having on the 6th day of July, A. D. 1927, filed in the County Court of Callahan County, Texas, his application to sell the following described land belonging to said estate:

24 acres undivided out of a tract of 72 acres of land, situated in Callahan Co., Texas, said 72 acres being tract No. 3, described in and set apart to Chris Dunlap, Okie Dunlap and Jewell Dunlap by decree entered in the District Court of Callahan County, Texas, on April 14, 1919, in Cause No. 1836, as shown by the minutes of said court, said 72 acres being a part of surveys Nos. 150 and 151 of the BBB & C RR Co. Lands, and further described by field notes as follows:

Beginning 668 1/2 vrs. South of the Northeast corner of the Southeast quarter of Survey No. 150, BBB & C RR Co. land; Thence South 423 8-10 vrs. Thence West 950 vrs. Thence North 423 8-10 vrs. Thence East 950 vrs. to the place of beginning.

Now, therefore, these are to notify all persons interested in said estate to be and personally appear at the next regular term of the Honorably County Court, to be holden at the Court House in the City of Baird, Texas, on the First Monday in Aug. A. D. 1927, same being the 1st day of said month, and then and there to show cause why such sale should not be made, should they choose to do so. Given under my hand and seal of office, this the 6th day of July A. D. 1927.

S. E. Settle  
Clerk, County Court Callahan County, Texas.

## DISTRICT MANAGERS WANTED

Substantial men, experienced crew managers preferred, capable of organizing sales force, sell "NO-BUMP" to coach and tudor owners, all makes, \$3.50. Four springs replace usual rigid "Pegs", makes car "ride like a rocking chair". Five territories still open. General Steel Products, INC., Dept. A, 415 Plymouth Building, Minneapolis, Minn. 32-ltpd.

FOR SALE: My place in West Baird whole or in quarters. Write me for price and terms. Mrs. W. C. Powell, 106 Douglas Street, Dallas, Texas, 26-4t.

## NEW SUGGESTIONS

for the

## SUNDAY DINNER

No. 1  
Roast Beef with Browned Potatoes and Peas  
Cauliflower au gratin  
Prunes Stuffed with India Relish  
Lettuce Salad French Dressing  
Coffee Charlotte  
Coffee

By CAROLINE B. KING  
Culinary expert and lecturer on household science.

PREPARE and roast the beef as usual, arrange the potatoes about it, alternating them with halved canned peas drained and dried, then dredged with a little flour. Brown nicely and serve as a garnish about the roast.

**Prunes Stuffed with India Relish**  
Soak and steam large meaty prunes, cool and extract the pits from slits in the sides. Fill with finely chopped pickle, India Relish or Piccalilli. Serve as a part of the salad course or as a relish with the meat.

**Coffee Charlotte**  
Line sherbet glasses with split lady fingers, and fill with stiffly whipped cream to which enough clear black coffee has been added to color and flavor well, sweeten to taste with powdered sugar and whip in half a teaspoonful of vanilla extract. Top each serving with a blanched almond or a cherry.

**Deviled Lamb Chops**  
Mix together two tablespoonfuls melted butter, one tablespoonful Worcestershire Sauce, one tablespoonful lemon juice, one tablespoonful catsup, one teaspoonful mixed mustard and a few grains of cayenne. Score rib or loin chops lightly and place in the sauce for ten minutes. Drain and pan broil quickly. Serve on a hot platter, sprinkle with salt and pepper and pour the rest of the sauce around the chops.

**Duchesse Potatoes**  
Boil and mash the potatoes as usual, beat well, and add a tablespoonful of butter to each cupful, also one-half teaspoonful of salt and a dash of white pepper. Pour in

No. 3  
Roast Duck with Prune Dressing  
Glazed Sweet Potatoes  
Creamed Spinach  
Cabbage and Pineapple Salad  
Sunshine Creams  
Coffee

enough sweet cream to moisten delicately and whip in the yolk of one egg, then the stiffly whipped white. Beat well, arrange in a vegetable dish, and brown lightly.

**Prune Relish**  
Wash half a pound of prunes, soak in two and a half cupfuls of water, and cook till tender. Drain, cool and cut in small pieces. Return to liquid, add one-fourth teaspoonful cinnamon, one-fourth cupful sugar, one-fourth cupful tart jelly, and two tablespoonfuls orange juice. Cook till thick.

**Roast Duck with Prune Dressing**  
Wash and singe a four pound duck, wipe well, inside and out. For the filling mix together one cupful of soft bread crumbs, one-half teaspoonful of salt, and a pinch each pepper and paprika. Add one cupful steamed chopped prunes, one cupful chopped apples and one tablespoonful melted butter.

**Cabbage and Pineapple Salad**  
Shred a small hard head of cabbage fine and mix with an equal quantity of canned pineapple cut into dice. Add half a cupful of chopped English walnuts or almonds moisten with mayonnaise or French dressing. Serve on lettuce leaves.

**Sunshine Creams**  
Soften a tablespoonful gelatine in two tablespoonfuls of cold water. Boil together one cupful granulated sugar and half a cupful of water to the thread stage, pour slowly over the well beaten yolks of two eggs, add the gelatine and the juice and grated rind of an orange. Whip till almost congealed, then fold in a cupful of whipped cream and the whites of the eggs, stiffly beaten. Serve in tall, slender glasses, topping each with a cherry.

# Thousands of Motorists Throng Roads To National Beauty Spots of West

The wide world beckons and the motorist is answering the vacation call. New roads, new conveniences and new services have made the whole United States almost as close as the wheel of one's car. Thousands and scores of thousands of motorists all over the land are responding to the travel lure. They are going from each place and in all directions.

New roads in the far West this year and improved old roads have made practically every national beauty spot pleasantly accessible and there is already an indication that the great national parks will make records for visitors this year never before approached. But no matter how well the parks will not be reached by the man in the East, unless there is a green spot in a city. To be a motorist, it means a great privilege of natural beauty, in many instances containing thousands of square miles. And it is equipped to take care of visitors. The visitors may either camp or stay at mountain lodges as fine as any.

Some of the points that are now included on a complete all summer motor trip to the Pacific Coast alternating as between North and South on the go and return journey are:

Glacier National Park, Yellowstone National Park, the Columbia River Highway, the Snoqualmie Falls and Pass, Rainier National Park, the Mount Hood Loop, Crater Lake National Park and then the famous series in California—Mount Shasta, the Mount Lassen Volcanic National Park showing the only active volcano in the United States, the Redwood Highway, Muir Woods, Yosemite National Park with its matchless waterfalls and rock formation, the Sequoia National Park with its General Sherman Tree, thirty-six and one-half feet

in diameter and with five thousand trees greater than ten feet in diameter in an area of two miles square, Los Angeles, Hollywood and Old Mexico. Then on the Southern route, Zion National Park, Bryce Canyon, the Kaibab National Forest, the Petrified Forest, the Grand Canyon and the residences of the pre-historic cliff dwellers, and Indian pueblos where the native American still lives much as he did before Cortez came to the shores of North America.

If any of our readers wish to make a motor journey to the Pacific Coast that touches Southern California, on either the going or return journey, by special arrangement, the Automobile Club of Southern California will act as their guide and servant without charge. Write or telegraph the club, mentioning this paper, at its headquarters, Twenty-sixth and Figueroa streets, Los Angeles. Say from what point you will start, give the time of

start and the time you hope to be back home again. Mention the several important places on the route that you want to visit. The Club will then send you complete detail route maps, selecting the go and return routes so that the journey will be pleasant from a weather standpoint. Say whether you are going to camp out, camp in motor camps or stay in hotels. If specific information is wanted, make the request definitely in the communication. On arrival in Southern California the Automobile Club will make the visitor a guest member without charge. These courtesies are extended in return for the courtesies invariably shown to California motorists when traveling in the other parts of the United States. All of our readers intending the journey should avail themselves of the offer. It will make their journey decidedly more pleasant and workmanlike than if they pioneer.

## LINDBERGH JOINS SELECT COMPANY

Now Member of the "Did It Alone" Club.

Washington.—He did it alone! Col. Charles A. Lindbergh has joined a choice company of solo explorers and adventurers, because "he did it alone."

Dr. David Livingstone, Henry Stanley, Alexander Selkirk (Robinson Crusoe), Capt. Joshua Slocum, Capt. Harry Pidgeon, Lieut. Andrew S. Rowan, John Colter, and Sir Galahad, did it alone.

"Adventurers 'on their own' have earned the world's best glory wreaths," says a bulletin from the Washington headquarters of the National Geographic society.

"David Livingstone sleeps in Westminster abbey because, traveling by himself, he revealed the geography of the dark heart of Africa, David Livingstone was lost three years to the world when Henry Stanley—alone, except for native carriers—cut through the Congo to reach Livingstone at Ujiji and leave supplies and medical equipment for the missionary explorer.

"The solo adventurer who carried the 'message to Garcia,' like Colonel Lindbergh, wore the American uniform. Elbert Hubbard told the story which thrilled and still thrills; how the young officer on the eve of the Spanish-American war took the message from President McKinley for the commander of the Cuban insurgents deep in the trackless forest; how he crossed to Cuba, braving capture and death as a spy if caught; how he delivered the message to General Garcia which put hope in the hearts of Cubans.

**Sailed Around the World.** "Difficulty in making a living in New England prompted Capt. Joshua Slocum to embark on an adventure par excellence. Alone he sailed the 'Spray' around the world. Last year Capt. Harry Pidgeon also circumnavigated the world in a still smaller boat, 'The Islander,' a yawl 34 feet long and 10 feet 9 inches on the beam. He returned to Los Angeles, his home port, after an absence of three years, eleven months and thirteen days. On one leg of his voyage Captain Pidgeon did not see a speck of land, a sail, nor the smoke plume of a steamer for 85 days.

"Courage when it goes alone has ever caught men's imaginations. The early bards gave Galahad, Beowulf and St. George, the dragon slayer, no weapon bearers or assistants. More is the credit to the traveled Gulliver, to the Connecticut Yankee in King Arthur's court and to Jack the Giant Killer, in the opinions of enthusiastic readers, because they did their deeds without aid. 'The boy stood on the burning deck,' and the poet, who knew the public's preference for heroes, added, 'whence all but he had fled.'

"Many lone adventurers have died lonely. This has been true of trail makers in the Middle and Far West. While Daniel Boone and David Thompson, he who mapped by himself the country between Lake Superior and the Pacific coast, made their chief expeditions with helpers, each traveled much alone. John Colter left an estate of \$220, although he accompanied Lewis and Clark and by himself discovered what is now Yellowstone park. Colter's story shows one of the hazards of traveling alone; no one would believe his descriptions of Yellowstone wonders because he had no partner to confirm them.

"In a cemetery in Shanghai stands a solitary headstone to Frank N. Meyer, plant explorer, who by introducing new plant varieties into the United States, did much to promote American agriculture. Although Meyer had Chinese helpers he pursued constructive adventure without white companions and finally sacrificed his life in a Yangtze river accident.

**Alone in China.** "Out in China at the present time is Dr. Joseph Rock, who prefers to travel alone. His hazardous journeys to Tibet and Yunnan have yielded, among other finds, the fruit of the chaulmoogra tree, which, has been found to cure leprosy. When Peary discovered the North pole he had the Eskimos with him, but he was the only white man to stand on top of the earth!

"Alexander Selkirk's true story proved so pathetically lonesome that Daniel Defoe found it necessary to give him that fictional companion, Good Man Friday, when he wrote 'Robinson Crusoe.' Selkirk, the real Crusoe, had a misunderstanding with the captain under whom he sailed and asked to be put off on uninhabited Juan Fernandez island near the Chilean coast. Here British sailors from the 'Duke' found him four years later, scarcely able to talk, surrounded by pet goats, parrots and cats. He was dressed in the skins of goats which he was able to catch by his amazing feetness. A bronze tablet on the island now marks 'Selkirk Lookout.'

"One nonstop solo trip, not as long as that from New York to Paris, was made between Boston and Lexington by another hero who traveled alone, Paul Revere."

### Styles Move Eastward

San Francisco.—Shoe styles in California are six months ahead and by the time the modes have reached the Atlantic coast Californians are wearing something else, asserts A. H. Geuting of Philadelphia, president of the National Shoe Retailers' association.

# for Everybody, Everywhere

The Coach

Widely popular because of its handsome appearance, comfortable seating arrangement and low price. Ideal for personal or family use and favored by women drivers because of its ease of operation.

\$595 f.o.b. Flint, Michigan

The Sedan

A beautiful enclosed car, notable for its marked distinction in line, color and appointments. Accommodates five persons in comfort. Four wide doors, six adjustable windows—and Chevrolet's handling ease, of course.

\$695 f.o.b. Flint, Michigan

The Touring Car

Streamline body finished in Palmolive gray Duco. A car of unusual utility and economy because of its low fuel and oil consumption, and its ability to withstand hard usage over all kinds of roads.

\$525 f.o.b. Flint, Michigan

The Roadster

A favorite among those who demand economical operation and smart appearance in a two-passenger open car. Distinctive rear deck "fish tail" modeling. Exceptional luggage capacity. Rear deck removable.

\$725 f.o.b. Flint, Michigan

The Coupe

Combines smart appearance, and all-around utility with low price. Popular for professional and general business use or as a personal car. Fast in traffic, easy to park, and comfortable on long runs.

\$625 f.o.b. Flint, Michigan

The Imperial Landau

This noble example of style car-designing affords true custom-built appearance and luxury. Specially designed Fishbe body in satin black Duco with embellishments of brilliant chasseur red.

\$780 f.o.b. Flint, Michigan

The Sport Cabriolet

The most distinctive two-four passenger car ever offered in the low-priced field. Finished in royal oak green Duco, with tan top. Spacious rumble seat. A car of rakish appearance and distinctive individuality.

\$715 f.o.b. Flint, Michigan

The Landau

Fine appearance emphasized by beige brown Duco finish, black leather rear quarters and landau bows. Full-crown fenders, bullet-type lamps and rich interior appointments add to its elegance and style.

\$745 f.o.b. Flint, Michigan

# MORGAN CHEVROLET COMPANY

Baird, Texas.

## QUALITY AT LOW COST

### Pre-Roman Dwelling Uncovered in Germany

Berlin.—Ruins of an ancient cottage dating long before the first Roman invasion of the German borderlands have been excavated near Mayen in the Rhineland by Dr. Franz Oelmann of the University of Bonn. Ruins of the villa type of architecture, introduced by the Romans, are common enough in southern Germany, but this is the first good example of the houses built by the Celts who occupied the valley even before the Germanic tribes came, and who gave to the great river its Celtic name of Rhine. The house was built over a timber frame, the gables being formed by long poles set solidly in the earth and then bent toward each other over shorter supporting posts, so that when their ends were lashed together the sides and roof of the house formed a single sweeping curve, like the top of a pointed Gothic arch. The spaces were latticed in with lighter wands and covered over with a thick thatch. Houses of this type, Doctor Oelmann states, are known in the South Sea Islands, and in some parts of South America, but for centuries have not been built in Europe, save in certain very isolated regions of very backward culture.

### Tree Comes to Meet Farmer at the Barn

Pomeroy, Ohio.—Alonso Kesterson has never believed in fairies, but now—well, consider the evidence: Mr. Kesterson, who is past the age of believing in fairies, owns a farm just outside Pomeroy. As is a habit of farms in that vicinity, it runs mostly up and down. Just back of the house the Kesterson farm turns sharply upward for several hundred feet. Three hundred feet up this steep clay slope stood an apple tree. Its apples were of a variety particularly prized by Mr. Kesterson and he bemoaned their inaccessibility. "I wish that old tree was down in the barn lot," he confided to his grandson the other morning. "I like them apples special and it's gittin' too hard to climb up there." A few minutes later the two heard a rumble, a clatter and a crackling of timbers; they turned to behold the apple tree, its roots still buried in a gigantic clod of earth fifteen or twenty feet in diameter, settling itself in the barnyard. A bare slippery expanse of clay on the hillside revealed its path. The slippery clay, softened by heavy rains, had staged a landslide for the apparent benefit of Mr. Kesterson. The tree crashed through a fence and demolished a shed. It was in bloom at the time and now is preparing, Mr. Kesterson said, to bear a crop of apples.

### Naturalist Finds Owls Can See in Daytime

Vancouver, B.C.—Dan McCowan, a naturalist and photographer of the Canadian Rockies at Banff, Alberta, has just discovered that owls can see in the daytime. McCowan, who has spent 20 years studying and photographing the wild life of the Banff National park, during which time he has taken more than 10,000 negatives, gives his judgment on the seeing capacities of the owl as follows: "One day recently I climbed up a small Douglas fir near the Banff Springs hotel to photograph a nest full of young horned owls which could be snapped from the top of this tree in their nest in a big stump. I was just taking a closeup of the owls when the mother bird came at me in full flight, hit me in the back of the neck and knocked me out of the tree. I dropped about 25 feet, grasping various limbs as I fell, but being a Scotchman I kept a firm grip on my camera, which had cost money." Only a short time previously McCowan had climbed 500 feet up the steep slopes of a cliff near Banff to reach an eagle's nest. He had just succeeded in photographing the young eaglets when their feathered protectors swooped down from a thousand feet above and made such menacing motions with their dangerous looking talons within a few feet of McCowan's face that he scurried down the cliff to safety.

### Yet He Failed

Cracow, Poland.—Stanislas Schwarc, chief of the political police, was ordered to run down a gang of counterfeiters. He failed. Other detectives were put on the job. They reported Schwarc was head of the gang.

### Got Relief

Budapest.—Jail promised such a relief from his wife's company that Andreas Kurdi passed himself off as his son, served three months in prison and asked to stay longer.

### Show Dog Vaccination Stamping Out Rabies

Paris.—Vaccination of dogs has done much to stamp out rabies, it was agreed by scientists attending a recent rabies congress at the Pasteur Institute. Japan, Italy and the United States, it was said, had vaccinated several hundred thousand dogs. The results have shown that dogs so treated developed rabies in only a small percentage of the cases. This vaccination, however, is said to give only temporary protection. It must be repeated every year to be effective.

**AUGUST 10th., 1927**

### INDIANS HAVE NO SINGLE RELIGION

Beliefs Among Various Tribes Differ.

Washington.—Nearly 100,000 Indians in the United States are untouched by Christian doctrines, the board of Indian commissioners recently estimated, and remain to all intents and purposes pagans, presumably still holding in large measure the beliefs of their ancestors. What these primitive Indian religions beliefs are is told in a bulletin from the National Geographic society.

"Poetic fancy and a natural tendency to describe newly encountered beliefs and customs in terms of those already familiar have given white people many false ideas in regard to the religious beliefs of the American Indians," says the bulletin. "Some enthusiasts have pictured the typical red man as noble and ethical beyond his white brother, believing in a fatherly 'Great Spirit' and striving to live the good life that he may go after death to the 'Happy Hunting Ground.' This is a fallacy.

**Have No Single Religion.**  
"There is no single religion of the American Indians. Instead the beliefs differed widely in different sections and among different tribes. There was, however, a general similarity of views, and these were about what could have been expected from people of a relatively primitive degree of culture. Nowhere does what could truly be called the conception of a 'Great Spirit,' an overruling deity, emerge.

"There were greater and lesser spirits, to be sure, but the characteristic Indian belief is in a multitude of spirits animating animals, objects and the various forces of nature. Nor were these spirits inherently good or bad, morally. They might help or hinder the individual in his activities or health, and whether they did the one or the other was the test of their 'goodness' or 'badness' for him.

"The primitive Indian has no conception of a hell; nor is his entry into the spirit land dependent on his conduct. He enters it as a matter of course, he believes, and continues there whatever activities have interested him in this life. To some tribes this is a 'skyland,' to others it is merely a region of the earth, 'in the west,' 'across the sea,' or 'beyond a river.' Others believe the villages of the dead to be near their villages but invisible.

**Believe in Magic.**  
"Coupled in the mind of the primitive Indian with a belief in many spirits is a belief in magic, through which the spirits can be influenced. The medicine men possessed the secrets of such magic, it was believed, and often interceded. All Indians believe in the possession of a soul which leaves the body at death. They also believe that it leaves at other times, and some tribes ascribe illness to this absence of the soul. The services of the medicine man are sought to recover the missing soul. Belief in a continuing soul did not lead to ancestor worship as among Eastern peoples.

"Most Indian mythologies do not concern themselves with creation; they assume the existence of the earth and deal with its peopling and with the origin of arts, customs and rites. All these are supposed to have come by a sort of revelation.

"Some tribes, however, especially those of the Pacific coast region, do have a creation myth. In some it is 'Old Man Above,' in others an animal such as the coyote or the silver fox, who makes a hole in the sky, comes to earth and creates the animals and men. In some of these myths there is only water beneath the sky, but the descending being creates the earth in the form of an island which grows.

**Morality Well Developed.**  
"Morality and ethics were well developed among American Indians. They have a strong sense of conscience and many individuals are strikingly benevolent. The tribal morality was strict. He who lied, failed to keep his promises, or stole within the tribe was disgraced. Murder, too, was punished. War removed ethical barriers among Indians as it has among most people in all ages. It then became a virtue for the Indian to kill his enemies and to take their property.

"On the whole, the Indian's religious beliefs may be described as being wholly practical and as springing from fear of the more or less hostile forces of nature that surround him. His various rites arose from his efforts to propitiate or to take advantage of these forces."

### Form "Cavalry Troop" in China; Use Ponies

Washington.—Lacking a cavalry troop and feeling that one might be useful, officers of the Fifteenth United States Infantry, guarding part of the Tientsin-Peking railway in China, have improvised a mounted outfit with their foot soldiers.

One officer and thirty-four men of the headquarters company were told off for this duty. Their mounts are Mongolian ponies, which range from 13 to 14 hands in height and average about 700 pounds in weight.

The Fifteenth Infantry headquarters company platoon has been trained by Capt. H. M. Henderson in horseman ship, cavalry drill, patrolling and street fighting, with frequent practice marches of 18 to 40 miles.

There's a surprise in store for you here this week. One of our customers was asked the other day which had the sweeter disposition--blonds or brunettes. "My wife's been both and I haven't noticed any difference," he answered. It's easy to tell the difference in the superiority of our confections. Such delicious qualities represent a supreme attraction.

## Every Day Supper Hint For Busy Women

By CAROLINE B. KING  
Culinary expert and lecturer on  
household science.

### Kidney Bean Goulash

2 cans of red kidney beans  
1 quart of canned tomatoes  
1 cupful of grated cheese  
1/2 pound of sliced bacon  
2 green peppers

Shred the peppers and remove all seeds, fry the bacon crisp, lift it from the pan and set in a warm place, then turn the peppers into the bacon fat and fry a delicate brown. Add the beans and the tomatoes and cover closely. Simmer gently half an hour, then serve on a hot platter garnished with the bacon and sprinkled thickly with the cheese.

### Prune Short Cake

Make a rich biscuit dough adding two tablespoonfuls of granulated sugar, bake in two layers, when done split and butter generously. Put together with prunes, cooked with sufficient sugar to make them rich and thick. Prunes should be pitted and chopped.

### American Chop Suey

1 pound of chopped beef  
3 large onions  
2 green peppers  
1 cupful of water  
3 tablespoonfuls of butter  
1 teaspoonful of salt  
3/4 teaspoonful of pepper  
1 can spaghetti with tomato sauce

Shred the onions and peppers very fine and fry until tender in the butter. Then add the meat and fry with onions and peppers for a few minutes. Add the water and seasoning and simmer slowly for ten or fifteen minutes. Add the spaghetti and serve.

### Prune Souffle

Melt two tablespoonfuls of butter and cook to a paste with the same quantity of flour, add one cupful of prune juice and one-quarter cupful of sugar and simmer to a thick smooth sauce. Remove from the fire and while still hot beat in the well whipped yolks of three eggs and one-half teaspoonful of lemon extract. Finally fold in one-half cupful of prune pulp and the whites of the eggs stiffly beaten and pour in a buttered pudding dish. Bake slowly till firm, then serve immediately.

### Fried Onion Soup

3 or 4 medium sized onions  
3 pints of rich stock  
1 cupful of grated cheese  
Slice the onions and cook them in a tablespoonful of butter, stirring all the time until they take on a rich brown color. Heat the stock to boiling and pour over the fried onions, then simmer about five minutes. Pour the hot soup over

a slice of crisp, freshly made toast for each serving, and scatter the cheese thickly over the surface; sprinkle with paprika.

### Prune Fritters with Prune Sauce

Cook large prunes in the ordinary manner till tender. Then drain, reserving the juice. Remove the stones and dip each prune in lemon juice, then in powdered sugar and lastly in a batter made of two eggs, a cup of sweet milk, half a teaspoonful of salt and enough flour sifted with a teaspoonful of baking powder to make a stiff batter. Drop by spoonfuls into boiling fat and fry a delicate brown. Drain on paper and serve with prune syrup cooked down slightly and thickened with a very little cornstarch blended with cold water. Grate a little nutmeg into the sauce.

### Prune Puff

Stew half a pound of prunes and add a teaspoonful of butter. When cool remove the pits. Place in a buttered baking dish and pour over them a batter made of a cup and a half of flour, two teaspoonfuls of baking powder, one-quarter teaspoonful salt, half a cupful of sweet milk and two eggs beaten separately. Bake till well done and serve from the dish in which it is baked.

## GHOST STORIES HELP SELL OLD CASTLES

Find Spooks Enhance Value  
of Property.

London.—Ghost stories are being bought and sold in the London real estate market as a result of the discovery that old castles with spooky reputations are preferred by buyers, particularly wealthy Americans, says Popular Mechanics Magazine. Not that the purchasers believe in ghosts, but there is something about owning a home with a tradition of being haunted that makes it worth thousands more, in the estimation of many purchasers.

England is well supplied with good ghost stories, and the list is constantly being added to, largely, it is believed, because candles are still extensively used for illumination and the dim light of a candle is very favorable, according to scientists, for producing the condition that leads to seeing things that aren't there.

Ghosts have always had one drawback from the standpoint of careful investigation—they are usually seen by people who don't want to see them, and almost never by persons who go looking for them. There is a simple explanation for that, and for the ghosts that are heard as well as those that are seen. The visible ghosts, scientific investigators declare, exist only in the eye of the beholder, and the audible ones in his ear.

### Sounds Are Amplified.

Everybody, even those who have never claimed to have seen a ghost, has lain awake at night and heard queer sounds, abnormally loud, even though they would have been inaudible to anyone else, because they existed only in the hearer's own ear. The sounds were made by blood pulsing through the veins of the ear. Picked up by the eardrum, which amplifies them just as a radio receiver amplifies an incoming signal, the ear sounds, heard in moments of apprehension or nervousness, can easily be imagined to be the stealthy steps of a burglar or the movements of a more ghostly visitor, particularly if one is sleeping in a centuries-old castle well supplied with ghostly legends.

As for the ghosts that are seen, they are classified medically as Purkinje images or Sanson specters, both named after their discoverers, and it is in seeing them that the weak light from a candle plays such an important part. Purkinje discovered that under certain conditions, the blood vessels of the retina, that film at the back of the eye which is directly connected with the nerve leading to the brain and which really sees the image focused on it by the eye lens, could produce images of its own. To do that, though, a dim light is necessary as a bright illumination furnishes so much light that the blood vessels do not cast their shadowy reflections. It is as when one meets an approaching automobile at night. If the car has bright lights on that flood of light blinds the eye, whereas if the dimmers are turned on the retina is able to distinguish all the details of the roadway clearly.

### How It Is Explained.

Like the Purkinje image, the Sanson specter is produced within the eye either on the front surface of the cornea, which is at the front of the eyeball, or on either the front or back surfaces of the crystalline lens, a convex lens like that in a camera, which focuses the image on the retina. When you look through a street-car window under certain light conditions, you not only see the passing buildings outside, but likewise images of the people behind you, or buildings on the opposite side of the street, the images being formed on the window glass. The Sanson specters are something of the same sort, tiny images, usually badly blurred, of things which are at one side, out of the direct line of vision. But the optical nerves, accustomed to placing things they see by their size and relation to other objects, transmit a message to the brain saying that these blurred specters are ahead, and, like the images on the street-car window, you can look right through them and see solid objects behind.

Given a dim candle flame and a condition of nervousness, grief, or even indigestion, it isn't hard to imagine that you are seeing images of ghostly figures, particularly as they appear to be almost transparent, and move and shift position as you move.

### Finds Substance to

#### Prevent Blood Clotting

Baltimore, Md.—From the liver of dogs Prof. W. H. Howell of the Johns Hopkins university has prepared an anti-coagulant that will keep a sample of blood in a practically normal condition for 24 hours.

Clotting is nature's protection against bleeding to death, but this tendency of the vital fluid to congeal after its exposure to the air offers serious disadvantages in blood transfusions and certain types of important experimental work. This new clot-preventing substance, which has been named heparin, is of great interest, therefore, to surgeons, pathologists and other specialists who deal with blood, particularly those who make the various blood tests used in detecting disease.

### There You Are!

New York.—Mrs. Ruth Aronson Cracks Wickey was married on Friday, August 13. Now she is seeking a divorce.

# PLUMBING

I have been in the Plumbing Business in Baird for the past seventeen years and hope to continue. During this time I have sold only "Standard Enamel Ware," every piece is positively guaranteed to you. Come and see me and let me figure on your jobs. We are good and competent Plumbers with seven teen years of experience behind us. Try us, we will treat you right.

I thank you one and all for your patronage and hope to serve you in the future.
