

DEMONSTRATION URGES BEST USE OF ELECTRICITY

Efficiency And Utility
Shown By REA Expert

Sponsored Co-operatively
By Appliance Dealers
And Rural Electric
Company

The first three cooking demonstrations sponsored this week through the co-operation of electrical appliance dealers of the county and the local rural electric company were well received by good sized crowds. The last of the series in Gainesville Thursday night is likewise expected to draw a good attendance.

Demonstrations were under the direction of Miss Oneta Litter of the utilization division of the Rural Electrification Administration.

Stressing efficient use of electricity as the central theme of her lecture, Miss Litter demonstrated food storage and refrigeration as well as cooking. The purpose of her appearance is to help housewives become more familiar with the new convenience at their disposal, also to help them use the current more efficiently.

Lucky number attendance prizes with a value of about 20 dollars were given at each of the four demonstration places. Electrical appliance dealers co-operated by providing all items used in the demonstration besides several others arranged for displays. The meetings were held in Forestburg, Bulcher, Muenster, and Gainesville on consecutive nights.

RENEWAL OF WAR ON COYOTES APPROVED BY COMMISSIONERS

A renewal of hostilities between Cooke county and Br'er Coyote was approved last week in a session of the Commissioners' court with representative farmers and E. T. Personette of the Federal Predatory and Rodent Control board. As a result, the same program that was in effect last year, by which a licensed trapper will be engaged co-operatively by the county and federal government, is again being maintained for a period of several months.

The county pays two fifths of the trapper's expense and agrees to keep him here as long as the wolf menace continues. Farmers bothered by wolf raids are expected to submit a request to the Commissioner's court in order to secure the man's service in their communities.

As explained by Judge Ray Winder, the county does not approve of engaging a trapper permanently. Experience has shown that the pests can be effectively thinned out in a few months. Later, as they begin to migrate into the county again, a trapper will be brought back. It is estimated that a few months of active campaign each year is sufficient to keep coyotes under control.

At the present time the trapper is working in the Dexter community. His next assignment is the neighborhood of John Fette and Gordon Ramsey. Both of those men have sustained several sheep losses lately.

The trapper uses poison as well as traps in his work.

FMA DIRECTORS NOT MOVED BY THREAT TO DRILL CITY WELL

The Farmers Marketing Association chooses not to make a reduction in its water rate to the city. In spite of growing interest in a city well directors of the association decided last Thursday night to maintain its present level of prices, especially in view of the possibility that the largest consumer, the refinery, may drill its own well. Losing that volume, it did not consider the reduced price as adequate.

Directors also mentioned that published figures on the city's water bills are misleading in that the figures mentioned were, not in effect until increased by the combination of hot weather and a vastly increased demand at the refinery. They stated that the city's bill over the past eight years was approximately \$100 a month. At the present time the bill is about \$200 a month.

ISOLATIONIST SENATORS THREATEN FILIBUSTER

WASHINGTON, D. C.—A bloc of 34 isolationist Senators announced last Friday that they would talk to death any proposal to lift the existing embargo against arms shipments to nations engaged in war. Photo shows a group of the leaders after the meeting. Left to right: Senators Homer T. Bone; William E. Borah; Gerald P. Nye and Rush D. Holt.

POULTRY NEEDS CARE TO PRODUCE PROFIT, SPECIALIST STATES

Speaking especially to "coasting" poultrymen who simply grow chickens but neglect to give them necessary attention, Professor W. C. Homeyer, poultry specialist of Universal Mills, offered helpful hints for poultry profits to a large audience at the K of C hall Tuesday night. His lecture was sponsored by Universal Mills and arranged by that company's local distributor, the Muenster Milling Co.

He recommended a well balanced diet as one of the essentials for growth or egg production and urged special vigilance against diseases and worms, either of which will impose a severe handicap on a flock but can be avoided, to a great extent by reasonable sanitation. Non-productive chickens, mere boarders, should be culled out.

The Universal Cowboys, radio orchestra appearing daily on the Universal program, played several numbers in connection with Homeyer's program and remained afterward to play a dance.

Dozens of visitors from towns as far distant as Wichita Falls, Sherman and Pilot Point were present.

AUTO DEMOLISHED, OCCUPANTS ESCAPE WITHOUT INJURIES

Andrew and Miss Anna Fleitman escaped possible serious injuries last Friday evening when the car in which they were driving left the road, turned over several times and landed in a deep ravine south of Myra.

The accident occurred while Andrew and his sister were enroute to their home from Gainesville. The former, driving the car, was unable to account for the accident, except for the fact that he napped momentarily following a week of hard work with a thrasher crew.

The Chevrolet coupe was demolished but the occupants received only minor cuts, from broken glass, and a few body bruises.

ROCK STATION AGAIN UNDER MANAGEMENT OF WALTERSCHEIDS

Since Wednesday, Paul and Ed Walterscheid are back at the Rock Station, 4 miles east of Muenster, operating a lunch room and retailing petroleum products for the Muenster Refining Company, A. G. Hutton, owner of the station advised.

Along with their retail business the brothers will conduct a wholesale agency for the refinery, concentrating their attention on tractor trade of the community.

LARGER BOILER IS LATEST ADDITION IN REFINERY EXPANSION

Another step in the current expansion program at the Muenster Refining Company is the installation of a 125 horse steam boiler to replace the 45 horse boiler that is no longer adequate for the company's constantly increasing production. The small unit will be retained for an auxiliary.

Workmen were busy Tuesday on a concrete foundation for the boiler. A. G. Hutton expects to have it in use in about two weeks.

AGILE PILOT CHEATS DEATH

SAN DIEGO, Calif.—An airplane pilot miraculously escaped death last week when a single seater monoplane he was preparing to land struck power lines carrying 12,000 volts of electricity and was suspended 40 ft. above ground. C. B. Thomasson, 27, sailor attached to the VT-5 squadron, naval air station and holder of a private pilot's license, was the lucky flyer. The plane burst into flames several minutes after it had struck the wires, but Thomasson had escaped from the plane and pulling himself hand over hand to a nearby pole climbed down to earth unhurt. Photo shows: Firemen playing water on the plane, but the fuselage was burned from the wings and body leaving nothing but the motor and the ribbed skeleton suspended in the wires.

FIRE DEPARTMENT ELECTS HENRY LUKE AS NEW FIRE CHIEF

Henry Luke was elected fire chief of the Muenster volunteer department when the annual election of officers was held during a regular business session in the city hall Monday evening. John Fisher and Joe Horn were re-elected assistant fire chief and secretary-treasurer respectively, and Jake Horn, Jr., was named fire captain.

To Elmer Fette and Frank Hoedebek fell the appointment to represent the Muenster unit at a firemen's school at A and M College from July 17 to 21. Both will leave next Sunday.

The members also discussed plans for their annual picnic to be held some time this month.

APPLICATIONS FOR SCHOOL TRANSFERS DUE BEFORE JULY 30

Warning was issued this week by County Superintendent Randolph O'Brien that all students intending to transfer to other school districts next year must file application for transfer before July 30. Parents who expect to send their children to a public school outside their own district are reminded to mark the date and take care of the transfer before it is too late.

SCHMITZ BROTHERS OPEN BOWLING ALLEY

F. J. (Cotton) and Lawrence (Biggun) Schmitz of Lindsay went into business at Gainesville Sunday as proprietors of the Schmitz Bowling Alley at 406 E. California. The Alleys are rated among the best in North Texas.

Four of the alleys will be reserved for ten pins, which is played with large balls, 12 to 16 pounds, and another for duck pins, played with 3 to 7 pound balls.

"BUILD OR REBUILD" WILL BE DECIDED BY GENERAL FMA VOTE

Whether or not the Farmers Marketing Association will put up a new store building will depend upon the outcome of a general membership vote several weeks from now. That is the decision of FMA directors at their regular meeting last Thursday night.

No date was announced for the general meeting but it will probably be announced as soon as estimates are drawn up to show the expense of repairing the present structure and of building a new, modern store. Because damages caused by the recent fire are confined almost entirely to the second floor the directors do not feel that haste is necessary.

READS OBITUARY, LOCATES OLD FRIEND, PAYS 50 YEAR DEBT

When news of the recent death of Mrs. N. F. (Mack) Naughton appeared in a Missouri newspaper it enabled an old friend, B. A. Gibbins at Edinna, Mo., to locate Mr. Naughton and pay a 50-year-old debt. Early this week Mack received a \$25 check with an apology for the delay in paying. For years the man had not known of the Naughtons' whereabouts.

BIKE RIDERS WILL HAVE RACES SUNDAY

The bicycle supremacy of Muenster hangs in the balance. Taking their cue from motorcycle enthusiasts a group of bike riding youngsters have decided to put on a show of their own next Sunday afternoon in Robert Yosten's pasture. About 25 are expected to compete in a good series of races.

Admission charges are set at 5 and 10 cents.

SEC. SWANSON DIES

Claude A. Swanson, Secretary of the Navy in the Roosevelt cabinet, died suddenly in his native Virginia. Swanson was 77 years old and represented the state of Virginia for twenty-three years before his appointment to the cabinet.

FREE TREATMENT OF FLOCKS OFFERED TO LOCAL POULTRYMEN

Free poultry service sponsored by Universal Mills of Ft. Worth is again available to the people of Muenster, according to a statement released this week by Muenster Milling Company, local distributor for the Fort Worth feed company. Jess Newman, territory representative and veteran poultry specialist, will have charge of the service.

Newman's attention at this time of the year is given principally to chicken pox, also known as sore head. That dreaded disease has become so prevalent as to be a serious threat to every flock. Vaccination, he says, is the only assurance against chicken pox, and every person wishing to keep birds healthy should arrange for vaccination as early as possible.

To do this it is necessary only to notify the Mill. The day before Newman arrives the Mill will remind people to lock in their chickens and have them waiting for treatment. Usually Newman comes to Muenster on Wednesdays. The vaccination service will be in effect only until September 15. After that date live virus for the treatment is no longer available.

There will be no charge for Newman's service but there will be a small charge to cover actual cost of the vaccine used.

Much of a poultryman's profit depends upon his attitude toward worming, Newman also stated. He recommended that birds be wormed at least once a year, quoting statistics to the effect about 90 per cent of poultry disease results from decreased resistance, which, in turn, results from worms.

CIVIC LEAGUE WILL ELECT OFFICERS AT FRIDAY'S MEETING

Members of the Ladies' Civic League are reminded of a regular monthly meeting this (Friday) afternoon at 3 o'clock in the public school.

The annual election of officers will be held and a one hundred per cent attendance is anticipated.

Another phase of the meeting will be a vote to decide if the league will become federated with the state garden clubs and be known as the Ladies' Civic League and Garden Club.

WORK ON GAINESVILLE HOSPITAL UNDER WAY

Work is progressing on Gainesville's new hospital now under construction on North Richie street for J. B. Ferguson, who is coming to Gainesville from Electra to operate the institution.

Concrete foundation is complete and brick work is going forward rapidly.

JOHN HOBERER IS MAKING RECOVERY FROM INJURY

Lindsay.—John Hoberer of this community suffered injuries to his arm, a cut on his lip and several bruises on his leg when he was caught in a fan belt at the Whaley Mill and Elevator company plant in Gainesville.

The accident occurred last Wednesday morning at 2 o'clock. After receiving treatments for the injuries at the Gainesville hospital he was permitted to return to his home, where he is making a satisfactory recovery.

BEARD BRINGS IN BEST WELL OF VOTH POOL

Three Offsets Due To
Follow In Near Future

Cary-Norbury Test West Of Pool Abandoned As Dry Hole

A new surge of activity got under way this week in the South Muenster oil pool, known to oil men as the hot spot of Cooke County. Joe Beard, bringing in a well variously estimated from 1500 to 4000 barrels, opened the way for more drilling by himself as well as two other operators.

The new well, is Beard's No. 2 Voth, an offset to the southwest of the hole abandoned in January and still dry in spite of two weeks of trying to make it a producer. It is rated as the best well in the field and flows from Ellenberger topped at 1774, about ten feet higher than neighboring producers. It is said to have started flowing when the lime was penetrated only a few inches.

Beard is now building storage tanks for his crude and at the same time continues working on his No. 1 in the hope of getting production from it. His No. 3 will be under way in the near future.

Two other offsets to the well are S. S. Staley et al and Stanforth.

Farther west in the Voth field the results are less favorable. Cary and Norbury are now engaged in pulling pipe from their test about a half mile west of the producing pool. The dry hole seems an indication that the field does not extend that far west.

A mile south of the pool J. M. and W. O. Russell with Fred Larsen are pumping about 100 barrels daily from a shallow sand topped at 1125 and penetrated to 1143. It is on the TCU-Stark place. An offset will probably be drilled south on the Mrs. J. D. Linn place.

Coming back toward Muenster and slightly to the west Harry Couch began rigging up Tuesday for a test on Hesse's place.

Several miles farther south, on the J. T. Donald ranch Randall and Kell are drilling a 3,000 foot test for John A. Pace.

Northeast of Muenster development continues in the shallow Wiesman and Fisher pool. The No. 2 Perkins, brought in by Kingery this week is on a par with other wells of the pool, about 50 barrels.

MERCURY SOARS TO HIGHEST OF SEASON IN WEEK END WAVE

Muenster's hottest weather of the year came last Friday and Saturday driving the mercury in some places as high as 110. A quiet sweltering heat continued through Saturday night, relieved by only a few degrees, to make it the first really unpleasant night of the summer.

The heat's mark is very apparent in corn fields, where leaves, a deep green only two weeks ago, have turned to a scorched yellow. It is not however, considered as especially damaging to the crop.

With the last of the threshers back in the sheds, farmers are again looking forward to more rain. It is believed that a good shower would put the finishing touch on splendid feed and corn crops and at the same time prepare stubble fields for better plowing. At the present time plowing is tough, neither dry enough nor damp enough.

MUENSTER HOPE FOR LEGAL BEER BLASTED BY O'DANIEL'S VETO

Another hope for a solution of the local beer situation was blasted Tuesday when Governor W. Lee O'Daniel vetoed the bill proposing the creation of wet precincts in dry counties. It was one of the many bills submitted to the governor by the legislature before its adjournment.

By his action the governor blocked the only apparent chance of bringing lawful control to beer at Muenster. Previous attempts to vote the entire county wet have been consistently unsuccessful. As a result Muenster will probably continue in its old, unlawful practice, selling beer in spite of the law between the state's enforcement drives.

LONE STAR GAS SYSTEM FACILITIES SERVE THE HOMES AND INDUSTRIES OF 299 TOWNS AND CITIES IN TEXAS AND OKLAHOMA

L. B. DENNING, President
LONE STAR GAS SYSTEM

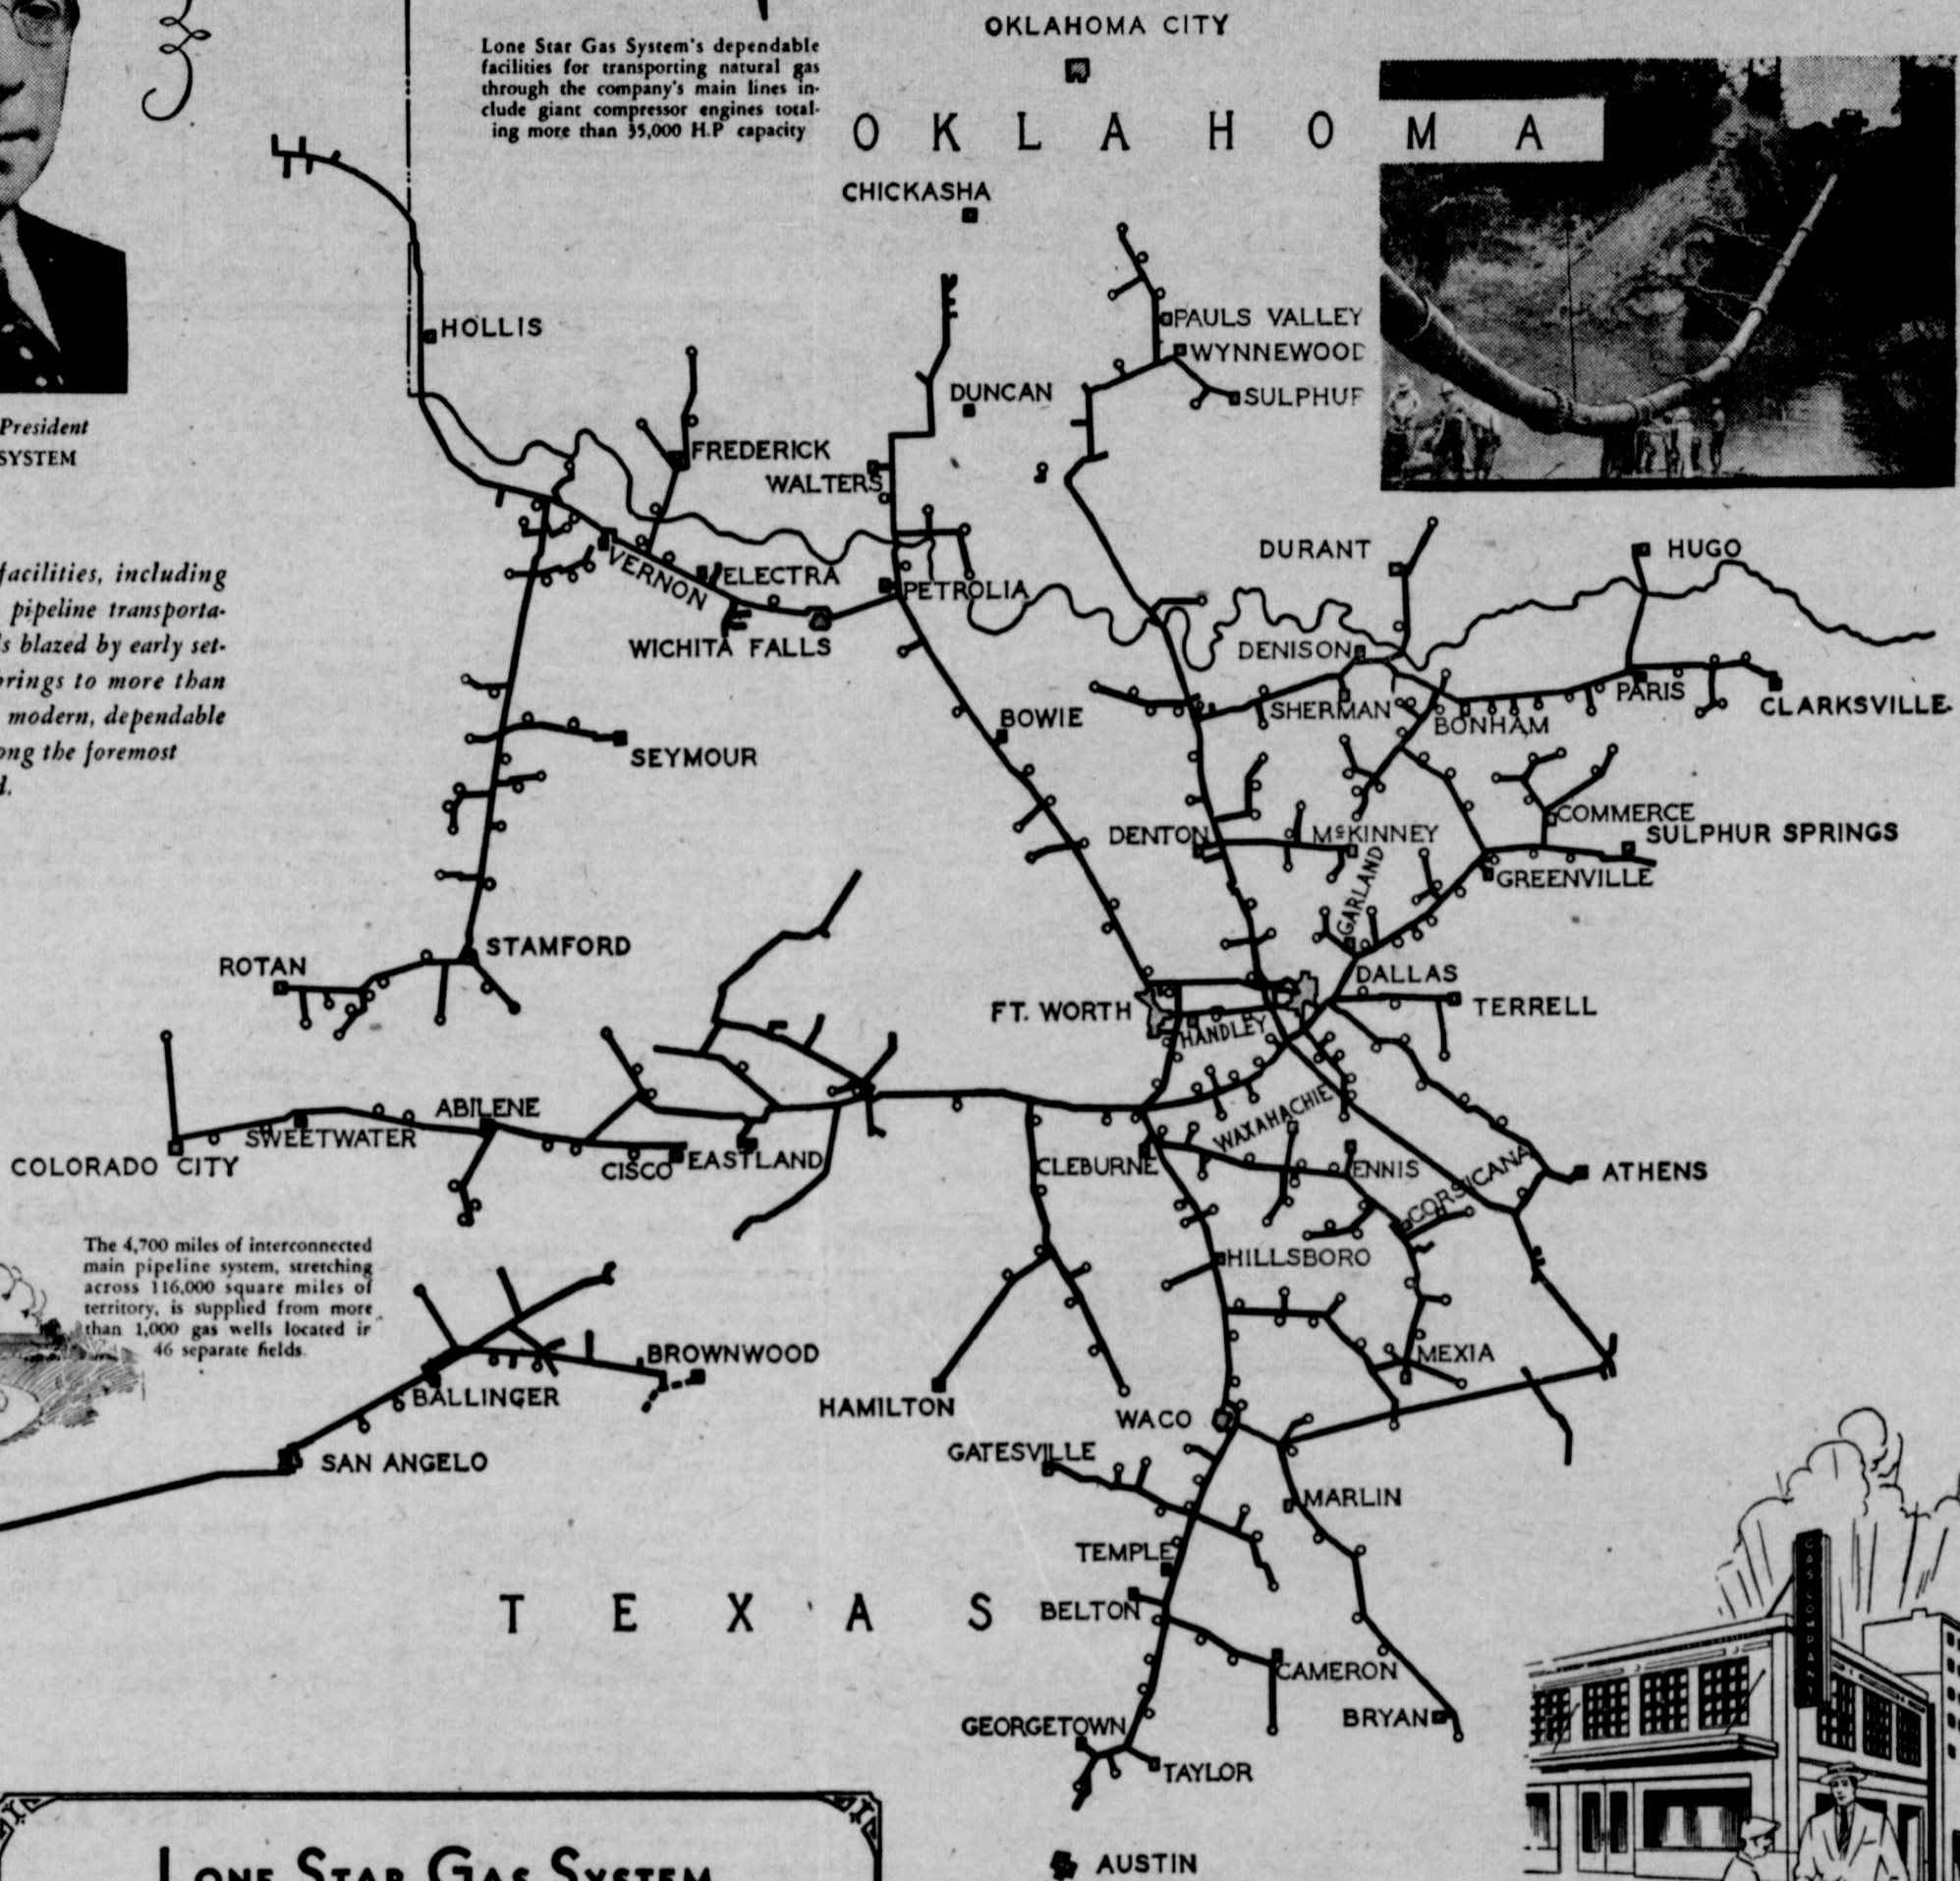

Today, through its modern facilities, including 4,700 miles of interconnected pipeline transportation system paralleling old trails blazed by early settlers, Lone Star Gas System brings to more than 300,000 homes and industries a modern, dependable fuel service that stands among the foremost in the world.

Lone Star Gas System's dependable facilities for transporting natural gas through the company's main lines include giant compressor engines totaling more than 35,000 H.P. capacity

The 4,700 miles of interconnected main pipeline system, stretching across 116,000 square miles of territory, is supplied from more than 1,000 gas wells located in 46 separate fields.

LONE STAR GAS SYSTEM

- ★ 4,700 MILES OF TRANSPORTATION PIPELINES
- ★ 1,000 GAS WELLS IN 46 SEPARATE GAS FIELDS
- ★ 3,000 TRAINED AND EXPERIENCED EMPLOYEES

AS we reach our thirtieth birthday, we are mindful of the responsibility that goes with our job. We renew our pledge to the policy that has guided us through the years—"First, find out what is the right thing to do... then, what is the right way to do it."

We know that homes must have heat and that many depend entirely upon our service. If we should fall down on the job there would be inconvenience, discomfort, suffering in

many homes. We realize that, even though our customers seldom think about it, they have confidence in our ability to render dependable service and rely on it being available instantly and without interruption day or night, throughout the years, regardless of the weather. We know it is the responsibility of each of us of Lone Star never to fail that trust.

L. B. Denning

30 YEARS AGO

In 1909 Lone Star Gas Company pioneered the development of natural gas in Texas. The first natural gas pipeline, 126 miles long, from Petrolia, Texas, to Fort Worth and Dallas, was an epochal event in Southwestern progress and indicative of a greater growth and development to come.

1939 FRIGIDAIRE with the METER-MISER

Quality! Convenience! Size! Net Cost! These are the yardsticks of refrigerator value! Consider all of them before you buy. Prove to your own satisfaction in our showroom or in your home that Frigidaire, in every way, offers the greatest refrigerator value money can buy!

A Small Down Payment ... Easy Terms
Buys any Frigidaire model

6 "COLD-WALL" MODELS
You don't have to cover foods! The new "Cold-Wall" Frigidaire keeps foods naturally moist and vitally fresh longer than ever before. Saves foods' vital juices from drying out, preserves flavor, color, nourishment days longer.
"Cold-Wall" 5-39. Lifetime Porcelain finish. Food Storage—5.1 cu. ft.; Ice Making—56 big cubes at one freezing. Price only \$21975
"Cold-Wall" 6-39. Food Storage—6.2 cu. ft.; Ice Making—84 big cubes at one freezing. In Durable Dulux finish, price only \$23475
In Lifetime Porcelain finish, \$249.50
"Cold-Wall" 8-39. Food Storage—8.2 cu. ft.; Ice Making—84 big cubes at one freezing. In Durable Dulux finish, price only \$28450
In Lifetime Porcelain finish, \$299.50
"Cold-Wall" Imperial. Lifetime Porcelain finish. Food Storage—12.5 cu. ft.; Ice Making—136 big cubes at one freezing. Price only \$46300

SUPER-VALUE 6
Full 6 cu. ft. size genuine Frigidaire at a new low price
Gives you the same simplest refrigerating mechanism... same world-famous Meter-Miser... same one-piece all-steel cabinet construction... same finest features of quality and performance as other Frigidaire models costing up to \$100 more!
Durable Dulux finish. Food Storage—6.0 cu. ft.; Ice Making—63 big cubes at one freezing. Price only \$15475

4 MASTER MODELS
A beautiful new line of Frigidaires, of highest quality, with dozens of convenience features ordinarily found only in higher-priced models.
Master 4-39. Durable Dulux finish. Food Storage—4.1 cu. ft.; Ice Making—32 big cubes at one freezing. Price only \$16450
Master 5-39. Durable Dulux finish. Food Storage—5.1 cu. ft.; Ice Making—56 big cubes at one freezing. Price only \$18450
Master 6-39. Durable Dulux finish. Food Storage—6.2 cu. ft.; Ice Making—84 big cubes at one freezing. Price only \$20975
Master 8-39. Durable Dulux finish. Food Storage—8.2 cu. ft.; Ice Making—84 big cubes at one freezing. Price only \$25700

4 SPECIAL MODELS
The Frigidaire "Special" gives you dozens of first-quality features for economy, long life, increased food protection, better ice service.
DA-3-39. Durable Dulux finish. Food Storage—3.1 cu. ft.; Ice Making—32 big cubes at one freezing. Price only \$12450
DA-4-39. Durable Dulux finish. Food Storage—4.1 cu. ft.; Ice Making—32 big cubes at one freezing. Price only \$14450
Special 5-39. Durable Dulux finish. Food Storage—5.1 cu. ft.; Ice Making—56 big cubes at one freezing. Price only \$16450
Special 6-39. Durable Dulux finish. Food Storage—6.2 cu. ft.; Ice Making—84 big cubes at one freezing. Price only \$18475

Meet the METER-MISER

Cuts Current Cost to the Bone!
...for it's the simplest Refrigerating Mechanism Ever Built... and when parts aren't there, they just can't use current or wear. Unseen, trouble-free, completely sealed in a permanent bath of oil. Comes with a 5-Year Protection Plan backed by General Motors.

Only Frigidaire has QUICKUBE TRAYS!

Imitated but never equalled—because they're 1. Easier to use—just lift one lever and cubes are free. 2. Built Sturdier. 3. Faster Freezing. 4. Better Looking. Compare—and you'll want only genuine Frigidaire Quickube Trays.

STOP ON A DIME

READ HOW THIS AMAZING NEW "LIFE-SAVER" TREAD GIVES YOU A DRY TRACK FOR QUICK STOPS ON WET, SLIPPERY ROADS

Like a battery of windshield wipers, the never-ending spiral bars of this new "Life-Saver" Tread sweep the water right and left, force it out through the deep drainage grooves—making a "dry" track for the rubber to grip. Come in and see the new Safety Silvertown with the Life-Saver Tread today.
