

The Odell Reporter

VOL. 7. NUMBER 24

ODELL, WILBARGER COUNTY, TEXAS, THURSDAY, JUNE 13, 1918.

ONE DOLLAR PER YEAR

EVERYONE MUST HELP.

Wars cannot be fought without money, and upon the Treasury centers every financial demand upon the Nation.

The rich of this country cannot alone meet the needs of the Nation; the men of the country cannot do it alone; the women of the country cannot do it alone; but all of us, the people of the United States, disregarding partizanship, forgetting selfish interests, thinking only of the supremacy of right and determining to vindicate the majesty of American ideals and secure the safety of America and civilization, can do the great and splendid work which God has called upon us to do.

W. G. McADOO,
Secretary of the Treasury.

Lowry Writes Homefolks on Mother's Day

The following letter was received last week by W. N. Lowry from his son Floyd Lowry, who is now driving a car for a Colonel in the army somewhere over in France. And since Floyd was the first Odell boy to enlist in the army and claims a number of friends in this section of the country who are interested in where he is at and what he is doing, we are reproducing a portion of the letter he has written his homefolks:

"Mother's Day"
Somewhere in France
May 12 1918

"Dear Father, Sister and Brother.—Today is the day for all soldiers to write home. I am not feeling very well, but I ma going to wriie just the same.

"Dad this certainly is a beautiful country. Everything has greened up and everyone over here doing their bit.

"Dad I certainly would like to see you all. It seems to me like I have been away from home 10 years.

"I am still driving for the same Colonel and getting plenty to eat.

"This is Sunday morning and the old church bells are ringing. It brings about many thoughts just to sit here and listen to them.

"I will sure be glad when the time comes for us to roll our picks and mount the old boats back home.

"Well I wish I could write longer letters, but I reckon its no use. Just as long as you know that I am well I would think that would be sufficient.

"Write to me often all of you and tell Marvin to write if he is able. Goodbye to all, as ever,
Floyd

Submits to Surgeon's Knife to Fit up for Army

Having made four attempts to get into the army and being told on two occasions by recruiting officers that he would have to submit to an operation before he would be fit for army service; Lawrence Starr, son of Mr. and Mrs. W. P. Starr of the city, consented to an operation Monday and as result of the surgeon's knife, it is now believed he will be ready for enlistment in about two weeks.

A short time after the United States entered the war, Lawrence made an effort to get in at the officers' training camp at Leon Springs. He later tried the Navy, the Marines and Quarter Master Corps, but the same physical defect was against him in each instance.

After a full recoverance from the operation, which was not of a serious nature, Lawrence will make another attempt to enlist in the Navy. The operation was performed Monday at his parents' home and he is reported to be getting along nicely.

Honor Mr. and Mrs. Scott

W. M. Scott and family were honored guests at a lunch that was prepared by a number of their friends in Odell and spread at Thompson Park late Tuesday evening. The family will leave this week for their new home at Burkburnett.

I. W. Boyd was in town Wednesday.

You Will be Asked to Pledge War Stamps June 28th

In pursuance to instructions issued by William G. McAdoo, Secretary of the Treasury Department, 1,800,000 Texas men and women will soon be officially summoned to attend the meetings to be held in their respective school districts June 28, where they will pledge President Wilson in war saving stamps.

Each person will receive the Federal summons through the the mails, it was announced by Louis Lipsitz, state director of the National War Savings Committee.

In addition to this notification the war proclamation, bearing the presidential summons, will be posted in all public places. Supplies of these are now being sent to all Sheriffs, postmasters and railroad employes, who are now reconized as Government workers, for posting.

The June war saving stamp pledge drive, which is being conducted by the National War Savings Committee under instructions from the Treasury Department, entails the printing of more than 6,000,000 pieces of literature and the holding of pledge meetings June 28 in 11,000 Texas school districts. On the night of June 28, every county chairman will be required by the Treasury Department to make a report to Mr Lipsitz of the amount pledged the President. The Treasury Department has also required a report from the State Director that night showing the action of each county, Mr. Lipsitz has pointed out.

Records at state headquarters show thta are now about twenty-five war savings banks in Texas. In these banks only war savings stamps are sold. The first bank of this kind to be put in operation in Texas was built at Lott. Fort Worth has a complete set of officers and directors for its bank.

No Contract Has Yet Been Let to Erect new Church

No contract has yet been let for the erection of the new Baptist church, however blue prints have been submitted and it is the opinion of members of the building committee that the contract will be let next week.

Twenty-four hundred dollars has been subscribed for the erection of the church, which is not far from the amount that will be requirsd to erect the building.

According to information given out by a member of the building committee, the committee have under consideration plans and specifications that call for a building similar to the Fargo Baptist church.

Mrs E. W. Moon and children are visiting Oscar Tate and wife at Rannlet, Oklahoma.

Call No. 21

We have lately installed a phone at our place of business and our number is 21. Call that number when in need of Groceries and many things in the Dry goods line.

Special Sermons to Children And Mothers Sunday

On account of being sick Sunday April 4th., which each year is usually reconized as Children's Day by the different churches; Rev. R. E. Lynn, pastor of the Methodist church announces that he will preach a special sermon to the children Sunday morning and that Sunday will be observed as Children's Day. A special program which will consist of some few reading, and songs by the Sunday school students is being prepared this week under the direction of Mrs. L. L. Boutwell.

Rev. Lynn announces that he will deliver a special sermon to the mothers Sunday night.

Ladies Aid Meets

The Ladies Aid Society met in call session at the Baptist church Monday evening, the meeting being called to elect a secretary-treasurer to take the place of Mrs. W. M. Scott, who vacates the office on leaving Odell. Mrs. J. M. Gibbins was elected to take her place.

In a way, the meeting was one of honor to Mrs. Scott whose service as a member of the Ladies Aid has been highly appreciated. A course of ice cream and cake was served at the meeting.

Will Grind Corn Saturday

Parties over the country who have corn for meal purposes are hereby notified that we will grind Saturday 15th.

S. B. Sutton

This Week a Busy One With Wilbarger Co. Farmers

This is a busy week with the farmers over the country. The big rain last week having give the ground a good soaking, makes it necessary for them to stay close to their fields in a fight against weeds. There is no excuse for anyone to be idle now, as reports are coming in almost every day from the farm for more help.

Crop prospects on many farms in this section of the county could hardly be better now. And the rain of last week will go a long ways toward assuring a good corn crop, with other kinds of feed stuff and cotton promising a good yield.

Since the Reporter was published last week something near two inches of more rain soaked the ground, the heaviest shower falling Friday morning.

Overhauling Gins

A crew of four men are at work this week at the Chickasha gin plant overhauling the machinery and get it ready for the fall run.

Another crew has been at work the last few days putting in a new boiler at S. B. Starr's gin.

Soldier Boys Visit at Home

Roy Hughes, Ted Key, Carl Wynn and Alford Turner, all Camp Bowie boys, visited homefolks this week. The first three have returned to the training camp, Alford Turner being given a more extended furlough.

T. J. Watson was in town Wednesday.

WHY RED CROSS ASKS HELP

Read This List of Part of Materials Needed by the Organization, and Then "Loosen Up."

Here are just a few of the articles of which the Red Cross must carry a stock in its stores: Foods, wearing apparel of all types and descriptions, beds and bedding for hospital and civilian uses, hospital supplies, surgical dressings, surgical instruments and drugs of every kind, splints, furniture, farming machinery, lumber, portable sawmills and mixers and rock crushers, gasoline tractors, cystoscopes, chloroform masks, scarifiers, nitrous oxide gas plants, building materials, every kind of tinware for use in canteens and hospitals, china and glassware, phonographs, games for indoors and outdoors, smoking materials, libraries, field kitchens, kitchen trailers; portable X-ray machines for use in the field, fully equipped in motorcars; portable disinfecting outfits for men and clothes, consisting of several rooms, where men coming from the trenches, covered with filth and vermin, enter and remove their clothes, which are passed through a sterilizer while the men proceed to another room and are bathed with disinfectants and showered, finally passing, thoroughly cleansed, to a room where their clothes are returned to them disinfected and dried. This particular piece of equipment alone costs 59,000 francs, and the Red Cross is installing them in the army camps and behind the trenches as fast as the need arises. —Elizabeth Frazer, in the Saturday Evening Post.

LAY IN SUPPLY OF OXYGEN

Substance Necessary in Human Body to Produce Explosions, Otherwise Muscular Power.

You are a whizzbang, a five-nine and a 420-howitzer shell all rolled into one—if you only knew it. You can explode more forcibly than the 200-pound, thin-shell aero bombs on moonlight nights. And the only thing that saves you from blowing yourself up every minute of your life is nature's provision for distributing the spark throughout your system.

Well, its like this: Dr. Ronald C. Macfie of Aberdeen, Scotland has discovered that every muscular movement is accomplished by an explosion. You are different from an airplane motor. In three essentials, component matter, design and the manner of exploding.

When an aero cylinder explodes, just so much gas is gone, not to be regenerated within the motor. But when you wield the hoe in your war garden, your muscles of the hand and arm are propelled by an explosion of part of their own substance. The burnt-up portion is automatically replaced by natural processes.

If you require a great deal of muscular power—if you explode a good deal, Dr. Macfie explains—you must eat starchy foods and take all the oxygen you can get.

In other words, "lay off" the meat, eat potatoes and go walking in the open air at night instead of going to the movies.

Luminous Paint Useful.

Many ingenious uses have been found of late for luminous paint. Watches with dials which glow in the darkness are becoming common, and only the other day an order was given for 100,000 marching compasses with luminous needles to be carried by soldiers at the front. Immense quantities of luminous cloth are used by the soldiers who go over the top. It is cut into small rectangles about ten inches long and fastened to the collars of the uniforms. The soldiers can thus recognize their own men in an indiscriminate fight in the dark. The luminous paint is also smeared on the end of sharpened sticks which, when stuck into the ground, make a fairly clear beacon. Luminous tape is also used by the mile for a variety of purposes. In this way the stretcher bearers mark the paths they are to follow. It has been found that on a dark night the luminous paint is visible for only 60 feet. A soldier can dip his hand in the paint and signal by describing letters in the air or by wigwagging, knowing that the enemy cannot see him a hundred feet away.

Euclid in British Army.

Another war hospital publication to hand is "With the Wounded," the organ of the Brondesbury Park military hospital, which also echoes those high spirits which seem the peculiar property of war hospitals. Its contents include "Euclid in the Army," from which we extract the following definitions:

"All regimental sergeant majors are equal to anything, but the side of any three sergeant majors, taken together, is less than that of any three brigadier generals 'taken at random.'"

"A major has the shortest temper between two meals."
We should like to see some more of these definitions.—London Globe.

The Right Spirit.

President John Grier Hibben of Princeton said the other day:

"It costs \$10,000 to make an airman, and no airman should be foolishly reckless, for his country can't afford to lose him.

"I like to think of the Princeton boy who was asked, when he went from his training camp to the front:

"Well, are you prepared to die for your country?"

"Not a bit of it," said the young airman. 'I'm prepared—and well prepared—to make about six Hunns daily die for theirs.'"

War Strain Causes Nerve Shock.

The term shell shock has misled many persons to believe that it is due to the profound impression or shock produced on the nervous system by the detonations of high explosives. No doubt, there are cases of actual brain or nerve injury due to concussion of the air accompanying shell explosions, but these mechanical causes are a great deal less frequently responsible for war neuroses than the mental effects of general war strain. It is remarkable that these war neuroses, common as they are among privates and officers alike, are seldom found in men who have been actually wounded. Perhaps this seeming anomaly is due to the actual wound shock offsetting the mental impression affecting the controlling nerve-center in such cases.—Popular Science Monthly.

Foch Keen Student of War.

General Foch, like General Joffre, is a home lover and avoids society. He is said to live in a small flat near his office, when not at the front, and to be devoted to his family. The conventions of society bore him. Like the proverbial Englishman, he is fond of taking long walks, and never knows when he is beaten. His saying that "the battle is never lost until its loss is admitted" is famous and indicates not only his military wisdom, but his sane and courageous philosophy. Already a master of strategy before the war, he has not been slow to learn the new lessons of the present conflict; rather, indeed, has he developed added initiative, decision and military audacity.

Gas Well Finally "Tamed."

Out in the sagebrush-covered wastes of eastern Washington there has just been tamed a big gas well, and development work on the property is now under way. The flow of gas was discovered three years ago, when a misguided settler drilled for water and had a four-inch pipe blown out of the ground. A year later a passerby threw a lighted match into the gas and for 18 months the well burned day and night, a beacon visible for miles around. A few months ago the old well was capped, the gas used to provide fuel for a modern drilling engine, and an 18-inch pipe has just been sunk into the gas reservoir.

Mat Restorer.

Rubber matting that has been in use for some time and is beginning to look the worse for wear may be restored to respectability by painting it with lead-colored paint. This gives a varnish surface that is not only oilproof, but is easily cleaned with a cloth.

"Coal Savers."

Various preparations are extensively advertised in this country at present which are presumed to contribute considerably to the heating power of coal when applied in the prescribed doses, writes Consul General Robert P. Skinner, London. The director of fuel research, in answer to an inquiry as to the value of these preparations, states that these proprietary substances have been in the market a long time, but that there does not appear to be any genuine scientific evidence in support of the claims of their manufacturers. He concludes: "The nature of the substances makes it highly improbable that they have any effect whatsoever on the combustion of coal or other fuels when they are used in the quantities prescribed."

Not One Came Down.

The day was dull, as days can be dull, sometimes only in the trenches. Suddenly, high up in the sky, sailing over the lines, was discerned a flock of wild geese. In a moment, rifles were blazing upward from all quarters; even machine guns were requisitioned, while away at the other side of No Man's Land the German, too, was roused to action. But the flock of geese sailed on, their long necks outstretched and their wings rising and falling in undisturbed rhythm. And never a one came down.—Christian Science Monitor.

Health About Gone

Many thousands of women suffering from womanly trouble, have been benefited by the use of Cardui, the woman's tonic, according to letters we receive, similar to this one from Mrs. Z. V. Spell, of Hayne, N. C. "I could not stand on my feet, and just suffered terribly," she says. "As my suffering was so great, and he had tried other remedies, Dr. — had us get Cardui. . . I began improving, and it cured me. I know, and my doctor knows, what Cardui did for me, for my nerves and health were about gone."

TAKE

CARDUI

The Woman's Tonic

She writes further: "I am in splendid health . . . can do my work. I feel I owe it to Cardui, for I was in dreadful condition." If you are nervous, run-down and weak, or suffer from headache, backache, etc., every month, try Cardui. Thousands of women praise this medicine for the good it has done them, and many physicians who have used Cardui successfully with their women patients, for years, endorse this medicine. Think what it means to be in splendid health, like Mrs. Spell. Give Cardui a trial.

CLARENCE E. GILMORE FOR RAILROAD COMMISSIONER

Clarence E. Gilmore, of Wills Point, Van Zandt County, announcing his candidacy for Railroad Commissioner of Texas at the Democratic primary, says he is entitled to be considered as a candidate for reelection. That the Supreme Court of Texas held in the injunction proceedings instituted by him that the name of his opponent had no lawful place on the ticket as the nominee of the Democratic party, the committee had no authority to make the nomination and that he had the lawful right to make the race as a Democrat unopposed by such unlawful conduct. He calls attention to the fact that the opinion of the Supreme Court was not rendered until Saturday before the general election on Tuesday and that in contempt of the injunction his opponent's name had been certified to the various counties as the Democratic nominee, the tickets printed and distributed. Since but two days intervened, only fifty-two counties corrected the error, giving the voters a legal ballot and in these he received nearly two votes to his opponent's one, carrying practically all of them. He says he is sure the Democracy of Texas will not stand for such unlawful conduct and such contempt for the constituted authorities.

Mr. Gilmore is forty-five years of age, born and reared on the farm, owned and edited the Wills Point Chronicle for eighteen years and for the last six years has been actively engaged in the practice of law. He served three terms in the Legislature, during which time he was chairman of the penitentiary investigating committee, which made a searching investigation of the penal institutions of the state and aided in the enactment of wholesome prison reforms.

His practical business experience, his untiring energy and thorough study and understanding of every problem he deals with, and his study of problems which confront the Railroad Commission, equip him, he says, for the duties of this position.

His home people, who have known him longest, vouch for him absolutely.

TAKES PLACE OF REAL EYE

Invention of French Oculist Invaluable to Soldiers Who Have Suffered Disfigurement.

The high velocities and high explosiveness of the present-day projectiles often result in facial wounds of most horrible appearance, in the repair of which the surgeons meet with extreme difficulties. In particular, soldiers return from the line of fire not merely with an eye shot out, but with the entire lid and eye socket destroyed, and the absence of these foundations has often made the insertion of an artificial eye impossible.

Until the present moment there has never existed any means for concealing this disfigurement and restoring to the unfortunate victim the appearance of a normal man possessing two eyes. But quite recently a French oculist, Henri Elnius, has made it possible to do this even when the eyelid is entirely missing.

In its essential features the apparatus consists of an artificial eye, equipped with a lid of any convenient plastic material—paraffin or molding paste, colored to match the subject's complexion. This eye is furnished also with lashes, to give to it to the fullest extent the appearance of a natural eye. It derives its support from fine metal wires attached to eyeglass or spectacles, so adjusted that when the latter is placed upon the nose, the artificial eye falls accurately into its cavity. The eye may easily be separated from these attachments for cleaning.

Art.

Here are quotations from some of the examination papers submitted by Indianapolis school children for credit in the art courses at the John Herron Art Institute:

"His way of working was very 'technique.'"

"There was a picture of St. Catherine receiving the crown from an 'angel.'"

"Michael Angelo has many paintings in the Renaissance, which is a building in France."

"The 'sargent' did the 'freeze' in a room in the Boston Library."

"Hoffman painted most of the Prima Donna. The most famous is the Sistine Madonna."

"One of the greatest painters of all times painted beautiful pictures on the ceiling of a church somewhere in the United States, and this great artist's name was Michael Angelo."

Heavy Demand for Rubber.

The world discarded 183,000 tons of automobile tires during 1916. Adding to this the large number of bicycle tires thrown away every year by their owners, it appears that the world spends every year at least \$600,000,000 for pneumatic tires alone. Nearly 5,000,000 automobiles are now in use in the United States. To supply these with tires nearly 88,000 tons of India rubber are needed every year, and the American automobile owners pay every year as much as \$200,000,000 for tires.

Don't Let The Bread Question Bother

Don't bother about substitutes for wheat flour. We have RICE FLOUR, CORN FLOUR, BUCKWHEAT FLOUR, and PANCAKE FLOUR and the latter in the large sizes. We shall keep a fresh supply of corn meal on hand.

About Sugar For Canning And Preserving

The sugar shortage is serious. This is due principally to transportation difficulties, nearly all available cars being needed by the Government for the transportation of war supplies, troops, etc. Since sugar must be conserved and since it is handled by jobbers on a STRICTLY CASH BASIS, we are forced to sell it for ABSOLUTELY SPOT CASH; that is, in all quantity lots above a dollar's worth and then only when it is used for canning and preserving purposes. Do your bit.

Thanking you for your liberal patronage, we are,

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatuleacy, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS
