ODELL, WILBARGER COUNTY, TEXAS, THURSDAY, MAY 27, 1915

ONE DOLLAR PER YEAR

School Days "Dear Old School Days" Are Now Closed

Public School Students With Teachers Enjoyed Picnic on Creek

After seven very pleasant and profitable months, our school closed on Friday May 22nd.

A large per cent of the pupils made their grades and passed into the higher grades for the coming year; which evidence shows that they worked diligently throughout the term, and that their efforts were crowned with success. Not success only for the time being, but for all time to come. Aside from the happiness and unspeakable joy of a well spent year and the consolation of knowing that they had begun and accomplished something, there will be throughout their lives, a thrill of pleasure as they look back and consider this one of their successful years in school.

And if their ambitions to do something, continues through life with them, when they are nearing the end, the same smile that illuminated their faces and filled their young hearts to overflowing with joy, as they flipped their report cards to see those words, "Promoted to Higher Grade," will spring up in their hearts a new fountain of pleasure, as they look back over a well spent life and have the consolation of feeling that the world is a little better by their having lived in it.

The pupils had learned that we had planned a big day for them on the last day of school, with a picnic on creek. In this as in many other things, they seemed determined not to be out done.

Accordingly on Thursday afternoon they began to ask permission to go to town in bunches and as a result they almost snowed us under with gifts and eatables of all descriptions. And as Abraham Lincoln said of the gifts from two very close friends "they mutually excelled each other."

Words are too meaningless for us to attempt to express our gratitude for those gifts. But again the pupils seemed determined that we should not be any happier in receiving them, than they were in giving.

The greater part of Friday forenoon was spent in singing and playing, as most of the pupils were either sad or happy to work.

Promptly at one o'clock we all started for the grove on the creek, which had been chosen for our picnic. Soon after reaching the spot, the cries and the whoops, from among the bushes and woods:

"Bushel of wheat,
And bushel of rye;
All that isn't hid,
Hollow, "I" "
announced that the fun had started.

Ice cream was served and a number of kodaks were made, which will after years, be a pleas-

ant reminder of those last happy hours we spent on the creek.

But how true it is, "Every Rose has its Thorns." There comes the sad parting, the class mates must part, chums must separate, some will go into other schools and new ones will take place. These chums may continue to staunch friends, but to be school chums again is hardly likely.

And again the teachers are torn away from pupils, with whom they have worked and whom they have learned to love, with a love that is excelled only by parental ties.

But let us hope that when these boys and girls of today become men and women of affairs of tomorrow, that we shall be permitted to clasp glad hands again.

R. C. Potteet

Will Teach at Pleasant Valley

While it was announced in last week's issue of the Reporter that the local school board had secured the service of Miss Irene Hazard as one of the teachers for the school next term. The position was only offered her by the trustees, which she declined to accept. In declining the position offered her at this place, Miss Irene did so to accept an offer as teacher in the Pleasant Valley district.

At a meeting of the school board Monday, Mrs. Eldridge wife of the principal of the school was elected by them to teach the grade in the school that was offered Miss Hazard.

Seed Prices Cut Way Down

We have orders to sell the Mebane Triumph seed we have at \$1.10 per bushel, the very same seed and bought from the very same man for which we have sold at \$1.75 for several years. Overstocked with seed and poor demand. The finest seed at the lowest price. The seed man takes his loss and you get the gain if you're quick.

WHITE & CRAIN.

Wanted—100 mules for war. Height 15 hands and 1 inch to 16 hands and 3 inch high. Age from 5 to twelve years.

Hail Storm Does Damage, Across River In Okla.

Crops Around Olustee Were Beat Into Ground--Business Houses Damaged

Olustee Okla., May 20.—Olustee was visited Thursday morning just at daylight by one of the worst storms in its history. Hail accompanied by violent winds and torrential rain, fell on the country around, and south of Olustee for several miles. Beating everything into the ground, ruining the wheat, oats and corn, beating the cotton into the ground, cutting the alfalfa to pieces, knocking almost all the fruit from the trees and breaking an immense amount of glass, estimated at \$1000 in Olustee alone. Trees are stripped of the leaves and the country like it has been mown. The storm did but little damage north of Olustee, but from Olustee south for some miles the damage is immense. We hear the storm extended from near Eldorado to some miles east of Salt Fork. The loss is immense, as all crops are almost a total loss in this territory. Wheat was looking so fine and now a hopeless loss. A few of the farmers had hail insurance on the wheat and oats but all else has to be done over.

Revival Closed

The Methodist revival closed last Sunday night after a three weeks session at the local church Evangelist York and his singer who were the principal workers, in the meetings, left Monday for points in Oklahoma, where they will after a short recuperation, conduct other revivals.

As a result of Rev. York's visit to our town, and the revival he assisted in conducting; there were some few additions made to both the Methodist and Baptist church and a few conversions who have not yet united with any church.

Evangelist York's home is at Eldorado Oklahoma, and Mr. Terry's home town is at Sentinel in the same state.

WEBB BROS.

Phone 33, Odell, Texas

Kicked By Horse

The three year old child of Mr and Mrs. D. M. West, came very near being killed last Friday evening when he was kicked by a loose horse.

Two work horses of Mr. West were standing in the pasture near the house and were not aware of the presence of the little fellow around them. He went up near the heels of one of them which kicked him in the side, inflicting a painful injury which was believed by parents at the time, to be an internal hurt. But young West has recovered from his misfortune and is able to be up and resume his playing.

Big Oil Tank

I. D. Crain, one of the business men of the town, now has workmen employed putting up a big storage tank on the rail road right-a-way. Mr. Crain is arranging to handle oil in car load lots and the big tank will be used for that purpose.

The tank has been on rail road platform here several days, but it was not until recently that a place could be gotten to station it

Attending Conference

N. B. Bucy, C. E. Foster, and Rev. O. B. Annis, local pastor of the M. E. church, left Tuesday of this week to attend District Conference of their church in session at Paducah.

Waiting For Rail Road Company to Send a Surveyor

Surveyor Has Been Notified to Come and Stake Off Elevator Site Here

The editor of the Reporter was informed this week by one of the business men of the town, who is interested in the elevator that will be built here by the Orient Milling Company of Chillicothe, that the Company had lately wired officials of the Orient railroad, to send their surveyor to Odell, to survey off a building site on the railroad right-a-way, upon which the elevator will be built.

While it was previously announced in the Reporter, that the Milling Company would probably get ready to build their elevator it June, it depends a great deal now on just how soon they can get the railroad surveyor here to locate the site.

Crop Prospects

This week has been a busy one with the farmers of this country. Most every one with whom we have talked, tells us he is behind with his work and has very little time to come to town. Most of them as a rule are pleased over crop prospects and see no reason why anyone just now would harbor a case of the blues.

People all agree that there has been less sand storms and sifting of the sand this spring than they have ever seen in this country and for this reason, only in a few instances have we heard of cotton having to be planted over and that on account of too much rain. Since so much wet weather has ceased, the cotton crop is putting on a healthy appearance and is beginning to show up fine.

Corn is beginning to grow and the wheat and oat crop on some farms seems at its best; garden truck is plentiful and the orchards of the country are going to be loaded with a big peach crop.

SUBSCRIPTION \$1.00 A YEAR.

On Monday the 31st. of this month the Commissioners court will consider bids for advertising the delinquent tax list of Wilbarger County for the years 1913 and 1914. We wonder if it is going to cost the County \$1300 again.

Last week's issue of the Crowell News reported a destructive hail storm visited that county during the week. Several fine fields of wheat were beat into the ground by the ice balls. One field of a hundred and fifty acres which was estimated to make 30 bushels per acre, was practically destroyed.

A new insect of green appearance has showed up in the wheat fields around Quanah and is attacking the headed grain. The insect drills into the grain of the wheat, and the wheat seems to shrink up and shatter out, the head turning yellow. Wheat raisers say it is not the Hessian fly. Several wheat fields in that locality have been infected and one man says his crop has been already damaged 15 per cent.

Fort Worth news papers are boosting the "Buy it in Texas" movement and have announced a convention to be held in the Panther City the 22nd. of next month. Its purpose will be to adopt resolutions urging every true hearted Texan, to buy every thing he needs that he possibly can in Texas. Since Odell is in Texas, if people around here are going to be effected by the resolutions of the "buy it in Texas" promoters, the Reporter wants them as far as they can to buy what they need in Odell.

The towns of Cristobal and Sonora have agreed to give bonuses amounting to \$315,000 to the Kansas City, Mexico & Orient upon completion of the branch line from San Angelo through Sonora to Christobal. It is said that this line will eventually be extended to Del Rio, 175 miles south from San Angelo. At Del Rio the road will connect with the Southern Pacific and ultimately with the National Lines of Mexico at Eagle Pass, a few miles east of Del Rio. The main line of the Orient now ends at Alpine, but has for its ultimate terminus Topolobampo on the Gulf of California, Mexico.

It is the duty of every man who calls himself a citizen of Odell to study the needs of our town and as far as he is able to work to its upbuilding. We all

KNOW THY COUNTRY

II—Railroads

In discussing the commercial achievements of this great age, we shall approach the subject as the historian chronicling events. This series will endeavor to record in writing the supremacy of American men and industries in the world's affairs and perpetuate an appreciation of our marvelous industrial achievements by presenting simple facts, figures and comparisons that are overpowering in their convictions.

America holds her proud place among the nations of the earth today on account of her supremacy in transportation facilities. The mighty minds of the age are engaged in the problems of transportation, and the greatest men in the history of the world's commerce are at the head of the transportation systems of the United States.

In the discussion of transportation, let us consider separately our Railways, Telegraph and Telephones, Express, Public Highways, Steamships, Street Railways, Interurban and other forms of transportation, and this article will deal with railways.

The United States has the largest mileage, the best service, the cheapest rates, pays labor the highest wages, and we have the most efficient management of the railways of the world. They stand as a monument to the native genius of our marvelous builders, and most of the railroads in foreign countries have been built under American orders.

The railroads represent a larger investment of capital than any other branch of human activity. The mileage in the United States exceeds

the accepted distance from the earth to the moon. We had in 1911, the last year in which figures for all countries are available, on the earth's surface, 639,981 miles of railway divided as follows: United States 241,199, Europe 207,432 and other countries 191,350. The United States has 38 per cent of the world's mileage, seven per cent of the estimated population and about five per cent of the area. The total capital invested in the railways of the world is \$50,000,000,000, divided as follows: United States \$13,000,000,000, Europe \$25,650,000,000 and other countries \$11,350,000,000. Reduced to a mileage basis the capitalization is as follows: The world \$78,000, United States \$54,000, Europe \$124,000, and other countries \$59,000.

A comparison of rates is equally as interesting and the United States takes the lead in economy and service. The average rate per ton per hundred mile haul is as follows: United States 76c, Great Britain \$2.53, France \$1.44, Germany \$1.44, Russia 92c, Austria-Hungary \$1.30, Italy \$2.30 and Switzerland \$2.82.

The average yearly pay of all railroad employes in the principal countries is as follows: United States \$757, Germany \$392, Italy \$345, Austria \$322, Great Britain \$279, France \$260 and Russia \$204.

About 30 per cent, or 188,000 miles, of the railways of the world are government owned. About half the railway mileage of Europe is government owned.

A comparison of the economy, in time and money and the convenience in travel, will be made in a later article.

know that there are very few things in this life that materially benefit us, ever come to us without some effort on our part and for this reason we should all work cooperatively to build a bigger and better Odell. There is no one here who wants to hear it said that Odell is a dead place or dying from lack of interest and failure on the people's part to reach out and take hold of the opportunities. Let's not sit around and trust to luck, for some of these times we are liable to wake up to the fact that we have already let what might have been lucky days for Odell pass. It is not a good idea either to stand and wait until opportunity knocks at the town door. Because opportunity is constantly rapping at every city door and the trouble usually lies in the fact that the people fail to open the door and let her in.

Community Pride

Community Pride is an asset, and it is one of the greatest of all assets.

The town that improves its streets, cleans up the alleys, paints the houses, cuts the grass, rakes the lawns and plants its flowers is not only encouraging cleanliness, but is making for itself a name among the peoples of the outer world.

Commercial travelers and others come, and look, and go away and talk—and the talk is all in favor of the town and its people. Talk travels, and grows, and multiplies until the town becomes known in many climes for its growth and progressiveness.

In time other men who are looking for a change of location hear of this town—and then they go, and look, and talk, and are pleased, and it becomes their

home. And the town continues to expand and progress, and as the years roll by it gradually assumes larger proportions and a more commanding and dominating position in the world.

When Community Pride comes in Prosperity enters by its side, and the two become the mighty levers that control the machinery of success.

Personal Pride and Community Pride should march side by side, for when these two potent factors join hands in a laudable purpose opposition quickly melts away. —Ex.

It Pays!

The codfish lays a million eggs
While the helpful hen lays one;
But the codfish does not cackle
To inform us what she's done
And so we scorn the codfish coy,
But the helpful hen we prize;
Which indicates to thoughtful men
It pays to advertise. —Ex.

Will Bradstreet and family of White City also Mrs. Floyd Richardson and little daughter, Edith took dinner with the former's father J. B. Bradstreet and family Sunday.

G. T. Daniels and family, J. P. Richardson and family, Frank Cullman and family also Joe Meek, Floyd Richardson, and son, and Grandpa Richardson took dinner at the Bolton and Hall home Sunday.

Some Marvelous Exhibits at the Panama-Pacific International Exposition

Exhibits in Agricultural Palace at the Panama-Pacific International Exposition Show Caterpillar Gaining Favor Over Lug-wheeler Tractors in Farm Machinery.

An observer in the Agriculture Palace at the Panama-Pacific International Exposition at San Francisco cannot help noticing, in the display of agricultural power machinery, the almost complete superseding of the new design of power tractor, known as the caterpillar, over the cumbersome, unstable, high-wheeled engine of a few years ago. There are few of the old models on exhibition, while the caterpillar principle has been applied to almost every type of engine for agricultural purposes.

The caterpillar proper is a heavy sheet metal chain, varying in width from ten inches to two feet according to the weight of the engine, which passes around two heavy sprocket wheels like a belt. These wheels revolving, pass the chain about them, the lower part moving backward, with the weight of the engine resting on the broad surface of the chain between the two sprockets.

An engine of this type can be operated on ground soft enough to mire an ordinary farm wagon.

Duplicate of the Roosevelt African Shotgun.

A duplicate of the shotgun which Col. Theodore Roosevelt took with him on his African trip, a gun constructed expressly for him by an American armorer, is on display at the manufac-

turer's exhibit in the Manufacturers' Palace at the Panama-Pacific International Exposition, San Francisco. The gun cost its illustrious owner \$360, and its beautiful design, graceful lines and wonderful inlay work would justify the expenditure to any lover of fine pieces. The stock is elaborately hand carved, the barrels and lock are hand engraved, and the lock is inlaid with a hunting scene in gold. The barrels are of the finest Krupp steel. Before starting on the trip the ex-president wrote to the makers: "I really think it is the most beautiful gun I have ever seen. I am almost ashamed to take it to Africa and subject it to the rough treatment it will receive."

The left barrel is choked and the right open. It is cored to shoot either buckshot or a single ball.

In a group in this Palace are displays by four of the world's greatest manufacturers of sporting arms, which form an exhibit which attracts hundreds of sportsmen. Each display is in charge of a firearms expert.

Pearl Culture a New Industry. Among the interesting exhibits of the Japanese in the Manufacturers' Palace at the Panama-Pacific International Exposition is a demonstration of the methods and results of pearl cultivation in the far East. The displays of this cultivated product, showing hundreds of pearls which until

pearl culture was placed on a commercial basis a few years ago would have been the possessions of royalty, will delight any lover of beautiful gems, and the methods of production will prove interesting to any observer. Though pearl culture has become a thriving industry in Japan, attempts to reproduce it in other parts of the world have yielded but meager results.

The successful method of propagation was evolved by the Japanese scientist Kokichi Mikimoto, who discovered a species of oyster which produced the pearl on the surface of the shell. Though the finding of the oysters and inserting the nuclei, then waiting for the pearl to grow to a commercial size may seem a simple process, the fact that it has not reduced the price of the gems, even to that of the most expensive imitations, shows that it is beset with many difficulties.

Mrs. Nora Cook and family of near Chillicothe were shopping in Odell Saturday and spent the night and day following with Mrs. Cook's sister Mrs. J. A. Spivy east of here.

Fay Dooley, daughter of Mr. and Mrs. R. T. Dooley happened to the misfortune to get her arm broken while playing with some children at a school picnic that was held on the creek near town.

J. P. Hamilton returned Saturday from Arlington where he went to be at the bedside of his brother who was reported to be seriously low. Mr. Hamilton said he left his brother considerably improved.

THE HIGH COST OF LIVING

has not affected our job printing prices. We're still doing commercial work of all kinds at prices satisfactory to you.

Ed Turner, one of the well known young men of the country, left Saturday for Trail Oklahoma where he will visit for a while before going to Woodard to work in the harvest fields.

C. E. Hart has our thanks for a renewal of his subscription.

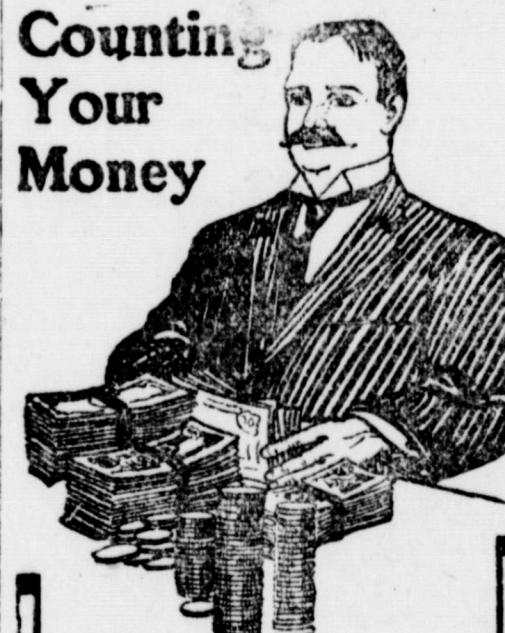

The Reporter acknowledges receipt of a check for one dollar from W. C. Plunk at Quail, for a renewal of his subscription.

The Reporter failed to mention last week that S. B. Sutton, one of the prominent ginmen of the town, returned during the week from Dallas driving a big automobile. His car is one of the prettiest in Odell.

G. W. Webb, one of the grocery men of the town, returned Saturday from Oklahoma City, where he went with his wife to be treated by physicians at that place. He says he left Mrs. Webb getting along nicely and that the Doctors at Oklahoma City were confident they could relieve Mrs. Webb of her trouble. She will be under treatment there for some time.
