FORMER PUTNAM BOY RECEIVES HONOR

The Texas Junior Bar Association convened in Fort Worth in their annual meeting last week and elected Alto B. Corvin, of Dallas, president and M. L. Cook, of Galveston, district vice-president.

Mr. Cook is a former Putnam boy, and is a son of Mr. and Mrs. John Cook of Putnam. He is now a practicing lawyer in Galveston. The next meeting of the association will be held at Waco.

SCRANTON P. T. A. HOLDS BUSINESS MEETING

The Scranton Parrot-Teacher Association held its second regular meeting Tuesday, November 13, at the central building. After a short program which included two excellent songs by a quartet composed of Mr. T. Blaylock, Mr. and Mrs. Moody Laminack and Mr. A. Gattis, the club went into business meeting. In business meeting it was reported that the fund for painting had reached a gratifying total considering the fact that the fund has been in existence only two weeks.

NOTICE

Due to some of our news matter getting lost in the mail this week we are having to go to press without a number of news articles. We regret that this happened, but it is unavoidable and hope our readers and contributors will bear with us this week.

We urge you to bring your news in as early as possible so that it can be avoided in the future.

GOD'S PROCLAMATION TO HIS PEOPLE

(By C. C. Andrews, Baird, Texas)
"If I shut up heaven that there be no rain, or if I command the locusts to devour the land, or if I send pestilence among my people."

"If my people, which are called by my name, shall humble themselves, and pray, and seek my face, and turn from their wicked ways; THEN will I hear from heaven, and will forgive their sin, and will heal their land."—2nd Chron. 7th Chap., 13-14.

The Same Proclamation Extended, and is Effective in the New Testament.
" whatsoever things were written afore time were written for our learning (warning)."

Paul in 16th Chap. of Romans.
"Now these things (blessings and judgments) were our examples to the intent we should not lust after evil things, as they also lusted."

"And all the things happened unto them for ensamples, and they are written for our admonition upon whom the ends of the world are come." Paul in 1st Cor., 12th Chap. 2.

One of the outstanding attributes of God is, that He has never brought a judgment on his people, that He did not first warn them, and then manifested another attribute, namely, long suffering before he inflicted the punishment. Yet, finally, if his people did not return to him the punishment came.

All of the sorrows, heart aches, and punishments that befall his people of old, was because of their sins.

And so it is today, for we are told that "the things that happened to His people of old were written for our learning (warning), example and admonition."

God created this world and the things that are therein, for his people to possess and enjoy its blessings, on this condition: that "they fear Him, and keep His commandments. But the people sinned, and rejected "the council of God against themselves," and went in their own way, attempting to leave God out.

So God can do nothing else and be in harmony with Himself, but to withhold the promised blessings, and send curses for their disobedience.

Now let us read a few of the many things written to His people of Old Testament times, how He warned them, how he promised blessings and prosperity, when they were obedient to Him.

On the other hand how he would send curses, and withhold blessings when they were disobedient to Him.
Another attribute of God I am happy to mention that ought to appeal to our better judgment and wisdom is:

God is always willing and ready to forgive, and withdraw the judgment, and remove the curse, when his people return unto him with their whole heart.

For he so requires in the proclamation. Notice what he says "Humble yourselves," "pray," "seek his face" and turn from their wicked ways."
THEN, when these conditions maintain, "he will forgive and heal the land."

To be continued next week

Texan Speaks In New York

Peter Molyneux, editor of the Texas Weekly and widely known economist, told the Academy of Political Science in New York Nov. 19th that international cooperation is the only safeguard of peace. Mr. Molyneux (above) shared the subject, "The Outlook for World Peace," with Newton D. Baker at a banquet presided over by Owen D. Young.

DOGGETT GOT NINETY-NINE YEAR SENTENCE

In the case of the State of Texas against Clifford Doggett, charged with robbery with firearms at Baird last week, Mr. Doggett was given 99 years in the penitentiary for participation in robbery with firearms which resulted in the death of L. F. Threat of near Putnam.

A murder charge against Doggett will be called in court at Eastland Tuesday morning, the case being the same, investigation of the death of L. F. Threat.

Several Putnam citizens attended the trial at Baird. Among them were W. F. Short and Gus Brandon.

BAXTER STARS IN THRILLING FOX PICTURE

Described as a thrilling and spectacular story of desperate war in the air, the newest Fox film starring vehicle for Warner Baxter opens Sunday at the Plaza Theatre, Baird.

"Hell in the Heavens" is the title of the new film, and it is said to offer one of the most absorbing and romantic war dramas yet produced in Hollywood. It tells a story of daring men—not afraid of death but afraid of fear; desperate for life, yet each day braving destruction in the skies.

Preview audiences in Hollywood have voted "Hell in the Heavens" the most powerful picture Warner Baxter has had in seasons, and all advance reports indicate that it is film of unusual dramatic quality.

COMMUNITY HEALTH DEPARTMENT NEEDED

AUSTIN, Texas.—"What the average community needs is a well organized health department which emphasizes five types of activities," says the American Public Health Association. These activities are: (1) The safeguarding of child health and motherhood; (2) the control of contagion; (3) accurate recording of births and deaths; (4) support of public health laboratories; and (5) sanitary control of diseases spread from human waste and by vermin and insects.

The Texas State Department of Health provides that due emphasis be given to each of the above mentioned activities. To illustrate how these 5 essential functions are interrelated the interest of the various bureaus in the new born baby, pre-school and school child may be cited as an example. Child health is safeguarded by providing information and instruction of the mother. Through the Bureau of Vital Statistics, complete and accurate birth registration is kept as well as records indicating deaths which occur among children from preventable diseases.

Contagion is prevented or controlled against further spread through the encouragement of immunization early in life, through the prompt reporting of infectious disease. Public health laboratories and sanitary engineers provide additional bulwarks of protection about child life.

Adequate health organization an wholehearted support on the part of various state and local agencies are essential if these activities are to be successfully maintained.

BAPTISTS TO SPONSOR COMMUNITY XMAS TREE

The First Baptist Church here will sponsor a community Christmas tree this year. A special program and other arrangements will be completed. The committee for this purpose is composed of Misses. Fred Golsen, Jack Brandon, and Loren Everett. Everyone is invited to take part.

SCRANTON NOTES

Our people are rejoicing over good rains that have furnished stock water and put the ground in fine shape for breaking.

Rev. G. G. Smith, former pastor of the Methodist church, has moved to De Leon, where he has a charge for the new year, and Rev. R. T. Wallace of De Leon has come here to take charge of the pastorate and preached his first sermon Sunday at 11:00 a. m. We welcome this new family to our midst and hope their stay will be pleasant and profitable both to them and the people of Scranton.

Mrs. Gus Worsham and two daughters, of C. H., and Mrs. Shultz of Lubbock, are visiting friends and relatives here. Mr. and Mrs. Worsham lived here for many years, and made many friends who are always glad to meet with them again.

Mrs. Roy Battle, who is teaching in the public schools of Pioneer, spent the week-end with her husband, who is farming here.

Mrs. Geo. Morgan had her sisters, Misses Ruby and Opal Hillings of Atwell, spend several days with her the past week.

B. T. Leveredge and Raymond Sprawls were business visitors in Cisco Saturday. Other Scranton people seen on the streets of Cisco Saturday were Ray Battle, P. M. Ray and Woodson Sawyer.

Mr. and Mrs. J. D. Sprawls, Mrs. M. B. Sprawls, Mrs. E. W. Faires and Orval Reese attended the Workers' Conference of Callahan Association at Potosi Tuesday.

Mr. B. F. Davidson of Abilene was here the first of the week visiting friends and looking after business interests.

Pete Baliew had the misfortune to receive a gash on his head while practicing ball at school Tuesday, which required several stitches from a doctor in treatment.

Miss Opal Gattis received injury to her teeth in a matched ball game with Morton Valley Wednesday.

Arthur Baile, Noel Black, W. E. Faires and Bill Faires were Abilene visitors Tuesday.

Mr. and Mrs. Tom Haislip of Stanton are visiting home folks.

Orval Reese, teacher of the Young Peoples' Sunday school class at the Baptist church, gave his class a party Friday night. Cake and chocolate were served.

Miss Elizabeth Jobe, home economics teacher, spent the week-end with her sister, Miss Margaret, who is attending school at W. C. Fort Worth.

Mr. and Mrs. Jno. Cook of Putnam were the guests of Mr. and Mrs. W. C. Faires Sunday.

Absent-Minded?

Landlady: "A professor formerly occupied this room, sir. He invented an explosive."

New Roomer: "Ah, I suppose those spots on the ceiling are the explosive." Landlady: "No, they're the professor."

Heads National League

NEW YORK . . . Ford Frick (above), who gave up his newspaper job a year ago to become publicity director for the National Baseball League, is today its new president. He was elected to succeed John A. Heydler, resigned, but to stay at Chairman of the Board.

FINE RAINS THIS WEEK WELCOMED BY EVERYONE

Our first experience with a real rain in many months came this week. All the rains have been slow and the thirsty earth soaked up the major portion of it. Rains started Monday and came again Tuesday and Wednesday. More than an inch has fallen. The moisture is bringing wheat and oats, as well as turnips up.

Stock tanks caught enough water to tide the farmers and ranchers over a few weeks.

A wet norther bore down upon this community Wednesday afternoon and rain continued until in the night.

ALONG THE SCOUT TRAIL

By P. L. Butler.
Boy Scouts of Troop No. 17 of Putnam were reorganized June 9, 1930. Records show that for 1930 the troop committee was J. W. Norred (deceased), chairman, J. W. Hale and F. P. Shackelford. Rev. Cecil Fox, former pastor of the Methodist church here, was Scoutmaster and P. L. Butler assistant Scoutmaster. The troop has been active ever since and it has won two awards given by President Hoover for the year 1932, and by the present President, Franklin D. Roosevelt for the year 1933. At a special banquet for the Scouters of the Chisholm Trail Council at Abilene in the Hilton Hotel the troop received the honor of being next to the best troop in the council, but now the tide has changed.

Most of the boys including the Scoutmaster have lost interest in Scouting and are on the verge of quitting the game. Scouting is a grand thing for boys who try to live up to the teachings of the Scout Oath and Law, but I am sorry to say that there isn't many in the troop now who do it, and that alone is why the Scoutmaster has tried to quit.

The Troop and officials said they would not let me resign. I have done my best to keep the boys interested, but I realize that my efforts have been in vain, and after this year someone else will take my place, or else there will not be a Scout Troop in Putnam during the year 1935. On December 31 Taps will be sung the last time by the Troop, under the leadership of the present Scoutmaster.

SECOND RENTAL CHECKS BRING NICE SUM

(ROSS B. JENKINS, County Agent)

The second payment on reduction program were received for more than 550 contract signers this week. The parity payment has been accepted but something has held up the delivery for a time yet.

The Associated Press gave out some of the benefits that the farmers of Callahan had derived this week up to October 1st, which shows that the farmers have drawn more than a quarter of a million dollars for having cooperated with the government in its drive to reduce the burdensome surplus. Cotton as now received \$177,000, corn-hog (first payment) \$5,000, wheat (spring payments) \$5,800, and cattle \$114,000. Mr. A. L. Cook, assistant in cotton adjustment, announces that more than 425,000 pounds of certificates will have been pooled by the week-end. This will net the farmers around \$17,000. In all it gives this county above the returns from their actual crops, about \$319,400. All this volume of service has passed through the offices of the county agent this year. There has been some \$8,000 spent by the agent for labor in the office which went to the farm committees who have worked to make this program a success.

Certificates Must Be Pooled by Saturday Night

All persons who wish to put their surplus certificates in the National Pool to be sold by the Government to farmers who have made more than their allotment, must pool them with Mr. A. L. Cook by Saturday night. That is the latest date any may be accepted for pooling. These certificates will bring 4 cents per pound when sold by the pool manager. About \$1 per bale will pay the cost of handling.

Peanut Program Announced

Secretary Wallace definitely announced that the Peanut adjustment program was in the making and would be ready for the sign-up probably in the earlier part of December. The contract approved by the Secretary requires that acreage planted to peanuts in 1935 be not in excess of one of the following bases, as chosen by the producer signing the contract:

(a) 97 percent of the acreage planted in 1933.

(b) 90 percent of the acreage planted in 1934.

(c) The average acreage planted in 1933 and 1934.

Payments to producers for acreage adjustment in 1935 will be measured by the quantity of peanuts harvested in 1934 at the rate of \$8 per ton, provided, however, that the amount of this benefit payment shall not be less than \$2 an acre of the allotted peanut acreage on a farm covered by a contract. This provision for payment on an acreage basis is designed to protect producers with below-normal yields this year.

The benefit payment will be made on the entire 1934 harvest crop of contract signers, regardless of the use to which the peanuts are put.

Extra Bale Certificates Received

More than 398,000 pounds of Tax Exemption Certificates were received this week for producers who had 1-3 or more below normal yield shown on their contract. Some time back the county agent was advised that those farmers who had lower yields because of drought, insects, hail, etc., would be given additional certificates upon recommendation of such by the agent. Many farmers had never asked for any adjustment so the agent with the help of the county board, composed of V. F. Jones, Aaron McKee, and Evan J. Barton took every contract and if it was thought there was a chance to get any more for it, the recommendation was made and signed by the agent. Thus many men are receiving certificates as a complete surprise to them. At 4 cents per pound this will net the farmers more than \$16,000 or as one man stated, is more than the county will spend on salaries for both agents for the next 10 years.

RELIEF CLIENTS MUST SUPPRESS BOOZE APPETITE

Drinking and gambling relief clients stood shackled today by a new regulation designed to protect their families from want caused by their own extravagance.

State Relief Director Adam R. Johnson decreed that hereafter such family heads will be paid only in kind, commodities doled out in payment for work. Frequent arrests of a client will automatically place him under these restrictions.

If such a client steadfastly refuses to work when not paid in cash, County Administrators will prefer charges of vagrancy against him.

FROM THE EDITOR'S WINDOW

A New Dealer

On last Saturday morning Jimmy Rawson's pet goat got away and come to town and there was considerable fun and amusement for awhile as the goat was scampering all over town going into all business houses and finally into Fred Cook's Garage where he decided the door was too small and smashed through a plate glass. After some discussion it was finally decided that he was a new dealer and Mr. Cook considered himself the goat as it would cost him about \$10.00 to replace the glass.

We appreciated the congratulations we received from Patsie, Baird Star correspondent from the Eula Community. We have never met Patsie but we have heard our father speak of him so often that we feel we are acquainted with him.

We appreciated a little congratulation from W. Homer Shanks, one of our advertisers, this week. Notice his new ad in this week's paper.

10 MILLIONTH CHEVROLET

DETROIT. — The 10,000,000th Chevrolet car came off the assembly line at Flint, Mich., Nov. 13, as Chevrolet workers all over the United States joined in a celebration marking the 23rd anniversary of the founding of the Chevrolet Motor Company.

Ceremonies were held at each of the nine Chevrolet assembly plants throughout the country, at which officials were hosts to civic leaders and persons prominent in state and local government.

The building of the 10,000,000th Chevrolet was observed with ceremonies participated in by M. E. Coyle, president and general manager of the company, and the principal members of its staff.

Car Presented to City
The 10,000,000th Chevrolet was presented to the police department of the City of Flint, and officially accepted by Mayor Howard Clifford and Chief of Police James V. Willis.

Miss Elois Norred of Hardin and Simmons University spent the week-end in the home of her mother, Mrs. W. H. Norred.

THANKSGIVING AT HOWARD PAYNE

By Lois Mercer

Here and there will be many Thanksgiving homecomings, many celebrations and various gala events, but perhaps one of the most celebrated events taking place anywhere will be held at Howard Payne College, Brownwood, Texas, where a number of our young people are going to school.

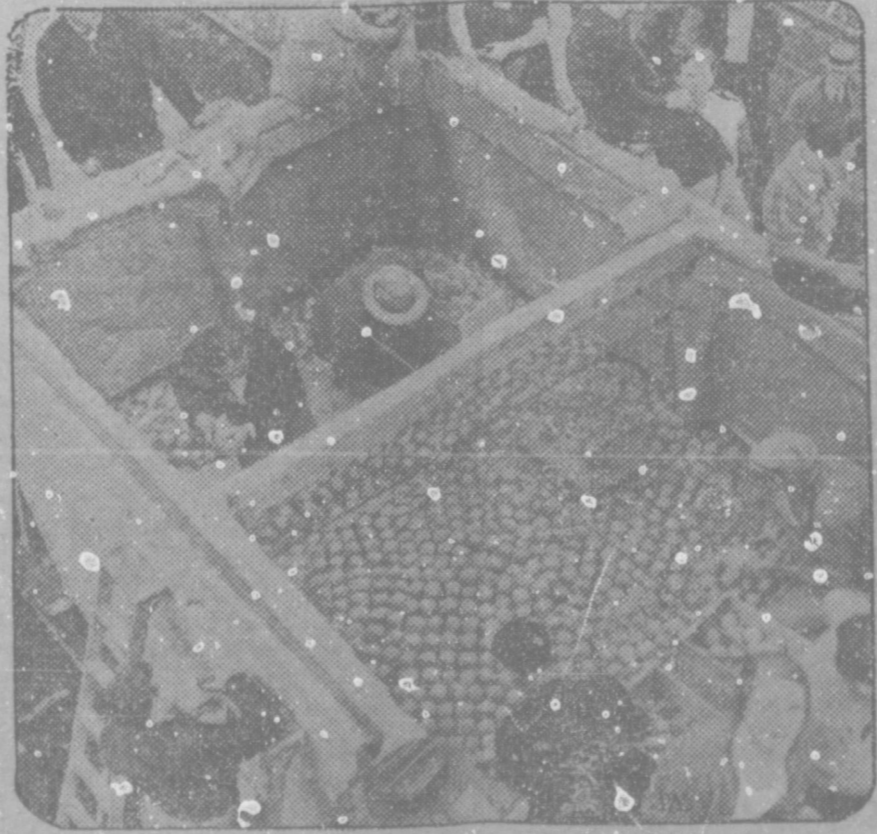

A spirit of Thanksgiving and an atmosphere of appreciation will be present on the Howard Payne campus on this one Thanksgiving day. Ex-students will return to join in the celebration in honor of those two noble persons, Mr. and Mrs. John G. Hardin, who have made it possible for their Alma Mater to write a debt free charter. All who attend Howard Payne, all faculty members, and all who are interested in the progress of this college have a legal right to be fervently in earnest when breathing a prayer of thanks for the noble deed of Mr. and Mrs. Hardin. By their donation of \$100,000 to Howard Payne, it can loom above the intellectual horizon as one of the best schools in Texas and can face every debtor fairly and squarely with a clean slate. Surely, the heart of every Howard Payne student should swell with pride when he thinks of this endowment.

The name of Howard Payne will remain the same in a respect but in the words of Thomas H. Taylor, president of this college: "The Hardins have changed the name of our college inasmuch as they have taken the 'Pain from Howard Payne'."

Every student who loves and honors the Blue and Gold of Howard Payne College will pay tribute on this coming Thanksgiving Day to those two who made it possible for that student to be enrolled in a debt free school; to that noble man and woman who by this gracious gift have won the heart of every student enrolled in Howard Payne and who have made it possible for many students to remain such, thus enabling them to reach a higher peak of learning.

When the sun sets on this Thanksgiving Day, perhaps the air will be filled with the memory of its having been one of the most eventful and complete days in the history of Howard Payne College.

Largest Box of Apples Is Shipped East

SEATTLE . . . The largest box of apples ever shipped is now enroute to Detroit. It contains 75,650 winnipeg apples, a choice crop grown at Yakima, Wash. The box was loaded on a flat car and slid to the highest bidder, a Detroit buyer.

Cards of Thanks, Resolutions of Respect, and any kind of entertainments where admission fee or other monetary consideration is charged, will be charged for at regular advertisement rates.

THE VOTE ON THE BANKHEAD

There seems to be some confusion in regard to who will be eligible to vote in regard to the Bankhead Law election which is to be held the first week in December, as some are saying that it will require a poll tax receipt before a person will be allowed a vote. This is an error and the election will be held by the same officials that have been handling the work and will read: For or Against the Bankhead Control Law and every person that is a producer of cotton be entitled to vote and everyone should attend these elections and do not leave the work for John as there has been too much left that way already that has gotten us into the predicament we are in at the present.

THE COTTON SITUATION

The cotton market has been a very tame affair for some time as the trade is waiting on the result of the vote on the Bankhead Law and to see just what Congress and Mr. Wallace have in store for the crop year of 1935. There has only been a few points change in the price of cotton in the last 30 days running from about 11.90 to about 12.35 for high on December cotton. It is being talked by people who favor this law that the market will decline if the law is defeated and there is every reason to believe that it will as it gives the speculator a chance to put the market lower just as the passing of the act gave the speculators a chance to advance it in 1933 but the Bankhead Law and the Farm Adjustment Act are just the old Farm Board over again as the Democratic Party was pledged in their platform to discontinue the farm board and they did but gave us the Farm Adjustment Act which is many times worse than

RINGLETS

RINGLETS are all the rage. And though they may be difficult for you to do the first time by yourself, it is much simpler by one of our trained operators. Come in and see.

Also I have a scholarship to Hardin & Simmons University, Abilene, Texas, which I will sell in the same manner.

MILDRED YEAGER
Putnam News Office
Putnam, Texas

"Another Victim of The Snatch Racket" — by A. B. Chapin

the old Farm Board. It will be remembered that the Farm Board started loaning money and was going to peg the price of cotton at 18 cents and made the loan 16 cents and they stayed 200 points under the market all the time, just as Mr. Wallace has done in the case placing the loan value at 12 cents when the price of cotton at that time was about 13 1-2 cents. It was pointed out at that time by cotton people who keep up with the situation that the price of cotton would go down. We will leave it to you as to whether the market has declined or not. The Democratic Party also declared for a lowering of the Hawley Siroot Tariff Law that was enacted by the Republican Administration but as far as we know there was no attempt at lowering the tariff around the United States increasing our foreign trade, but the politicians decided that there must be something done to satisfy the American farmer so without considering the effect it would have on foreign trade in order to save themselves they gave us the Farm Adjustment Act and the Bankhead Law controlling production. If you will see Hester's statement on cotton last week you will see that our exports have fallen off by 45 per cent. The American crop was reduced this year by about 3,000,000 bales while the foreign crop has been increased by about the same amount. When the American farmer produces a bale of cotton there must be someone to buy it and our foreign trade has been taking about 60 per cent of our production against about 40 per cent for domestic mills. After reducing our crop by 3,000,000 bales it looks like now we would lose 3,365,000 bales sales to foreign countries or in other words that the carryover of American cotton would be greater than it was this year. There are certain people going over the country telling the farmer that this plan is only temporary and will not hurt the export trade. When some propagandist comes along dishing out this propaganda ask them why foreign countries have only taken one half as much American cotton as they did last season, and watch them squirm and twist for an answer. The Domestic Allotment Plan will be discussed next week.

THE BOOK
... the first line of which reads, "The Holy Bible,"
and which contains Four Great Treasures
BRUCE BARTON
AN OLD MAN SETS OUT

Paul left Ephesus after the riot, but not to return to Jerusalem; he was going across into Europe again. We may imagine the conversation that took place, for we get a wonderful glimpse into his mind in the letters to the Corinthians.

"You are going over the same ground again, Paul?"

"Yes, but every time widening the circle. This is my third time out, and each time I make a little larger swing, and see the work growing."

"When do you get back to Jerusalem?"

"Next spring at Easter. I am going to take back the biggest collection that the Jerusalem church ever received."

"Are you going to stay there?"

"Stay there? Do you think I could ever be content to settle down and stay in Jerusalem?"

"But you are getting to be an old man, and travel is hard on you and dangerous."

"Yes, I have been in dangers of many kinds. It has been my privilege to travel farther than any of the other apostles.

In labours more abundant, in stripes above measure, in prisons more frequent, in death oft.

Of the Jews five times received a forty stripes save one.

Thrice was I beaten with rods, once was I stoned, thrice I suffered shipwreck, a night and a day I have been in the deep;

In journeyings often, in perils or robbers, in perils of mine own countrymen, in perils by the heathen, in perils in the city, in perils in the wilderness, in perils in the sea, in perils among false brethren;

In weariness and painfulness, in watching often, in hunger and thirst, in fastings often, in cold and nakedness."

"That is a long list of perils Paul. It must nearly have broken you down."

"I have still a heavier burden, my anxiety for all the churches I have established."

"Do you carry them on your mind and feel responsible for them?"

"Who is weak and I am not weak? Who is caused to stumble and I burn not?"

"You have done a great work and have much to be proud of."

"I am proud of it, and have been criticized as being vain about it. I have sometimes been ashamed of myself for letting people know my pride and joy in all this. Yet, while I have sometimes made myself a fool by seeming to boast, I really am not boastful. God forbid that I should glory, save in the cross of Christ and in the joy of service."

"When you go out again where shall you go?"

"Back again over the same ground, but more widely, to all the Roman sub-capitals in Asia Minor and Greece, and then to Rome."

Next Week: Paul in Irons.

Reverend G. C. Williams of Clarendon has been assigned the Putnam Methodist church here for next year. He and his wife and their three children will move to Putnam this week.

Baseball's New Deal

NEW YORK ... ABOVE is Joe Cronin who goes to the Boston American Red Sox as playing manager in one of baseball's biggest deals. Boston is reported to have paid \$150,000 for his release from Washington, the highest cash price ever paid for a player. The deal had Cronin's okay as he was offered a 5 year contract as player-manager at \$25,000 per year. ... BELOW is baseball's greatest, Babe Ruth, now in the open market for a job as manager, with pen all poised to sign on the dotted line. ... Boston Nationals, and the Philadelphia Americans are reported in the market for him.

NEW TAXES

The Board of Control has issued a statement that they will not ask for any new appropriations in the way of additional expenses or the return of salaries that were reduced by the 43rd Legislature. This will be good news to the tax-payers over the state as the board of control makes a budget before the convening of the Legislature in January and submits it to the Legislature for all expenses of the biennium but we can't tell what some legislator may undertake to put over and if he gets it over it may make the appropriation bill large enough to require additional taxes to take care of it. Senator Hopkins of Gonzalez thinks there is no need of any new taxes but with proper economy the expense of the government can be carried on at the present tax rate. There is a movement on foot already by a number of people who are trying to restore salaries of all Texas employees back to what they were when the 43rd Legislature reduced them, but if the present employees are not satisfied with their salaries let them get another job and we can fill vacancies from Callahan County with just as competent men at reduced salaries from what they are getting at present.

There is some talk of raising the gasoline tax another cent per gallon and the people will begin to protest and organize at once against any raise as the people have more tax to pay now than they can pay. There are many who are working on relief work and other works and having to furnish their own gasoline to go and return which would work a hardship and would be a tragedy on justice at this time. You will hear it argued, let the people who use the road pay the tax, but the people who are using the roads most are people who are employed by the big corporations and have an expense account and this expense account is charged to the price on goods made to the consumer; while the man who works at common labor jobs and pays this tax has it taken out of his meager wages and it would be an injustice at this time as it would only put more people on relief.

Going On 102 Years

JACKSONVILLE, Fla. ... One of Florida's respected citizens celebrated his 101st birthday this week. He is C. H. Dennessen (above), born in Denmark in 1833. He was professor of botany at the University of Copenhagen and taught crowned heads of Europe. He came to the U. S. in 1881 and has lived in Florida 24 years.

DRAUGHON'S BUSINESS COLLEGE
ABILENE, TEXAS

OUR SHORT STORY

Reading Time—4 minutes

She was standing at the roadside with a briefcase under her arm as I slowed up the car east of Needles, Cal. Ordinarily I don't pick up hitch hikers. She was young and blonde, that type of ash white blonde that runs thirteen to the dozen on the Hollywood boulevards. She was pretty, too, in spite of the Mojave desert dust, and bleary eyed sleepiness which subsequent conversation revealed had been acquired aboard a five ton truck.

"How far east are you going?" I asked.

"All the way to Sylvia, Kansas." I thought that I had her catalogued pretty accurately and told her so. "Beauty Contest Winner returning home because you couldn't get a break in the movies?"

"Just half right," she answered grimly. "I'm a beauty contest winner who is returning home because I threatened to be a success."

"Director get fresh?" I ventured. "Yes, but not in the way you mean," she said. "I was a pretty green kid when I came out to Hollywood six months ago. It was the old story. I had some pictures of myself to show as winner of a local beauty contest and some high school theatrical experience to talk about. I managed to see a director all right, one of the highest in Hollywood. He was right from my own town. He was nice enough too, and made me realize that I'd need some lessons in dramatics and voice before he could find a part for me.

"I had a bit of money and managed to get a job as a waitress in the Blue Hat. I dropped right out of sight and put in all my spare time studying. I was going to take him by storm when I was ready.

"The day before yesterday he dropped in for lunch and saw me. He remembered me all right and called me over to his table.

"What has happened to you?" he asked. "I told him all I had been doing and that I had planned to ask him for a screen test pretty soon.

"You look all right to me right now," he said. "And your voice is swell. I've something in mind which I think will suit. Drop down to the studio this afternoon at four o'clock for a test on stage 3.

"You can bet I was on time at that studio.

"The director had left word with the gateman to let me go to stage 3. When I got there however he wasn't there. There weren't any lights or cameras either. Just a young man with glasses standing in front of a microphone.

"How about that test I am to take?" I asked.

"We'll give it to you right now," he said. "And I'll bet you'll be a wow too! This is probably the beginning of a real movie career for you!"

"But where are the lights, the cameras and everybody?" I asked in bewilderment.

"Not necessary at all!" he assured me. "All you have to do is stand in front of this microphone and this cable to it, running to the second booth will record your voice."

"What'll I say, though?" I asked. "Do you want me to read some lines or recite something from Shakespeare, or what?"

"The young man with the eye glasses looked at me in wonderment. "Didn't the director tell you?" he asked slowly. "That he's all set to sign you up. That you're a natural to play the voice of Mickey Mouse?"

MILK—THE BEST HEALTH INSURANCE

(By W. H. Riddle, Dairy Department, Kansas State College).

"There is no single change in the diet of the American people that will be of such benefit to them as the general use of one quart of milk a day for every man, woman and child."

This is not the statement of some milk-as-the-sole diet faddist, but is the careful opinion of that guardian of the Nation's health—the American Public Health Association.

Investigation in many nutrition laboratories throughout the world has established beyond question that milk furnishes more food essentials than any other single food in the diet. Any increase in the proportion of milk consumed results in a greater degree of health and increased ability to resist disease. This is especially true in times like the present. With family incomes reduced and the cost of living tending upwards, the tendency, too often, in economizing on food purchases is to cut down on the amount of milk for family consumption. For some reason, in the minds of many people, milk ceases to be a food and becomes a luxury when it goes beyond a certain price per quart. This is anything but good economy for the evidence shows that one quart of milk buys more protection than is possible with any other foodstuff and as far as comparative costs are concerned, it is the cheapest item in the market basket.

It is unfortunate that many housewives consider milk an extravagance when its cost advances. We have even more reason to be careful in a year of drought like the present, for fresh fruit and vegetables, the other important protective foods in the diet, are scarce and higher in price with the result that the consumption of these has been cut materially.

Sherman, an outstanding authority on nutrition and champion of increased consumption of milk, states, that where economy must be practiced and expenditures reduced, the diet should be built around bread and milk. "The lower the level of expenditure the more one must forego other foods, and concentrate effort upon providing these two, supplemented by a little of some inexpensive food or vegetable."

Today approximately 20 per cent of the food dollar in the average family is spent for dairy products. Nutrition authorities are agreed that it should be nearer 35 per cent.

FORD PLANS INDUSTRIAL DRIVE

Dearborn, Mich.—Henry Ford announced today the beginning of another of these titanic industrial drives which, from time to time throughout the last 30 years, have caused the world to wonder and, in millions of millions, given him the stature of a modern giant.

Early in the day Mr. Ford announced plans to build, during the coming year, "1,000,000 cars or better."

Later in the day, officers, engineers and statisticians of the Ford Motor Company, asked for figures showing the magnitude of the movement in terms of goods and dollars, disclosed that commitments have been going out for several weeks on a buying and productive program that will run in a total cost of more than \$415,000,000, to be spent during 1935 and 6,008 suppliers scattered all over the United States.

When large scale production is resumed—now planned for early in December—the Ford monthly pay roll in the Detroit district alone will run to \$6,861,000.

In discussing his industry Mr. Ford indicated that "so far as the Ford Motor Company is concerned the depression is over."

"Our experience during the last six months," he said, "and what we see in the future tells us a year of improved business is ahead."

"Do you think 1935 will end the depression?" he was asked.

"Why, the depression would be over for the whole country very soon," he answered, "if American industrialists would just forget those alphabet schemes and take hold of their industries and run them with good sound American business sense. They should take hold of their country, too, in the same way and run it with good, sound American common sense."

The new industrial drive will call for considerable additional employment but company officials stressed the fact that more than the company's labor requirements is already available in Detroit and its suburbs.

For the last several months approximately 55,000 men have been employed in the Detroit area. At present, with the plants re-tooling this number has been greatly reduced.

When production is resumed all additional jobs will be given to workmen or other mechanics in the Detroit area.

It is estimated that when the drive to produce 1,000,000 cars is in full swing, 87,000 men will be employed.

The project calls for the spending of tremendous sums. For example, it is estimated that the bringing in of raw materials will require 164,000 cars and outbound products 160,000 cars, largely to the railroads, of \$74-bills, largely to the railroads, of \$74,000,000.

The greatest single item listed in the 1935 Ford production budget is \$100,000,050 for bodies. This huge sum will be spent almost entirely in purchases from the Detroit body building industry.

Almost as great is the total to be spent for steel, iron and non-ferrous metals which runs to \$75,000,000. The bulk of this, \$53,600,000, will go for steel, purchased in the open market, which will be in addition to steel

made in the present Ford mills. A total of \$6,618,000 will be spent for malleable castings and \$2,683,000 for grey iron, exclusive of that produced by the greatest foundry in the world at the River Rouge Plant.

Requirements of non-ferrous metals are topped by aluminum, of which \$6,000,000 is to be purchased. Other such requirements are, copper, \$3,600,000 lead, \$1,453,000, tin \$1,151,000, zinc \$337,750.

The rubber industry will benefit tremendously from Ford expenditures. A total of \$22,500,000 is scheduled to be spent for tires, and \$6,000,000 for crude rubber.

Materials required for finish of Ford car bodies will require spending of another \$32,000,000. Of this total \$16,727,000 will go for upholstery cloth, carpet, leather and other body-trimming materials, \$11,000,000 for glass, and \$4,300,000 for paints and lacquers.

Lumber requirements, including that necessary for boxing, crating and shipping braces will run to \$3,000,000.

Of major importance is the large sum spent by Ford in extension of the present steel mills and in expansion of the present power plant to supply the added power required by the new strip mill. This will total \$14,000,000. In addition Ford is spending \$2,500,000 for machine tools and fixtures.

Additional sums including costs of fuel and unproductive labor—such as that required for moving machinery, cleaning, washing windows, etc.—brings the estimated total cost of 1935 operations to more than \$415,000,000.

A GREAT CULTURAL FORCE

It is good news that friends of "Chautauqua" have come to the aid of that famous institution, so that the outlook is good that it will be able to pay off its debt of \$750,000 and continue the cultural work which it began sixty years ago.

Few of the present generation, probably, realize what a powerful influence on American life and thought has emanated from the "Hall in the Grove" on the shores of Chautauqua Lake, in the county of that name in western New York state. Founded in an era of depression like the present one, an era which future historians, we imagine, will regard as even more severe than that which we are now passing through, the Chautauqua Literary and Scientific Circles, which were established in almost every rural community in the 1870's and 80's, were more than mere reading and study clubs. They were a stabilizing influence in the era of unrest, widespread poverty and discontent, which followed the Civil War. By stimulating interest in good literature, inciting people to get together to discuss history of the past and the prospects of the future, the Chautauqua movement was a powerful force in lifting up the hearts of a distressed nation.

While Chautauqua had a definitely

religious background, it was not pietistic. There was no cant about it. It did not preach, but rather, sought to set people to thinking, in the firm belief that the thoughtful would find their own ways to the salvation of their souls.

Out of Chautauqua grew hundreds of local "Chautauqua Centers" holding annual gatherings, often in tents, lasting for a week or more, and bringing to the folk, far removed from cultural centers, speakers, lecturers and entertainment of a nature calculated to gratify the desire for knowledge and to aid in understanding the forces that move the world.

The movies and the automobile have been the two innovations chiefly responsible for the decline of the Chautauqua movement. But the Hall in the Grove still stands, and it is gratifying to know that it will be able to keep on radiating its beneficial influence.

H. C. Freeman and son, Herbert Freeman of Paint Rock, returned from a trip to Roswell, New Mexico, Saturday. They report passing through some fine country and seeing a fine crop. The cotton looked to be making about 1 bale per acre and it had never been picked.

THE PANTHER'S SCREAM

PANTHER'S CIVICS CLUB

We, the Seniors girls, Auntie Mae Barron, Roberts Pruet, Frances Sprawls, Gertrude McCullough and Earlene Pruet, at ex-senior attending the trial Friday evening at Baird with the permission of Mr. Webb. We were accompanied by Mrs. Noel McCullough. The purpose of attending the trial was to learn how a trial is conducted so that we will be better prepared for trials in our civics club.

Doggett was tried for robbery reforms. He will also be tried for the killing of Mr. Threat in Eastland county. In hearing the trial it taught us more about the laws of our government and also will help us in our public speaking.

* CAN YOU IMAGINE

R. D. smoking a cigarette. Alvin minding his own business. Lawrence with a girl. Frances speaking to a freshman. Norris writing a two page theme in civics.

Mr. Masur admitting that some one answered a question in civics correctly.

Where we will go when we get through being a senior.

WHEAT MEETING CALLED

All wheat contract signers are called to a meeting for the purpose of electing members for the allotment board for 1935 and officers for the association. This is to be at the county agent's office Nov. 27th at 10:00 o'clock.

Agent's Office Closed Thanksgiving. The offices of the county agent will be closed all day Thanksgiving.

TODAY AND TOMORROW

Frank Parker Stockbridge

LAND ... its wonders
Premier Mussolini offered prizes not long ago for every Italian family that had been working the same piece of land for 100 years or more. An amazing number of Italian farmers were able to produce evidence that they were occupying the same land that their ancestors had farmed. Some of the families had been on the same land for 1,000 years, many for more than 500 years.

Yet Italy, a small, compact country, which could be hidden in a corner of Texas, has not yet been able to develop its agricultural resources to their utmost, in spite of the fact that it contains as many people as New York, Illinois, Pennsylvania, Ohio, Texas and Massachusetts combined.

Prince Caetano, American-trained Italian engineer who died the other day, owned most of the Pontine Marsh, between Naples and Rome. His family has owned it for 2,000 years, and for 2,000 years reclamation work has been going on there. Part of the marsh has been made

lately into good farm land, but there is a hundred years' work yet to be done.

Loking at such facts and figures, I smile at the enthusiasm of those who think it possible to solve all of America's farm land problems in a few years.

HOUSES ... poor people
I get a similar reaction from the gigantic programs of "slum clearance" and Government building of residential areas in our cities, which come out from Washington.

Again Italy furnishes a comparison. A few days ago Mussolini started the demolition of a block of old Roman houses, built originally about the beginning of the Christian era. I went through one of those old houses a couple of years ago. Families were living there whose ancestors had lived in the same rooms since long before Columbus discovered America. Then I went out to the suburban hills and saw the new "garden" apartments the Government had built for the working people. They were charming in their outlook, modern in their design and equipment—but too expensive for any but the highest-paid workers to live in.

In New York the first residential unit built as a "slum clearance" project, Knickerbocker Village, has been filled up with "white collar" workers; the poor people can't afford the rents, even though this was built as a private enterprise, with the aid of Government loans.

Whenever Government itself buys or builds anything it always costs much more than when done by private enterprise. So I haven't much faith in the notion that it is going to be of any real service to the ordinary working man for Government to build beautiful apartment houses.

PEOPLE ... spread thinly
I do a good deal of motoring over country roads in the East, and once in a while I make an airplane trip, which is the best way to really see the country. I am constantly being amazed at the immense proportion of land which is not used for anything, compared with the small areas in farms and cities.

Even in what we call the thickly-populated states, southern New England, New York and Pennsylvania, people are spread out so thin that they can't make use of half of the available land. After three hundred years, we still have fewer people to the square mile, even in such densely populated states as Massachusetts and Rhode Island, than England has; while New York and Pennsylvania, outside of the two big cities of New York and Philadelphia, are comparatively deserted, by contrast with France and Germany.

I have a distinct belief that the country lying east of the Alleghenies could support the whole present population of the United States.

HOMESTEADS ... "ritzy"
I have just been looking over some of the plans for "subsistence homesteads" prepared by the Federal Government. They are all good-looking well-designed houses, with all modern improvements. I would like to live in one of them myself.

These are intended for poor folks with large families whose wages are so low or whose work is so irregular that they cannot afford to live in cities or villages but must eke out their wage income by raising a lot of their own food. The idea is not to give a man a chance to make his whole living, but only part of it.

It strikes me that a man would need a pretty good job, as jobs go, to justify him in assuming a debt of \$2,000 or more, which is what the Government guesses these subsistence homesteads will cost. It also strikes me that they are not a genuine contribution to the problem of industrial unemployment unless they are adequate to provide the family's entire living in case the head of the household should be out of work for a year or two or longer.

ELECTRICITY ... maybe luxury
In my farm home I have no electric lights. The power company won't run its lines up the back road unless I pay the cost of a mile of poles and wires, or guarantee to buy an exorbitant amount of current per year. My near neighbors and I get along very nicely with kerosene lamps, gas engines for our washing machines and buzz-saws, and battery-operated radio sets. An electric refrigerator would be very nice, but up in New England we seldom run short of ice, mostly from our own ponds.

I think one of the principal things the matter with the United States is that too many people have been taught to regard as necessities of life too many things which are merely luxuries.

SUNDAY SCHOOL LESSON

by Charles E. Dunn

The Christian Steward
Lesson for November 25th. Matt. 25:14-30.
Golden Text: Matt. 25:21.

It is significant fact that most people do not know how to distribute their income. They have no budget system, and no philosophy of stewardship. An expert on income management once gave me interesting glimpses of the manner in which people give to the church. She told me of a young man with an annual income of \$2800 who spent \$208 a year on recreation, and gave only \$12 to the church, less than one-half of 1 percent of his means. Another man she interviewed was paid a salary of \$10,000 a year, and gave only \$100 or 1 per cent to the church, while he spent \$600 for a saddle horse.

If folk would take membership in the Christian church as seriously as their daily work and recreation the churches would not have to beg for financial support. An abundance of funds would be available. For instead of presenting to God a mere pittance everyone would feel ashamed not to give a decent part of his income on a regular basis. St. Paul well stated the rule of Christian giving when he said, "Upon the first day of the week let everyone of you lay by him in store, as God hath prospered him."

Someone has written: "I am a nickel. I am not on speaking terms with the motorman, I am too small to sit in the movie, I am not large enough to buy a necktie, I am a small consideration in the purchase of gasoline, I am not fit to be a tip. But believe me, when I get into a church or the missionary society, I am some money."

It is plain that the rank and file are not conscientious in their giving for they fail to take to heart the Christian principle that we are trust-

tees, for the time being, of God's wealth, and must devote it to the highest uses. Thus few deserve the cordial "Well done" of our Golden Text.

SHANK'S NURSERY
Clyde, Texas

Better Soft-Shell Pecan Trees, fruit trees, roses, shrubbery. Fall planted trees make far more growth.

You Need Refrigeration Every Day of the Year

There are only a few days each year that the temperature is low enough for the proper refrigeration of foods. Although foods may not spoil during cold Fall weather, the temperature is not low enough to prevent the growth of bacteria, the real danger of poor refrigeration.

The electrical refrigerator's economy and dependability of operation has been proven. The saving on foods alone makes the investment of your money amply repay you.

To protect your family's health, proper refrigeration is a necessity every day of the year. The cost is no greater than obsolete methods of refrigeration.

Low incentive rates make it possible for you to secure the maximum of benefit at the minimum of expense. Buy safe—buy dependable electrical refrigeration.

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule and adds only a small amount to your total bill?
