one:

Plea

all

Whether it's "cool and quiet" or "rock and roll," there is going to be plenty of fun at dances when school gets underway this fall. How you rate as a date will determine whether you have your share of the fun. Here are a few tips that will make every date a successful evening.

• Get off to a good start by being on time. If you keep your date waiting the evening is sure to because it goes with the age, but there's no need to feel helpless because it goes with the age, but there's no need to feel helpless and dejected.

Tussy has developed a tax-free double-barrelled skin treatment called Medicare which can help put you on the track to a cleaner, fresher face for fall. Tussy's Medicated Creamy Masque "washes" away the excessive oil and grime that so many skin blemishes thrive on Tussy's Medicated Lotion, the other half of Medicare, is blended to a natural skin tone and conceals unsightly blemishes as it aids in drying and healing them. And, for the one unruly spot that gleams like a headlight "touch up" with the new Medicare Stick.

Be a honey by following these

• Greet one another with a cheerful hello. If you try, it's not too hard to give your date that warm feeling that you've looked forward to these hours together.
• If you're shy in conversation, you'll help overcome it by concentrating on the other fellow. Try to speak slowly—distinctly—look directly at your conversation partner.

Always remember the purpose of a date is to have a good
time. Don't be too critical. Adapt
yourself whatever the situation
and go through the evening
cheerfully.

But you say, what's the use of
all these tips if my complexion is
tuined by blackheads, conspicuous
pores, blemishes, and frequently
the pimples of acne. That's a
toughle faced by many teenagers

of grasses and legume. The total noculation. production is often increased, the forage is higher in protein and minerals and the grazing season is frequently extended when a combination is used.

Finally, asks the specialist, why most season in the specialist of the specia

are the best bets for winter grazing. Italian ryegrass does well in East Texas, the Gulf Coat region and in the Blackland and Grand Prairie areas. Vetch crimson clo ver, Hubam and Madrid sweetclo the best combination for a par-

Whether it's "cool and quiet" or "rock and roll," there is going to be denty of fun at dances when school gets underway this fall. How you ate as a date will determine whether you have your share of the fundere are a few tips that will make every date a successful evening. Get off to a good start by being on time. If you keep your date because it goes with the age, but there's no need to feel helpless and dejected.

Tussy has developed a tax-free double-barrelled skin treatment called Medicare which can help put you on the track to a cleaner, fresher face for fall. Tussy's Medicated Creamy Masque "washes" away the excessive oil and grime that so many skin blemishes thrive on. Tussy's Medicated Lotion, the other half of Medicare. is blemded to a natural skin tone and conceals unsightly blemishes as it aids in drying and healing them. And, for the one unruly spot that gleams like a headlight "touch up" with the new Medicare Stick.

Be a honey by following these tips. Bid the blues goodbye, and you can bet your phone will be ringing again soon for campus delight of "bait and date."

• Greet one another with a cheerful hello. If you try, it's not too hard to give your date that warm feeling that you've looked forward to these hours together.

• If you're shy in conversation, you'll help overcome it by concentrating on the other fellow. Try to speak slowly—distinctly—look directly at your conversation partner.

Always remember the pur-pose of a date is to have a good ame. Don't be too critical. Adapt yourself whatever the situation and go through the evening

of grasses and legume. The total production is often increased, the forage is higher in protein and minerals and the grazing season is frequently extended when a combination is used.

Finally, asks the specialist, why meand more grazing crops of meat and milk! cut labor requirements for handling livestock and for building and protecting the soil on your farm.

Finally, asks the specialist, why meand more grazing crops of meat and milk! cut labor requirements for handling livestock and for a weeks stay at Red River.

New Mexico.

are the best bets for winter grazing. Italian ryegrass does well in East Texas, the Gulf Coat region and in the Blackland and Grand Prairie areas. Vetch crimson c ver, Hubam and Madrid sweetclover are among the legumes which bination with the grasses. Trew suggests contacting the local ounty agent for information on the best combination for a par-

tilizer use recommendations from oculated before planting. The cost! is small compared with the returns and benefits from good in. Fort Worth were dinner guests
