City Offices Moved Into New Quarters Wednesday, August 1

The new City Hall opened its doors for business Thursday, August 2.

The modern brick structure contains not only the City Hall facilities, but also a community meeting room equipped with a 12'x14' table.

The City Hall section consists of a front office 16x28 ft. The lobby of this office is furnished with modern upholstered furniture. The secretary's section is a part of the front office and contains a two foot wide service counter with wood paneling.

The Council room opening off the lobby is 12'x16'4". A storage room for records open off a 4'6" hall which begins in the front office and continues through to the entrance of the community room.

The Community meeting room size 37'2"x30' is an ideal place for public and civic gatherings. It is equipped with a 12'x12' electric

kitchen, and a kitchen pantry. A pass-through window makes serving of meals more convenient.

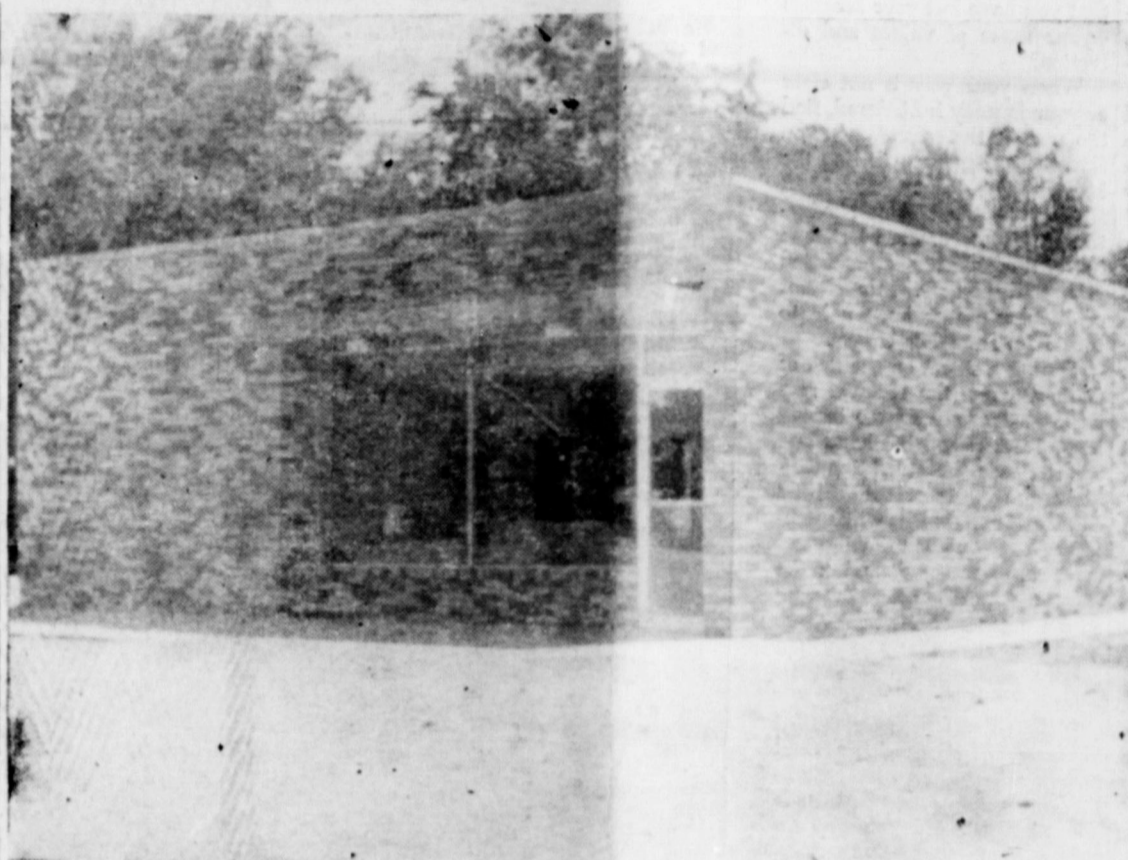

Restrooms are conveniently placed at the east end of the hall. A private restroom has been installed in the secretarial section.

Two refrigerated drinking fountains are added features. One has been placed in the lobby while the other is in the community room.

A storage and equipment room 8'x9' is accessible from the community room. It is equipped with a service sink.

The building features refrigerated air conditioning throughout. Vented heat supplied by an electric furnace will keep the building warm.

Desert Sand is the color used throughout the building. Floors are throughout the building. Floors of the City Hall and kitchen are covered with vinyl asbestos tile. The community room floor is laid with asphalt tile.

EARTH CITIZENS ARE PROUD OF NEW CITY HALL — The City offices were moved into their new quarters Wednesday, August 1. The new structure has large lobby, secretary's office, City Council meeting room, water superintendent's office, restrooms, fully equipped kitchen and community meeting room. The building also has central heating and cooling. The city officials invite everyone to drop by and inspect the new City Hall.

New Chlorinator Installed At Earth Swimming Pool Last Week

The Earth Swimming Pool was forced to close Thursday, July 26 due to a breakdown of the automatic regulator on the chlorinator.

A new chlorinator with automatic regulator was installed August 1 by the Seahorse Swimming Pool Corp. of Lubbock at a cost of

\$645.

The pool has been cleaned of the fungus growth that accumulated when the chlorinator failed and was reopened Sunday and will remain open until school starts.

Mrs. Z. E. Robnett is in charge of the pool.

Springlake School Campus Being Improved As Opening Day Nears

The buildings on the Springlake School campus have taken on a new look since the school term ended last spring.

The high school administrative offices have been renovated with installation of tile floors, mahogany wall panels and acoustic tile on ceilings and above panels.

An additional classroom and a completely remodeled library is another major improvement at the High School.

The Elementary building has un-

dergone a complete paint job and some painting has been done at the Junior High building, auditorium and gym.

The new field house is underway as the foundation has been laid and the plumbing roughed in.

Volunteer workmen are ready to pour the concrete floor which will be 4 inches thick. Among those who have helped in the construction is Fred Clayton, E. C. Hudson and Lynn Glasscock. Any volunteer help on this project will be appreciated.

Earth Lions Club Has Annual Installation Tuesday, July 31

The Earth Lions and Lionesses met Tuesday night, July 31 at the Earth community room in honor of Ladies' night and installation of new officers.

The evening's program began with group singing led by Jarvis Angeley. W. J. Rylant, Sr., led in the pledge to the Flag.

Bill Mann led the invocation. A delicious dinner of fried chicken, boiled potatoes, black eyed peas, salad, cantaloupe, hot rolls, and butter, blackberry cobbler, ice tea and coffee were served.

Mrs. Minnie Pate and Mrs. Minnie Henderson cooked the savory meal.

Master of ceremonies for the occasion was past president Leon Dent.

Lion members stood and introduced their wives and guests.

Linda Kay Lawrence, lovely and talented daughter of Mr. and Mrs. John Lawrence, sang a number of songs from Rogers and Hammerstein, "Getting To Know You," "I Whistle A Happy Tune," "I Have Dreamed," "If I Loved You," and "You'll Never Walk Alone." She was accompanied on the piano by Mrs. George Laing.

Twelve Lions were named who will receive pins for 100 percent attendance for the past year. They are Jarvis Angeley, Fred Clayton, Rex Clayton, Melvin Bock, M. E. Kelley, George Laing, Bill Mann, Cecil Meadows, Ross Middleton, Carroll McDonald, Phil Raught and Paul Wood.

Lion George Redinger of Olton, Deputy District Governor at Large, District 272, for 1961-62, installed the new officers.

Officers installed were Rex Clayton, president; Phil Raught, 1st vice president; Roger Haberer, 2nd vice president; Fred Clayton, 3rd vice president; M. E. Kelley, treasurer; Charles Crable, assistant treasurer; Jarvis Angeley, secretary; Paul Wood, assistant secretary; W. J. Rylant, Sr., Lion Tamer and Carroll McDonald Tail Twister.

Directors installed were Charles Crable and Dr. D. W. Holt, 1 year and Wendell Clayton and Norman Hinchliffe, 2 years.

Following the installation the new president voiced several Lion projects now underway. They are glasses for underprivileged school children, the new foreign exchange student and sponsorship of Boy Scout Troop 614 and Cub Scout Pack 614.

Benediction was led by George Laing.

Out of town visiting Lions were James Gallagher, Don Spain, Olton Lion Boss, Herman Meyer and Conner Parsons, all of Olton.

There were 32 present, including guests.

Dalton Lightfoot, son of Mr. and Mrs. E. O. Lightfoot is reported in poor condition at his home in Colorado City.

Dodgers, Giants Meet July 31

The Dodgers and Giants of the Pee Wee League, despite the rain that was peeping down, fought to a 21-7 score in favor of the Dodgers Tuesday, July 31.

Jack Angeley is Dodger coach and Calvin Wood is Giants coach.

Many of the Pee Wees will become Little League members next year and we should see some very good baseball games from these boys.

Mr. and Mrs. J. B. Thomas and children visited in Durant, Okla., Dallas and Fort Worth on a three week's trip recently. James remained at Dallas for two more weeks and returned home last Saturday.

PAUL WOOD and JERE LAWRENCE

Piggly Wiggly Buys Paul's Super Market, Beasley Named Manager

Jere Lawrence of Sweetwater, announced Wednesday that he has become owner of the former Paul's Super Market, and the store will be known as the Piggly Wiggly Store.

Bill Beasley has been secured as manager of the store.

Beasley resigned his position as

vice-president of Citizens State Bank July 21. Coming to Earth in 1953, he became owner and manager of the Earth Oil and Gas Co. In 1956 he sold the business and went to Muleshoe, where he was associated with Western Fertilizer Co. for seven months. In September, 1957 he became vice-president of Citizens State Bank.

Beasley has had experience in the grocery business having been an inactive partner of Paul's Super Market.

Lawrence has been active in the grocery line for a number of years, becoming part-owner with his father in 1944 of the Piggly Wiggly in Snyder, and of the Piggly Wiggly No. 2 in Sweetwater which he and his father built.

In 1951 he joined in a partnership of the Friona store with U. S. Akens of Friona, and the two men are now owners of the Earth Piggly Wiggly store.

Lawrence will continue to live in Sweetwater and will visit the Earth store occasionally. He says the new store will bring lower prices and better facilities to Earth. Improvements will be made in the meat and produce departments.

Piggly Wiggly will continue to give S. & H. Green Stamps. Double stamp days will be on Tuesday and Wednesday of each week.

A grand opening is planned at a later date.

Mrs. George Kasinger, Mrs. Ed Bell and Mrs. E. O. Lightfoot were in Lubbock last Monday on a business trip.

BILL BEASLEY

Layman's Retreat Held At Ceta Canyon Friday

A Methodist Layman's Retreat was held Friday, August 3 through August 5 at Ceta Canyon.

Dr. John off, retired Methodist pastor was guest speaker. He was pastor of the Chicago City Temple Methodist Church for 19 years.

Rev. S. H. Salley, pastor of the Earth Methodist Church and a number of laymen attended.

Teresa Smith of Amarillo is visiting Mr. and Mrs. Phil Hunter and family.

Harlyn Galloway Pitches Perfect Game For All-Stars at Olton

In a thrilling and breath-taking no-hit and no-run game Thursday night, August 2 at Olton, the Earth - Springlake Little League shut out Olton 8-0.

The brilliant pitching of Harlyn Galloway of the Giants resulted in a perfect game. None of the opposing team got to first base. A number of outstanding catches were made by the Earth-Springlake fielders.

Donald Huff of the Yankees was credited with a home-run and Mark Holt with a 2 base hit with the bases loaded.

All members of the team were present except Bobby Cummings who was on vacation and Arthur Ray Haberer, who is attending Big

State Boys Summer Baseball Camp at Meridian.

Pete O'Hair, who coached the League winning Red Sox, is coach of the All-Star team.

The battery was made of Harlyn Galloway, pitcher; Mark Holt, catcher; Gary Kelley, first base; Randy Washington, 2nd base, alternating with Donald Huff; Dell Vining, 3rd base; Terry Bridge, shortstop.

Outfielders were Gary Hestand, Lonnie Dear, Wayne Henderson, Perry Don O'Hair, Kelley O'Hair, and Gene Glasscock.

A large number of Earth and Springlake fans attended the exceptionally well-played game.

Springlake School Coaches Attend Conference In Lubbock This Week

The District High School Coaches Conference being held at Texas Tech, began August 7 and will close Friday, August 10.

A welcome and get-acquainted session was held Tuesday, following registration.

Lectures and conferences on the many phases of football, basketball and track were spotlighted in the agenda for Wednesday.

Coach Groves of Florida University will appear as guest speaker.

The All-Star basketball game will be played at the Coliseum tonight.

The All-Star football game will be played Friday night, as the North goes against the South. Jerry Lovelace of Farwell will participate in the game. He represents District 3-A.

Attending the conference from Springlake School are coaches Jodie Mahan, Eldon Davis, Danny Smith, and also C. L. Berry.

Earth Tire And Supply Hires New Employees

The Earth Tire and Supply Co. have hired three new employees lately.

Nat Bearden began his duties last Wednesday. Mr. Bearden, formerly was employed on the J. B. James farm. He and Mrs. Bearden are long time residents of Earth.

Gayle Sawyer, son of Mr. and Mrs. Gayle Sawyer was employed by the firm several weeks ago and will work part time when school begins. He is a member of the sophomore class of Springlake High School.

Mrs. Fern White, a former resident of Beatrice, Nebraska, has accepted a position as bookkeeper. She formerly worked for the Beatrice Chamber of Commerce, and is the mother of Mrs. Gale Ballard, a new resident, whose husband is employed at Plant X by the Missouri Valley Construction Co.

HOME TOWN TALENT — Furnishing outstanding vocal talent at the Earth Lions Club Installation and Ladies' Night, Tuesday night, July 31 was the talented Miss Linda Kay Lawrence. She is majoring in music at Oklahoma Baptist University and is the daughter of Mr. and Mrs. John Lawrence.

NEW LION BOSS — Rex Clayton officially accepts the gavel following installation of officers of Earth Lions Club Tuesday night, July 31. Left to right is George Redinger of Olton, installing officer, Clayton, and Leon "Tuffy" Dent, outgoing Lion Boss.

Agriculture Dept. Develops New Cotton Spinning Machine

College Station—A radically new machine, developed by U. S. Department of Agriculture engineers, may be an important step toward eventual automation in cotton spinning mills.

Although much additional research will be needed to perfect its operation, the prototype apparatus has demonstrated advantages that could lead to considerable savings of time and labor required in spinning cotton yarn.

Inventors of the machine, known as the SRRL Ringless Spinning Machine, are G. J. Kyame and H. R. Copeland of USDA's Agricultural Research Service. Their machine spins cotton without the use of bobbin, ring or traveler, which limit the rate of yarn production and the size and shape of yarn packages in current spinning.

The machine has two major faults, says the inventors. It puts more twist in the cotton than is desirable in a satisfactory yarn and the yarn varies in thickness and strength along its entire length and its appearance is inferior.

In conventional spinning, a bobbin is mounted on a spindle that revolves inside a closed ring that speeds up to 12,000 revolutions per minute. As the bobbin turns, twist is imparted to a strand of fibers, converting it into yarn. The yarn, in turn, is wound around the bobbin.

In the SRRL Machine, the yarn is wound directly from the spindle into packages of any shape or size needed for later processing steps. This eliminates time and

HOW TO GET YOUR BEARING

A large passenger plane bound for Hawaii took off from the great airport in San Francisco. Sometime later, as the pilot checked his course over the Pacific Ocean, one engine began to sputter, then stopped completely.

Immediately, the pilot turned the plane around to return to San Francisco, since it was only 300 miles behind. Hawaii lay nearly 2,000 miles away.

In a short while the pilot was approaching San Francisco, but a heavy fog had settled over the bay area. The pilot though he had instruments, was not sure of the direction in which he was flying.

He turned to his copilot and said, "There is a mountain east of the city and its top will be above the fog. There is a cemetery on top of the mountain; one of the tombs has a tall cross on it. Let's fly toward the mountain and if I can find the arms of that cross, I can land the plane safely."

Rising above the heavy bank of fog, the pilot of the plane soon saw the mountain and found the cross standing in the cemetery. Taking his bearing from the arms of the cross, he was soon able to land the plane safely.

Do you often feel as if you are lost in the fog of trouble, worry and despair that surrounds you? Do you ever feel that you have lost your bearings—your sense of values and direction?

When your way is not clear or your journey is hindered, find the arms of the cross. When you find the cross, you will find the Master Pilot—Jesus Christ.

Christ is the Master Navigator. He has never been lost. The fog of doubt has never confused Him, and the fury of the storms of life has never been able to turn Him from His course.

During a storm on the Sea of Galilee, when the sea was raging and the waves were tossing high, Jesus raised His hand and said, "Peace, be still." Immediately the tempest-tossed little boat began to stop its wild pitching and rocking as the wind and sea obeyed the command of the Master. The disciples, covering in the bottom of the boat, were only too glad that Christ had taken the helm and become their Pilot.

Today, that same Master Pilot is ready to help you. He is not a dead Christ, but a live, vigorous, real person. As you turn to the cross, He will help you arrive at your destination.

labor now required to change bobbins and rewind the yarn.

The manufacture of cotton yarn consists of an expensive series of disconnected processes. Although several of these have been combined or connected, many textile people agree that the full advantage of automation cannot be realized in spinning mills until present processes are replaced by an entirely new spinning procedure. The SRRL Ringless Spinning Machine, officials believe, is a step in this direction.

Shifts Continue In Farm Real Estate

College Station — The average value per farm in Texas increased from \$48,378 to \$64,950 between 1959 and 1962, according to C. H. Bates, economist of the Texas Agricultural Extension Service.

In this same period, the average size of farms increased from 631 to 719 acres. This year the land on the average Texas farm is \$39,302. Buildings are worth an additional \$5648. The average value for land and building is about \$91 per acre, he said.

The rate of sales of farm land accelerated some during the last year also. The number of farm title transfers in Texas rose from 51.8 per 1000 farms in 1960-61 to 58.2 in 1961-62.

A study by USDA's Economic Research Service shows the average value per acre of farm real estate reached a new high of \$123 per acre in the U. S. in 1962, 5 percent higher than in the previous year. The average farm has 236 acres, and is \$41,400. About \$32,800 of this is accounted for by land, and the balance, \$8600, by farm buildings, Bates, said.

Good Housekeeping Around Grain Bins Cut Insect Losses

College Station — The summer grain harvest in Texas is picking up momentum each week and farmers are reminded that grain storage facilities should be put in first class shape before the harvest begins. C. F. Garner, extension entomologist, says grain should be stored only in bins which have been cleaned thoroughly and treated with a residual spray.

He says all old grain, trash, feed sacks and debris that furnish living quarters for insects should be removed from the bin. A sweep-down of the ceiling and walls and a thorough cleaning of the floors are musts. A good cleanup job around the bins will also help keep down insect infestations, he adds.

Grain storage structures should exclude all outside moisture, and they should be easily accessible grain. Bins in which grain can be aerated are helpful in cooling or drying grain.

For the residual spray, Garner suggests either malathion (premium grade) or methoxychlor used in a two and one-half percent formulation. The latter is available as a wettable powder or emulsifiable concentrate.

Premium grade malathion may

Farm Facts

Production of sugar beets, sugar cane, and refined sugar in this country broke all records in 1961, according to the Crop Reporting Board, USDA.

Estimated refined sugar production for the 50 states was 4,089,000 tons. Per capita consumption is 88 pounds.

Production of sugar beets was estimated at 17,960,000 tons, nearly a million tons above the previous record of 1959.

Sugar cane production was estimated at 8,649,000 tons, the largest crop of record. Hawaii growers harvested an estimated 9,981,000 tons to bring total U. S. sugar cane production for the year to 18,230,000 tons.

This record harvest from 1,529,100 acres indicates an increase in acreage for the sucrose-producing crops, and more self-sufficiency for this segment of America's food needs. A large share of the U. S. sugar supply historically has been imported from Cuba,

U.S. is becoming a land of sugar.

which now is under Communist control.

Continued acreage shifts to sugar cane and beets would improve the agricultural balance in this country and take up acreage now producing commodities that are surplus.

also be used as a protectant on corn and grain sorghum. One pint of 57 percent malathion mixed with 2 to 5 gallons of water is required to treat 1000 bushels of grain. Sprays may be applied to the grain stream as it is being

unloaded or turned into final storage. The use of this chemical will reduce the possibility of insect damage, Garner adds.

The entomologist explains that only clean, sound grain with a moisture content of 12 percent or less should be stored. Grain with a high moisture content attracts insects, promotes mold growth and may induce heating. Grain he adds, that is free of broken kernels is safer from insect damage than dirty, cracked grain. Garner suggests leaving adequate space to inspect and fumigate the grain if necessary at the time the bin is filled.

Finally, the entomologist suggests that grain producers visit the local county agent and pick up copies of the latest publications on grain storage problems.

Farmers Home Administration Gives Annual Report

Muleshoe, Texas — Arch T. Fowler, Area Supervisor of Area 20 of the Farmers Home Administration in Texas, announced to-

day that during the past fiscal year, July 1, 1961, to June 30, 1962, the FHA had collected \$4,390,149 in the seven counties that make up Area 20. The seven counties are Bailey, Castro, Cochran, Hale, Hockley, Lamb, and Parmer. Fowler also explained that during the past fiscal year, 1961-62, the Farmers Home Administration has assisted a large number of farmers to produce their 1962 crops. Loans totaling \$3,761,435

LISTEN TO THE VOICE

The most important subject in the universe is God. It is absolutely essential to the happiness of people to know God. Yet there are millions to whom God is an unreal, vague, mystical being. They do not know nor understand Him.

Who is God? What is the truth about God?

First, His rank is supreme. His power, rule, and reign transcend all earthly rulers and all human thrones and powers. He knows no boundaries, either by miles or men.

Second, God is the source of all life. He created all life and made man His masterpiece. He made him a giant—spiritually, mentally, physically.

Third, God is the source of all power. He is the only self-existing being. He is the only being not dependent upon anything or anybody. Yet upon Him all other beings are dependent.

Fourth, God's youth is eternal. The word that best expresses God which is most descriptive of His being is the word "Jehovah"—the God who has been; the God who is now; the God who shall always be.

God Himself said, "I change not." He is the same today, yes-

terday and forever. He is forever young.

God knew our mortal minds could not comprehend the mystery of Himself as a self-existing Spirit. So the Son of God came in the likeness of flesh, took on the form of a human being, and began to express God to the human family. When you know Jesus, you will understand God.

Jesus was perfect in strength. He was never sick. Disease never marred His flesh. Mentally, Jesus was perfect intelligence, perfect wisdom. His spirit was perfect love.

If you want to know more about God, listen to the voice and speech of Jesus. It is a perfect voice.

God is supreme. He is the source of all life. He is the source of all power. His existence is eternal. His youth is eternal. His embodiment is in Jesus Christ of Nazareth.

How can we express God? We can express God best in one word: Love. For God is love. It is for this reason that He gives good things to the world. That is why all things that are good come from God. It is love, constantly and unendingly shown, that makes us realize that God is a good God.

have been made in this seven county area during this same period of time. These borrowers were unable to get financed through the regular conventional lending sources. These loans were of many types . . . Operating loans to help a man with his farming operations; Farm ownership loans to help some farmer buy a family-type farm or help a farmer acquire some additional land to enlarge his present farm to a family type farm; Rural Housing loans to assist someone in repairing or building a home in rural areas, small communities, or towns of less than 2500 population; Soil and Water loans to assist a farm owner in reorganizing his farming operation by introducing approved farming practices, drilling irrigation wells, installing water distribution systems, building terraces, fencing, and other things necessary to increase the productivity of his land resources; and a few emergency loans to just help a man through this crop year.

Fowler said that in 1961 many borrowers paid the FHA in full and if present prospects for the crops this year were reached that many more would pay out in full in 1962.

One of the requirements for borrowing from the FHA is to be

unable to secure the needed assistance through regular conventional credit sources, many of the farmers that FHA assisted during the drought years have paid FHA in full and have returned to the credit sources they used before coming to the FHA. The assistance that FHA gives to farmers and ranchers is a contributing factor in the overall economy of a county or community. This is especially important in a practically total rural area without any large industrial payrolls.

'62 FALCON FORDOR SEDAN

SAID THE FORD FALCON TO THE CHEVY II (AND CORVAIR)

No matter which compacts you compare the facts favor the Ford Falcon. Here's proof!

FALCON VS. CHEVY II

Chevy II tried to copy Falcon's lines, length, wheelbase, height, width—and many inside dimensions. But here's where it missed!

- Falcon's standard engine is a smooth Six; Chevy II's is a Four!
- Falcon offers more passenger comfort—almost 1 inch more rear leg room for example!
- Falcon has bigger rear doors—1½ inches wider!
- Falcon goes 6,000 miles between oil and oil filter changes*. Chevy II, 4,000—a 33% savings!
- Falcon has extra layers of insulation—50% more underfoot!
- Falcon holds the Mobil Economy Run's gas mileage record for a Six or Eight!

PLUS 10% more glass area, multi-leaf (instead of single-leaf) rear springs, wider trunk opening with a mat inside, heavier bumpers, greater maneuverability, more models to choose from!

And Falcon's prices start lower!

*After first 1,000-mile change

FALCON VS. CORVAIR

Falcon is a true family car! It's not only longer but almost 4 inches wider than the Corvaire. It holds 6 big people in comfort. (Just try to seat 6 in a Corvaire!) And that's just the beginning!

- Falcon's engine delivers more horsepower than Corvaire's rear-mounted engine!
- Falcon packs away almost twice as much as Corvaire's front-end trunk!
- Falcon bridges the bumps better with a 1½ inch longer wheelbase!
- Falcon has bigger brakes than Corvaire!
- Falcon seats are comfortably higher—1½ inches higher in front, almost 3 inches in back!

PLUS 33% savings in oil and oil filters, record gas economy, 10% more glass area in the windshield alone, bumpers almost twice as deep—all in addition to Falcon's bigger doors, more shoulder room, deeper seats!

And Falcon's prices start lower!

*Based on comparison of manufacturer's suggested retail prices, including dealer

Wise Use Of Rainfall And Irrigation Urged

The rains which finally covered the Southern High Plains rather general have been excellent, and as a result the farmers have saved thousands of dollars through reduced irrigation pumping costs.

Now, however, many are commencing again to pump water to the growing and fruiting crops. Some never stopped. During this stage of crop growth . . . when the crops are in peak bloom . . . adequate moisture is most necessary for optimum yields.

This is the time also when a minority of irrigators will have water losses due to 'tailwater' escaping from the cropland.

It is apparent that many farmers should take better care of their irrigation water. Particularly, in view of the fact that the High Plains Water Conservation District has just published a map which shows declines of the underground water level amounting to more than 100 feet in some areas of the southern High Plains during the past 24-year period.

In a day when farmers do considerable talking about high production costs, and justifiably so, many of them could effect substantial savings through the use of good irrigation management practices.

To maintain an adequate level of economic prosperity in this region will require wise use of both rainfall and irrigation water by each and every water user.

Spokesmen for the High Plains Water District state that the economic life of the ground-water supply will be prolonged if each farmer will practice this 'good sense' approach to one of our most serious problems.

NOTICE

All high school, freshmen and junior high football boys are asked to report at the High School August 20.

The Scout Roundtable for the month of August will be held August 13 at 8 p.m. in the Littlefield Methodist Church.

Adult leaders of Pack 614 will have a demonstration program.

All Scout leaders, committeemen and parents are invited to attend.

Farm Facts

Crop production in the U.S. is breaking all records.

Although total acres harvested were the lowest on record, new high yields were set in 1961 for corn, sorghums for grain and silage, soybeans, popcorn, dry beans, and clover-timothy hay. Yields of other hays, rice, and peanuts were second highest of record, and the winter wheat yield was third highest of record.

This reflects a new record for efficiency by American farmers. One hour of farm labor now produces nearly twice as much food and fiber as it did in 1950.

In America one farm worker produces enough food and fiber for 23 people. In Russia, one farm worker produces enough for only four or five. More than 40% of the Soviet Union's labor work in agriculture and forestry. In this country, only 9% work on the farms.

And the benefits of this efficiency are passed on to the consumer, who spends only 20% of his take-home pay for

Crop production is breaking records.

food. By comparison, Russians spend more than 60% for food, and the French and English spend about 50%. Our free enterprise system means fewer people on the farm and lower food costs for consumers.

HELLO WORLD!

Mr. and Mrs. J. C. Robbins announce the birth of a son, August 1 at 4 p.m. in the Greene Hospital - Clinic.

The young lad weighed 4 lbs. at birth and has been named Jimmy Don.

The couple have three other children and the father is employed as a foreman at the Hallsell Cattle Co.

Savings Bond Sales 31% of Annual Goal For County

Savings Bond sales in Texas for the first six months of 1962 totaled \$76,720,875 which represents 102.3 percent of the 75 million dollar Freedom Bond Drive goal for Texas. June bond sales in Texas were \$11,489,268.

These figures were reported recently by C. O. Stone chairman of Lamb County Savings Bond Committee. Mr. Stone also reported that bond sales in Lamb County were \$114,293 for the first six months of the year. This figure represents 39.9 percent of the 1962 sales goal.

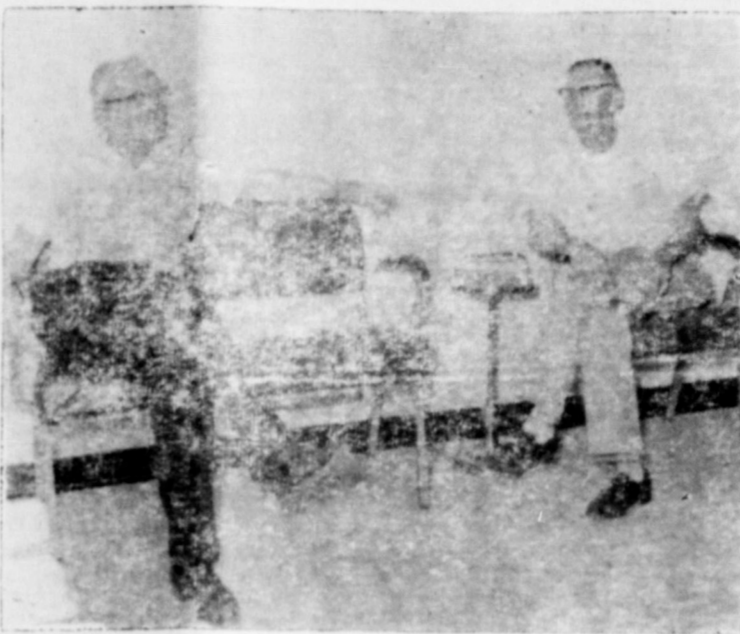

"The achievement of the Freedom Bond Drive goal in Texas demonstrates to the nation that Texans stand ready to do their part in our fight for freedom. These bond dollars will help our nation maintain a strong military posture and at the same time keep our country economically stable," chairman Stone concluded.

Mr. and Mrs. Jim Glasscock and boys have returned from a camping trip to Cowles, N. M. They were accompanied by Mr. and Mrs. L. G. Gibson and family and Mr. and Mrs. Robert Akin and family, both of Olton.

weeping may tarry for the night, but joy cometh in the morning. —(Psalms 30:5)

The darkness will pass away, the light will break forth in us. Our heart will be lightened, our mind will be lifted, and peace will suffuse our entire being.

Regional Meeting Of County Historical Committee August 18

A regional meeting of County Historical Survey Committees from 44 Panhandle Counties with the Texas State Historical Survey Committee has been set for August 18 in Amarillo. Dr. Rupert N. Richardson of Abilene, president of the Texas State Historical Survey Committee announced.

The meeting will begin with a noon luncheon in the Vic Mon Motel.

"All County Historical Survey Committee members, members of County Historical Association & other people interested in historical preservation are urged to attend," Dr. Richardson said.

"We want this meeting to be a reawakening of interest in historical preservation in the Panhandle, he added. "It will also afford the opportunity to discuss the coordination of all our efforts."

This is the fifth regional meeting the Texas State Historical Survey Committee has held this year. Other meetings have been in the regions surrounding Victoria, Nacogdoches, McCamey, and Abilene.

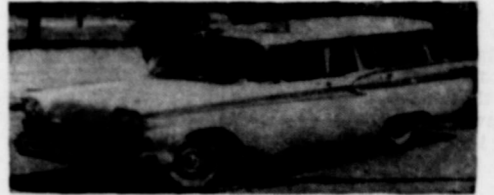

The Panhandle Regional Meeting program will be centered around what the counties are doing and can do for preserving Texas history and the work of the Texas State Historical Survey Committee in state historical programs.

Counties included in the meeting are Armstrong, Bailey, Bricco, Carson, Castro, Childress, Cochran, Collingsworth, Cottle, Crosby, Dallam, Deaf Smith, Dickens, Donley, Floyd, Garza, Gray, Hale, Hall, Hansford, Hartley, Hemphill, Hockley, Hutchinson, Kent, King, Lamb, Lipscomb, Lubbock, Lynn, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Stonewall, Swisher, Wheeler, Terry, and Yoakum.

DISCUSSING NEW CITY OFFICES — Mayor Marcus Messer, News-Sun publisher, Ross Middleton are shown seated in the lobby of the new City Hall after an inspection tour of the new facilities and inspection of the new furniture. The city offices were moved into the new building Wednesday, August 1.

SHELTER PROGRESS RAPID

The national civil defense program of surveying fallout shelters for up to 60 million Americans is ahead of schedule, and should be completed before the end of 1962, according to officials of the Defense Department's Office of Civil Defense.

By October 1 OGD expects to have in the hands of local civil defense authorities complete information on the number and location of shelter spaces available in each community.

From information obtained by the Federally-financed National Shelter Survey, local civil defense officials will know also how many persons in each community could be sheltered, how many could not be sheltered under present conditions, what additional space could be modified into shelter areas, how much it would cost, and similar data. Local architects and engineers surveyed shelter areas under contract to the Army Corps of Engineers or the Navy Bureau of Yards and Docks.

Under present plans, civil defense authorities receiving this information would then be responsible for marking shelter areas with a nationally-standardized sign. They would stock shelter areas with specially-prepared 14-day supplies of food, water, sanitation and medical items, and fallout detection instruments—all provided by OGD.

The shelter survey, marking, and stocking program, announced last August and in operation Dec. 1, 1961, is the first part of a broader plan to provide fallout shelters for virtually all Americans over the next five years.

Dr. Salk Coins A Word. Bionauts

"Super stars" of science
will make up the research
team of the Salk Institute
for Biological Studies.
Dr. Jonas Salk, who will
direct the Institute at San
Diego, Calif., quite often
draws analogies between
sports and science.
He once said, modestly refer-
ring to his historic role in de-
veloping the polio vaccine, that
"I just happened to be in the
right place to catch a long
forward pass."
Today he might select an-
other sport and say that the
Institute faculty members are
the Mickey Mantles of science
- they can hit home runs from
either side of the plate. Dr. Salk
points out that in recruiting his
Institute Fellows he searched
for and found versatile sci-
entists "who have all been trained
in a field other than that in
which they are working today."

Dr. Szilard Dr. Salk Dr. Bronowski

Varied Abilities
They possess more than one
skill or field of knowledge.
They are not limited to biology.
Some of the 10 Fellows already
appointed are equally at home
in higher mathematics and
physics, or history and litera-
ture.

This unique combination of
professional skills, versatility,
imagination and intellectual
curiosity has been described by
many as the magic formula
needed today to achieve the
conquest of disease - from the
common cold to cancer. They
believe firmly that an assault
on disease of the kind and
magnitude planned by Dr. Salk
and his colleagues could pave
the way to revolutionary break-
throughs.

Just as the Mickey Mantles
depend on the baseball fans
who pay their way through the
turnstiles, construction of the
Salk Institute will depend on
contributions from the general
public.

\$15 Million Goal
This summer all across the
nation a campaign is in full
swing to raise \$15,000,000 to
build and equip the Institute.
The drive is sponsored by The
National Foundation through
the March of Dimes. It is a
renewal of the partnership be-
tween all Americans and Dr.
Salk - the man who did so
much for them in developing
the polio vaccine, and will do
so much more as director of the
Institute.
As another way of describing
the scientists who will work at

the Institute, Dr. Salk has
coined the word "bionauts." "If
we can speak of astronauts," he
asks, "why can't we think of
"bionauts" - scientists who are
capable of doing in biology
what has now been done in the
fields of space and of atomic
physics?" He envisages the
Salk Institute as a sort of
launching pad for the gifted
"bionauts" of the scientific
world who will comprise his
faculty.
The conditions under which
the Salk Institute "bionauts"
will pursue their studies are
probably unique. The physical
as well as the intellectual at-
mosphere of the Institute has
been designed so that the in-
dividual scientist can concen-
trate fully on productive work
and thought. Laboratory equip-
ment will of course be the most
modern. A highly special-
ized reference library on biol-
ogy and related fields will be
maintained. The whole envi-
ronment is designed to spur the
Institute Fellow toward daring
and uninhibited original think-
ing on how to reach the goal
he is seeking - faster.

Pioneering Projects
In most great universities and
other research centers sci-
entists are obliged to invest a
great deal of their time in
teaching and in administrative
detail. There will be none of
these time-consuming duties
for the faculty of the Salk In-
stitute. Its members will spend
all of their time on pioneering
projects. Moreover, they will
have complete freedom to
launch whatever projects they
elect and may change the di-
rection of their research if they
wish.
Experts familiar with the
scientific world and its leaders
agree that the 10 Fellows se-

lected thus far are entering the
stage of their most productive
period. Their average age is
49 years but seven of the 10 are
even younger.
Dr. Warren Weaver, vice
president of the Alfred P. Sloan
Foundation and a Salk Insti-
tute Nonresident Fellow who is
often described as the "elder
statesman of American medical
research," is 67; but Dr. Melvin
Cohn, a famed American bio-
chemist now with the Pasteur
Institute of Paris, and a Salk
Institute Resident Fellow, is
only 38.

A-Bomb Architect
Dr. Leo Szilard, long-time
professor of biophysics at the
University of Chicago and cele-
brated worldwide as one of the
"architects of the atomic bomb,"
a Nonresident Fellow, is 63. But
Dr. Edwin Lennox, an Ameri-
can microbiologist now also on
leave at the Pasteur Institute,
and a Resident Fellow, is only
41.

Dr. Jacob Bronowski, of Lon-
don, a Resident Fellow who is
well known in the United
States for his books and lec-
tures, is 54. His versatility is
outstanding - in mathematics,
philosophy and history.

Dr. Salk has remarked that
the professional and cultural
interests of the Fellows hap-
pily overlap. At a recent meet-
ing of several of these scientists
in New York City, they chatted
with vivacity of organizing
competing string quartets at
the Salk Institute next year, of
sailing and swimming in the
Pacific, even of shooting a
round of golf now and then.
These "super stars" of science
who may be expected soon to
revolutionize biology and thus
"help man make the most of his
gift of life" are human beings,
too.

Earth Cemetery Association Has Called Meeting

A called meeting of the Earth Cemetery Association was held at the new community room Monday, July 30.

New officers were installed for the year. They are Ernest Green, chairman of the board, C. C. Goodwin, vice-chairman and Mrs. Wayne Rutherford, secretary-treasurer.

A four man committee was appointed to care for selecting of graves, and opening and closing of graves. Those appointed were M. E. Kelley, Gus Parish, L. T. Smith, and Carl Jones.

The Association does not provide funds for opening and closing of graves and arrangements must be made with the committee or funeral director, reports Mr. Green.

A resolution was passed by the Association to meet once each quarter year.

The Earth Cemetery Association sends out a plea to the Spanish citizens to help keep the cemetery clean and neat, as the caretakers responsibility is toward graves of perpetual care. Graves of non-perpetual care must be cared for by survivors of the deceased.

Mr. Green remarked that the new community room and City Hall is a credit to the community and expressed the group's appreciation for the new meeting place.

Party Line.....

Mr. and Mrs. Nat Bearden visited last Sunday in Amherst with Mr. and Mrs. Jim Roles and family.

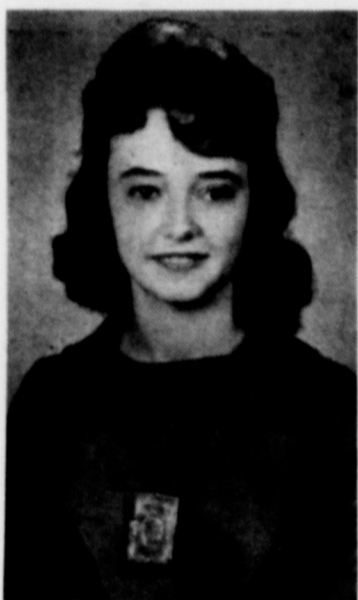

—PL—

Let your prayer be a prayer of faith, love and thanksgiving, and let your heart and mind be filled with the assurance that all things are working together for good.

EMERGENCY SUPPLIES for the 258-person fallout shelter area in the basement of the Merchants Terminal building in Baltimore, Md., are stored as part of a 14-city test of shelter stocking procedures conducted by the Department of Defense with the cooperation of local civil defense agencies. The heavily-built basement is typical of areas in existing buildings across the nation which could make good public fallout shelters when supplied with food and water for each occupant for 14 days along with sanitation, medical and radiation detection kits. Lessons learned in the 14-city test will be applied to the stocking of community fallout shelters for up to 60 million Americans starting later this year. (Department of Defense Photo)

Sheryl Stevens Senior Winner In 4-H Food Show

SHERYL STEVENS

Miss Sheryl Stevens, 16, daughter of Mr. and Mrs. Elmo Stevens of Pleasant Valley has been named a first place senior winner in the District 4-H Club favorite food show held July 24 at Texas Tech Home Economics building.

Sheryl was entered in the new division and came out a winner with her display of a special broiled chicken. Her theme was "Informal Patio Supper."

Sheryl will be among four senior district representatives to enter the state 4-H Favorite Food Show September 22 at College Station.

She will be a junior in Muleshoe High School when the term begins and is in her sixth year of 4-H belonging to the Pleasant Valley 4-H Club.

Sheryl began her duties last week as news correspondent of Pleasant Valley for the Earth News-Sun upon the resignation of Mrs. John W. West.

Party Line...

Mr. and Mrs. Richard Moore accompanied Mrs. Ida Allen to Amarillo Thursday where Mrs. Allen boarded a train for Pine City, Minn. She will spend a few weeks visiting her daughter, Mr. and Mrs. M. L. Zaun.

Pleasant Valley Girl Winner In District 4-H Dress Revue

Lynna Pitts, 12 year old daughter of Mr. and Mrs. Kirk Pitts of the Pleasant Valley community was a blue ribbon winner in the junior division at the District II

4-H Club dress revue Tuesday, July 31.

The annual revue was staged following a luncheon in the new ballroom of the Texas Tech Student Union building.

Ribbons were presented by State Senator Preston Smith.

Lynna is in the 7th grade of Muleshoe School and has been active in 4-H Club work for four years, presently a member of the Pleasant Valley 4-H Club.

Her main 4-H projects are clothing, and food and nutrition. Last year she won first place in the district for clothing in the junior division, first place in county and second place in the favorite food show.

Party Line.....

Kenneth Sawyer and Johnny attended a cattleman's dinner Tuesday, July 31 at the Cattleman's Club in Clovis.
