

NOSIN..... WITH POLLY

"It is a socialist idea that making profits is a vice. I consider the real vice is making losses."
— WINSTON CHURCHILL

I wonder some times if we eat to live, or live to eat. Seems most of us meet at the grocery stores and wonder what to buy to eat, thinking when we go in, we only want an item or two, seems most of us are like Mrs. Truman and Stine, who had carried a huge amount of groceries to the car and then asked her daughter, "Beverly, what was it we needed."

If you see some lady in town stepping high, it might be Mrs. O. J. Parish. Just wait until all the gals in town cast their eyes on those new neutral alligator shoes and bag her son. Dewayne sent her from Guatemala Bay Cuba. HAND MADE TOO.

When the John Garrett family visited the Children's Home in Lubbock, Sunday, they had a surprise awaiting them at the door. Mrs. Garrett had called and asked if they could visit the home, saying she was from Earth. Some of the children hurried into make-up of Space People, and greeted the Garretts at the door with, "You are from Earth, well, how do we rate as people from Mars?"

Our girl Anna, completed a year of work with us as a news reporter this week. We didn't have a button to present her so I slipped out and bought a gift and presented to her, with this encouraging note, "Happy anniversary Anna! They tell me, the first year in news paper is the hardest. (But don't you believe it) every year is the hardest in Newspaper."

Anna has sure taken to newspaper in one year, and we've taken to Anna.

Chubby Dent, knowing that Bud Irvine is from California, (and is not educated on bad clouds and tornadoes) said, he was sure Bud was not afraid of the cloud Tuesday night, when he stopped the Little League game between the Giants and Cardinals, but the fact that the Cardinals was in the lead made that cloud look worse.) since he had finally won ONE GAME, he knew Bud was just afraid of him and his boys.

By the way you folks who are interested in purchasing new Fords or John Deere tractors, should see our local dealers, as soon as possible. (Cause they sure are in a happy mood, since they finally won A game. if they ever come up second or third place, they will probably be paying their customers, "To Boot Bonus" to get them to trade.

I never resented having to WORK FOR A LIVING until I took off long enough to go to a chicken fry at the Jarvis Angelo home Tuesday night. (And I seen what I had been missing, besides the chicken, cake and ice cream, I had also been missing a wonderful time.) And since then we have been looking forward to taking off again and attending some of the things we enjoy so much. I've always heard that to many hours with your nose to the grindstone, (even though mine could stand a little whittling off.) Makes JACK a dull boy. (They fail to say how JILL felt, but DULL doesn't fully describe Jill's feelings.)

Even though the night was stormy, and we moved from the beautiful lawn to the barn, there, we still had enough room, and enough chicken fried to accommodate the 94 folks who attended.

Clarence Kelley kept watch, looking at the clouds. I finally showed my "Okiesism" and went over to look out the door to see about the fierce blowing of the wind. He said, (You can sure tell an "Oakie" when it gets stormy they know in Oklahoma, this would mean business.) Pretty soon Paul Wood come over and looked out, and I remembered, he had once lived at Seminole, Oklahoma. (But he's a full fledged Texan now he said this LITTLE wind in Texas don't mean a thing.) Mary Foster peeped out and jumped back in real fast and began eating on her piece of chicken with a little more speed, as she remarked, "I believe I'd really be scared if I weren't eating chicken. (She's a former Oakie in TexasETA former Oakie too.) (By the way, (Continued on Page 4)

A Woman's World and OIL

BY PETROLEUM PEGGY

An egg is one of the most uncommunicative things in the world. Its so hidden inside its own shell that you can't even see it.

Some eggs are being brought out of their shells these days, though Not with psychology — with petroleum. Now, this isn't being done to develop the egg's personality. It's being done so that the homemaker will get her money's worth from every dozen, and pay a lower price as well.

The egg with the oil based plastic shell is the newest development in food processing. Eggs are broken by machine, carefully inspected and dumped into separate, cup-like containers. A little carbon dioxide is added to maintain quality, and then the egg is sealed in with a strong film of oil based plastic.

This saves a lot of top-quality eggs which otherwise would be wasted. As eggs are sold now, any egg with a rough, odd shaped, too thick, too thin, or cracked shell is automatically put into a lower-grade classification or discarded, regardless of its other qualities. With the new method, the egg content, not the shell, is the important thing. And when the eggs

Ottawa Landmark

Photo: Courtesy Canadian National Railways

The most striking feature of Ottawa, Canada's capital city, is the Peace Tower of the Parliament buildings, which rises to a height of 293 feet above the carefully tended grounds of Parliament Hill, and dominates the whole city. Made in the form of a Campanile, it is built of stone from France, Belgium and Great Britain, to a height of 221 feet above the ground level. From this stone understructure rises a 72-foot reinforced concrete spire, covered with copper. The Parliament buildings adjoin the world famous Chateau Laurier on the banks of the Rideau Canal, overlooking the Ottawa River and are across the street from the United States Embassy buildings.

LAW VIOLATION ADMITTED
Violation of Texas Election Laws was admitted by C. T. Johnson in a deposition just taken in Austin. Johnson admitted spending \$1,200 in travel expenses during his 1954 campaign for Lt. Governor, but reported only \$125 to the Secretary of State. Previously he had testified under oath that he had spent "no more and no less" than \$125.

Bathing Suit Time Means—Fun for All and calorie counting for some

Flavorful vegetable beef soup is low in calories and has good food value. Serve it with saltines, cottage cheese salad, diet-pack apricots and a glass of skim milk for a streamlining lunch of 450 calories.

It's easier for the cook if one menu can serve everyone. With soup as the crux of the meal, there's no problem. A typical menu may include vegetable beef soup and a cottage cheese salad (adding pineapple and mayonnaise to Junior's).

To go with the soup and salad have peanut butter and bacon sandwiches for the athlete... saltines for the "slimmers". For dessert, serve diet-pack apricots to the calorie-counters, and chocolate cake to the others.

MENUS

Low Calorie for Mom
(approximately 450 calories)
Vegetable Beef Soup
Saltines (3 to 5)
Cottage Cheese and Green Pepper Salad
Diet-pack Apricots
Skim Milk

High Calorie for Junior
(approximately 1300 calories)
Vegetable Beef Soup
Peanut Butter and Bacon Sandwiches
Apricot and Cottage Cheese Salad with Mayonnaise
Chocolate Cake Whole Milk

Today with the many kinds of condensed soups available, and numerous sandwiches and salads to choose from, the job of fitting menus to family needs is an easier one... tastewise, weightwise, and nutritionwise.

come to think of it Texas is a big state and with all the Oakies in Texas and California, I'm beginning to wonder who inhabits the State of Oklahoma now. (Surely Oklahoma being the small state she is, hasn't produced enough fine people to fill Texas, California and Oklahoma.

You've heard this old question, "Where was Moses when the lights went out? Well, I don't know why people were supposed to look for Moses, when the lights go out. All the lights in the barn, house and yard went out while we were out there. But no-one seemed to move. Mary said she was glad the lights went out, so people wouldn't see how much she ate. Jarvis Anzeley remarked, he could remember when he at the age of 15 or 16, would have thought THIS TERRIBLE INCONVENIENCE, was a mere golden opportunity.

Jim Dick McNeil can manage a smile this week, since all is back

in the family fold. (But a few days ago he said he felt sorta like a "stepchild.") His folks had bought a brand new Dodge and left on a vacation for South Texas and his wife had left going to California and he just plain felt "left out."

Delma McCarty left Opal to MAN the Sanders Lumber Company. (While he like most of the male species in Earth, do when their unsuspecting wives come in for a minute, find they have urgent business to attend to down the street.) Well his business got scattered out over a large area and he found he had to visit with this one and that one. (After much longer time than he was supposed to be gone.) He said Gee I've gotta go "Opal is pinch hitting for me." Marvin Ellis says you better rush or she might do less pinching and more hitting when you walk in."

I got a new name suggester for my column. This suggestion came from our Chamber of Commerce president, who suggested "Itchy Ears" instead of Nosin.

IT'S THE LAW in TEXAS

AUTOMOBILE ACCIDENTS

Now that millions of people are taking their summer vacations and driving about the country, automobile accidents are occurring with increasing frequency. When involved in an accident, it is hard to keep your wits about you and know just what to do.

It is therefore a good idea to plan in advance just what you would do in event of a s mashup. Here are a few simple rules that every driver should commit to memory.

1. STOP: Failure to stop can result in serious criminal consequences.

2. RENDER AID: If anyone is injured: (1) Render first aid. (2) Stop bleeding. (3) Call a doctor or an ambulance or both. (4) DO NOT move an injured person in any way that could possibly add to his injury.

3. PROTECT THE SCENE FROM FURTHER DAMAGE: You may be liable for damages to approaching drivers, unless they are properly warned. If the highway is obstructed at night, have someone turn his headlights beams on the wrecked vehicles.

4. CALL AN OFFICER: Police-men, Highway Patrolmen, Sheriffs and their deputies are trained accident investigators whose testimony may be invaluable in establishing your civil claim for damages.

5. GATHER INFORMATION: WRITE IT DOWN: Don't trust your memory. Don't guess — be specific. Measure skid marks. Step of distances. Be sure to obtain names and addresses of witnesses. You are required by law to exhibit your driver's license to the other driver — and he must do the same.

6. BE CAREFUL WHAT YOU SAY: Even if you feel you probably are to blame. It is best to make no admission. You may later learn that the other driver was equally at fault, or more so. Emotional comments can be misconstrued by others, or may be misquoted. Whatever you say, make it factual.

7. SEE YOUR DOCTOR: If there is the slightest chance you may be injured. Serious injuries do not always result in immediate pain or bloodshed.

8. CONSULT YOUR LAWYER IMMEDIATELY: The sooner your lawyer is brought into the matter, the better he can advise you and protect your rights. He can obtain statements from the witnesses while

their memories are fresh, and do many other things to insure that the true facts are preserved. Get your lawyer's advice before giving any interview or statements to investigators or adjusters for the other side.

9. INFORM YOUR INSURANCE COMPANY PROMPTLY: Failure to do so may void your policy.

10. REPORT THE ACCIDENT: to the Department of Public Safety. This is required by law, if there is any injury, death or total damages exceed \$25.00.

An official accident report form may be procured from the Police, Sheriff's Dept., Highway Patrol, or State Dept. of Public Safety.

Mr. and Mrs. E. R. Southerland and family of Pampa visited Mr. and Mrs. Jim Morris this week.

Let Us Reason Together

By W. E. IRVINE

"BUT I CERTIFY YOU, BRETHREN"

When a teacher goes into the school room to teach he must have a certificate by proper authorities. He must be certified as qualified mentally, educationally and socially.

Have you ever thought about having your preacher certified? How about the doctrine he teaches? Is it certified? How do you know it is RIGHT or dependable?

The apostle Paul said, "But I certify you, brethren, that the gospel which I preached to you was not after man." Gal. 1:11. He warns us to make sure that all things we accept religiously are certified. "Prove all things; hold fast that which is good." 1 Thess. 5:21.

When the preacher tells you what to do to be saved, you have every right to expect him to certify his message. Your soul is at stake.

You do not invest your life's savings in a stone just because a man tells you it is a diamond. You have it appraised by competent authority. In religion we must go to the only certified authority, even Jesus Christ. "All authority is given unto . . ." Matt. 28:18. Unless CHRIST, not man, certifies the doctrine, or name, or practice, it is not certified by the proper authority.

The name "Christian" is certified in 1 Peter 4:16; Acts 26:28; Acts 11:26. The church and its name is certified in Romans 16:16; Phil. 1:1; Acts 14:23; Acts 20:28.

The gospel plan of salvation is certified in Mark 16:16; Acts 2:38; Acts 22:16;

Accept only the certified gospel. "Ye shall know the truth and the truth shall make you free."

AUSTIN, Tex. — Nearly 100,000 young Texans take off their mortar boards and roll up their sleeves this week.

when complete, will show a record number of diplomas and degrees awarded this year.

Texas Education Agency pegs public high school graduates at between 64,000 and 65,000. Degrees being conferred by state-supported colleges and universities are estimated by the Texas Legislative Council at 20,000. Private and church supported schools swell the graduate rolls several thousand more.

Awaiting these young people, said commencement speakers, is unprecedented opportunity. Examples of the '56 high school graduate's future, as outlined by an Austin speaker: (1) a longer life span — 44 years ahead for boys, 49 for girls; (2) higher earnings averaging a quarter million dollars apiece; (3) less work, dwindling to a 30-hour week and (4) ev-

er increasing ease and leisure as technology advances.

Concrete evidence of the speakers' promises is the job placement story. University of Texas Student Employment Bureau reports five to ten job offers per graduate at better than ever salaries. Personnel in some deans' offices speak wearily of the impossibility of coping with the year-end flood of would-be employers.

High school officials say many graduates began work between their last exam and commencement night.

MIXED REACTION TO HIGHWAY BILL

A bonanza or a blunder — Texans are in disagreement as to which term applies to the new federal highway bill.

Senate passage of the bill left only a few details to be ironed out in House-Senate conference before sending the measure to the President. Final enactment will set into motion a 13-year, \$51,000,000 interstate highway construction program.

Texas Highway Department officials are frankly jubilant. They are poised to begin letting contracts August 1, using the new supply of federal funds. We'll be scraping the bottom of the barrel in the July letting," said State Highway Engineer DeWitt C. Greer.

Greer said the new law would mean a minimum increase of \$57,000,000 a year in federal road building aid to Texas — or double the present amount.

He called it "the most far-reaching piece of highway legislation yet enacted." He predicted an era of unparalleled development.

Gov. Allan Shivers was less enthusiastic. He charged turning a state function over to "bungling bureaucracy" made it unduly costly.

His objection was to the provision giving the Secretary of Labor rather than the states, power to set wages on all contracts. This means a third less highway mileage that the people would otherwise get," said Shivers.

"Tax money always dwindles in value," said the governor, "when it is sent to Washington for processing and returned to the states."

LIQUOR REVENUE REPORTED
 Liquor, legal and illegal, brought the state \$2,401,414 in revenue during April. Largest part — \$1,513,932 — came from the beer excise tax.

A total of 505 criminal complaints resulted in 308 convictions, 59 jail sentences and \$45,929 in fines.

HOPE HELD FOR LABOR LAW
 Champions of Texas' "right-to-work" law haven't given up the fight.

Railroad attorneys and Atty. Gen. John Ben Shepperd contend that the U. S. Supreme Court decision on a Nebraska law did not touch on the constitutional issues involved in Texas. This was pointed out in a supplemental brief filed last week with the Texas Supreme Court.

A ruling is expected soon from the state's high court on the hard fought "Amarillo case" involving railroad unions' right to demand closed contracts.

Union leaders interpret the U. S. Court ruling as knocking out state anti-closed shop laws in the railroad industry. Shepperd and railroad lawyers say the decision, if anything, strengthens the case for the Texas law.

HIGHER AND HIGHER LEARNING

A rising skyline has been proposed by the University of Texas' critical classroom needs.

President Logan Wilson suggests that the only two remaining sites on the original 40-acre camp-

THE AMERICAN WAY

Picking Another One

us be used for eight story buildings. Most present buildings have four floors. For development five to ten years hence, Dr. Wilson recommends expanding to the east of the present campus in the area adjacent to Memorial Stadium.

"TV TRIAL" APPEALED
 Fairness of the first televised murder trial in Texas history is being challenged in the Court of Criminal Appeals.

Defense attorneys charge that District Attorney Tom Moore of Waco was more interested in "putting on a show" in the Waco trial of Harry L. Washburn, than in giving the man a fair trial.

TRUST CREDITORS FACE TANGLE
 US Trust and Guaranty Co. depositors still may have a long weary wait for their money.

At one time State Liquidator J. D. Wheeler said he hoped to be able to start making partial payments after July 1. With that in mind a Fort Worth woman now seeks court action to designate her a preferred creditor because she is a depositor.

District Judge Charles O. Betts pointed out proper procedure is first to seek priority with the re-may appeal through the courts. This takes months, sometimes years.

SHORT SNORTS — Walter L. Bell has resigned as director of the State Board of Control effective October 15. He has held the job since 1953. He has no immediate plans except to return to his Fort Worth home and rest — The Rev. James Hamilton Clark, chaplain of the Texas House of Representatives for the past ten years, has passed away. He had been a Methodist minister in various South and Central Texas towns and served seven terms as county judge in Johnson City before becoming House chaplain — Texas Health Commissioner Henry Holle reported that "practically all" nursing and custodial care homes in Texas have been licensed and are meeting requirements of the licensing law which became effective June 1, 1953. Texas has 466 homes under state license.

EDITORIAL

IS THIS BAD ?

The Wall Street Journal has something important to say about the farm problem — and the ever-changing agricultural scene.

"If turn-of-the-century politicians had decided the village smithy must be preserved as a way of life," the Journal observes, "They could have preserved it — for a while anyway — by having the Government buy up all the surplus horse-shoes." Instead of course, the blacksmith shops simply disappeared, and the blacksmiths went into other lines of work, as a part of a normal and inevitable evolution.

There is a parallel in the current concern over small or family farms. These are not disappearing. But their number is going down — just as the farm population as a whole, regardless of the size of the farms, is going down. And here the Journal says: "Why is the farm population . . . declining? Because for more than a generation American agriculture has been steadily producing more and more with fewer and fewer hands . . ."

"But is this ability to produce abundance with little manpower a bad thing? Of course not. It is the dream of every underdeveloped country in the world. It is precisely the mark of a highly advanced technology and industrial civilization."

One tractor can do the work of many men. So can the other machines now used to cultivate, harvest, and conserve the soil. That means we need fewer farmers — and that total farm income is divided among a smaller number of people, with a larger proportionate share going to each. Over the long run, whatever the temporary difficulties, the result cannot help but be enormously beneficial to all concerned, including the family farm.

Ready Mix Concrete Co. Stresses Economy and Quality in Their Work

The constantly expanding business life of Muleshoe and surrounding territory is shown by the recent organization of the Ready Mix Concrete Co., owned by C. W. Ramage of Muleshoe. This business has just purchased all new equipment and is qualified to do all types of cement work. Mr. Ramage was formerly in the cement business in Sulphur, Oklahoma, before locating in Muleshoe. Associated with his father in the operation of this company is H. D. Ramage, who takes an active part in the business. Two, three and one-half yard trucks were recently purchased to haul cement sand and gravel. Also a cement mixer and conveyor. Nine yards of cement can be poured at one time. Bill Daughtery and Teddy Harrison are two experienced truck drivers employed by this firm and they are well acquainted with cement work. A finished, turn-key job can be turned out this company. All types of cement work are done by this enterprise, including pouring cement for barn floors, driveways, curbs, foundations for houses, driveways for filling stations, cement blocks for irrigation pumps and other types of work. This business sells sand and gravel, also concrete blocks for building. All builders know it is false economy to use inferior building materials and they know they are certain to get their money's worth when ordering from the Ready Mix Concrete Co., their reputation for high quality material is known to all with whom they have dealt. These people know their business from A to Z and anyone needing this type of work can get a satisfactory job by giving them the business.
